ORGANIZE TO WORK.

Movement to Inaugurate Silver Club No. 1 in the First Ward.

AGAIN THE DEEP CREEK ROAD

Really Men at the Helm.—Idaho Placer Mining.—Notes.

The silver agitation has started a movement in the line of organizing silver clubs. The idea was discussed at a meeting of residents of the First Ward of this city, and this morning it was determined to call a mass meeting of the people of that ward, to be held on Monday evening at 8 o'clock, for the purpose of organizing the First Ward Silver club. The official call will probably be issued in the district this evening. The meeting will be held in the Liberty Park Methodist church. Everybody in the ward, and others interested in the silver movement, will be made welcome, though the membership of the club is expected to be limited to the district named. The promoters are sanguine that the formation of silver clubs throughout the Territory will be at vast benefit at the present time, in being a means of disseminating information on the silver issue, and of concentrating forces in the interests of the white metal, by sustaining any general plan of action that may be deemed advisable.

THE DEEP CREEK ROAD.

A special meeting of the Real Estate exchange is called for 8 o'clock this evening, and the subject to be considered is the railway to Deep Creek. The exchange is determined to organize in a form to do something live and building the road, if anything can be done this season. Mr. Conklin, president of the exchange, stated today that no definite plan had been formed as yet, though a general outline had been suggested but was not in shape to publish before it had been discussed by the exchange. This discussion is the object of tonight's meeting.

It is understood that Mr. Wantland has a plan to submit that will prove of special interest, and may open a way to the inauguration of practical effort on behalf of the railway. What it is will be unfolded at this evening's meeting, should there be opportunity.

RICH PLACER MINES.

Placer mining is now one of the principal styles of outdoor work among laboring men at Caldwell, Idaho, says the Idaho Statesman, and quite a number are likely to engage in that work during the year along the Snake, Boise and Payette rivers. Many inquiries are also coming in from distant states in regard to the opportunities for employment in this line.

Monroe Buchanan is meeting with gratifying success at placer mining. He has of late been working at Smiths Point, on the Boise river, about three miles above the mouth, and in the past twelve and a half days has taken out with the aid of his wife and little son $67.17 in gold. In one day they took out as high as $24. A rocker designed by Mr. Buchanan is used in the work. Pay is found from the surface to the depth of six feet, and the bar that they are now engaged on contains some four acres of ground.

Mr. Buchanan is of the opinion that the richest gravel can be found away from the present channel of the river, but in ground that was formerly the river bed. He says that quite a number of persons are already at work near his location and that there are opportunities for many more along the Boise and Snake rivers, as well as along the Payette.

NOTES.

Chas. W. Nibley arrived in town today from Baker City, Oregon, where his time is chiefly spent in the business of the Oregon Lumber company. He says the company is now getting out about 150,000 feet of lumber per week, but will close down in another month. Times are greatly like except for some grumbling among the gold miners there, the outlook for the remainder of the season is far from promising. There have been some good discoveries of gold and profitable working in quartz claims. Mr. Nibley will go to Omaha on business in a few days, and then return to Baker City.

SALT LAKE CLEARING HOUSE.

Today's clearing house exchanges amounted to $265,968.

TODAY'S QUOTATIONS.

New York—Silver, 99¾ bid, $8.30.
London—Silver, 32¾.

ORE AND BULLION.

Wells Fargo & Co. received today: Silver bullion, $5567.74.

T. R. Jones & Co. received today: Bullion, $1640; ores, 1609. Total $3249.

McCornick & Co. received today: Bullion, $5580.

W. M. Steward had in for assay today 3 tons of Grizzly ore.

Primary Meeting.

The officers of the Primary association of Salt Lake Stake will hold their annual meeting Friday, August 4th, at 2 p.m., at 147 east South Temple street.

E. C. CLAWSON, President.

Assessor's New Office.

Assessor Will Lynch is moving his office from the Board of Trade building on West Temple street, half a block south of the old Continental Hotel. County Selectman Bamberger will have an office at the same place.

WANTS THE CASH.

Councilman Rich Proposes a Scheme to Recover the Copper Plant Bonds.

Various schemes have been advanced on the part of the city and its representatives to recover temporarily the $25,000 copper plant bonds. But the one introduced in the following resolution introduced by Councilman Rich at last night's meeting of the Council was a little too capitalistic and sweeping to suit the members and was decided on a vote of seven to four:

Resolved, That the committee appointed for this Council on February 16th, 1893, for the purchase of real estate, viz: Geo. A. Lowe, W. H. Rowe, Spencer Clawson, J. R. Cannon, M. L. Ware, C. F. Loofbourow and L. C. Harris, be and are hereby discharged from further duty, and the $25,000 belonging to the Salt Lake City corporation that was entrusted to their care be at once returned to the treasurer of Salt Lake City.

August "Contributor."

The August number of this valuable magazine has its usual quota of interesting and instructive reading matter. With the current number is issued the prospectus for the coming volume 15, and a perusal of it shows the intention of the Contributor company to make the magazine second to none in the West. The publication may be commended to all Latter-day Saints as well as to strangers.

Don't Want Them New.

Messrs. Peabale and Devitt, representatives of the eastern boot houses, informed a NEWS reporter this afternoon that they would make no further attempt to buy the city bonds. The offer made last night was withdrawn in writing today. Both men say they did the best they could. The bidding will now have to be done by the city.

Died From His Injuries.

The young man, Wm. Hooper, who met with so serious an accident on Thursday afternoon while at work on the new Ruskelle block, near the Knutford hotel, succumbed to his injuries shortly after 1 o'clock today. He resided at 290 Wall street. But little hope of his recovery had been entertained from the first.

The funeral will take place next Monday, at 4 p.m., from the Nineteenth ward meeting house.

BANK OF THE REPUBLIC.

It Will Not Take Its New Quarters on Monday Next.

The National Bank of the Republic, which has been doing business at No. 140 south East Temple street, will on Monday next move into its new, commodious and elegant quarters in the White house, at the corner of East Temple and Second South streets. The entire north front of the first floor has been remodeled and converted into one of the most handsome and convenient banking places in the city. The total cost of the improvement approaches very close to $25,000 and during the present stringency speaks strongly for the stability of the concern.

The interior design and decoration is a winner, to use a slang phrase. Andrews & Jaccard, of Chicago, who have fitted up several of the leading banking houses of the city. The woodwork is mahogany throughout and the finish is very fine. The lobby and passageway are covered with costly English tiling. The safety deposit, record and money vaults are tornado, burglar and fire proof, and are equipped with magnificent time locks. The cages are of Julian hard-wrought steel. The netting surrounding the cages, like the huge vaults, is of silver finish and is a living lesson in advocacy of the use of the white metal.

The savings deposits, buying, receiving, discounts and collections departments are models of neatness and convenience. There are also beautiful rooms for the president, cashier, and directors. On the exterior of the outer doors is self-operating combination street picket protecting gate, giving the whole an impregnable appearance.

A YOUNG MAN DROWNED.

Shocking Occurrence in the Warm Springs Near Kanosh.

Special to the NEWS per Deseret Telegraph.

KANOSH, Utah, July 29.—John Woodward was drowned in the Warm Springs about five miles from here while bathing last evening. The springs were crowded. A little girl in the water got alarmed and was about to drown when Woodward went to her aid and was drowned himself. He was about 27 years old and unmarried. An inquest is now in progress.

HOW TO BOIST WATER.

A Practical Answer from Parowan to the Inquiry From Mexico.

Correspondence of the NEWS.

PAROWAN, July 25, 1893.—In answer to J. D. Harvey of Colonia Diaz, Chihuahua, your correspondent has this to say: If there were a mechanic in that vicinity who would give his mind to the working of mechanical principles shown forth in any of the modern mills now in use, and would adapt them to the construction of mills of size suited to the capacity or yield of the largest wells which it was convenient to dig, the commercial cost of the mill—or rather of its product would be reduced within the reach of settlers. Settlers can and do go to enormous expense in the construction of heavy dams and long miles of hard ditch work, and it is if successful, comparatively no hardship, because their own labor was made available; but when eastern manufacturers, roller mill operatives and railroads, speculative implement dealers and local canvassers each get in their claim, a small wind machine will cost one hundred dollars, and that to have cash, which may cost the poor settler double that sum in local exchange of labor and produce is severe. I will venture to say that mills of more than double the capacity of those now in use there can be produced and set up for the sum named, a large proportion of which being earned by local labor need not require commercial cash, but such pay as settle always (not) convenient when helping each other. Iron, of course, would have to be imported, but the amount required is not excessive. The above remarks, to a great extent, apply to pumps—but no matter which kind of pump or elevating device is used, it requires as much force, measured by foot pounds or horse-power, plus the friction—to raise a given weight of water a given height, whether by one or new plans of handling the flood and for wind power it requires a device that can work fast or slow without waste as the wind may happen to apply the necessary power.

That water can be raised economically for irrigation the distance named to Mr. Harvey's communication is beyond question, but new settlers not having the kind of pay required for direct exchanges stand at a desperate disadvantage.

In the matter of new manufactures I know whereof I speak, because of having tried it, and with the intent, prepared to show others how to "go and do likewise." And the results will justify their expectations.

I do not think it is very generally known that this is a miniature Salt Lake valley, with its genuine salt lake and an extensive extent of good, tillable land simply waiting the enterprise of settlers to bring it into cultivation. But little of it is yet entered upon, and excepting that water is the weak, what little is entered shows is with that surmise doubt which long so long over the now profitable dry farm lands in Box Elder and Cache counties. Water seems to underlie a large portion of the valley at suitable depth for pumping, and flowing wells have been struck at depths of 40 to 60 feet. But boring for flowing water seems to be attended with the same risk and uncertainty as boring for gas and for minerals, which only wealthy men and corporations can afford to invest in.

A most interesting celebration of Pioneer Day took place yesterday, in which to the ladies is due the praise of most interesting and eulogistic original essays and recitations in honor of the men who made it possible under God to enlarge the national domain and increase its wealth and its liberties.

JOS. T. SMITH.

MEMORIAL TO CONGRESS.

Report by a committee of the Denver Chamber of Commerce.

DENVER, July 29.—The committee of the chamber of commerce and board of trade, appointed to prepare a memorial to Congress in favor of the issuance of the circulating medium by the free coinage of silver produced from the mines of the United States, and demand the paying out of the money hoarded in the vaults of the treasury, through its chairman, ex-Governor John Evans, has made a report. It calls attention to the facts that the amount of legal tender currency in the country is altogether inadequate for the transaction of its business and that owing to this great injustice there is relatively a diminishing value to the property, wheat, cotton and silver and that this condition of currency and its associated causes has finally undermined the confidence and brought with it the length and breadth of the country, closing business generally, mines, banks and manufactories, from the Atlantic to the Pacific, from the lakes to the gulf, that the repeal of the Sherman silver law went further and set the currency and should therefore be followed by the passage of a law which would provide a remedy for the evil. Andrews & Co., of Chicago, who have fitted up several of the leading banking houses of the city. The woodwork is mahogany throughout and the finish is very fine. The lobby and passageway are covered with costly English tiling. The safety deposit, record and money vaults are tornado, burglar and fire proof, and are equipped with magnificent time locks. The cages are of Julian hard-wrought steel. The netting surrounding the cages, like the huge vaults, is of silver finish and is a living lesson in advocacy of the use of the white metal.

The savings deposits, buying, receiving, discounts and collections departments are models of neatness and convenience. There are also beautiful rooms for the president, cashier, and directors. On the exterior of the outer doors is self-operating combination street picket protecting gate, giving the whole an impregnable appearance.

WITHIN OUR GATES.

C. W. Nibley, all the way from Baker City, Oregon, and headed for Omaha, is in our midst for the time being. He is looking as well as of yore.

J. H. Ballentine of Ogden and Miss May Ferguson of Park City entered the wide-open doors of the metropolis yesterday and both took quarters at Cullen.

Miss Mattie J. Atkins, a recent graduate of the Emerson college of oratory of Boston, Mass., is stopping at the Morgan and is arranging to give an entertainment in this city in the near future.

George W. Thatcher, the broad-shouldered Democrat of Logan, came down yesterday and took in the Tabernacle choir concert at Saltair. He was in the city today looking around among friends.

HOTEL ARRIVALS.

The Metropolis—Miss A. Brown, James Dowey, Fort Collins; W. J. Richards, Chesapeake, Md.; Mr. Mann and wife, Brooklyn, N. Y.; Mr. Fox and daughter, Tarrytown, Conn.; Miss M. A. Atkins, Mt. Holyoke, Mass.; Miss Ferguson, Park City; Mr. Ballentine, Ogden; Mr. Thompson and wife, Pittsburg, Pa.; Mr. Jones, Kearney, Neb.; W. G. Swanson, C. A. N. W. Ry.; Miss H. Gilbert, Kansas City; R. B. Jones, Denver; Mr. H. Howard, New York; T. Hanson, Chicago; Mr. Fitzgerald and daughter, N. Norwich, Conn.; Mr. Montgomery, N. Salem, New York; W. G. Farwell, Logan; A. L. Farwell, Rochester, Minn.; Mr. Hoyt and wife, Chicago; Mr. Thatcher, Logan; Mr. Hoffman and wife, Chicago; Mr. Fitzgerald and wife, Chicago; Mr. W. H. Hopkins, Omaha; J. A. Cowell, Kansas City; Mr. Wm. Lea, Kansas City; Mr. Wm. Lea, Jr., Kansas City; Mr. Wm. Lea, Pittsburg; G. W. Wright, Joseph, Mich.; A. B. Garrett, Detroit; Mrs. H. F. Brown, Detroit; Mr. Wm. H. Brown, Detroit; Mr. Hoffman and wife, Denver; Mrs. S. Hopkins and wife, Denver; Mrs. Wm. Lea, Kansas City; Mrs. Wm. Lea, Jr., Kansas City; Miss Garrett, Detroit; Mrs. Hoyt, Chicago; H. Wood, N. Y.; E. Armstrong, London, Eng.; Joe Stevens, Alma Mich.

TEMPLETON—H. G. Bellinger and wife, Louisville, Ky.; J. E. Hopkins, New York; Mrs. Wm. Chapman, New Haven, New York; Ed Kaufman, Chicago; J. A. Mason, Fort Du Chesne; F. W. Dunn and wife, New York; Mrs. Dunn, Philadelphia; Mr. F. Dunn and wife, East Orange, New Jersey; Mrs. J. Dunn, New Orleans; J. Barron, to Pittsburg; S. Goldwin, Buffalo, N. Y.

SAVINGS BANK.

NO MAIN STREET.

Pays Interest on money from 1 to 6 months, 4 per cent interest paid on deposits of 6 to 12 months, and compounded four times a year.

Utah Title Insurance & Trust Co.

CAPITAL, $100,000, FULL PAID.
