VOID IN FIVE YEARS.

Professional School Diplomas and Certificates May Be Abrogated

UNDER CERTAIN GIVEN RULES.

University of Utah Is Liable for the Payment of City Water Taxes Assessed against It.

Attorney General Bishop this afternoon transmitted the following opinion to Hon. John R. Park in relation to abrogation of certain certificates and diplomas under circumstances mentioned:

Hon. John R. Park, President of the Board of Education, Salt Lake City, Utah:

Dear Sir—I am in receipt of your favor of the 7th inst., submitted on behalf of the State board of education, asking to be advised as to whether it is the duty of the State board, under paragraph 4 of section 5 of chapter 130 of the laws of 1896, to formally revoke certain diplomas and certificates which are authorized by said chapter, in cases where the holders thereof allow a space of five years to elapse without following some educational pursuit.

The said act provides for the issuance by the State board of education, of State diplomas or two grades, namely, high school and grammar, and State certificates of one grade, namely grammar. The grammar grade diploma is valid in the grammar and primary departments during the lifetime of the holder, the certificate in grammar and primary departments during a period of five years. The law then prescribes a certain examination for each of these grades of certificates, and also provides that normal certificates and normal diplomas issued by the University of Utah shall have the force of State certificates, and also that the holders of high school certificates and territorial first grade certificates, now in force, may at the discretion of the State board be exempt from examination in any and all of the subjects which are required for such certificates, and life diplomas issued by the state boards of other states which are of equal rank with those issued by the State board of this state may receive equal recognition.

The 4th clause of said section 5, the one to which you call my attention, and upon which you ask my interpretation, evidently refers to the diplomas and certificates above mentioned. It provides: "No professional diploma or certificate shall be in force, if the holder allow a space of five years to elapse without following some educational pursuit."

It will be observed from this provision, that it was intended to limit these diplomas and certificates to professional teachers; that is, it authorizes the holders of such diplomas and certificates to teach in the public schools of the State without being subjected to examination, unless they shall allow a space of five years to elapse without following some educational pursuit, in which case this authority to teach is withdrawn by operation of law, and the holder should be placed upon the same basis, and would be required to submit to the same examination as other teachers not holding such diplomas or certificates.

I am of opinion that this provision of the law is effective, and operates to abrogate such diplomas or certificates, at the expiration of five years, as aforesaid, as effectually as any revocation of the board could possibly produce.

I have the honor to be, your obedient servant, A. C. BISHOP,
Attorney General.

University Must Pay Water Taxes.

The following opinion relative to the exemption of the University of Utah from the payment of city water taxes was transmitted to Secretary Porter this afternoon:

Hon. Fauch Pierce, secretary of the Board of Regents, Salt Lake City, Utah:

Dear Sir—I have before me your favor of recent date, submitted at the instance of the board of regents of the University of Utah, asking to be advised upon the following: "Shall Salt Lake City succeed water taxes against the University of Utah amounting to $64 for the year ending June 30th, 1896; the city has also assessed water taxes against the University of Utah for the year beginning July 1st, 1896, and ending June 30th, 1897. The city is the owner of the waterworks and has furnished water to the University. The University is a State institution and is supported by appropriations made by the Legislature from time to time. The board of regents desire to know whether they shall pay these taxes or not. We have never paid water taxes."

Without elaboration, I am of opinion that the University of Utah can claim no exemption from such charges, and that it is legally liable therefor.

I have the honor to be, your obedient servant, A. C. BISHOP,
Attorney General.

Board of Pardons.

The State board of pardons will hold its next regular session on Saturday, September 19, 1896, at 10 o'clock a. m., at the Supreme court room in the city and county building, Salt Lake City, Utah. At that meeting the following applications for pardon will be considered by the board: Charles E. Campbell, housebreaking; Carl Danielson, grand larceny; Samuel Mulberry, murder in second degree; Cornelius Mahoney, assault with intent to commit robbery; Robert Bowen, forgery; Charles King, unlawful sexual; James Hardy, using glass powder in kill fish; Hans Olsen, using glass powder to kill fish; Hans Olsen, using glass powder to kill fish; Joseph D. Clark, forgery; Sloan Hawks, voluntary manslaughter; Robert Asaeno, rape; John Dooling, attempt to commit rape; Juan Aguilera, obtaining money and goods under false pretenses.

Charged With Forgery.

Railroad Detective Wheeler of the Union Pacific arrested Marcus L. Stevenson Thursday evening on a charge of forgery. Stevenson is in the employ of the Union Pacific company as a painter, and it is alleged that on July 20th last he forged the name of D. E. Burley, general passenger agent for the Union Pacific in this city, on an order for a one-cent mileage ticket to Butte City, Mont. The order was given to a girl named Viola Hayes, who wished to use the ticket. When the order was presented at the railroad office, it was not honored, and investigation revealed the fact that it was a forgery.

The girl said that Stevenson had given her the order, and title led to his arrest. He will have a hearing before Justice Wenger on Monday next at 10 o'clock. Meanwhile he enjoys his freedom on the strength of having furnished a $250 bond.

The Horse Was Killed.

A vegetable vendor's team ran away on West Temple street, between North Temple and First North streets, just before noon today. The team collided with a trolley pole and one of the horses was killed outright, its head being crushed in by the force of the blow. The owner's name was not learned though it was said he lived at Bountiful. The carcass was conveyed to the crematory this afternoon.

German Arms for Zanzibar.

PARIS, Sept. 11.—A dispatch from Aden says a port official there has received information that two German vessels loaded with arms for Zanzibar, entered the Red Sea and that under the instructions on the subject had been cabled the official referred to.

The Gold Tide.

NEW YORK, Sept. 11.—Lazard, Freres & Co. deposited $3,000,000 in gold in the sub-treasury in exchange for legal tenders. The steamships Britannia and Fulda Bismarck brought $613,000 and $3,237,500 respectively, making the aggregate amount received $23,212,500.

Aleton Native Offered Peace.

CAPETOWN, Sept. 11.—Advices from the Matopo hills say that chiefs and headmen have conferred with the British officials. The natives were offered peace on the surrender of their arms and those guilty of murdering settlers and slaves to mild blood. The chiefs agreed to this, saying they were sick of war, that the people, moreover, are unwilling to surrender and are going towards Zombezi.

The Paris Cyclone.

PARIS, Sept. 11.—Several newspapers estimate the number of injured during the cyclone yesterday at 150, of whom forty were seriously hurt. The Journal confirms the police statement that only three persons were so seriously injured as to be in danger of losing their lives.

Death's Harvest.

BOSTON, Sept. 11.—Professor J. Cook, of Harvard University, died today, aged 71. Since the death of Prof. James Dwight Dana, of Yale, geologist, he has been looked the last of instructors.

Corbett Will Accept.

NEW YORK, Sept. 11.—In a dispatch to the Evening World, James J. Corbett says he will meet Robert Fitzsimmons for a fight if Fitzsimmons accept the match's conditions issued last night.

The Sixteen Was On.

"Aha!" And he laughed fiendishly as he read from the morning paper. "The bandit shot at the man whose life was saved by the bullet striking against a bottle of pickled beans!"

"Well," snapped his spouse, "what of that?"

"What of that?" said he as he fell his coffee going up steadily to the maps of Africa. "Don't you realize that the bullet must have been on?"—London Tit-Bits.

Remember.

It takes only five minutes to change wet boots and stockings, but it may take two months to get over a cold caught by not changing them.—Brooklyn Eagle.

MINING IN TINTIC.

The Lower Mammoth People Rejoicing Over the Present Outlook.

NOW CLOSE TO THE ORE BODY.

The Ajax Company Making Large and Regular Shipments—Stocks on the Stock Exchange.

Special Correspondence to the News.

MAMMOTH, Sept. 10, 1896.—The Lower Mammoth Mining company is greatly pleased over the small strike which was made of the mine a few days ago, and Superintendent Frank Anzilla of the mine reports that they have today encountered a large body of blue limestone; he also states that they are now some twenty feet or so from the main body of ore which is known to exist some little distance from the blue limestone formation. Mr. Anzilla says that they expect to put on a large force of men after they cut through the blue limestone.

The Blue Consolidated Mining company made shipments this week of five carloads of first class ore.

The Dun mine which has again resumed work after the short lay-off made a shipment of five carloads today.

The Ajax Mining company came up to time today with checks for their employes, and some of the boys who were paid today will make the little town of Mammoth pretty lively tonight. The Ajax company has done some good work this week, and made a large shipment of ten carloads of first class ore today. The company is sinking a shaft in the old workings of the Copperopolis, and taking out some first class pay ore.

The Mammoth Mining company is doing about as well as any of the mines in the Tintic district, making a heavy shipment of thirteen carloads of ore daily.

The New East Tintic Railway company will commence the first shipments of ore from the Mammoth mine on Monday next over the new line. Large deposits are on the dump there in the mine, and there will be some extensive consignments some time next week.

The Grand Central Mining company has commenced the work of drifting. The shaft is now down seven hundred feet. One carload of ore was sacked for the company today and a wonderful amount of development work has been done on the property.

The Opex Mining company will connect the water pipe from the road up to the mine next week, and when that has been accomplished, the hoist will at once commence to bring up large deposits of ledge matter which is being sunk upon to reach the main body of ore, which the company anticipates will be found at a depth of 400 feet.

Mr. Lawrence of the North Star reports that the property is assuming a better shape than at the present time. The mine is making regular shipments every week, and Mr. Lawrence states that they will make a run of their low grade ore through Farrell's mills, or better known as the Sioux Consolidated mills, on Monday next. There are over 3,000 tons of good pay ore on the dump, and it is the ore that they intend to run through the mills. At present the Ajax company has the use of the Sioux consolidated mills, and as soon as that company has made the necessary run and trial test of the Ajax ore, the North Star will commence to run its low grade ore, no doubt for the same purpose of finding out if the Sioux Consolidated mills can work it economically and bring in a paying proposition. The North Star will make a trial of 3,000 tons.

Ephraim Enterprise Notes.

The work of developing the prospects in the Ephraim and West Point mining district has been progressing rather slow for the past few months, except in the case of the Bullion Pate mens. This property has been worked continuously since its discovery and is meeting the expectations of its owners. It shows a well defined vein about twelve feet wide about one half of which is fine steel galena ore. There are now a great many tons of ore on the dump, but it will not be shipped as the company intend to put in a plant to work it.

Work on the Good Luck group on the south of the Bullion Pate, and the Galena Hill group on the north will be commenced in a short time and be vigorously pushed during the fall and winter.

Work on the Great Dream claim which has been allowed to lie idle for some time will be resumed as soon as the tary season is over.

There are some good prospects in the mining district that have not been at work for several years, and which are being developed this fall.

WITH THE STOCK BROKERS.

Ontario Dealt In On the Stock Exchange Today.

Not often is it that Ontario is dealt in on the stock exchange, but today it scored a transfer of 100 shares at $10.50 per share. This was the only sale made during the entire call, although some of the stocks were invited with fairly good quotations, which, however did not come close enough to each other to warrant the transaction in business.

Mercur was so offering at $6.05, but did not get a bite. Yesterday, while Mammoth could have been bought at $2.15 with a bid of $2. Ontario was offered at the close at $11 and Sunshine was held by sellers at $2.10 for the stock at $2.10. Seven cents and a half was the difference in figures which prevailed between the Sunshine and stock, while Smith Greenwood was so offering at 60 cents with 57 cents bid.

The closing figures were as follows:

Dips and Spurs.

Forty tons of high-grade ore came from the Dalton and Lark Tuesday.

The Mammoth dividend of 12½ cents per share will be paid on Monday the 21st, owing to the 20th falling on Sunday.

There is trouble in the air over a recent Scott assessment levied by the Morgan Mining and Milling company of Hardscrabble. The stockholders of the company declare that they will fight the assessment to a finish.

Utah Kyanite sandstone is to be used for building purposes by the Butte, Montana, board of education. The stone comes from the quarry located near Toledo on the Rio Grande Western railway and is handled by the Kyanite Stone company.

The stockholders of the Bullion-Beck will begin to feel like "bloated bondholders" before long if the company continues to make new records. There last month three regular $15,000 dividends were declared, while Thursday a double one of $30,000 was ordered distributed on the 20th. The Bullion-Beck is in good shape at present and large and rich bodies of ore are growing the development work as it progresses.

INDEPENDENT REPUBLICANS.

They Issue a Call to County Committees Regarding the Bad Lake Mass Convention.

The following explanatory call has been issued:

The several Republican county committees of the state of Utah have been selected by the whole party to represent its power and authority, and by virtue of the authority so conferred upon organized authority within their respective territorial districts. A great questions, in which the differences of opinion exist, has divided the party and its organization in the State of Utah. Once previous the party controlling the State organization has been called to emphasize its contention with respect to the party form by dividing two State conventions to be convened, and calling upon the several county organizations to provide for the selection of delegates thereon. The two State conventions are called in the interest and support of the platform of the national Republican party declared at St. Louis, and the presidential candidates nominated by that party. The contention of Republicans in Utah, believed to be a large majority of the whole, declines to accept such platform or the candidates, and intend to insist upon their rights to express their views and vote their preference at the ballot box in the regular way. For these purposes, therefore, a provisional committee has been appointed with power and force
