# THE "WANDERING JEW."

Conspicuously New and Promising Property on Swan's Mountain, Beautiful Canyon.

## BUSINESS SLOW AT THE EXCHANGE.

Bids and Offers Made for the Purpose of Footing Up Figures—Dumps in the Big Bullfrog Camp.

A very promising mining property which only cost its owner a week or two ago is the Wandering Jew, located on Swan's mountain in Bonnie Clabbers, above the commencement of the canyon on the south side, a year ago it was in the same state as many others, and it had done just what most others have done—it had convinced it was going to construct a tunnel. The tunnel has reached the mountain a little over 50 feet to this time and when it has reached 100 feet it is expected to cut the vein which is supposed to be there. The vein will be encountered at a depth of about 40 feet, and there is every indication that it will be a good one. Several assays have been made on it from the mouth and from several places in the tunnel, and they have been very satisfactory, some of them showing as high as $40 in gold and silver. The property is owned by Messrs. Ellis, Lyman and J. J. McCullough.

### BUSINESS WAS FLAT.

Bids and Offers or Exchange Today Were Made to Foot Up Figures.

Today's proceedings on Change were about "plenty," the bids and offers made being made chiefly to footing up figures for the sales of Grover-Marion stock at 4 cents and Northern Lights at 8 cents, and Northern Pacific was disposed of to the extent of 40 shares at 47¼ cents each. Stocks on the floor when the call was completed were:

### Brigham Items.

The following is from the Brigham Bugle of Saturday:

A small crowd of men for the shipping end of a contemporary had gathered in the vicinity of the Brigham Bugle office on Saturday morning to see an important piece of work.

This has been a busy week at the Brigham smelter, the shipping of ore for last week was over double that of any previous week in the history of the Indian & Lark.

Mr. Murray Thomas informed us that he expects to drive the last bar out of the furnace we are having a play with Saturday, for immediate use. He says the Bullfrog work in the Indian is all in the Argo.

Mr. Thomas was one of Spanish Fork's contribution to the Bullfrog rush this week.

The Bullfrog district is to have large quantities of good water, and it is said it will be in inexhaustible quantities. The management is at present working very quietly in other parts of the camp.

The first payment of the Gold Jordan mine was made last week. The mine is reported to have been very satisfactory to the parties who bought it, and they are now working there with a force of men.

Mr. Thomas, who is in the Keystone district, writes us that the Keystone people are working on a 40 foot vein of good quality, and they have a good showing of ore in sight.

Mr. Thomas says the Keystone people are very much pleased with the Bullfrog country, and they are all in good spirits.

Mr. Thomas says the Keystone people are working a force of men on the property.

The Bullfrog Mining Exchange is now in full swing, and it is expected that a good deal of business will be done there
