## UTAH IN GRIP OF THE STORM KING.

Big Fall of Snow and Violent Wind Sweep Every Part of the State.

CONSIDERABLE DAMAGE DONE.

Telegraph Lines Down and Only a Few Wires Being Successfully Operated Today.

In This City Wind Reached a Velocity of Sixty Miles an Hour and General Condition is Severe.

There was an unusually heavy snow and wind storm last night, a special feature of which was a hurricane traveling at the rate of 60 miles an hour; and the situation was emphasized further by thunder and lightning, the latter striking a house on Second West street, in the southern limits of the town, but not doing much damage. Trees were uprooted and blown down, though this occurred mostly in the western section of the city, where the blasts appear to have been the heaviest. Signs suffered all over town, tearing loose from their fastenings, a number of windows in the business part of the city were blown in, though not as much damage was done in this line as might have been expected. Billboards were demolished, as well as board fences, and a number of smaller buildings suffered more or less severely. The electric lights went out of commission for a short time, owing to the blowing down of wires both in the city and out. The other lines supplying the fluid, in addition to the local supply. The street car service was not affected, as between 1 and 3 a. m. when the storm was at its height, no cars were running. Telephone companies were slightly inconvenienced in the city, but out on the toll lines trouble was reported this morning, though the wires were reported all right by noon.

TELEGRAPH POLES DOWN.

The telegraph companies suffered out in the country regions, the Western Union losing 125 poles north of Pocatello, which will cripple its northern service for a day or two, and it would be longer but for the fact that the company has several gangs of men up there who are rapidly repairing damage. The same company is suffering from the blowing down of quite a number of poles in the southern yards of the Denver & Rio Grande road, which is embarrassing southern communications. Wires were down on the San Pedro, between Ogden and the San Francisco as well as between Ogden and the east, but Manager Hay reported most of the trouble corrected by this morning. The Post and Courier's damages were readily repaired, so that their communications were reported as in working order by noon. The wind uprooted the roller mills in North Salt Lake, and the bath house at the Warm Springs and caused a general fright in that section of the city, lest the hurricane should turn into a cyclone.

WAS A RECORD BREAKER.

The storm was a record breaker, in that it extended from the Pacific ocean to the Atlantic coast, snowing at points west of the 100th meridian and east of the 80th meridian, with the heaviest snow falling between the 100th and 110th meridians. The Utah and Idaho floras have probably suffered some, and if it struck those in Idaho as severely as it struck Salt Lake, the loss is probably considerable. It will not be so much, however, now as it would have been had the storm come a few weeks later, during the lambing season. Sheep conditions generally this winter have been very favorable. At State and Twelfth South street a barn was demolished, while two more barns were blown over in the same section, but farther west. On Second South street the barn seemed to take a liking to the illuminated signs which guide the way of the night wanderer to the Bismarck and the Oxford. Both signs were treated impartially, but with disastrous results, and they will need extensive repairing before being put into commission again.

OVER THE STATE.

Last night's storm was pretty much the same throughout the state. While no particular damage was reported, the telephone companies were put to considerable inconvenience. At Park City four local lines of the Bell company were reported down, and communication with Beaver, Cedar City and St. George was cut off. The high wind raised havoc with some of the lines, but the work of repairing them was quickly started and they will soon be in good order again. Reports from other centers throughout the state are as follows:

Logan—The wind blew to almost the extent of a blizzard nearly all of last night. About a foot of snow fell. It tapered off about 6 o'clock this morning, and it has turned very cold.

Ogden—While plenty of snow fell during the night, six or seven inches, there was no wind at all.

Provo—The wind blew pretty hard all night, and about 10 inches of snow fell. It is drifting now, and has turned much colder.

Park City—Not more than six or seven inches of snow fell during the night, but the wind played havoc with the telephone lines, tearing down four of them.

Nephi—"We are ready to cry 'rough here.' We had a regular blizzard all night, and there is about three inches of snow on the ground. It is turning cold."

Manti—Wind, rain, sleet and snow, with the weather turning bitterly cold, is the condition of affairs here.

Tooele—"A high wind blew nearly all night, and when it let up, snow began to fall. There is about eight inches of snow on the ground."

Richfield—"It has been cloudy and quiet whiffly all night, but it is breaking now. No snow fell."

Heber City—"High wind all night and about two inches of snow fell."

## REV. N. E. CLEMENSEN OF LOGAN SAYS THAT HE MARRIED ROSE HAMILTON OF MILWAUKEE.

AND ALSO LOTTIE GREENWOOD

PERSONS ARRESTED MUST BE CONFRONTED WITH CHARGES WITHIN TWENTY-FOUR HOURS.

Senator Sutherland Says Story is False And Senator Burrows Smiled At It.

(Special to the "News.")

Washington, D. C., March 12.—Failing to make out a case against Senator Smoot through testimony thus far produced, the anti-Mormons have started on a new tack. In the city edition of the New York World of this morning, an edition seldom seen outside the metropolis, there are three columns of Smootophobia, which add much to the literature of the celebrated case, but very little to the truth about the senator.

This World story today declares, upon the authority of the "Rev." N. E. Clemensen of Logan, that Senator Smoot was married, Dec. 28, 1904, to Rose Hamilton of Milwaukee, Wis., and that a child was born as the result of this union in February, 1904; and further, that he also married a third wife who is known in social Utah as Lottie Greenwood. It will be recalled that there was talk of an arrest of this "Rev." Clemensen for impersonating an officer a few days ago, and he is evidently playing for a subpoena to testify before the committee, with expenses paid to Washington.

When Senator Sutherland's attention was called to this latest emanation of the "Mormon" rallies he declared emphatically that he knows the whole story as false. Senator Smoot did not care to make any statement further than to characterize the yarn as absolutely absurd and ridiculous. He does not consider it worth any consideration whatever. Senator Burrows smiled but made no comment. Other members of the committee expressed the opinion that it is rather late in the day to start such charges.

It is hardly likely that the committee will summon Clemensen, but it may do so. C. M. Owen, who has had charge of the work of gathering evidence against Smoot, could not be evaded today, but he has frequently asserted that he has never had reason to suppose that Senator Smoot ever married more than one woman.

great danger. In fact it is believed that the mortality among them will be so great as to bring disaster upon the owners.

EFFECT ON SHEEP.

Utah and Idaho Flocks Will Probably Suffer From Storm.

"It is entirely too early yet to tell how badly sheep men will suffer from the storm, as we have no advice as to how heavy it was through the sheep raising country," said Assistant Cashier Henry T. McEwan of the State Bank of Utah, at noon today. "However," he added, "the Utah and Idaho flocks have probably suffered some, and if it struck those in Idaho as severely as it struck Salt Lake, the loss is probably considerable. It will not be so much, however, now as it would have been had the storm come a few weeks later, during the lambing season. Sheep conditions generally this winter have been very favorable. At State and Twelfth South street a barn was demolished, while two more barns were blown over in the same section, but farther west. On Second South street the barn seemed to take a liking to the illuminated signs which guide the way of the night wanderer to the Bismarck and the Oxford. Both signs were treated impartially, but with disastrous results, and they will need extensive repairing before being put into commission again."

It was a bad night for chickens. Housewives who put their flocks to roost in comfortable hen houses with a good evening meal had to dig their fluffy pets out of the snow drifts this morning, and could find only slight traces of the henhouse roofs protruding through the snow here and there.

OVER THE STATE.

Last night's storm was pretty much the same throughout the state. While no particular damage was reported, the telephone companies were put to considerable inconvenience. At Park City four local lines of the Bell company were reported down, and communication with Beaver, Cedar City and St. George was cut off. The high wind raised havoc with some of the lines, but the work of repairing them was quickly started and they will soon be in good order again. Reports from other centers throughout the state are as follows:

Logan—The wind blew to almost the extent of a blizzard nearly all of last night. About a foot of snow fell. It tapered off about 6 o'clock this morning, and it has turned very cold.

Ogden—While plenty of snow fell during the night, six or seven inches, there was no wind at all.

Provo—The wind blew pretty hard all night, and about 10 inches of snow fell. It is drifting now, and has turned much colder.

Park City—Not more than six or seven inches of snow fell during the night, but the wind played havoc with the telephone lines, tearing down four of them.

Nephi—"We are ready to cry 'rough here.' We had a regular blizzard all night, and there is about three inches of snow on the ground. It is turning cold."

Manti—Wind, rain, sleet and snow, with the weather turning bitterly cold, is the condition of affairs here.

Tooele—"A high wind blew nearly all night, and when it let up, snow began to fall. There is about eight inches of snow on the ground."

Richfield—"It has been cloudy and quiet whiffly all night, but it is breaking now. No snow fell."

Heber City—"High wind all night and about two inches of snow fell."

MISS ANTHONY'S FUNERAL.

It Will Be Held in Rochester Thursday At 2 O'Clock P. M.

Rochester, March 13.—The funeral of Susan B. Anthony will be held on Thursday at 2 o'clock. Rev. Gannett of the First Unitarian church, of which Miss Anthony was a member, will officiate.

## SPEEDY TRIALS TO BE GRANTED.

Czar's Government Issues Circular to Governor-Generals and Governors of Provinces.

RESULT OF GREAT OUTCRY.

Persons Arrested Must Be Confronted With Charges Within Twenty-Four Hours.

St. Petersburg, March 13.—The government has sent a circular to the governor-general and governors of the provinces instructing them that persons taken into custody for political offenses must within 24 hours of their arrest be confronted with the charges and allowed to make explanations. The circular also generally insists on expediting the trial of political prisoners. This step on the part of the government is the result of the tremendous outcry raised against the arbitrary action of the local authorities in arresting suspects and holding them without trial or expelling them by administrative order. Over 3,000 persons have been arrested in European Russia since the government entered on its active campaign against the revolutionists.

AGAIN THE CASTELLANES.

Countess Appears Before Judge and Asks for Absolute Divorce.

Paris, March 13.—Countess Boni de Castellane, accompanied by Edmond Kelly, her lawyer, today appeared before Judge Ditté, president of the civil tribunal of the Seine, and asked for permission to amend the proceedings in her application for a separation from her husband, so that the decree will give her an absolute divorce. The application asked for a separate domicile and custody of the children pending the legal procedure. Judge Ditté before fully deciding complied with the usual formality of requiring the husband and wife to appear together for the purpose of interrogating them concerning the possibility of a reconciliation. The latter will fulfill the legal requirements but it is not expected to yield favorable results, as the parties are fully determined to terminate their union. Their joint appearance before the court will occur in four or five days, and immediately thereafter an amended bill will be filed, and a writ will be served on the same grounds as previously. The only change being a petition that the bonds of matrimony be dissolved.

STATEMENT ON BEHALF OF ANTHRACITE OPERATORS.

New York, March 13.—The following statement on behalf of the anthracite operators' committee of seven is published today:

Mr. Baer received yesterday Mr. Mitchell's acknowledgment of the answer by the operators' committee to the proposition made to the anthracite mine workers with advice that the same would be submitted to the miners' committee as soon as possible.

The operators think that they are taking long chances in even offering to continue the present condition for three years longer. This offer was based on the possibility that the business prosperity which characterized the last few years will continue. There is no certainty of this, as any time within the next three years a depression in business may take place which may lessen the demand for coal, and carrying out this contract the operators may be placed at a serious disadvantage.

The presidents of the anthracite coal carrying companies adjourned this evening.

Coal dealers who were seen yesterday said there was an uncertainty in their minds as to whether there would be an anthracite coal strike.

The probable withdrawal of the customary reduction in prices of domestic anthracite during the summer will mean virtually, it was said, an increase in the price.

WAGE SCALE ACCEPTED.

Washington, March 13.—The committee of five, representing the telegraph and station men of the Southern Railway, last night agreed to accept the wage scale of that road. The wage scale has been adopted with a view of fitting each individual case.

Blowing Water Into Hamburg Harbor, Driving Vessels Ashore.

Hamburg, March 13.—A hurricane is blowing the water into the harbor, flooding houses and driving vessels ashore. The country down the coast is flooded and the land batteries are continuously firing alarms, as the landmarks are not visible owing to the severity of the storm.

Emperor William has given up his proposed trip to Helligoland on board the battleship Kaiser Wilhelm. Several minor shipping disasters have been reported.

A GREAT HURRICANE.

Blowing Water Into Hamburg Harbor, Driving Vessels Ashore.

Hamburg, March 13.—A hurricane is blowing the water into the harbor, flooding houses and driving vessels ashore. The country down the coast is flooded and the land batteries are continuously firing alarms, as the landmarks are not visible owing to the severity of the storm.

Emperor William has given up his proposed trip to Helligoland on board the battleship Kaiser Wilhelm. Several minor shipping disasters have been reported.

PREPARED TO FIGHT AGAINST TAKING AN INVENTORY.

Privas, France, March 13.—The population of the town of Concorour, about 12 miles from the coast, determined to resist the taking of the inventory of the church, under the church and state separation law. The doors are heavily barricaded, and strong graticas have been fastened across the windows. A hundred men armed with rifles and provisions for a long siege, are installed inside the building.

HEAVY SNOW IN IOWA.

Des Moines, Ia., March 13.—A heavy snowstorm struck Iowa early today and increased in severity. Street cars have been badly impeded and train service is threatened.

NEWHOUSE ENDORSED.

After the adjournment of yesterday's conference between the big mining magnates, Mr. Newhouse, big holder of the larger interests in the east that no agreement had been reached and that the difficulties were great. This morning Mr. Newhouse received numerous responses to these messages in which his action in holding out as he did received hearty endorsement. While he was perfectly willing to make a personal sacrifice, Mr. Newhouse considered it his duty, as president of the Boston Consolidated, to carefully guard the interests of shareholders; that if any bargain was made, they should receive for their interests what they were worth.

If no further negotiations are entered into, Mr. Newhouse stated today, the plans, now well under way, for the equipment of the mines with milling facilities will be carried out. The plant will go up at Garfield; just as has been intended. The two companies have common interests and the relations will be the most friendly whether there is any consolidation or not.

The Boston Consolidated company has \$1,500,000 in its treasury; amply enough to carry out any future plans that it may have.

NEGOTIATIONS WITH MR. GUGGENHEIM.

"The negotiations with Mr. Guggenheim," continued Mr. Newhouse, "were entirely of a friendly character. We could not agree on the amount of tonnage that the respective mines contain and therefore the proceedings did not reach the point where we could arrive at a basis on which terms of consolidation could be discussed. We believe the Boston Consolidated is worth a certain figure; Mr. Guggenheim believes the Utah Copper has an other valuation. We both agree they are both very great mines. I consider the Utah copper one of the greatest mines in the west; yet I believe the Boston Consolidated has the right to be classed as being equally as great."

WIDE DIFFERENCE OF OPINION.

Mr. Guggenheim, representing the Utah Copper, was seen by a representative of the "News" early in the day; so was Mr. Newhouse, representing the Boston Consolidated. Both stated that there was a wide difference of opinion as to the valuation of the respective properties involved, and neither seemed to offer much encouragement in the

## TAKEN TO CANYON COUNTY JAIL.

Moyer, Haywood and Pettibone Removed From Idaho State Penitentiary.

GOV. GOODING PROTESTED.

Order for Removal Made by State Supreme Court on Atty. Richardson's Application.

Dozens of Deputy Sheriffs Sworn In to Protect Jail and Militia Will be Called Out if Necessary.

Caldwell, Idaho, March 13.—Under a heavy guard, Moyer, Haywood and Pettibone, who have been indicted for the murder of former Gov. Steunenberg, were removed today from the state penitentiary in Boise to the Canyon county jail in this city against the protest of Gov. Gooding.

To forestall any effort at rescue, which he believed might be attempted, Sheriff Nichols has sworn in dozens of deputy sheriffs who will patrol the jail night and day while the federal officials are detained there. If this protection is not sufficient, Gov. Gooding will call out the militia.

The order of the supreme court to remove the prisoners to the jail was made yesterday after an appeal upon application of Atty. Richardson after a conference with his clients. The three men expressed themselves as dissatisfied with the treatment accorded them by Warden Whitney and insisted upon being taken to the county jail, where they should be kept under the statutes.

FAMINE CONDITIONS IN JAPAN BEING RELIEVED.

Chicago, March 13.—N. Sato, first secretary of the Japanese legation at St. Petersburg, stopped in Chicago yesterday on his way to Russia, where he will assume his official duties. Mr. Sato said that the famine conditions in Japan are being rapidly relieved with the help received from other nations.

"We wish to express to the American people our gratitude for the generous contributions of money and supplies which have been so liberally contributed by them for the purpose of relieving the awful conditions which have prevailed in Japan owing to the famine," said Mr. Sato. "The cause of the famine was the enormous quantity of rain which fell last season in the islands of Japan. The result was floods ruined the rice crop and the people in many parts of the empire have died in large numbers for lack of food. An unusual snowfall has been expected a good crop of rice next year for the water will be stored in the mountains to be ultimately used for the irrigation of the rice fields. We are hopeful that the great snowfall will be followed by a dry season."

A GREAT HURRICANE.

Blowing Water Into Hamburg Harbor, Driving Vessels Ashore.

Hamburg, March 13.—A hurricane is blowing the water into the harbor, flooding houses and driving vessels ashore. The country down the coast is flooded and the land batteries are continuously firing alarms, as the landmarks are not visible owing to the severity of the storm.

## HUNDREDS OF FUNERALS.

Those of Miners Who Perished in The Great French Mine Disaster.

THE VICTIMS NUMBER 1,212.

Heroic Work of German Rescue Corps in Recovering Bodies Excites Admiration and Praise.

Paris, March 13.—Hundreds of funerals are being held today at the towns surrounding Courrires, where the mine disaster Saturday resulted in the loss of over 1,000 lives. Snow has fallen, but lines of mourners fill every road, many of them carrying caskets, where hearse were not obtainable. At Billimontigny, a rough altar was erected in the open air and funeral services were conducted over 60 bodies. Another and similar ceremony occurred at Mericourt over the unidentified dead.

The company's latest figures show that there were 1,212 victims of the explosion.

Mining Director Moyer of Herne, Prussia, with his rescue corps of Westphalians, recovered 25 more bodies this morning. The heroic efforts of the Germans are exciting admiration and praise.

LAWYER BROWNE ON TRIAL CHARGED WITH FORGERY.

New York, March 13.—Charged with forgery committed in an attempt to control of property valued at \$1,000,000, Henry H. Browne, a lawyer, who at one time published Browne's civil procedure reports, was placed on trial.

As outlined by an assistant district attorney Browne has had an elaborate scheme which involved bringing into existence persons who never had been heard of and representing that they needed all the money they could get to land. At one time, it is said, he posed as William R. Hubert before a notary public, who has identified him since his arrest.

In this specific charge is made, E. B. Peterson, a Norwegian, owned large tracts of land in Inwood and Mount Hope. In 1888 he determined to go back to Norway and for this reason he bequeathed the land to his wife. Before sailing, however, he decided to take his wife and one child with him. They sailed on the steamship Geiser, which was run down by the Tinnigvald off Seab Island and the Petersons were among the passengers who perished. They had no heirs and the property was appraised without an owner.

Browne had known Peterson and eight years after the disaster he said he had found two heirs to the property. They were Charles A. Clark and a man in Boston named Wing. Soon thereafter a deed was filed conveying part of the property from Clark and Wing to John T. Key. There were transfers of other pieces of the property, Kelly and Ignatius F. O'Rourke transferring their part to William F. Colclinton. Mr. Train declared all these names were fictitious.

Three years ago there were recorded two mortgages on certain of the properties. They were for \$1,300 and were made to William R. Hubert, who was supposed to have taken the property from the Petersons. There were transfers of other pieces of the property, Kelly and Ignatius F. O'Rourke transferring their part to William F. Colclinton. Mr. Train declared all these names were fictitious.

## GREAT SMELTER FOR UTAH COUNTY.

Pelican Point Lands of Samuel Newhouse May be Utilized For This Purpose.

NUCLEUS FOR BIG COMPANY.

Significant and Interesting Statement Made Today by Close Friend of Mining Magnate.

Now that there does not seem to be much likelihood of the Newhouse mining interests in this state being joined with those of the American Smelting & Refining company, the question has arisen: What is to become of that great body of land out at Pelican Point on the west
