MINING, BUSINESS AND STOCKS

FORENOON ON THE EXCHANGE.

Silver Shield Failed to Arouse Any Enthusiasm During Today's Early Calls.

COLUMBUS CON. WAS HIGHER.

Stock Sold on Open Board at $1.25—Tonopah Midway Transfers—Closing Quotations.

On the floor of the mining exchange during the early calls, 9,520 shares were sold, for which was paid $3,440.12. Silver Shield was not in demand, and only 200 shares were sold, the same going at 40 cents.

Mammoth received some call, and stiffened slightly, the stock going at $1.08, and up to $1.08. May Day remained unchanged, while Carisa went at 11 and 11½ cents. Columbus Consolidated was wanted and during the open board session 300 shares changed hands, the same going at 1.25. For the first time in a long while some Tonopah stocks were transferred, 200 shares of Midway going at $1.24½, and $1.25. A lot of Thompson, 1,000 shares, went at 9¼ cents.

The closing quotations and sales were posted as follows:

NEW GOLDFIELD COMPANY.

Ogden Citizens Organize One to Operate in Nevada Camp.

Articles of incorporation of the Goldfield Crown King Mines company have been filed with the county clerk of Weber county. The company is incorporated for $20,000, divided into 200 shares of the par value of $100 each. The principal place of business will be Ogden City. The following named claims are owned by the corporation: Cedric, Grand Central, Flora Bell, Creole, Queen, Combination, Kentucky Bell, Lillie V., Fraction and Lease 5, on the Ramsey claim, in the Goldfield mining district. The officers elected are: G. F. Brown, president; J. S. Carlson, vice president; J. J. Olsen, manager, and they, with A. J. Heath, Sam Klein, Thomas Arbor and G. A. Whitmeyer from the board of directors.

HOLDERMAN PROCESS

For Treatment of Gold Ores Said to be Panning Out All Right.

W. E. Holderman, inventor of the Holderman filter tank process for the treatment of gold ores, returned yesterday from Elko county, Nevada, where a mill with his process installed has been built and placed in successful operation on the Golden Eagle property, a control of which passed recently to Joseph Ferren and Otto Stahlman of this city. Mr. Holderman was accompanied by A. E. Custer, chief metallurgist and chemist of the Holderman company.

According to statements made during the day by Mr. Holderman, and which were fully concurred in by Mr. Custer, the process is proving even more of a success than was really anticipated and this being the first plant installed to treat ores in commercial quantities, naturally they are very much elated over the results being obtained.

The Golden Eagle mill is handling an average of 30 tons of ore per day and is treating a material about 50 per cent of which is in the nature of slimes. A charge is completed in 24 hours; the saving of values averages anywhere from 90 to 95 per cent, while none of the metals soluable in cyanide are lost.

Mr. Holderman says the Golden Eagle ores are of a peculiar character; they are non-perculating and contain a great deal of arsenic, lead and other metals. Owing to the susceptibility to sliming, the material cannot be treated with any degree of success, so far as he knows, with any other process than his own. The cost of treatment is said to run from 15 to 25 cents per ton, which is regulated according to the amount of automatic devices employed and the tonnage brought under treatment. No more water is required than is necessary in the treatment of perculating ores.

The Holderman company has several other plants in contemplation and during the present year it is expected several will be built in this state, Idaho and California.

PURCHASES BY UTAHNS.

John T. Hodson and F. A. Virtue Buy the Midas Group.

John T. Hodson and F. A. Virtue, both prominent Salt Lake mining men, have purchased the Midas group of two claims, lying east of the Dixie mine, says the Goldfield News. They have also acquired a group of three claims near the Nevada King. Both properties are to be vigorously developed. Work will be started immediately. Both groups show splendid ledges on the surface that carry good values. Recently an assay of $614 was secured from a 16 foot vein that has been opened up to some considerable depth. On the Nevada King large bodies of high grade milling ore are being developed and the new owners of the Midas are confident an equally good prospect presents itself on their acquisition.

The total acreage of the two groups is approximately 95. Mr. Hodson will give his personal attention to the management of the properties.

The Sherman-Goldfield Mines company yesterday added further to its holdings in southwest Nevada by the purchase of the Majestic group of five claims in the Bullfrog district. This is the result of J. R. Davis' recent visit to the district, he being the field man of the company and largely interested therein. The company expects to push work in the development of its new acquisition.

TOWN OF BULLFROG.

The Name, Amargosa, Has Been Dropped Permanently.

The town of Amargosa, in the Bullfrog, Nevada, mining district has undergone a change in name and hereafter will be known as Fullfrog. A new townsite has been laid out, at the head of which is H. H. Clark, the discoverer of the original Bullfrog mine. It is claimed that a sufficient supply of water has been obtained to furnish the needs of a town of 15,000 inhabitants.

GOLDEN ANCHOR STRIKE.

One Reported from Tonopah and the Stock Stiffens.

James A. Pollock & Company, brokers, received a report over their special wire, from Tonopah this afternoon that an important strike had been made in the Golden Anchor mine, adjoining the Tonopah Midway property, and that the stock had stiffened 10 cents a share as a consequence of it.

Schilling's Best: good tea and good dealing: money-back tea.

Your grocer returns your money if you don't like it.

ELDORADO CANYON, SOUTHERN NEVADA.

Region Along the Colorado River Is Attracting Wide Spread Attention Now.

ORES WILL COME TO SALT LAKE

For Treatment—Building of Salt Lake Route Gives Camp Available Transportation Facilities.

Eldorado canyon, a comparatively new mining camp in almost the extreme southern part of Nevada, is attracting considerable attention just now and recent developments made there indicate that it will be the location of some big producing mines. Like Searchlight, the camp is comparatively unknown to Salt Lake mining men. Now that the Salt Lake Route is about ready for traffic in ores from southern Nevada, no doubt more will be known of these Nevada camps which have been shut out from available transportation facilities. The ores from the mines of Eldorado canyon, principal among them being the Blackhawk, Wall Street, Roberts and Venus, are going to be brought to the Salt Lake smelters for treatment.

A correspondent of the Mining Review writes interestingly of the camp:

"Eldorado canyon, one of the most southern of southern Nevada's numerous mining districts, is on the boom, and people are now flocking into this veritable 'Eldorado' by the hundreds. A month ago there were scarcely a corporal's guard in this grand old camp. A week ago more than 150 treasure seekers were prospecting in this locality for stores of hidden wealth, and, now that the fever is on, the tide in this direction is rapidly swelling, and capitalists and prospectors are joining hands in the endeavor to pry into Dame Nature's most secret treasure vaults in this ancient and highly productive camp.

"If one were to make a trip into Eldorado canyon he would gaze with astonishment at the wealth that is but waiting to be taken out. He would see where, for years, old prospectors have gouged about on the surface and have taken out millions. It is truly incredible that such possibilities have been neglected for these many, many years. This is a district that has produced many millions, but which was abandoned before its vast deposits of mineral wealth had barely been scratched. But at last its merits are being appreciated, and the old canyon is being rejuvenated. The adverse conditions which have for so long retarded this section are now entirely removed and a lively interest is being taken in its resurrection. With an influx of outside capital the old mines of the camp are to be given another chance to take their proper places among the big producers of the west.

"The new life and activity now so noticeable in Eldorado canyon will bring joy to the hearts of the old timers there, and who, for so many years, have patiently worked along against such overwhelming odds and so many obstacles. Early in 1864 the Eldorado Canyon Mining company purchased the Techatticup mine; but little was accomplished, and in 1879 it was sold to the Southwest Mining company for $150,000. This company resumed the work and continued to take out the golden treasure, for which this property is so justly noted, until about the year 1895, since which time the property has lain idle. Sometime between the years 1879 and 1895 John Powers, the original discoverer and locator of the camp, sold the Wall Street, Quaker City, Tough-Nut and Mocking Bird claims to eastern parties. Work in the operation of these properties continued for a period of 17 years, and millions in gold were taken from surface workings. Since the abandonment of these old mines some work has been carired on from time to time in a desultory way, but scarcely any ore was milled.

"If, with the crude methods and crude machinery then used and employed, the difficult and expensive means of transportation, and the lack of water, $5,000,000 could be realized in the early history of Eldorado canyon, what should the conveniences of modern mining and a new railroad produce? For 17 years the stamps pounded away in the near vicinity of the Colorado river, for it was here that the reduction plants of the district were located, and the immense bodies of ore in the mines were but barely touched to keep up the necessary output. There was not a piece of mining machinery in the camp. The ore was hoisted by means of hand windlasses and on the backs of Indians, and then hauled nine miles to the river for milling. Had the pioneers of the district only known it, a sufficient supply of water was at hand, and right at the mines; and yet fortunes were squandered in useless transportation. Nothing but the very richest ore was touched or handled, and the rich pay streak was followed through magnificent bodies of fine milling rock. A fortune, alone, was necessary to get supplies into the camp. Supplies purchased in San Francisco were taken around, on water, by the way of the Gulf of California, and then taken up the Colorado river in flat boats, and then hauled to the mines.

"Such were the conditions in the early days of the camp. What are they now? The new Salt Lake route passes within easy freighting distance of the canyon, and should the district develop as conditions and indications now promise, a branch road will surely place the camp into immediate touch with the outside world. Thus two markets are opened to this section—Salt Lake, and Los Angeles. The water question has been solved and mills may now be erected at the mines.

"A new townsite, called Nelson, has been opened up, and the conveniences of a city and postoffice for the camp are assured. Outside capital has been interested in the mines of Eldorado canyon; the old lethargy has been shaken off, and a new era of prosperity is dawning in the old camp, which should give to the world another source of golden wealth galore."

CONCENTRATES.

A sale of Majestic Copper stock was reported at $3 a share today.

W. J. Dooly has gone to Tonopah and Goldfield on mining business.

Six cars of Tonopah and seven cars of Tintic ores were at the T. & B. samplers today.

Manager Hanchett and other members of the Newhouse staff are in Beaver county today.

Operations have been resumed at the property of the Jim Butler Tonopah Mining company at Tonopah.

E. J. Swan, the civil and mining engineer, has returned from a trip to the Nevada gold camps.

Capt. J. B. Black has returned from making an examination of mining property near Battlemountain, Nev.

It is reported that the owners of the Dutchman property in American Fork canyon will sink a 500 foot shaft.

A. J. McMullen, manager of the Skylark Copper company's properties in Beaver county, has gone to camp again.

A. J. Orem and son Walter C. have gone to Silver City, Ida., on mining business, and will be absent for possibly a week.

The ore and bullion settlements reported late yesterday were as follows: Crude ore and concentrates, $35,000; base bullion, $33,300.

Captain Duncan McVichie, manager of the Bingham Consolidated properties spent the forenooon at the company's smelter at Bingham Junction.

W. G. Adamson, the well known mining operator of this city, who has acquired extensive interests in Elko and Humboldt counties, Nevada, has been making investigations in Tonopah and Goldfield.

The Utah-Goldfield company is prosecuting work on company account on its property in the eastern section of the district. The group is crossed by a number of quartz-porphyry dikes that show marked mineralization. These are being prospected and the showing is reported by General Manager Cleghorn to be decidedly encouraging.—Goldfield News.

Development work is being prosecuted with very satisfactory results on the Goldfield-Guerdon company's group of claims near Red mountain, east of Goldfield. There is also a very considerable activity in that section of the district. On the Thompson and Quinn property there has been noted a marked improvement in values, the increase in sinking 12 feet being from $2 to $53 per ton. The Goldfield-Guerdon is controlled by Salt Lake people. John Cleghorn of Salt Lake is in charge of development work.—Goldfield News.

STRIKING GAINS, FRACTIONAL LOSSES

Extensive Advances Registered At the Opening Were Soon Wiped Out.

THEN CAME A GOOD RALLY.

Railway Stocks Made a Fairly Moderate Respose to Upward Movement.

New York, March 16.—A large number of striking gains were mixed with a few fractional losses in the opening deals in stocks today. Ontario & Western was included in the latter with a decline of ¾. Five thousand shares of Chesapeake & Ohio at 58½ and 58⅛, compared with 57⅞ last night and 1,000 shares of Union Pacific sold at 135⅝ and 136 compared with 135⅛ last night. General Electric jumped 2½ and Louisville & Nashville and Chicago & Alton rose 1¾. The market was sold freely to realize on the high opening prices. The most extensive advances registered at the opening were pretty generally wiped out, and such speculative favorites as St. Paul, the Pacifics, Pennsylvania, Reading and a number of others were quoted fractionally below yesterday's final figures. Corn Products preferred broke 3¼ in a brief time and Canadian Pacific, Ontario & Western, Smelting, People's Gas and Tennessee Coal yielded 1 to 1½ below last night. Later on Chesapeake & Ohio was bid up again to 59⅛, but the movement had little effect on other stocks. Prices improved slightly in sympathy with the renewed strength in Chesapeake & Ohio. But the higher level again invited heavy profit taking and prices of active stocks fell generally 1 to 1½ below last night's level. Northwestern lost 3 and New York Central, Ontario & Western, Tennessee Coal, Atlantic Coast Line, C. C. C. & St. Louis 1, Delaware & Hudson and Corn Products 1¾ to 2. Prices rallied before noon, New York Central recovering 1½ and some others a point.

Bonds were irregular at noon.

The rally was not extended beyond the noon level of prices, despite the strength shown by the local traction stocks. Metropolitan Street Railway improved a point and Metropolitan Securities 2. Selling was resumed just before 1 o'clock and the market fell back to the low point of the morning and in some cases below. Illinois Central, Reading and Union Pacific fell 1¾.

Railroad stocks made a moderate response to the upward course of the railway equipment and the traction stocks. Metropolitan Securities was carried up 2½ to 87½, and Metropolitan Street Railway touched 126. Large blocks of Locomotive were bought at an advance of over 2 points and Car preferred also gained 1. Declines of 1 in Central of New ersey and Rubber preferred.

LIVESTOCK.

WOOL.

ST LOUIS.

St. Louis, March 16.—Wool steady. Territory and western mediums, 20@21; fine medium, 16@18; fine, 15@17.

LONDON WOOL AUCTION.

London, March 15.—The offerings at the wool auction sales today were 14,240 bales, principally cross-breds and medium greasy merinos. The continent and home buyers were keen bidders and their takings were large. Americans bought a few lots of cross-breds. Several hundred bales of New South Wales greasy, bought in Australia last season for America, were sold here this week at 1s, 1d@1s, 4d.

LOCAL MARKETS.

In this morning's local markets the price of eggs continues to drop, as the number of hens returning to duty continue to increase. So the retail price is now 20 cents, and by the case the figure is $5. There is plenty of spring lamb on the market, and the new Cuban potatoes are something of a novelty. The price of pineapples is stiffening, the best now fetching 40 cents; but Utah rhubarb has fallen from 10 to 7½. Otherwise there is no change in the markets, and as the produce exchange failed to break loose at last Tuesday's meeting, prices in flour and grain continue as before. The prices obtaining today are as follows:

RETAIL.

Corn, per cwt	$1.45
Corn, cracked, per cwt	1.50
Wheat, per bushel	1.10¾@1.20
Oats	1.80
Barley, rolled, per cwt	1.50
