MINING, BUSINESS AND STOCKS

FOUND MOUNTAIN IS MAKING GOOD

Sunnyside Mill is Turning Out Large Quantity of the Yellow Bullion.

FULL CAPACITY 2,000 TONS.

Fine Showing Now Disclosed in Mine —Good Quality of Gold.

Louis D. Gordon, of Salt Lake, the discoverer of the now famous Round Mountoin district in Nevada, and who is heavily interested in the Sunnyside mine and mill in this camp, is more than pleased with the operation of both mine and mill during the month of November, and has received word that the mill output for the period stated was nearly $20,000 in the yellow metal, and that the bullion is now safely stored in the safe of the company, awaiting transportation to the mint. When the mill is running to its full capacity the plant will probably handle from 1,800 to 2,000 tons of ore monthly.

PROPERTY IN FINE SHAPE.

In speaking of the condition of the Sunnyside property the Nugget, of Round Mountain, says:

On Tuesday mine superintendent James McDonald secured some wonderful pannings from the old Spencer Baihly-Campbell lease.

A piece of rock half the size of a man's fist panned between two and three dollars worth of gold. To the naked eye, onely one or two small particles of gold were visible before the rock was broken up and panned, after which was discovered a pan of the gleaming particles some of them as large as nail parings. The color was a much deeper shade of yellow than usually characterizes the gold in the district and it is believed to be a higher grade of the metal.

The work of following down the hanging wall of the big ledge on the 250 foot level has been temporarily suspended while the main incline is being extended. The pitch of this extension will not be quite as steep as the original work and its purpose is to cut the ledge mentioned, at a point some distance below the winze which was being sunk.

The company house has been completed and is an attractive two story frame building with a porch on the side overlooking Big Smoky valley. The interior work has of course not been finished. This will be used as offices and living rooms for the officers and directors of the company and their friends when visiting the camp.

ON STOCK EXCHANGE.

Few Active Stocks on the Morning Call—Colorado the Star.

Colorado was the active feature on the morning call and a large number of sales were recorded, from 2.17½ to 2.27½. Seven Troughh took a decided drop, reaching a low mark of 29. The total sales mounted up to 39,400 shares, with a selling value of $22,044.50

There was little doing in the unlisted stocks, only one sale being recorded. Ohio Copper sold for 2.02½ and Ohio Kentucky was quoted at 2.00 at 2.10.

The following are the latest quotations and sales:

COMBINE SPOKANE MINES.

Large Properties Will Consolidate and Greatly Reduce Expenses.

Special Correspondence.

Spokane, Wash., Dec. 13.—Articles of an agreement to consolidate the North Moccasin Mining company, in which John A. Drake, a millionaire of Chicago, owns the controlling interest, and the Kendall Mining company, controlled by Spokane capital, and place the two properties under the management of a new company in March, 1909, have been filed in Idaho. The agreement is signed by A. E. Campbell of the Kendall and H. M. Rae, president of the North Moccasin.

The agreement provides that the Kendall shall treat all ores from the North Moccasin prior to the consolidation not to exceed 300 tons a day at a charge of 75 a ton. The North Moccasin is to meet the expense of any changes in the milling plant that may be necessary. The Kendall is to furnish the North Moccasin with electrical power for operating its tramway at $72 a horsepower a year. H. H. Lang, superintendent of the Kendall and President Rae of the North Moccasin are to meet on or before March 15, 1909, and agree as to the actual value of the properties.

The North Moccasin is a gold property. It has ore bodies at a great depth, carrying values of $20, which is high for a cyanide proposition. So far the development work at the Drake property has all been with a view to ascertaining the probable value of the ore bodies. The two companies are capitalized on the same basis—$2,500,000, with 50,000 shares. The stock of the North Moccasin has a present market value of about $2 a share, or a total of $1,000,000, while the Kendall stock is quoted at $1 a share, or a total of but $500,000.

RETURNS FROM ARIZONA.

Superintendent Hardy of Mascot Copper More Pleased Than Ever.

L. G. Hardy, superintendent of the Mascot Copper mines at Dos Cabezas, Arizona, is back from a trip to the property and is more pleased than ever with the splendid showing. While only a small force is now employed in the development work, the ore reserves of the mine are constantly being added to and when the time comes for active production, a large tonnage is assured. The veins on the property are very large, running from 10 to 30 feet in width presenting in many places full breasts of solid sulphides. The ore is of an excellent character for smelting as it carries large excess of iron.

Mr. Hardy says that within a very short time a daily production of 200 tons could easily be maintained, with no further development of ore than is now disclosed. The present work is being confined to development work only and no attempt is being made to extract ore in any quantity. With a concentrator or a smelter the Mascot could probably be put on a paying basis within a very short time.

ELY MAN VISITS GARFIELD.

C. B. Lakenan, general manager of the Steptoe Smelting & Milling company arrived yesterday from the west, and went out to Garfield with Manager Whitely to look over the plant there. It is understood that the object of Mr. Lakenan's visit is to arrange with the Garfield smelter to handle the concentrates from the first unit of the new concentrator now being completed at Steptoe, Nev. The first unit was completed Nov. 1, and the second and third units are now approaching completion. But as the smelter is not running, it is necessary to make some arrangement for handling the concentrates.

MINE ASKS FOR RECEIVER.

The following dispatch was received late yesterday over the Pollock wire from a director of the Bonnie Clare Mining company:

"In view of labor troubles in Nevada, the difficulty of getting cash and the comparatively isolated position of the mines, the management decided it was best to have a receiver appointed and thereby get the protection of the federal court. The mines are in better shape than ever; the mill is, or was yesterday, running, and is making money. I understand there is enough concentrates on hand to pay current debts, but the smelters will not receive any pay for them. The Foresters, who own a majority of the stock, applied for the receiver.

"The mill has been running on the lowest grade ore they have and the first cleanup made about $30,000. When they get it moving on the better grades it will make a much larger showing. If times had been normal the mill would have been running much sooner, but this labor trouble would sooner or later have to be settled. I have not sold a share of my stock and none of the big holders have, so far as indicated by the books."

PIOCHE DEMIJOHN IS MAKING RECORD

Samples of Rich Rock Received Yesterday by Members Of Company.

HAVE UNCOVERED BIG LEDGE.

Property in Position to Ship When Conditions Warrant Such Action.

Members of the Pioche-Demijohn company are highly elated over the new developments at the Pioche mines. O. A. Bailey is in receipt of several samples from the latest strike and is awaiting the returns from the assayer. The property of the company comprises two consolidated groups; the Demijohn and the Lucky Boy, each of six claims.

WORK AT THE DEMIJOHN.

On the Demijohn group a shaft has been sunk to a depth of 100 feet and from the bottom of this a drift 33 feet was run. Here the ore was encountered and followed for 66 feet. The drift is really on top of an immense ore body, a full breast of five feet now showing. The fissure is a true fissure vein and is widening with each foot gained. Samples received from this vein give results of from 15 to 66 per cent lead and from 50 to 110 ounces in silver. The ore is a heavy silver-lead carbonate, carrying an excess of iron.

LUCKY BOY LOOKING WELL.

On the Lucky Boy group, several showings of good ore have been opened up. In the early days this property produced a great quantity of iron ore, which was used by the smelters for fluxing purposes. In sinking through this iron, the present company broke into a body of copper ore at a depth of 40 feet. The first sample showed values of 21.9 per cent copper and a little silver on a parallel fissure about 100 feet further on a ledge of ore is exposed, averaging 4½ feet wide, and which assays 215.2 ounces in silver and 6 per cent in lead. A six-inch streak from this same vein carried 381.9 ounces silver and 12.3 per cent lead. There are many other fine showings on the property and the company believes it has the making of a big mine.

A force of men is now employed doing the assessment work and incidentally sacking a little ore, although this cannot be shipped under existing conditions. One thousand ore sacks were recently sent to the mine and of these about 500 have already been filled. Ten samples are now being assayed by a local firm and the returns from these are expected tomorrow.

The officers of the Demijohn company are: Joseph S. Free, president; Owen A. Bailey, vice president; William M. McCrea, secretary and treasurer, and Frank Parrish and E. O. Best, directors.

ASSESSMENT REQUIRED.

No Legislation Relieving Locators of Work Will be Enacted

Special dispatches from Washington are to the effect that no measures relative to assessment work for 1907 will be considered before Jan. 1. Senator Dick, chairman of the committee on mines and mining, has decided that h's committee will hold no meetings until the reassembling of Congress after the holidays.

This makes it impossible to secure the passage of the bills introduced by Senators Teller and Borah, providing that mining claims shall not be forfeited through failure of the entrymen to perform the required assessment work for 1907.

Senator Sutherland says that it is certain that no legislation will be enacted pertaining to this matter. He has received many letters from his constituents and finds that the majority of prospectors and mining men are opposed to the proposition.

This latest turn of affairs will cause a big flurry among the mining fraternity as many were holding back with hopes of favorable action by Congress. Now, however, the assessment will have to be done and there remains only the rest of the present month in which to do it.

REPORT OF RECEIVER PARKS.

The report of Received George W. Parks, in the case of Clarissa Maison against the Snyder Consolidated Mining, Milling & Prospecting company, was filed in the Third district court yesterday. Mr. Parks places the valuation of the property at $374,542.70, including supplies and material on hand. The company owes a general debt of $213,274.16 and a contingent debt of $242,085.61 to S. W. Tulloch, for money personally spent in development. Mr. Parks asks that he be permitted to borrow an additional $10,000 with which to do the annual assessment work.

DEVELOPMENTS AT FARRELL.

Strike in Salt Lake Property Talk of Seven Troughs District.

The flurry in financial circles seems to have but little effect on the mining industry of the Seven Troughs district in Humboldt county, Nev., which takes in the Farrell country in which are located the holdings of the Salt Lake-Nevada Exploration company of this city.

This company is pushing work in the development and exploitation of its valuable property, and is in such admirable financial condition that this work can be successfully carried on for an indefinite period. The whole country around Farrell is excited in the discoveries made by the company, concerning which the Seven Troughs Miner, of Vernon, says:

The work of opening upon the rich finds on the Wild Cat and Little Hero claims, the property of the Salt Lake-Nevada Exploration company, is being pushed with all possible vigor, and the strikes are proving a greater importance than was at first imagined. At present a force of six miners are employed on the property, and it is understood that more men will be put to work in the near future.

The Gordon and Kimball strike on the Wild Cat claim is proving a bonanza. The ledge has been opened by trenching for more than 350 feet, and the shaft recently started is now down about 40 feet, all in ore. There is at present sacked six tons of rock that will average between $300 and $500 a ton.

The ledge, which runs north and south, has granite as hanging and foot walls, with a contact of yellow porphyry a short distance away. The shaft is being sunk on the ledge, which dips to the east, and it is expected that the yellow porphyry will become the foot wall when a depth of a hundred feet is attained. The ledge, which is of a fine grain white quartz, varies in width of from four to 10 feet, as has been proven. It gives an average return of from $50 to $75 in gold and silver, the former predominating. There are two high grade streaks, the combined width of which will average about 30 inches, one lying against the hanging wall and the other against the foot wall. These two streaks will average from $300 to $500 a ton.

The strike made by Theodore Parks on the Little Hero claim is showing up equally as well as the Wild Cat find. Trenches have exposed the ledge, which has an average width of three feet, for about 200 feet. The ledge which runs east and west, lies in granite, but if it continues its present dip to the south, a deposit of phonolite, which lies close to the ledge of the surface, will become the foot wall within a depth of a hundred feet. The vein will average about $100 a ton across its entire width, and the high grade stringers on the foot wall, which measures about 16 inches, assay from $300 to $400 a ton. A shaft is being sunk on the ledge and every round of shots gives the discovery a better appearance. If the Little Hero and Wild Cat ledges hold their present courses, they will intersect on the Wild Cat claim, and it is expected that an immense body of high grade ore will be encountered at the junction.

CUMBERLAND ELY MILL.

(Pollock Special Wire.)

Boston, Dec. 12.—Boston News Bureau says: We are informed that the concentrator of the Cumberland Ely, Nevada Con., will not go into commission before April, when initial capacity of 500 to 1,000 tons is scheduled to be ready.

Just what the nature of contracts with North Butte and Butte Coalition at the Washoe smelter are cannot be leaned, but Manager Carson says that North Butte will make arrangements with some other smelter to take ores.

UTAH CONSOLIDATED.

(Pollock Special Wire.)

Boston, Dec. 12.—Boston News Bureau wires: Unless the Utah Consolidated company succeeds in effecting a compromise with the farming interests conferences which are now being held, which will obviate the closing of the Highland Boy smelter early in January, when the court injunction goes into effect, it will probably ship a portion of its ores to the Garfield smelter of the American Smelting & Refining company. Directors of the company meet in New York next week for dividend and owing to the prospective large expenditures necessary for the building of a new smelter, $1,500,000, and the possibility of a greatly restricted output, there is natural fear that the next dividend may be passed.

Butte dispatch says: "John Gillie, general superintendent and acting manager of Amalgamated Copper properties, has returned from the directors' meeting in New York, and says board intended closing down all mines and smelters of the company, was losing $350,000 per month in operation, but decided to accept suggestion of concentrating operations at Boston and Montana, which can show small profit on 13-cent copper. Since general curtailment order several months ago Amalgamated Copper has been producing between 7,500,000 and 8,000,000 pounds per month. This output will be but little reduced by concentration in B. & M. Copper will advance in price when manufacturing industries resume full operations; they will resume when money conditions improve and public confidence is restored. Financial conditions will improve—nobody knows when."

CONCENTRATES.

The directors of the Utah mine met yesterday and posted a Christmas dividend of 3 cents a share, or $3,000, payable on the 17th. The books close on the 14th.

Ore and bullion settlements in this city, as reported late yesterday by W. S. McCornick & Co., amounted to $70,000, as follows: Gold, silver, lead and copper ores, $10,000; base bullion, $60,000.

President Jacobson of the Columbus Consolidated is at Alta, inspecting the mine.

A New York dispatch says that all grades of copper were reduced one-eighth of a cent yesterday.

James C. Dick has accepted the superintendency of the Yampa mines at Bingham, and will take his new position the first of the year.

Work at the Cocomongo Gold mines at Cherry Creek, Nev., will be resumed at once, and the new mill will be rushed to completion.

Howard P. Saunders, the consulting engineer of this city, will return tomorrow from a professional visit to the mines.

Hyrum Lynee, president of the Reliance Mining & Milling company, whose property is at Tenabo, Nev., has returned from an extended visit east. Rumors that the Reliance property is to be sold are heard on the streets, but no confirmation of these can be secured.

CAUGHT WITH THE GOODS.

W. F. Bell Steals Jewelry and Cash From Room Mate.

At noon today Officer Gillespie arrested at the Oregon Short Line a man named W. F. Bell on the charge of grand larceny. The man stole a gold watch, $10 in cash, two gold rings and a stick pin last night from J. T. Rule, who occupied a room in the American house on Commercial street. According to the story related to the police, Rule took Bell into his room and furnished him a place to sleep. During the night Bell disappeared, and with him went the valuables belonging to Rule. A description of Bell was furnished the police, and Officer Gillespie spotted the man at the depot as he was about to take a train for the north. The money, watch, rings and stick pin were found on him and Rule identified the man.

$25.00 FOR A NAME

The Ensign Amusement company offers $25.00 for the most appropriate name for their new hall on North Temple street. The prize winner will be announced on the opening night, the date of opening to be given later on. Submit name to Ensign Amusement company, 25 east North Temple.

MARKET WAS DULL, CLOSING WEAK

New York, Dec. 13.—The stock market opened dull and practically unchanged from yesterday's closing. An abrupt fall of two points in New York Central started a general decline in which the bear party was very active. After spirited selling for about half an hour, which resulted in many sharp losses, the market became very dull, but steadier for the western stocks.

Canadian Pacific fell 2¼, Great Northern preferred, Northern Pacific, 2 and International Paper preferred, 1¼, and St. Paul, Pennsylvania, Reading, Louisville and Nashville 1, American Smelting, American Sugar and Distillers securities 1.

The market hardened steadily until it made up all of its early decline. A sharp drive was then made against American Sugar and when it broke to 96¼, the lowest price of the year, the general market also fell back slightly, but soon recovered. Chicago Great Western preferred "A" dropped 8 points on selling, inspired by the postponement of dividend payment on its debtenture stock. Brooklyn Union Gas also yielded 4¾. Westinghouse Electric 1½, and Colorado and Southern and the first preferred and Consolidated Gas, 1.

Bonds were irregular.

There was a reduction in the volume of business after 12 o'clock, but the tone of the market grew steadily better owing to the demand for Reading and the support of the metal stocks. New York Central and American Sugar continued heavy and ruled near the low point. Reading and U. S. Rubber advanced 1. There were losses of four points in Westinghouse Electric first preferred and two in Northwestern.

The closing was quiet and weak. Continued liquidation of Amalgamated Sugar discouraged buying of other stocks and rendered the task of the bears easier in forcing out the long stocks in the general market. The unfavorable October earnings of the Harriman roads assisted the decline. Prices averaged the lowest of the day and stocks that previously had some resistance became quite weak. American Sugar sagged 4 points. Great Northern pfd., 2; General Electric, 1½, and Union Pacific, Southern Pacific, Reading and Baltimore & Ohio, 1.

PRODUCE.

CHICAGO.

Chicago, Dec. 13.—The wheat market opened active today with prices inclined to be weak. Cables were lower and the weakness of the stock market was also a depressing factor. Buying by commission houses caused a light rally soon after the opening, but prices soon declined. May wheat opened ¼@¼ to ⅜@½ cent lower, at 99⅞ to 100⅛, sold up to 100⅜ and then declined to 99⅝.

The corn market opened firm but soon eased off in sympathy with wheat. May corn opened a shade to ⅛ cent lower at 56½@56⅝ to 56¾, sold at 57⅛ and then declined to 56⅞.

The oats market was weak. Prices showed some firmness immediately after the opening, but soon eased off. May oats opened ¼ lower at 53⅜, and after touching 54, sold at 53¾.

The provisions market was active and prices were weak because of lower quotations for live hogs. May pork opened 17½ to 22½ lower at 13.05 to 13.10. Lard was 7½ to 12½ cents lower at 7.85 to 7.90. Ribs opened 7½@10 to 12½ cents lower at 7.00 to 7.05.

Close: Wheat—December, 93¼; May, 1.00¼@1.00¼.

Corn—December, 55; May, 56⅝.

Oats—May (old), 53½@53⅝; May, 51½@51⅝.

Pork—January, 13.47½; May, 12.92½.

Lard—January, 7.72½; May, 7.80.

Ribs—January, 6.72½; May, 6.95.

Rye—Cash, 77.

Barley—Cash, 68@98.

Clover—Cash, 11.00@15.00.

Wheat—The market rallied at the end of the first hour because of a firm closing at Liverpool but later prices here slumped off. The close was easy with May ¼ cent lower, at 100⅛@100¼.

Corn prices declined late in the session in sympathy with wheat, May selling off to 56⅝. The close was easy, with May a shade lower at 56⅝.

EVAPORATED FRUITS.

New York, Dec. 12.—The market for evaporated apples is firm, without quotable change. Fancy are quoted at 12c; choice, 10@12½c; prime, 8¾@9¼c, and 1906 fruit, 8⅞@11c.

Prunes are moving slowly and it is reported that some concessions have been made on the smaller sizes. Quotations still range from 4¾ to 16c for California fruit and from 7c to 7¾c for Oregons.

Raisins are easy on spot, with loose muscatels quoted at 7@7¼c; seeded raisins, 7@9¾c; and London layers, $1.75@1.80.

BUTTER AND EGGS.

Chicago, Dec. 13.—Butter—Strong. Creameries, 20@28½; dairies, 17@25.

Eggs—Steady, at mark, cases included, 24@25; for fresh stock; others as low as 18.

SUGAR AND COFFEE.

New York, Dec. 13.—Sugar—Raw, firm; fair refining, 3.30@3.35; centrifugal, .96 test, 3.85; molasses sugar, 3.00@3.05.

Refined firm; crushed, 5.50; powdered, 4.90; granulated, 4.80.

Coffee—Steady, No. 7 rio, 6; No. 4 Santos, 7½.

TODAY'S MONEY MARKET.

New York, Dec. 13.—Money on call firm 6 at 10 per cent. Ruling rate 10 per cent; closing bid ——; offered at 6 per cent.

Time loans nominal; 60 days, 12 to 15 per cent, and 90 days 10 to 12 per cent; six months, 8 per cent.

Close: Prime mercantile paper 8 at 10 per cent.

Sterling exchange steady with actual business in bankers' bills at 485.20 at 485.25 for demand and at 479.50 at 479.55 for 60 day bills; commercial bills 479.25.

Bar silver 54⅞.

Mexican dollars, 43½.

Government bonds strong; railroad bonds irregular.

WHALE SWALLOWED KNOT LINE AND ROTATOR.

San Francisco, Dec. 13.—With shrieks that rose up high above the shrill and awful howling of the hurricane, a tortured whale rent the night air for six long hours as it vainly strove to vomit the knot-line and rotator of the schooner J. M. Weatherwax, which it had swallowed.

The disturbance in the interior economy of the monster which swallowed Jonah was not a circumstance compared to the frightful agony suffered by the one which came along from Eureka with the Weatherwax as the knots were surely and safely reeled off in its alimentary canal. The Weatherwax took 10 days to come down from Eureka to this port and part of the delay is attributed by Capt. Osterhius to the mad struggles of the whale in trying to disgorge the rotator. According to the log of the vessel a monster whale was found to have swallowed the knot-line and rotator at the stern of the vessel. For hours the monster screamed in agony as the schooner, forced along at 15 knots an hour by the storm, caused the rotator to inflict awful external wounds on the Leviathan. Death ended the suffering of the whale shortly after the line was cut by a tender-hearted sailor.

CORTELYOU SAYS IT'S A LIE.

(BULLETIN.)

Washington, Dec. 13.—In answer to inquiries as to report which gained some currency here that Secy. Cortelyou is about to resign from the cabinet, the secretary's sole comment was:

"That is anothr lie."
