MINING, BUSINESS AND STOCKS

CONSTRUCTION TO START NEXT WEEK

Material for Buildings of New Copper Smelter Now Arriving at Garfield.

SOME OF THE CONTRACTS LET

A Minneapolis Firm Will Supply Bulk Of Machinery—General Electric Wins Out.

Out at the new smelter town of Garfield at the southern end of the Great Salt Lake, where the new 2,000-ton copper plant of the American Smelting & Refining company is being reared, work has progressed to the point with the foundations that the erection of the big steel buildings will commence sometime next week. The Minneapolis Steel & Machinery company, which was awarded the contract for the structural material, has commenced deliveries, according to a gentleman who visited the site of the new plant during the day.

Manager Pope of the local office of the big Minneapolis concern was asked to make a verification of this, but his reply was that he could say nothing, just at present. However, the fact remains, that his firm is ready to carry out its contract and some of the expert builders in its employ have arrived in the state prepared to commence business.

The Power & Mining Machinery company of Milwaukee, it is learned, has captured the contract for the bulk of the machinery to be installed in the new plant. This was to be expected, for the Guggenheims, who are a power just now in American Smelting affairs, are the dominant figures in the machinery concern. The Allis-Chalmers company has made a winning in the shape of having been awarded the contract for the converter equipment, while the General Electric company, according to advices received by the "News" from New York, has outdone its competitors and will supply the electrical equipment for the great smelter.

The Utah Construction company which has the contract to do the excavation work as well as the building of the immense trackage about the works and on the Rio Grande spur, has a force of several hundred men in its employ.

P. J. Moran, who is doing the concrete work also has a large force engaged.

W. T. Anderson, supervising engineer of the Alphouse-Custodios Chimney Construction company of New York, is on the ground arranging his forces to commence the construction of the immense stack. In fact, work on the foundation is already in progress and in this portion alone will be required 1,400 cubic yards of gravel. The stack will require 65 car loads of brick, 1,000 cubic yards of sand, 800 barrels of cement and 30,000 bushels of lime. When completed it will be 300 feet high. The measurement across the bottom will be 68 feet and inside the 8-foot walls at the top, 30 feet.

FORENOON ON EXCHANGE.

Columbus Con. Sells at $2.20—Closing Quotations and Sales.

Trading was opened on the floor of the Salt Lake Stock and Mining Exchange this forenoon by the transfer of 100 shares of Daly at $1.50 a share. Lower Mammoth remained at about yesterday's quotations, while Mammoth found some demand at $1.10. On the open board United Bingham and Columbus Consolidated were on the active list, the latter selling at $2.20. There was a slight demand for Swansea and Sacramento.

The closing quotations and sales were:

SCRANTON A ZINC MINE.

Important Developments Have Been Made in the Tintic Property.

The Scranton mine in North Tintic, owned by the North Tintic Mining & Smelting company, which is comprised principally of Scranton, Pa., citizens, furnishes very good indications that it is going to develop into a zinc producer of considerable magnitude.

Recent disclosures made in the tunnel, at a depth from the surface of a little over 200 feet, shows a 30-foot vein of carbonate of zinc ore, the bulk of which, according to Assistant City Attorney Brammel, who is a stockholder, carries values of from 35 to 45 in zinc.

The vein has been drifted on for a distance of 130 feet and a winze is now down 40 feet, showing the same character of ore all the way.

Correspondence has been entered into with some of the eastern zinc smelting concerns and if satisfactory arrangements can be made shipments will be inaugurated at an early date.

NEW DIVIDEND PAYER.

Tonopah Extension Will Make a $10,000 Distribution.

Another Tonopah mine has entered the dividend paying stages. Announcement came over the Pollock wires during the day that the directors of the Tonopah Extension Mining company had posted a dividend of 10 cents a share or $10,000, which is payable on Oct. 25.

Considerable Extension stock is held by local mining men.

Incorporation Articles Filed.

A copy of the articles of incorporation of the Uintah Mining & Development company of Vernal was filed in the secretary of state's office today. The capital stock of the company is $50,000, divided into shares of the par value of 10 cents each. L. Johnson is president; S. D. Colton, vice president; J. H. Mease, secretary and treasurer.

WILL OPERATE BIG GAS PLANT.

Snow-Darst Franchise Means Much for Development of Industry in This State.

OWN RICH LIMESTONE PLACERS

Located Near Provo and Contain Coal Carrying as High as 90 Per Cent Free Carbon.

Special Correspondence.

Provo, Utah Co., Sept. 8.—The granting of the gas franchise to George A. Snow and Wm. Darst by the Salt Lake city council, means the inauguration of a big industry in this state, if the plans of the incorporators of the gas company are carried out, and the basis of operations will be in Provo. It has been reported in the "News" from time to time for several months that extensive locations of lime stone placer claims have been made in the mountains east of Provo, and that these locations have been transferred by the locators to George A. Snow of Chicago. This has been preliminary to launching the gas company, which will take over the holdings of Mr. Snow when the organization is completed. He now holds 32 placer claims of 160 acres each in the mountains east of the city, extending 10 miles from Provo canyon on the north to Slate canyon on the south, and about four miles east of Provo. The formation is dolomitic limestone in which are found veins of a carboniferous substance. This is mixed with limestone and slate ground and pressed together through geological disturbances in such a form that it is not recognized as coal, although some of it contains from 85 to 90 per cent free carbon, and in places some very fine specimens of anthracite coal have been found, but only in small layers or broken up into minute chunks. For the past 15 years a number of Provo people have expended considerable money in opening these veins with the expectation of striking anthracite coal in quantities that would pay. It is estimated that $50,000 have been spent in this kind of development work, without any other result than to demonstrate that there is an almost inexhaustible quantity of the material. Of late years but little work has been done on the claims, it being decided that if there is anthracite coal in the mountains in quantities that would justify mining it, it would take an immense amount of development work to reach it. While the prospecting was going on and after Dr. C. B. Snyder of this city has been investigating the prospectus of the substance, with a view to determining its commercial value, being of the opinion that a substance containing carbon in the quantity that it does could be profitably utilized. He learned that gas was manufactured from inferior non-commercial coal in England and in the United States, and he decided that the material could be used to advantage for this purpose, and tests were made which proved the correctness of this theory. But Dr. Snyder is not a capitalist, and local capitalists whom he sought to interest in the project did not consider it favorably. Certainly not favorably enough to invest money in it, and, Dr. Snyder claims, not favorable enough to refrain from discouraging others from investigating its merits. However, this may be, Dr. Snyder quietly sought outside assistance; he succeeded in getting A. G. Lawson interested. Mr. Lawson had investigated similar projects in other parts of the state, and was soon convinced that the Provo field offered better opportunities than any other. Through his efforts, Mr. Snow, Wm. Darst of Chicago, C. D. Sweet of Toledo, O., and other capitalists were interested, and this summer, after a thorough investigation of the quantity and quality of the material and its adaptability for producing gas, surveys and geological maps were made and the country located.

Eleven veins have been discovered, and four of them have been opened up at different points (some are the old workings of the anthracite coal properties), varying in thickness from four to nine feet.

The Pettibone-Loomis method of producing gas will be employed, and the product piped from the works to be built at some point near the depot, piped to Salt Lake and other points of consumption, where it will be stored in tanks and distributed through a pipe system. Two lines of main pipes will be used, one to convey gas for power purposes, and one to convey gas for heating and other domestic purposes. Some consideration has been given to a plan for shipping the material to Salt Lake and erecting gas works there, as well as at other points where large quantities are to be used, but this has not been decided upon and it is probable that the gas will be conveyed in mains from works here, as that will enable the company to supply intermediate points from the same service.

The remains of the gas producing material after the gas has been manufactured is a very superior sulphate of ammonia, and as that is a valuable fertilizer, the company expects to make a good profit from what would otherwise be waste.

One of the uses to which the gas may be put here is that of power for generating electricity for the proposed municipal electric lighting plant. It is claimed that it will be cheaper than constructing and maintaining a plant to be operated by water power, and that a more steady current can be maintained by use of the gas as generating power, and that this will reduce the cost of maintaining the electric light system.

It is estimated that the company will expend $2,000,000 in the erection of its works and the construction of the pipe line, and after that the maintenance and operation of the system, including the mining of the fuel, will make a very respectable payroll. In addition to this it is expected that the project will benefit various manufacturing enterprises by furnishing cheap power, and will be a great convenience and money saver to the residents of cities when the gas is introduced and used for heating and cooking purposes.

CONCENTRATES.

The Black Diamond Mining company of Stockton is loading ore for shipment.

Caller Tod Goodwin of the Salt Lake Stock & Mining Exchange has gone to San Francisco.

Five cars of ore from Bingham and one from Idaho were reported at the T. & B. sampler today.

J. J. Thomas has gone east on business connected with the organization of the Cincinnati-Goldfield Mining company.

W. H. Tibbals jr., will accompany Ben Smith, a mining engineer who has just arrived from Mexico, to Bingham tomorrow.

Col. H. G. Heffron recently inspected mining interests near Kingman, Ariz. Frank M. Benedict is a Bingham visitor today.

W. H. Nutting, former superintendent of the Bingham Con. smelter, has returned from a vacation spent very pleasantly on the coast.

David Taylor, chief clerk in the office of the Taylor & Brunton Sampling company, will leave for Ohio tomorrow on a 10 days' vacation.

Matt Cullen, owner of the Burning Moscow mine in Beaver county, has placed an order for a 25-horsepower gasoline engine and hoisting plant.

The ore and bullion settlements reported late yesterday by McCornick & Co. were: Crude ore and concentrate, $37,200; base bullion, $27,900; gold bullion, $3,000.

C. D. Rooklidge has returned from a trip to Nevada, where he saw the new hoisting plant of the Nevada-Superior Mining company placed in commission.

P. A. H. Franklin, at the head of the Gold Development company, operating near Marysvale, says the development of the mine has reached the point to justify mill equipment.

Sidney Black, E. G. Rickets, J. S. Baier and John Jacobs have given an option on the Cenco group of claims on the east side of the river in Sevier river canyon, near the bradburn property, to Otto Venkanel of Boston. The option holds for 60 days.—Richfield Reaper.

Supt. Buckbee of the Cumberland and Sinker Tunnel Co.'s has three shifts at work in one of the tunnels in the Old Ore Fine mine on War Eagle. The men are cleaning out and laying track, preparatory to the installation of pumps with which they will take the water out of the Chariot, Elmore and other of the famous producers on the mountain. Timbers are being hauled on the ground and as soon as the pumping machinery arrives and is put in place the pumping will commence. The pumps will have a capacity of 2,000 gallons per minute.—Silver City, Ida., Avalanche.

The famous mine of Mrs. Fermina Sarras, located in Esmeralda county, south of Hawthorne, was sold in Reno yesterday to a Boston syndicate represented by Edward Mellen and H. F. Quint, for $90,000. Of this large amount $40,000 in cash was paid over to this old Mexican Indian woman, and the remaining $50,000 is to be paid within a short time or the property is to revert to her. The deal was carried through at the Hotel Golden where all the parties were stopping. Immediately after completing the deal the Boston parties left to report to their company, and Mrs. Sarras left the city to stop for a few days with Mrs. Read, who lives at the mouth of this canyon east of Reno.—Reno Gazette.

CHEMICAL PLANT BURNED.

American Co.'s at Utah Junction, North of Denver.

Denver, Sept. 8.—The American Zinc and Chemical company's plant, comprising three large buildings located at Utah junction, north of Denver, was totally destroyed by fire this morning. The loss is estimated at $75,000.

The plant was a combination smelter and chemical works. C. E. Dewey is the manager of the company.

A WATER "LET-IN."

Order Will Probably be Made to Connect Mains.

It is probable that the waterworks committee will make a report on Monday night recommending that the water mains across Eighth East street at Third and Fourth South streets be connected. Councilman Black introduced a resolution at the last meeting of the council, asking for an appropriation of $400, with which to do the work, but the council voted it down. The committee met yesterday in the office of Supt. Hines and the proposition was explained to the members. It was shown that the connection will not deprive the upper system of any water at all, as argued by some of the councilmen Monday night, as the district affected is in the middle system, and it is the intention of making the connection to extend that system to Sixth East street. The valves for controlling the water in that district are already in place. With the explanation made it is probable that the committee will favor the plan.

RAILROAD MAN HURT.

Aged Train Dispatcher Falls Down Stairs in "News" Annex.

G. A. Guertin, an aged railroad man who recently came to this city from Denver to accept a position as dispatcher for the Rio Grande, suffered a painful accident this morning by missing his footing on the staircase of the Deseret News annex building. He fell from the second floor to the landing, a dozen feet below, and was found here by the elevator boy unconscious and bleeding from a cut in the back of his head. He was taken to the Willes-Horne drug store where medical attention was given him.

PRICES REBOUNDED VIGOROUSLY.

There Was a Bulge at the Opening, Followed by a Little Wavering.

CONFIDENT BUYING RESUMED.

Many Stocks Made Gains—In General Way Market Was Point Above Yesterday.

New York, Sept. 8.—Opening prices in the stock exchange rebounded vigorously from yesterday's depression. Gains of a point were very general among the active stocks. Canadian Pacific jumped 2½. Reading and Smelting were 1¼ and Union Pacific 1⅝. The market was broad and active.

A little wavering followed the opening bulge, Canadian Pacific reacting a point, and the list a fraction. Confident buying, however, was resumed and the market rose strongly, but became perceptibly duller after a number of stocks had established gains of a point and over, while Northern Pacific gained 3⅝. There was a light reaction before 11 o'clock.

The trading become extremely dull, but showed a firmer tone and worked to the top level before midday. Large buying of various stocks of London was a feature. Amalgamated Copper and Metropolitan Securities gained 1. Steels gained ¼.

Bonds were irregular at noon.

More headway was made with the Pacifics and grangers leading. In a general way the market was on a basis of a point above yesterday. Very little interest was manifested in the metal group outside of Amalgamated Copper and United States Steel. Minneapolis, St. Paul & Sault Ste. Marie improved 2¼, Southern Pacific 2½ and Erie, Illinois Central, Atchison, Sugar and Metropolitan Street Railway 1⅝.

Despite the extreme dullness of the afternoon the market gained strength steadily. There was little feature, the stiffness of money having a repressive effect on the dealings. United States Steel, Colorado Fuel, Republic Steel preferred and Missouri Pacific hardened 1. Smelting 2 and Delaware & Hudson 5¼.

LIVE STOCK.

CHICAGO.

Chicago, Sept. 8.—Cattle—Receipts, 2,000; market steady. Beeves, 3.50@6.50; stockers and feeders, 2.50@4.30; cows and heifers, 1.25@4.45; Texas fed steers, 3.25@4.50; western steers, 3.10@4.65.

PRODUCE.

CHICAGO.

Chicago, Sept. 8.—Clear weather in the west was offset by firm cables in the wheat pit today. December opened ⅛@¼ to ⅜@½ lower at 81⅛ to 82⅛, and for a time the price held within the opening range.

Minneapolis, Duluth and Chicago reported receipts of 423 cars against 421 a year ago.

Ideal weather and lower cables had a weakening effect on the corn market and December opened ⅛ to ¼ lower at 45½@45⅝ to 45⅛@45⅜.

Oats were easier in sympathy with other grains. December opened a shade to ⅛ lower at 26⅞ to 26⅞@27, and sold at 26⅝@26⅞.

A 10 cent advance in the price of live hogs caused a steadier tone in the provision market. Trading was very quiet. October pork was up 7½ at 11.65; lard was off 2½ at 7.65; and ribs were 2½ lower at 5.60.

Later the market became more active and a stronger tone developed on seaboard sales and cash demand. For December the highest point was reached at 82⅝@82⅞. The market closed firm with December up ⅝ of 82⅝@82⅞.

Corn—Strength of wheat caused a firmer feeling later in the session. The market closed quite firm with prices at the highest point of the day, December being up a shade at 45⅝.

Cash: Wheat—No. 2, red, 83; No. 3, red, 79@82; No. 2, hard, 81⅛@89; No. 3, hard, 80@82; No. 1, northern, —; No. 2, spring, 80@88.

Corn—No. 2, 53¾@54¼; No. 3, 53¾.

Oats—No. 2, 25¾; No. 3, 25½.

Close: Wheat—Sept., 81⅛; Dec., 82⅝@82⅞; May, 85⅝.

Corn—Sept., 53½; old, 55¼; Dec., 45⅞; old, 45; May, 43½.

Oats—Sept., 26; Dec., 27¼@27⅜; May, 29¼@29½.

Pork—Sept., 12.00; Oct., 11.70; Jan., 12.35.

Lard—Sept., 7.65; Oct., 7.70@7.72½; Nov., 7.67½; Dec., 6.85; Jan., 6.85.

Ribs—Sept., 5.62½; Oct., 5.62½; Jan., 6.

Rye—Cash, 62½@63½.

Timothy—Oct., 3.55.

Flax—Cash, northwest, 1.12.

Clover—Cash, 10.75@11.60.

Barley—Cash, 37@52.

NEW YORK PRODUCE.

New York, Sept. 8.—Sugar, raw, nominal. Fair refining, 3⅛@3 3-16, centrifugal, 96 test, 3⅝@3 15-16; molasses sugar, 3@3 1-16.

Refined—Quiet. Crushed, 6.00; powdered, 5.40; granulated, 5.30.

Coffee—Quiet. No. 7 Rio, 8¾.

Butter—Steady. Street price, extra creamery, 20½@21; official price, do., 20; renovated common to extra, 13@19½.

Cheese and Eggs—Unchanged.

Liverpool Grain.

Liverpool, Sept. 8.—Close: Wheat—Sept., 6s, 10d; Dec., 6s, 7½d.

The weather in England today was showery.

RETURNED MISSIONARIES.

Have you a friend or acquaintance in your former field of labor, to whom you would like to send a copy of the Semi-Weekly News? If so, take advantage of our special offer, made to aid the great missionary work. We send the paper one year to any point in the United States, Canada or Mexico at half price, $1.00. This does not apply to points where there are regular wards or Stakes. Foreign postage extra.

Princess Dressers.

We are showing a beautiful line of Princess Dressers, and to get you to look at them we have made the price right. We have them from the cheapest to the best. This week we will sell one similar to cut for—

$15.50
