IN FROM TOOELE.

Good Crops, Little Work, not Much Money and Lots of Grasshoppers in that Section.

Mayor Orme of Tooele arrived in the city today. He reports that the crops in and about the "Little Republic" are a "good average" this year, which means that the people will have plenty to eat during the coming winter, notwithstanding that times are hard and money scarce. The mines are mostly closed down and many men are in consequence thrown out of employment. Some of the sheep men are still holding on to their last clip of wool with the hope that the market will improve. Others were compelled to dispose of theirs in order to meet obligations.

The troublesome and destructive grasshopper, which has appeared simultaneously in several counties remote from each other in Utah this season, has done considerable damage in and about Tooele, and unless some season prevention comes it is feared that myriads of them will be hatched next season and that their ravages will be exceedingly serious.

Will Test the Law.

Dr. M. E. Greene, of Heber City, Wasatch county, is one of those who will test the constitutionality of the statute passed by the last Legislature requiring physicians to secure a certificate from the territorial medical board.

A Lost Foggy Robe.

If the person who took a foggy robe in a runaway, a week or two ago, will call at Mrs. Elizabeth Lambert's, in the rear of No. 642 east First South street, he can recover it upon identifying the property.

High Council.

The next meeting of the High Council of the Salt Lake Stake of Zion will convene on Wednesday, August 23rd, 1893, at 7:30 p.m. Members of the Council and all persons having business to present before them are requested to take note of this.

JAMES D. STORMS, Clerk.

Brighton Looking Up.

Judge Powers came down from Brighton last evening to attend the session of the Third district court today. He will return to that popular fishing resort, and there rejoin his family, tomorrow morning. The judge's health has improved to a surprising degree during his stay in the mountains, and he feels as altogether self-cast man from what he did a month ago. He has just completed the building of an attractive five room frame cottage at Brighton on his own account, and will "move in" next week. The new hotel, to be known as Brighton's, was opened a few days ago, and promises to be extensively patronized. It is said to afford ample accommodation for borders, being fitted with all modern conveniences.

A Remarkable Silence.

There has been the utmost silence on the part of the Liberal members of the City Council regarding the charges made by Councilman Rich that they were guilty of forgery in that they interpolated, cut out and otherwise changed the report of the special research committee after it had been signed by himself and the Mayor. It was thought that at least a qualified denial of the charge would be made, but those who had all expectations have been sadly disappointed.

Will Lecture in the Tabernacle.

Final arrangements have been made by Dr. White, the noted veteran educator, to deliver his lecture on Prayer in the Tabernacle tomorrow evening after the ward meetings. The Stake presidency especially request that the Bishops make this announcement in the evening that the attendance at Dr. White's lecture may be as large as possible.

Latest Court News.

In the Third district court this afternoon Hans P. Falkenen, a Dane, now of Salt Lake, was admitted to citizenship.

Nettie E. Robb obtained a divorce from Richard H. Robb on the ground of failure to provide and drunkenness. The hearing was had on the report of the referee. The parties for some time resided in Park City.

In the case of the People vs. Joseph Richards, charged with assault, the defendant was released on his own recognizance, on motion of the district attorney.

This afternoon J. M. Scott brought suit against Frederick Heath and Harriet Heath to recover $500 on a promissory note, secured by a mortgage, with interest at 9 per cent per annum.

Returned Home.

Elder Thomas Hodgson of Panguitch, Panguitch Stake, Utah, who left for a mission to the states on July 19th, 1891, arrived in this city August 16th, this year. He has been labouring principally in West Virginia and has enjoyed good health during his absence.

A TRAIN WRECKED

A Train Strewn Along the Concrete Highway.

FORT WAYNE, AUG. 18.—A mail and express train, carrying $50,000 in gold coin, consigned to Chicago, was wrecked here last night, at 11:15. The engine was thrown from the track at the crossing of Cleveland Terminal Belt line. The third car which contained the coin was burst open and the treasure partly thrown out and scattered in the middle of the highway. The wreck caught fire from the engine and but for the prompt action of the fire department the train with its precious load would have been consumed. A force of men was procured to guard the money and at dawn this morning it was taken to Chicago by another train.

THE WINTER RUN.

Discussing Shippers and Engineers to Prevent Chicken Cholera.

One of the great complaints against the winter house is that the temperature of eggs is due largely to frozen cracks and improper feed and care. The high scented carcass, such as the Texas, Mexican and others, suffer considerably during cold weather from frozen cracks. Calling or dulling the cracks of the young fowls has been practiced so long now that it may do not consider it a great reform any more than dehorning cattle.

Quite a number of poultry raisers adopt the custom regularly, claiming that the fowls suffer less from the operation than they do from the cold if the cracks are allowed to reach a large size. The comb is a very sensitive portion of the fowl, and the slightest freezing weather will affect it. Moreover, it is pretty certain that this freezing operation has a direct injurious effect upon the fowl's power of egg production. If the cracks of the large variety have not been cut when young one should be taken to keep them from being frozen. A daily application of vaseline on the comb will help to prevent the freezing, although it is not quite as infallible proof against the cold.

By feeding the poultry the proper food now and then and only fowls that produce an abundance of eggs, but strong, healthy chicks can be hatched out of them in the spring. The hens will also be in good health for the summer season and ready for the market after a few days fattening. Our pen experience has taught us that wheat spread feed is the best and cheap food for egg producing and not plus for fattening purposes, may be all right, the more variety of the all around food hens will be happiest. If the hens appear to be kept in perfect order and health the best will be seen.

Experience of the past has taught us that good solid grain, such as wheat, buckwheat, sunflower seed, boiled or steamed roots, meat scraps of clean water and green clover, with all the cabbages and turnips, that will devour, are the proper kinds of food. If given one kind of food and another kind, with no one common food of food and another food, they the hens will pick from and choose. Chows, and the cold chowder and fed warm in the morning is preferable to turnips and other vegetables, as it substitutes both lime and albumen and is an egg producing food in no less equals.

In our experience warm for special feeds for special results we should not forget the immortal principles of the whole thing the poultry. Special food must be fed only as an addition to the all around healthful food such as given.—Annie C. Webster in American Cultivator.

ARTIFICIAL INCUBATION.

Points Given by an Expert Operator on the Management of Incubators.

Here are some of the points given by E. H. Hardy, whose wide experience in artificial incubation renders them of unusual value. He says it is a mistake to be the Hens Producing company, making use of "The Business Hen," that a Leghorn will produce with large hens, particularly of the Asiatic or American breeds, produce chicks that will grow rapidly and all well as brollers, and the same from hens as large as and equally fine. As one can be successful who depends on eggs from all sources. Eggs from hens in confinement and which are carried either 10 to a brick or produce weak chicks. As long as operators buy their eggs for incubation the work will be uncertain, no matter what make of incubator is used. Small incubators of a capacity not exceeding 300 eggs give the best results. The incubator is now ready operated in a room of even temperature. It should not be placed near a window. Having placed the eggs in trays or drawers, keep the temperature at 103 degs. Turn twice a day.

The cause of chicks dying in the shells may be due to too much moisture, too high temperature, too low temperature, lack of constitutional vigor of parents, too frequent opening of the incubator or to the fact that the eggs are from hens that are overfed and fat. Where the chicks do not hatch out until the time is past it indicates that the temperature was too low. If they hatch on the last-mentioned day it indicates that the temperature was higher than necessary.

Give no food the first time, six hours then allow solid milk, scattered for them to pick up; the milk curd crumbs dipped in fresh milk, which should be placed in little troughs. After the fourth day give the bread and milk or a mixing meal, milled oats or meal and cracked wheat and cracked corn at night, occasionally a little chopped egg or meat. Dry food is best for chicks. After they are ten days old feed them anything they will eat, compelling them to scratch for as much as possible. Water must be given in a manner to avoid allowing the chickens to drown wet. Grit, such as pounded shells, are valuable to always within their reach. The main requirement for chicks is growth. Where the chicks round together at night under the brooder is indicative a lack of warmth. When they scatter under the brooder is indicative that they are comfortable.

In winter the chicks under a brooder should not be less than 30 days, or over 100 days. At the chicks squeak and seek the edge of the brooder the temperature should be about 95 degs. Keep the brooder clean. Do not attempt to ventilate the coop with cold air. As a chick is close to the floor it will escape all the pure air necessary. Feed a variety of food if possible, but cracked wheat and cracked corn must not be omitted after the chicks are six weeks old. When chicks are large enough to fly, dandelion leaves they may be taken from the brooder and placed in a warm, comfortable coop or house.

Insects Injurious to Cottage

At the Shakespeare Cottage on Shelter, where much attention has been devoted to insects that injure the cottage, Mr. H. E. Ward has followed the plan which it is claimed by him has done so much, of killing the only practicable of the indigenous cottage fly as a method of public place for the application of pure kerosene in a very simple manner, namely, the application of a drop of kerosene through the hole that it is to be denoted in cottages. The insects will congregate upon the mixture and may readily be destroyed in the way mentioned.

COMMERCIAL

REAL ESTATE.

Transfers filed in the office of the County Recorder of Salt Lake County, since August 10, as compiled by Abstract & Title Guaranty Company, 200 Dooly block:

Joseph F. Smith and wife to Joseph Dickey, lots in Block 3, plat A, Salt Lake City survey ..... $ [illegible]
Mary E. Dickey to Joseph Dickey, undivided ¼ interest in lots 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, block 3, plat A, Salt Lake City survey ..... [illegible]
Elias S. Ingersoll to Sarah Ann Ingersoll, lot 7, block 1, Wells addition of Salt Lake City survey ..... [illegible]
Elias S. Ingersoll and wife to Charles A. Ingersoll, lots 1, 2, 3, 4, 5, 6, 7, block 1, Wells addition of Salt Lake City survey ..... [illegible]
U. S. Marshal to Jos. H. Young, part of lot 3, block 75, plat A, Salt Lake City survey ..... [illegible]
H. P. Oleson, to Gilbert Cook, lot 3, block 2, Kimball's addition to Salt Lake City survey ..... [illegible]
W. H. Dalton to Joseph Cook, lot 3, Kimball's addition to Salt Lake City survey ..... [illegible]
Elias Smith and wife to Joseph F. Smith, part of block 3, plat A, Salt Lake City survey ..... [illegible]
Chas. F. Middleton to T. Ross Hoge, part of section 16, township 1 south, range 1 west ..... [illegible]
Chas. F. Middleton to Thomas J. Ross, part of section 16, township 1 south, range 1 west ..... [illegible]
C. E. Washburn to Salt Lake City Lodge No. 168, B. P. O. Elks, lots 3 and 4, block 5, Salt Lake City survey ..... [illegible]
A. F. Alston to Virginia Kimball, lots 3 and 4, block 5, Salt Lake City survey ..... [illegible]
Hiram Sanderson and wife to Jesse P. Sanderson, lot 10, block 1, Sanderson addition ..... [illegible]
Wilford Day Trust to Brigham Young, lot 3, block 3, Plat A, Salt Lake City survey ..... [illegible]
Benjamin C. Ottinger to Benjamin H. Roberts, undivided ¼ interest in lots 1, 2, 3, 4, block 16, plat A, Salt Lake City survey ..... [illegible]
