FORESTRY MEETING.

Important Questions Discussed by the Society Last Night.

The regular monthly meeting of the Utah Forestry association was held last night in the City and County building. After roll call the president, Dr. John R. Park, proposed four questions for discussion:

1. Is it not possible and desirable to secure a permanent growth of shade trees on each side of the State Road south of the city at least as far as the south drive of the Poor House?

2. Is it expedient and possible to arrest the destruction of young evergreen trees in our canyons solely for decorative and holiday purposes? Cannot our canyonmen supply the demand at a cheap rate?

3. Should not an officer of forestry be created by the consolidation of our prospective state or by law and filled by a qualified commissioner of forestry or school master, with power?

4. Should not a committee be appointed to consider a plan for the observance of Arbor Day that will be most serviceable and most likely to be carried out throughout the Territory?

On motion of Dr. R. J. Fisset a committee of three was appointed by the chair to consider the first proposition. The president appointed Lo Grand Young, Esq., Mr. Christopherson and Dr. R. J. Fisset.

C. A. Whiting moved that a committee of three, with Mr. Christopherson as chairman, be appointed by the chair to consider the second proposition. As other members of this committee the chair appointed Prof. D. R. Allen and Mr. F. A. Dix.

On motion it was declared to be the sense of the association that a forestry officer be provided for in our new Constitution.

On motion of Mr. Christopherson the president was asked to appoint a committee to report on the best means of utilizing Arbor Day. The president appointed Prof. D. R. Allen, President J. H. Paul and Mr. H. Kiesling as members of this committee.

A motion was made by C. A. Whiting that a committee of three be appointed by the president to consult with a like committee from the Horticulturist association on the subject of a union of the two societies. The committee was requested to report at the next regular meeting which comes on the first Friday evening in March.

The president appointed Dr. J. T. Kinnebrew, Dr. J. E. Talmage and Mr. John C. Swenzer as members of this committee.

Valuable papers were then read by Mr. John C. Swenzer and Prof. D. R. Allen. Interesting discussions followed both papers.

At the next meeting a paper on "Trees as Windbreaks" will be presented by Mr. J. Whitelaw Jones, and one on "A Territorial Park in the Uintah Reservation" by Dr. Fisset.

On motion the meeting adjourned to meet in the office of the county superintendent of schools in the city and county building on the first Friday evening in February at 7:30.

C. A. WHITING,
Secretary.

PARK CITY.

PARK CITY, UTAH, JAN. 4, 1895.

Business, Mines and Mills.

The opening of the week found business of all kinds nearly idle, mainly on account of New Year's day, and to give the various employes a short vacation. At most of the mines the men were allowed a two days' lay-off, something which never before occurred in the history of the camp. Immediately after New Year's everything commenced to take on a brighter look, and during the latter part of the week the same old activity was observed.

From general talk and preparations observed on all hands, it appears that the year 1895 will be a prosperous one, as nearly all the mines are making extra preparations for an active year, and are planning the properties in splendid shape.

At the Ingersoll mines about fifty men are now employed, and work in that company is being held at a stiff figure. With the present size of boilers for the engines, deeper workings cannot be done, and this week two larger size boilers have been ordered from Salt Lake.

Work at the McCune tunnel is being pushed along rapidly, and the owners, Messrs. Rogers and Williamson, anticipate that before the opening of spring they will be able to tax from these workings a considerable amount of ore.

The ninety-ten air compressor for the Daly-West mine arrived from New York during the week, and is now being put in position. This air compressor is one of the largest in camp, and is of the very latest improvement. With this machine in position the Daly-West will be in position to move actively forward in work.

Mr. H. Horn, an experienced Colorado miner, has been put in charge of the group of claims immediately west of the Silver King property, and has put a force of fifteen men at work sinking a shaft with the King vein in view. He says that his company, which is composed of gentlemen from Cleveland, Ohio, is ready to advance a large amount of money to develop these claims, and the order has been given to push developments along as rapidly as possible.

Workmen have been started on the excavation for the new addition of the Mercur leaching plant, as it is found that the present plant is entirely too small for the amount of work which can be done by the mill. With this addition the capacity will be greatly increased.

Notes.

A tank of sulphuric acid weighing 13,000 pounds arrived for the Mercur during the week.

The Hopkins Coal company of Colville, in connection with the Anchor and Silver King mining companies, are judging for an office and wagon scale near the Utah Central depot. The Hopkins company is about to establish coal yards in the Park for the selling of their coal.

The weather for the most of the week has been mild, but on Tuesday night it took a sudden change and has been snowing hard ever since. The sleighing is very fine and not a wheel has been seen in the Park for over five weeks.

Amusements at the various halls still keep up, and Park City is gaining quite a reputation as a good show town. The Weber Comedy company has been here every night for nine weeks, and the hall every night is consistently filled.

The ball sisters and also the boys at the gymnasium rooms were all run in masquerade and so a consequence the city treasury is several hundred dollars richer.

The various lodges of the A. O. U. W. in the Park are making general arrangements for a public entertainment some time during the middle of the month. This order has nearly 200 members in Park City.

Mr. and Mrs. David Keith started for California Tuesday, where the lady will spend the winter. Mr. Keith will return to the Park in about ten days.

Wm. Fay, the old time U. P. conductor running into Park City, was retired last Monday to make room for a new man.

The Ontario Electric Light company has about completed the stringing of its wires, and it will be now not a very short time until the power from the Ontario drain tunnel will be utilized to furnish the light.

WILL.

Business Bit Firm.

This is sometimes brought low by which no honest man is fit. A gentleman who has tried it for years says: "Scott's Emulsion of Cod Liver Oil, in all of especially invaluable in the spring." Scott's Emulsion is the best blood and nerve food. Druggists everywhere.

Simple ailments neglected may grow deadly. A handy remedy is

Beecham's Pills

(Worldwide Sales Over Quarter Million Boxes)

in all cases where Liver and Stomach trouble is suspected.

25 CENTS A BOX.
