MINING STOCK BUSINESS

"Hungry Wolves" of the Pit Clamor for Northern Light at a Low Figure.

HERMAN HILL RETURNS FROM EUROPE.

The Great Payne Mine—Mammoth and Sacramento Dividends—An Ingenious Pump—Miscellaneous.

Like a pack of hungry wolves, the bulls and bears made themselves heard in the pit of the exchange today, the occasion of their demonstrations being the call of Northern Light, which was pushed below 11 cents and but seven lots sold—for takers at the newly established figure. Despite the noise, however, not much of the stock changed hands, as the transfers amounted to but 2,000 shares, which went at figures ranging from 10½ to 11½ cents a share.

Taken as a whole, the day was without particular feature, honors being about equally divided between the listed and unlisted stocks, both as to trading and figures received. In the former class a little business was done in Galena at 61½ cents, while Sacramento was also dealt in, the stock making sales at 72 cents. Mercur and Mammoth suffered slight declines, but Silver Hill maintained a good position, a bid of 34 cents being refused for the stock.

The unlisted stocks, had Chloride Point as a seller at 32 cents, and 32 cents bid was given, exhibiting a decided firmness. Stephens advanced very materially and sold as high as 11½ cents, while South Swansea was about stationary and shared in the trading at 1½@2½. A demand for Little Pittsburg brought out transfers of that stock at 2½ cents. Grand Central, Dexter and Swansea were all quite strong, but neither did any business, being satisfied show with good figures.

The closing figures were as follows:

LISTED STOCKS.	Bid.	Asked.
Anchor	56	1 50
Alice	30	50
Bullion Beck	2 15	6 50
Centennial Eureka	21 00	40 00
Daly	87½	95
Daly West	3 75	4 00
Dalton & Lark	8½	11
Eagle	4	7½
East Chicago Gate		1
Four Aces	7	8
Geyser Marion	84	87
Galena	60	65
Horseshoe		10
Horn Silver	1 35	1 60
Humboldt	1 00	1 50
Mercur	7 85	8 10
Northern Light	11	11½
Ontario	4 75	5 00
Ontario	3 75	4 50
Sacramento	65	72
Silver Hill	32	34
Silver King	18 53	21 00
Utah	50	54

UNLISTED STOCKS.	Bid.	Asked.
Chloride Point	31½	32
Bonheur	12	12½
Cactus	¾	1
Golden Eagle	4	6
South Swansea	1 25	1 35
Swansea	1 12½	2 00
Dexter	1 12	1 25
Hercules	15	
Little Pittsburg	2½	3½
Grand Central	5 65	7 00
Hecla	1½	2½
Rosecrans	1½	2
Richmond Anconda	2½	3
Emerald	4	
Camp Floyd		10

TRANSFERS OF STOCKS.

One hundred shares of Galena @ 61½ cents per share; 500 Northern Light @ 10½ cents, 1,000 @ 11 and 500 @ 11½; 200 Sacramento @ 70 cents; 2,000 Little Pittsburg @ 2½ cents; 100 South Swansea @ 2; 1,000 Mercur @ 10½; purchases @ 10½ cents, 1,500 @ 11 and 2,500 @ 11½; 100 Chloride Point @ 32 cents and 100 @ 31½. Total shares sold, 9,100; selling value of stocks, $1,009.75.

BACK FROM EUROPE.

Herman Hill, the Stock Broker, Returns From an Excursion.

Herman Hill, one of the stalwarts of the stock pit, returned from his European excursion this morning, and was greeted by his many friends coming to his office in the city.

Mr. Hill left here on his journey, January 17 last, since which time he has visited Spain, points in Africa, Alexandria and Cairo in Egypt, Jaffa in Judaea, Damascus, Beirut, Constantinople, Athens in Greece, Cairo in Crete, the Pontine Bay, Palermo, Sicily, Naples, Rome, Genoa, Milan, Turin, Geneva, Paris, Milan, Switzerland and Frankfort and Hamburg, Germany.

Mr. Hill was a member of an excursion party over the Hamburg and American Steamship line, and made a thoroughly enjoyable trip all the way. The outward voyage should the Augusta Victoria was most delightful, save for, as was also the return trip, aboard the First Bismarck, which landed at New York on the 27th inst., but possibly to the day of from the time of their departure. Mr. Hill reports the feeling against America very bitter in the sections visited, parties clearly so in France, which is very bitter. This bitterness will come back to them, however, says the gentleman, as all American travel, which equals 75 per cent, will undoubtedly be turned from now on. Mr. Hill looks well and says that he fared well on both sea and land, though the kind courtesy of the steamship and railroad companies, being a holder of Utah mining securities, the gentleman shared in the dividends made, and, of course, benefited by the trip more than ever. He is glad to get back.

THE GREAT PAYNE MINE.

It Has Made a Wonderful Showing in Spite of a Bad Market.

Speaking of the Slocan country in Canada and the Payne mine in that country, in which Hon. A. W. McCune of this city is a heavy owner, Mr. Frank Waters is quoted by the Spokesman-Review as saying:

There has been considerable talk of late about the Le Roi being the greatest mine in Kootenay, said Mr. Watson last evening. "It is a great property, but the Slocan boasts of the Payne mine has paid $1,000,000 to a foot, which is more than the Le Roi has paid in its history. This, with silver only a little above 50 cents per ounce, and with a heavy duty on lead, is a wonderful showing. It has been done quietly, however, and the world has not heard as much about all the dividends the Payne has paid as it has about one small payment by properties of less worth.

I was in Sandon, and found everybody happy. The big mines are all busy. The Slocan Star has been increasing the output ever since and everything is working full time. The Paris tramway is about completed. It will be of immense advantage to that property. The Noble Five is working a full force on development, the management of the property having wisely decided to spend a year developing the mine, so as to be able to ship steadily when shipping is resumed."

Sacramento and Mammoth Dividends.

Today the Sacramento Mining and Milling Company distributed to its stockholders the sum of $5,000, in liquidation of its May dividend of half a cent a share. This gives the company a total of $12,500 and it is said that the mine and mill at Hirosir were never in better shape.

Tomorrow the Mammoth company will hand out $20,000, this sum also representing the May dividend. Its payment gives the Mammoth an aggregate of $1,255,000.

LEASED THE DEALY MINES.

Salt Lakers Take Hold of an American Fork Property—Repulsed Strikes.

The American Fork World says that John Fisher and Healy Bros. have leased the Dealy mines in American Fork canyon to that Lehi section. They are to be worked at full blast.

Men who have been working on Strong Iron mine in American Fork canyon have returned to town with a report of a great strike. The prospectors and others have gone to the workings to investigate.

C. C. Crosby, who has been working mines in Porter canyon, east of Alpine, for two or three years, says that his prospects now look much brighter than ever before. He expects to find some good ore very soon.

CANT BACK DOWN.

The Le Roi Deal Has Gone Too Far to be Defeated.

"The talk of breaking the Le Roi deal is all nonsense," said a gentleman last evening who is in close touch with the company and posted on the recent doings in the inner circles. "The British Columbia corporation will control the Le Roi mine in spite of all the opposition of disaffected stockholders. A control in black and white cannot be abrogated without getting the violation of it into court. The Le Roi mine was sold in Spokane by Spokane people, so that a legal way a contract was agreed upon and the majority of the stock of the company placed in escrow as a guarantee of good faith that the contract would be carried out. The British Columbia corporation has put up a half million on that contract and is ready to carry it to a finish. The Le Roi company will have to do its part. If it does not, there will be a merry time in the courts on a different suit in Washington than be enforced in Washington. The stockholders in British Columbia are fully satisfied with the deal by the laws as they, but it has nothing to do with the law in the case down here. Know if the Spokane people are sore enough to defeat ratification at the Rossland meeting next Friday, the contract can be enforced all the same."

Governor Mackintosh, who arrived from Rossland yesterday a few days since, leaves the Spokane again this morning. He will remain there until Tuesday, when he will return here and start for New York. He declined to discuss the Le Roi matter further than to say that he had no reason to doubt that the British Columbia corporation would control the property.—Spokane Spokesman-Review, May 28.

California's Mineral Production.

California's production of the various minerals for the year 1897 is outlined as follows: Antimony, 25 tons, $2,500; asphalt, 22,607 tons, $404,350; bitumenous rock, 45,475 tons, $153,172; borax, 4,000 tons, $1,000,000; copper, 16,000 tons, $1,600,000; gold, $16,000,000; iron, 37,469,000 pounds, $663,200; potashes, 24,592 tons, $24,592; coal, $7,440,000; gas, $100,000; gypsum, 2,028,278 pounds, $1,340,000; gold, $13,871,871; granite, 229,000 cubic feet, $1,000,000; limestone, 2,200 tons, $10,000; lime, 1,000,000 pounds, $10,000; marble, 47,371 tons, $375,000; magnesite, 1,143 tons, $12,871; magnesite, 1,000 tons, $1,000; marble, 4,000 cubic feet, $1,200; mineral paint, 1,115,228 pounds, $9,345; mineral waters, 1,236,112 gallons, $247,861; natural gas, 6,320,000 cubic feet, $63,027; paving blocks, 1,171,000, $35,225; platinum, 150 ounces, $900; petroleum, 11,250 barrels, $1,918,250; quicksilver, 30,648 flasks, $995,440; rubble, 324,312 tons, $267,025; salt, 27,231 tons, $327,000; sand, 2,000 cubic feet, $24,000; serpentine, 2,000 cubic feet, $2,500; silver, $422,740; slate, 400 squares, $2,000; soda, 5,000 tons, $175,000. Total, $25,115,441. In 1896 the total value of the mineral product of the state was $24,251,598, and in 1895 it was $22,841,604.

Gold Excitement in California.

Great excitement prevails in Selma, Cal., over the discovery of a ledge of very rich free milling gold-bearing quartz about fifty miles from this place, in the foothills near Kings river. Every available rig in town is being pressed into service, and pounding business men are hurrying to the scene. Trouble may arise. One claim already has three men on it, Scientific.

AN INGENIOUS PUMP.

Its Practicability and Certainness Demonstrated—In Motion on Capitol Hill.

During the last few days exhibitions have been given, on Capitol Hill, of a pump which gives strong evidence of having a great future ahead of it. Among the prominent points in its ability to bring water up to any required height and at any angle, is number of feet in the hill on the hill has six others. The engine used is very small, and the whole thing works with remarkable smoothness. It operates a fraction over 30 gallons of water a minute, through a three-inch pipe, from a depth of 110 feet. The amount of fuel used is comparatively small—17 pounds of coal an hour. An engineer who has seen the model operate states that the proportionate amount of power and fuel required would be considerably smaller if the pump were of large dimensions.

The model is the Anderson double water column pump, which has lately been developed by the enterprise and energy of Mr. Don H. Porter, who has a company formed to manufacture it and sell in the states of California and South Dakota.

A number of leading engineers and mining men have witnessed the working of the pump, which is the invention of Mr. Peter Anderson. They manifest a good deal of interest in it, and evidently consider it a good thing. The model developed by Mr. Porter has been built under the supervision of Mr. John Olsen, who has placed some improvements on the original construction.

Mr. Porter appeared in the pit of the exchange this evening and there extended an invitation to all interested to visit Capitol Hill and inspect the new pump. He said it would pump anything, and he believed all would be pleased who would take the trouble to pass upon its workings.

Still Want a Smelter.

Pursuant to adjournment, the stockholders of the Silver Lake Copper Mining company met yesterday, and after discussing ore and ran the subject of erecting a smelter for the treatment of its ores, appointed a committee consisting of Messrs. Morris, McMullen, Waterman and Ott, to examine and report upon certain machinery now in view and thought to be available. The company will hold another meeting on Saturday afternoon next.

Prominent Mammoth Stockholders.

F. H. Goodhart, owner of a big block of stock in the Mammoth company, is at present in the city on one of his periodical visits of inspection. Mr. Goodhart makes it a custom to visit the mines about once a year, his only object being to see how ventures he is interested in, are progressing. That he will find the Mammoth in good shape there can be no doubt, as the mine and mill are both said to be doing good work at the present time. It is rumored that Mr. Goodhart may register exceptions to the company's last election, owing to an alleged wrongful diverting of his votes, but this, it is believed, is hardly probable. While the gentleman is here, however, the company may determine one and for all something definite concerning the proposed purchase by the Mammoth company of the New East Tintic railway.

Digs and Spurs.

Silver, 58¾; lead, $2.58.

John Dern is expected back from Nevada tomorrow.

Morris Rambarger, assayer at the Mercur mill, was in the city today.

M. T. Gisbers, the well known mining man, is now at home attending to business.

The double-compartment shaft on the Overland at Mercur, has now reached a depth of 100 feet. It will be pushed to the 400-foot level.

The E and E mine near Baker City, Ore., in the Cracker district, will have 150 men at work within two weeks, according to his resident on a late visit. The mine is a good gold proposition.

Spokane mining men want no changes in the federal mining laws and will therefore instruct their delegates to the International Mining Congress to be held here in July, to vote against any proposed change or revision.

COMMERCIAL.

New York, May 31.—Wall street looked for London quotations this morning with considerable interest after the news of the suspension of trading there, and was satisfied with the gains in American stocks ranging up to a point in a few cases. The improvement was taken as here at the opening, and prices advanced above the London parity. The market showed quite advances after the opening, in a number of stocks. Prices of the leaders were shaded afterwards under the pressure of realizations. Aggressive strength was shown by some of the usually inactive securities. There was a rolling off in the volume of business after the first hour, but a more pronounced degree of strength in prices, some stocks recovering to the best.

Bonds were dull, but slightly improved.

NEW YORK MARKETS

MONEY.

New York, May 31.—Money on call nominally at 1½ per cent. Time money 2@2½ per cent.

Prime mercantile paper 3½@4½ per cent.

Sterling exchange dull, steady with actual business in bankers' bills at 4.86@4.86½ for demand and 4.84@4¾ for sixty days.

Posted rates 4.87 and 4.88½.

Commercial bills 4.83¾.

Silver certificates 59@60c.

Bar silver 59c.

Mexican dollars 47c.

Government bonds firm, new fours registered, 125½; coupons, 127½; fives registered, 112½; coupons, 113½; threes, 108½; fours, 112½; fours registered, 96; fives registered, 111½; coupons, 112½; Pacific fours of '96, 100½.

CHICAGO MARKETS.

LIVE STOCK.

HOGS—Estimated receipts today 13,000 head; left over yesterday 4,000; market active, higher; mixed and butchers' 3.80@4.05; good to choice heavy, $4.00@4.05; rough, $3.80@3.95.

CATTLE—Receipts 1,500 head; strong to 10 cents higher. Beeves, $3.00@5.25; cows and heifers, $2.25@4.60; stockers and feeders, $3.00@4.60.

PRODUCE.

CHICAGO, May 31.—Today was the climax of the wheat boom. Wheat for May was down fifty cents to $1.25. There was a big break in the deferred futures, on favorable crop reports, large receipts everywhere and enormous world's wheat shipments, over 12,000,000 bushels. Letter had not many shorts left in May, possibly 500,000 bushels. July opened at $1.01@1.02 and sold up to 99½, rallied to 99, and fell again to 96¾. Sept. began at 91¾@92, sold up to 87¾, then down to 80¾, and rose to 82¼.

Closing Wheat—May, 1.25½; June, 1.20; July, 99 1-16@¾; September, 81½@¾; December, 82@¾.

CORN—May, 39¾; July, 39¾.

OATS—May, 31; July 29½@¾.

PORK—May, $11.45; July, $11.55.

LARD—May, $6.37½; July, $6.42.

RIBS—May, $6.30; July, $6.35.

BARLEY—32@40.

RYE—49@50.

FLAX—$1.25.

TIMOTHY—$2.80.

CASH.

Wheat—No. 2 red, 1.25; No. 3, 80@1.05; No. 2 hard, nothing doing; No. 3 spring, 90@1.10; No. 1 northern spring, 1.25.

Corn—No. 2, 39¾; No. 3, 39¾.

Oats—No. 2, 29¾; No. 3, 29.

SAN FRANCISCO.

PRODUCE.

San Francisco, May 31.—Wheat: Cash, 1.42½; December, 1.42½.

Barley—Steady; December, 1.17½.

SCIENTIFIC MISCELLANY

Cycling with Reduced Air Resistance—Beetle Fungi—Imitation of Tires—Marvels of Double Stars—Snake Venom Insecticides—A Remarkable Rain—A French Method of Preventing Baldness—The Centrifugal Gun.

If air resistance could be abolished, Prof. C. V. Boys points out, the man who drives his bicycle at 15 miles an hour would be able to attain 330 miles, and his 25 miles an hour would be increased to 100 miles. Prof. Boys proposes some curious experiments. To reduce wind resistance, he would cover the bicycle rider with a large bottomless box having glass sides, and would have this box dragged along by steam at speeds gradually increased until the cyclist begins to lag. For safety the box could be open at the rear. A more serious suggestion is that recuperating be attempted when the barometer is very low, for a fall of an inch, it is reduced the air resistance by one-ninth, might mean a gain of a minute an hour—where the diminution of oxygen in the rider's lungs should compensate for the reduced air resistance.

A little known group of fungi is the Laboulbeniaceae, which grow only on insects and almost invariably infest beetles and flies. The sixty first described in 1853, according to Dr. Roland Thaxter, Rhody reports, than a dozen species had been distinguished in 1896, while not less than 120 species belonging to 20 genera are now known. The study of these fungi, which appear like minute hairs seldom more than a fifteenth of an inch high, seems to have been confined almost wholly to American botanists, only 19 European species having yet been found, of 250 species of insects infected, 241 are beetles.

Medium weight pneumatic tires inflated to a pressure of 30 lbs per square inch have been shown by late tests to be just able to keep the tires off the road—with a weight of 100 lbs in the saddle. Tires of the same pressure under these circumstances was about 81 per cent. With a pressure of 60 lbs the efficiency was 87 per cent, and at 70 lbs it was about 91 per cent.

A bridge fifty feet under water is the latest English Channel scheme. A raised platform car, capable of carrying forty-five passengers, would be propelled across by electricity.

The double stars thus far discovered, says M. Camille Flammarion, number about 15,000, but the orbits of only 25 have been calculated. These orbits vary greatly in length, the period of revolution ranging from a little more than five years to 10,000 or nearly two centuries. A star of the constellation Andromeda, however, is resolved by powerful telescopes into three suns, one of which turns around another in 54 years, and these two revolve about the third in a period of 1,200 years. The uniformity of the rate observed since the first discovery of the third sun in 1779 proves that it is a member of it. The triple star is visible to the naked eye, becoming double in a small telescope. It is a mistake to regard double stars as a separate class of heavenly bodies, for they are of various kinds, some consisting of two similar suns, while in others an enormous sun is attended by a much smaller star, as in the case of Sirius, and in still others we have a sun with a dark star, which makes its presence known by its disturbing influence on the motion and causing the light of the star as a variable star. One of the most remarkable characteristics of double stars is the wonderful coloring of some of them. The star in Andromeda, for instance, consists of a green sun and a blue star, of a beauty that defies the art of the painter to reproduce.

Some striking experiments with serpent venom and immunizing serum have been made by Dr. A. Calmette, one of the Pasteur Institute of Lille. A mixture of the venom of the bothrops, the naja and the cobra-de-capello—the most active snake poisons known—proved fatal to rabbits in 20 and 3 minutes respectively in 0.01 and 0.05 of the amount of five and ten times the fatal dose. Like injections, however, but for the serum rabbits which had first been inoculated with 2 and 4 cubic centimeters of protective serum. Snake poisoning is now to be well understood, it is stated, that results can be calculated with great precision, and from a person's weight it can be ascertained how much poison would destroy and how much serum would save life. Large quantities of the serum have been sent to India. It keeps a long time and is easily produced, horses being inoculated with venom and the serum after a fortnight no injury to the animals resulting.

A simple method of dissuing iron from rust, suggested by Mr. Carl Hoffman, is recommended by the Chemiker Zeitung. The iron is first cleaned by an acid bath, the iron being electrically coupled.

Halo colored red or black is not rare in Brazilian wheat. The air is often highly charged with particles having one of these colors, but the recent discovery of an intensely black rain in the agricultural district of Mullingar, in Ireland, is regarded as a remarkable phenomenon. The fall has been traced to a cloud of soot 30 by 16 miles. As dusk was the darkness that immediately followed, birds went to roost, and superstitious people were alarmed. It is suggested that this was a sequel to the northeasterly gales that had blown for a week before. The pounding matter was simply soot, which it is thought had probably had reflected from the manufacturing districts of northern England and southern Scotland, and had carried at a high altitude in a southeasterly direction, raising the point against the memorable case following the Krakatoa eruption. When the sun rose after the rain of soot it was a paler red from the southwest. The sun reappeared with its soot and the other with its moisture.

The wonderful gun, of Mr. James Judge, expected to discharge 30,000 bullets per minute, to be used in a case of 15,000 revolutions per minute, the equivalent force causing the missiles to be discharged through a steel plate which can be sighted and elevated or depressed by the operation of a trigger—at a tremendous muzzle velocity.

The Best is the highest grade baking powder known. Actual tests show it goes one-third further than any other brand.

ROYAL BAKING POWDER Absolutely Pure

ROYAL BAKING POWDER CO., NEW YORK.

ECZEMA ON BABY

Whole Body a Mass of Sores. Doctor Could Not Cure. Tried CUTICURA.

Speedily Cured. Now Fine Hair And Clear Skin.

Our baby at the age of four months was sickly, and broke out with Eczema on his face and body. He was a mass of sores. The doctor could not cure him. One day I saw proof advertisement in the newspaper, and I gave CUTICURA REMEDIES a trial. I used one box of CUTICURA OINTMENT, one bottle of CUTICURA RESOLVENT, and three cakes of CUTICURA SOAP, and he was cured. He is now seventeen months old, weighs 32 pounds, and has the finest head of hair and cleanest skin you would want to see. LOUIS BENNINGER, Feb. 3, 1897. Box 103 Ann, New York City.

ECZEMA ON LEG CURED BY CUTICURA

I had a sore on the upper part of my leg that three doctors called Eczema. Such pain I never experienced in all my life. I went to the papers of CUTICURA REMEDIES, and I bought the CUTICURA RESOLVENT, CUTICURA SOAP, and CUTICURA OINTMENT. The first time I used them was before I went to bed, and I slept more than half the night for two weeks before, and from that time on it got better, and to-day it is entirely gone. Feb. 3, 1896. C. BUSKEL, Mount Joy, Penn.

Cuticura

Sold throughout the world. Potter Drug and Chem. Corp., Sole Props., Boston.

How to Cure Skin Diseases, mailed free.

CASTORIA

For Infants and Children.

The Kind You Have Always Bought

Bears the Signature of Chas. H. Fletcher.

The Kind You Have Always Bought.

CASTORIA

THE CENTAUR COMPANY, NEW YORK CITY.

Fox Brothers' CASTORIA

A Vegetable Preparation for Assimilating the Food and Regulating the Stomachs and Bowels of INFANTS CHILDREN

Promotes Digestion, Cheerfulness and Rest. Contains neither Opium, Morphine nor Mineral. NOT NARCOTIC.

Recipe of Old Dr. Samuel Pitcher

A perfect Remedy for Constipation, Sour Stomach, Diarrhoea, Worms, Convulsions, Feverishness and LOSS OF SLEEP.

Fac Simile Signature of NEW YORK.

35 Doses 35 Cents

EXACT COPY OF WRAPPER.

One Reason

WHY SCOTT'S EMULSION CURES weak children is because it makes them healthy and strong, and because it is easy and agreeable for children to take it. Almost all children do take it readily, because it is prepared in a manner that the delicate digestion can easily assimilate it. The exception is hardly worth considering. Scott's Emulsion is the best food and medicine for children as well as for all druggists all over America.

SCOTT & BOWNE, Chemists, New York.

HEAD ACHE

"Both my wife and myself have been using CASCARETS and they are the best medicine we have ever had in the house. Last week she was troubled with headache for three days, she tried some of your CASCARETS, and they relieved the pain in her head almost immediately. We both recommend Cascarets."

Pittsburg Siftz & Deposit Co., Pittsburg, Pa.

CANDY CATHARTIC Cascarets REGULATE THE LIVER

Pleasant, Palatable, Potent, Taste Good. Do Good. Never Sicken, Weaken or Gripe. 10c, 25c, 50c

CURE CONSTIPATION.

Sterling Remedy Company, Chicago, Montreal, New York. 317

KO-TO-BAC Best and cheapest cure for all druggists or by mail 50 cents. Sample free. Dr. Boyer's Pharmacy, Denver, Colo.

CARTER'S LITTLE LIVER PILLS

SICK HEADACHE

Positively cured by these Little Pills.

They also relieve Dizziness from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coated Tongue Pain in the Side, TORPID LIVER. They Regulate the Bowels. Purely Vegetable.

Small Pill. Small Dose. Small Price.

F. Auerbach & Brd

GRAND ANNUAL

Spring Clearing Sale

For days our clerks have been preparing for this great sale until every department every counter every shelf is teeming with Sale Bargains that will magnetize trade.

Here are Some Sale Specials.

Shirt Waists! Shirt Waists!

At 39c

Ladies' Shirt Waists—200 dozen of the grade Shirt Waists price the largest variety of patterns, checks, stripes, plaids, etc., to be seen in the west, all sizes.

ANOTHER BARGAIN BROADSIDE.

At 59c

Magnificent assortment of 250 dozen of Ladies' extra heavy Shirt Waists in all the new patterns and colors, all sizes, regular worth 90c and $1.00.

Entire balance of each of Ladies' Shirt Waists at reduced prices for this sale. Not a single one left at the price we have been selling them at, from 90c, $1.00, $1.25, $1.50, $1.75 and up.

This great Clearing sale affords the most advantageous buying opportunities yet offered to a discriminating public.

Hosiery Department.

Enormous bargains for this great sale, to be free for them, we can only mention these few:

25c dz. ladies and children's seamless cotton hose in all sizes, a good fast black, they are the regular 25c quality, in this sale we offer ..... 7¢

50 dz. boys' heavy black ribbed hose, seamless, a hose proved by every mother for its surprising durability, goes in this sale at, per pair ..... 10¢

75 dz. children's Lisle Thread hose in excellent quality, fast black, sizes 5 to 9, never before sold for less than 25c a pair, in this sale they go at ..... 19¢

Ladies' open length lisle Maco cotton hose, all sizes, our 35c quality ..... 25¢

We are offering during this grand sale our matchless line of 35 and 50c hose at the popular price of ..... 25¢
