# MINING, BUSINESS AND STOCKS.

## DEVELOPMENTS IN THE MINOLA MINE

Local Shareholders Feel Greatly Encouraged.

WINZE IN HANGING WALL.

**Rock is Heavily Mineralized—Manager Mayne Believes a Large Ore Body Will Soon be Opened.**

The local shareholders of the Minola mine of Park City feel greatly encouraged over conditions at that property, and there is a feeling of confidence among them that the ground will develop into another Silver King. The property is located on the same contact, consequently they appear to have substantial reasons for their way of thinking.

Manager A. H. Mayne, who was at the property a few days ago, upon one of his regular inspection trips, reports a decided change in the formations in the bottom of the winze being sunk from the tunnel level. Mr. Mayne states that the hanging wall rock has been encountered, which is heavily impregnated with mineral. He exhibited the samples brought down with him, and they certainly give evidence of great hope for the future.

Mr. Mayne expresses the opinion that the winze is approaching close to a great ore body, so developments are being watched with deep interest.

### ON THE MINING EXCHANGE.

**Victor Was the Star Feature of This Morning's Proceedings.**

The proceedings upon the floor of the mining stock exchange this morning were quite animated and the volume of business done reached rather healthy proportions. A total of 21,730 shares were sold, having a value of $16,614.50.

The shining star of the occasion was Victor, which made some meteroic flights. The stock opened yesterday morning at 11 cents and this forenoon the closing quotations bid was 23 cents. Daly-West opened slightly improved, compared to yesterday afternoon's quotations, but closed even. Daly-Judge was considerably more firm and Daly appeared in the pit in much better condition. Boss Tweed came forward in active order, after a siege of quiet extending over a period of weeks. California kept up to steady prices. Yankee Consolidated displayed some weakness.

The quotations and sales of the forenoon were:

It was learned at the local offices of the Annie Laurie Mining company today that the second payment on the Golden Star option had been made.

Pat Ryan is one of the principal beneficiaries, being among the heaviest stockholders in the Golden Star corporation.

## VICTOR STOCK CREATES A STIR

Differences With the Boss Tweed Are Adjusted.

APEX QUESTION SETTLED.

**A Merger of the Two Tintic Properties is Said to Have Been Agreed Upon—Ratio Two for One.**

The sudden awakening of interest in Victor and Boss Tweed stocks at the afternoon session of the stock exchange yesterday, caused all manner of comment on brokers' row. Certain brokers had some heavy buying orders for the stock and the word was passed around that the two companies had gotten together, patched up their little differences and had at last consented to smoke the pipe of peace.

While those in control of the Tintic properties, which have been at outs for some time over the question of apex rights, seemed to turn a deaf ear to inquiries addressed to them, at least one was found with an untied tongue.

"Yes, you can say," said the gentleman, "that the Victor and Boss Tweed have settled their differences and while the documents have not all been signed up, an understanding has been reached and it is now only a matter of form to do the rest."

When questioned further as to the rumor of a consolidation between the two properties, his answer was, "Its very probable."

From another source, which can be depended upon as being reliable, it was learned that the Boss Tweed folks were quite willing to effect a settlement; and on the other hand the Victor shareholders were not opposed to the scheme of consolidation.

The basis advanced for the amalgamation is a pro rating of interests. The Victor is incorporated for 500,000 shares and the Boss Tweed for 250,000. Under the proposed scheme the Victor shareholders would be entitled to two shares in the new organization against one for those now holding stock in the Boss Tweed.

A gentleman who received a "tip" as to what is going on, is said to have asked and "insider" which stock he should buy. The reply was that he could not miss it either way, that the stocks would have an equal show in the proposed merger, according to their present ratio of capitalization.

### THE BLACKBIRD DIRECTORY.

**Dr. P. A. H Franklin and Associates Are in Control.**

While the lines were pretty closely drawn between the two factions which were represented at the annual meeting of the shareholders of the Blackbird Mining company held yesterday afternoon, the meeting passed off peaceably.

The faction represented by Dr. P. A. H. Franklin and associates was found to be in the majority and dictated the selection of the new board of directors, which were named as follows: John E. Du Bois of Du Bois, Pa.; J. W. Russell and D. W. Kimball of Boston; Charles J. North of Buffalo; Carl H. Fowler of New York, and Dr. P. A. H. Franklin and M. J. True of this city.

Later the board organized by the selection of J. W. Russell as president and J. W. Kimball as secretary and treasurer.

The minority is represented on the board by Messrs. Du Bois and North.

It was announced towards the close of the session by those in control that there is no disposition to treat those in the minority unfairly, but that the affairs of the corporation would be conducted in the interests of all shareholders.

Out of a total of 1,599,487 issued shares all but 5,351 were represented. About 400,000 shares still remain in the treasury for development purposes.

The headquarters of the company will be transferred to Boston and it is expected that a vigorous campaign of development will be inaugurated in the near future.

The corporation owns 27 patented claims besides a number of locations in Lembi county, Ida. In addition, it has some large Beaver county interests, near, and adjoining the Cactus mine, consisting of 46 patented and 61 located claims.

### COMMITTEES ARE NAMED.

**New Organization of the Mining Exchange Complete.**

The board of governors of the Salt Lake stock and mining exchange met in adjourned session after the usual afternoon call yesterday and completed its organization by the announcement of the following committees:

Arrangements—Herman Bamberger, chairman; A. S. Campbell, L. P. Marix, Ben D. Luce and C. W. Hartley.

Arbitration—N. A. Page, chairman; E. H. Airis, J. B. Thompson, J. C. Lynch and C. S. Woods.

Rules—J. W. Hatfield, chairman; William H. Tibbals and W. J. Barnett.

Listing—W. H. Farnsworth, chairman; James L. Hamilton, W. J. Browning and E. D. Miller.

Membership—William H. Child, chairman—Harry B. Cole and J. M. Reynolds.

The treasurership of the exchange being vacant, G. P. Norton was chosen to fill that position.

As foreshadowed in yesterday's "News," the monthly dues were increased from $3 to $5 per month.

Some of the members of the organization who displayed their severest disapproval of the result of the recent election have cooled their ardor and are ready to abide by the decision of the majority and labor unceasingly for the welfare of the organization.

**Middleman Mine Sold.**

The Middleman mine at Pearl has been sold to the J. I. C. Mining company, the purchase having been made for the company by J. C. Johnson, its manager. The price paid for the property has not been made public, but it is understood to have been a good figure in view of the fact that the transaction was for cash. The money was deposited in the Bank of Commerce several days ago, awaiting the arrival of H. W. Dorman, one of the owners, who had not signed the deed. The other owners were S. L. Tipton, J. M. Anderson and J. O. Baker.—Boise Statesman.

## SERVICES ARE APPRECIATED

Montana-Tonopah Employes Receive Nice Rewards.

GENEROSITY OF OFFICERS.

**Remarkable Progress Made in Development of Property—Physical And Financial Conditions.**

So well pleased were they over the progress of work in the Montana-Tonopah mine of Tonopah, that President Charles E. Knox and C. E. Morris, the principal stockholders, last week presented the employes of the mine, who have remained with the company from its inception, each with a block of 50 shares of stock out of their own private holdings.

The company began its career in August last and after 143 successive days of work the property was successfully launched as one of the principal producers of the Tonopah district.

In the letter with which the shares were handed to the recipients, was the following:

"We intend this as a token of appreciation for the faithful service you have rendered the company during the past four months.

"The remarkable progress made since Aug. 28, last, (the day the shaft was started) can be accounted for in one way only, viz: every employe of the company was at his post and did his full duty.

"The company highly appreciates this service, as do the donors of this stock."

Salt Lake capital is probably interested in the Montana-Tonopah mine to as great extent as any other property in the camp. Several members of the board of directors are local men.

The Tonopah Miner, commenting on the recent developments at the property will be read in Utah with interest:

"On Thursday night of last week the third body of ore that has been encountered was cut into in the main working shaft of the Montana-Tonopah company's property on Oddie mountain. The first discovery of ore in this shaft was made in the early part of December of last year; and the second a few days later at depths of 375 and 385 feet respectively. Both finds were regarded as important, for, while high values were not secured, big, strong ledges were developed. The discovery of last Thursday night, at a depth of 470 feet, however, puts into the shade all former finds, and has opened up a body of ore that for extent and richness promises to equal, if not exceed, anything yet developed in the Tonopah district, outside of the Mizpah.

"It was the pleasure of a representative of the Miner to visit and examine this property one day this week, and as a result of his inspection he came away with the impression that nothing was too good to say of the property, and that the reports that had gained currency regarding the richness of the last find were not at all exaggertions, but were simple, unvarnished truths.

"In appearance the ore resembles that which the Fraction produces, but it exceeds it in values. Eight assay certificates shown the Miner give returns of $352, $588, $537, $446, $692, $280, $209 and $754, one-third of which or more, is gold, the balance silver. Samples of the ore were also shown which had been put through the forge, and on them stood out little globules of gold, driven out by the heat to which they had been subjected.

"It is the intention of the company, at this depth, to establish a station and drive drifts east and west, thereby thoroughly prospecting the ledge just opened up. Sinking, however, will go right on and will be continued till a depth of 1,000 feet is reached, when more powerful machinery will be required.

"The Montana-Tonopah is one of the best managed companies in the district, and from the day it started work, it has conducted its development on business principles, and as an evidence of its financial strength its treasury shows a cash balance of $26,195, besides 165,000 shares of treasury stock still remaining unsold. Now that it is in good paying ore, it is expected that it will soon be declaring dividends."

The Montana-Tonopah owns 15 locations or a total of 165 acres of ground.

### THE ALPINE MINE.

**Ore Nets Company from $2,500 to $3,000 per Car.**

Of the Alpine mine in Nevada in which Salt Lake City capital is interested, the Tonopah Miner says: "The third shipment of ore from the mines of the O'Meara-Lynch company at Lone Mountain was made to the smelter at Salt Lake City last week. Up to the present time time 10 carloads of ore have been forwarded, and enough is now out to make another shipment. The ore nets the company from $2,500 to $3,000 a car. Messrs. O'Meara and Lynch are now in Tonopah, and expect to visit the property in a few days."

### TONOPAH STOCK SALES.

**Exchange in the Nevada Camp Holds Three Sessions per Week.**

The Tonopah stock exchange is holding three sessions per week. The sales reported by the Miner last week at two of the meetings were as follows:

"Midway, 500 at 35; Tonopah Consolidated, 1,000 at 85; Rescue, 3,700 at 25; Indiana-Tonopah, 8,300 at 12½; Colehan, 3,000 at 25; Montana, 3,500 at 95.

"At today's (Friday) session of the board quite an advance occurred in Colehan and Paymaster. Of the former 1,000 sold at 35; 1,000 at 37½ and 500 at 40. At the close 50 cents was asked, Paymaster, of which 7,500 were sold, brought 15 cents."

### THE B. W. & H. STRIKE.

**Recent Disclosures the Most Important Yet Made.**

Manager Billingsley of the B. W. & H. mine in southern Utah, in a letter, states that the new strike in this property is four feet wide at one side of the tunnel and although he has run 12 feet he is still in ore at the other side.

Three assays from this point give $19, $21 and $75 per ton, mostly gold. This strike is a great surprise, as it did not appear on the surface and is considered the most important one yet made on the property.

Manager Billingsley is now running a tunnel to tap a large gold vein 200 feet to the right of the main tunnel, which shows on the surface to be a bonanza, and when reached will give a depth of about 400 feet, and into the mountain about 400 feet. In driving this tunnel he expects to cut three other veins besides the one already mentioned, which already appear on the surface and which run high in value. A double shift is driving the main tunnel, which is now 500 feet long.

### HYDRO CARBON LANDS.

**Twenty Claims Acquired by a New York Party.**

Special Correspondence.

Provo, Jan. 28.—Twenty hydro-carbon claims, situated about four miles west of Colton, have been transferred by quit-claim deeds to Henry C. Lund of Salt Lake City, for a consideration of $3,300. The grantors are W. L. Richardson and others.

The same properties have been quit-claimed by Mr. Lund to Abraham Stein of New York for a consideration of $4,800.

### AT THE CALIFORNIA.

**Property Has Been in the Hands of Experts.**

The California mine of Park City has been undergoing an expert examination, it is said by the experts of the Western Exploration company. The officials in charge of the mine would not divulge any information relative to the meaning of such proceedings this morning, but at the Western Ex. offices, the admission was made that the property had undergone examination. Further than that "mum" was the word.

It is quite probable that a deal will be chronicled soon.

### MINING CONCENTRATES.

Joseph Dederick, who has been confined to his home by sickness, reported to be much improved.

D. H. Peery, president of the stock exchange, expects to go on a trip to Honolulu shortly.

Manager R. H. Channing, of the Highland Boy mine, is looking over conditions at that property today.

Having about concluded his labors, Samuel Newhouse expects to take his departure for the east tomorrow.

W. G. Adamson, who is managing operations at a mine in Humbolt county, Nevada, is in the city.

President George Teasdale, of the Blue Jay Extension mine in Beaver county, departed yesterday for the south. He expects to remain at the property for some time.

Manager G. L. Moats expects to pay a visit to the Four Metals mine, in the Deep Creek country, as soon as the climatic conditions are more favorable.

Eight quartz and two placer claims in the Marshall Lake district were sold last week to Dr. R. S. Law of this city and his associates, James L. Hill & Co., New York City, bankers, for the sum of $65,000. A large cash payment was made and the balance is to be paid in installments.—Boise Statesman.

## MARKET WAS INTENSELY DULL

Was Overborne by Selling Which Sent Prices Down.

VERY BARREN OF FEATURE

**Practically Motionless and Narrow Fluctuations Were Without Any Consistency.**

New York, Jan. 28.—Only a dozen stocks were traded in in the five minutes following the opening and the drift of prices was slow and irregular. Selling overbore the market and carried prices below last night's level, Pennsylvania losing a point. The market steadied and became very dull. Amalgamated gained a point. The market was practically motionless and the narrow fluctuations were without any consistency. St. Louis & San Francisco first and second preferred and Iowa Central preferred rose 1 to 1½ and Chicago Great Western preferred dropped 1½.

Bonds were heavy at noon.

A few feet of tape sufficed to record the transactions during the noon hour. The market was barren of feature.

### BRIGHT FOR MILLARD.

**Prospects for Irrigation Better Than For Years Past.**

Charles H. Wilcken, who is up from Millard county, reports conditions in that section all that could be desired. Mr. Wilcken says that the people of Deseret, Oasis, Hinckley and Abraham have been hard at work for some time past enlarging their reservoir and that this work is now completed, giving it a capacity of 20,000 acre feet of water, which is now being supplied by the streams surrounding that neighborhood. He says they have had more snow this winter than usual and that the prospects for an abundance of water next summer are better than for many years. The people of that section have been greatly hampered in times past for lack of water, and it is fondly hoped that the dry spell has been broken and that the future will bring about a changed condition.

If the Utah lake proposition falls, Mr. Wilcken says, the people of Millard will then present their scheme, which is to build an immense reservoir on the old Bonneville site at the head of Leamington canyon and the Sevier bridge, making possible the taking out of 77,000 acre feet, which would bring under cultivation a vast area of hitherto unused lands, and open for settlement a section of country which would be made choice through irrigation. If it were thought necessary a still larger reservoir could be built, as there is said to be ample water in the Sevier river to supply the demands of a section much more extensive than at present contemplated. Engineers are now figuring on the scheme, but nothing will be done unless the Utah lake project falls through, this being the agreement entered into at the time of the irrigaion meeting in this city some months ago.

### NOTICE.

The owners of primary rights to the waters of Parley's Canyon who are interested in the exchange with Salt Lake City, are hereby notified that a meeting will be held in Farmer's ward at the Central School House, on State St., between 11th and 12th South, at 12:30 o'clock on Saturday afternoon, Jan. 31, 1903. This meeting is for the purpose of electing an "Agent" for the year 1903, and for such other business as may properly come before said meeting. JOHN GABBOTT, Agent.
