MINING, BUSINESS AND STOCKS.

MINING MARKET QUITE ERRATIC.

Few Stocks Were Active and Some Traded Heavily.

MAY DAY WAS THE FEATURE

Rapid Advance of the Stock Caused Surprise—Majestic Very Active and Stronger—Park Issues Weak.

Considerable business was transacted on the mining exchange this morning notwithstanding that the market was exceedingly erratic. The recorded transactions involved 58,055 shares and over $32,507. Prices were firm in almost every instance and stocks generally moved to higher figures.

May Day was undoubtedly the main feature and with sales aggregating 32,600 shares closed with bids of 38. The stock advanced from 23 to 30 on news of important developments in the lower workings of the mine.

Majestic was very active, 2,000 shares trading at 3.00 and 3.05 a share. The stock was very strongly held.

The Park City issues were with the excetion of New York, California and Lone Pine, marked down. Daly-Judge traded at 9.90, and Wabash at 2.20.

Lower Mammoth and Century each developed strength and closed at higher prices, and the session closed on the following market:

MAJESTIC HAS FULL TREASURY.

Smelter Erection Will be Rushed, Also Mine Development.

GEO. E. KEITH IMPRESSED.

Connecticut Millionaire Buys Big Interest—General Manager Farish Assumes Charge of the Properties.

The Majestic Copper Mining company is not only completely out of the woods, but with a full treasury is in a position to carry to successful completion the magnificent plans of its promoter and president, A. B. Lewis. Thoroughly convinced of the merits of the big Beaver proposition, Geo. E. Keith, the Connecticut millionaire and 20 other easterners have purchased such an immense interest in the company's treasury stock that the lack of means is a thing of the past.

At an elaborate banquet Saturday evening at the Knutsford various toasts were offered and speeches made and just prior to the conclusion, Wm. Farish, the eminent expert, now general manager of the company, expressed himself as follows:

Assuming that the statements (referring to those in reports on the property) I have made to you are correct, and which are true, to the best of my knowledge and belief, in regard to the value of the ores and the probable quantities which they will develop, following out the general history of all mines located in similar formations, I have no hesitation in stating that the future of the Majestic properties, under good and honest management, should and will, in my opinion, develop into one of the great commercial enterprises of this era in mining.

The ores are present on each and every group, sufficient in value to justify large profits, and it is only a question of development and equipment to realize the fondest expectations of the most avaricious. You have thousands of tons already exposed upon the surface and above very superficial development, and it is only a question of the continuance of these vast ore bodies, which you have each and all personally seen, to depth to make this one of the great and most permanent enterprises of the age. That they go down in a majority of cases, can hardly be doubted, for if they do not it can only be said in this instance alone has nature forsaken her trodden path, which I have followed for over 40 years.

THE HONORINE TUNNEL.

Great Drainage Channel Has Been Completed 1400 Feet.

Secy. Ellingwood of the Western Exploration company this morning gave out the information that the great Honorine tunnel has been driven 1,400 feet towards its final destination. Work is progressing under Supt. Raddatz at the rate of about 20 feet a day.

Latest reports are to the effect that there is as yet no indication of water in the tunnel and the rock is somewhat harder necessitating slower progress.

The big tunnel will be driven with all possible energy and when completed it is expected will drain no fewer than 15 properties at least half of which have got ore bodies of commercial proportions and value at present.

HORN SILVER ANNUAL.

Stockholders Will Consider Smelter And Zinc Propositions.

The stockholders of the Horn Silver company will meet in this city tomorrow and it is not improbable that most interesting developments will result. President Allan C. Washington has already arrived in the city and it is stated unofficially that prior to his leaving some move will be started with a view to relieving the smelting situaably handle its immense zinc deposits. tion and enable the company to profit.

It is stated as a possible result of the meeting that the Horn Silver will erect a smelter of its own in which all its ores may be treated.

KENNEBEC IS LAUNCHED.

Big Alta Company That Will Continue Work This Winter.

The Kennebec Mining company is the name of a corporation which has just filed its articles with the county clerk. The company is capitalized at $400,000 in $1 shares and organized for the purpose of owning and operating the old Reed and Benson group at Alta.

The directors are Geo. H. Robinson, Col. John W. Donellan, W. J. Craig, Chas. W. Bennett, Albert W. Casey, S. M. Levy and W. F. Snyder.

It was stated today by a director of the company that development work will be continued on the property all winter and it is expected that within a few hundred feet the ore bodies from which much wealth was taken in earlier days will again be encountered.

OCTOBER DIVIDEND POSTED.

Daly-West Directors Order Another $108,000 Distribution.

Divident checks aggregating in amount $108,000 will on Oct. 15 be forto the shareholders in the Daly-West Mining company of record Oct. 10, when the books of the company close.

This dividend will be the fourth in the sum of $108,000, or 60 cents a share to be distributed, while during the year no less than $792,000 has been distributed. The grand total with the October dividend amounts to $2,043,000.

Supt. John A. Kirby recently staed that never in the history of the mine has there been more ore blocked out than now while the values continue as excellent as ever. Over 1,500 tons of ore is now being shipped weekly.

NOTES FROM SEVERAL CAMPS.

Interesting Developments in Bingham, Beaver and St. George.

In its review of the week the Bingham Bulletin has the following notes:

It is said that a year ago the Neptune-Kempton property might have been gobbled up by the United States company for less than the apex suit has already cost, and it is not yet fairly begun.

With three apex suits on, and others threatened, Bingham seems in a fair way to get its share of notoriety in the courts. The legal battles, however, indicate that there is something in the district worth fighting for.

The Ben Butler got in two more carloads of ore Monday—the last of its September shipments—bringing up the total to about 400 tons of crude and concentrates. In the bins there are 150 tons of first class and 150 of milling. The latter is being hauled to Dewey mill, and the crude will go to the depot as soon as it can be hauled. At present the daily average output is 12 to 18 tons of milling. The mine is making a fine showing. All around a force of 28 men is employed. Indications are that October will beat the Butler's shipment record.

BEAVER.

Reports from Milford are to the effect that 50 men are at work at the Majestic smelter site, while at all the properties of that company work is being pushed. Other operations as reported by the Beaver News are as follows:

A deal involving 18 valuable iron claims in Iron county was closed up in Beaver this week. The claims belong to James McGarry, who gave an option to George E. Lane of Milford. The price to be paid is $1,800 and the option runs for six months. In the transaction Mr. Lane represents A. R. Merritt, a big iron operator who formerly resided at Duluth, Minn., and is now at the head of the Nevada Oil company. Mr. Lane was unable to say what Mr. Merritt's intentions were with reference to development of the properties.

The Success Mining company, represented by George E. Lane, proposes to do some important development work on its promising property just west of the Copper Mountain. The group consists of five claims, which are traversed by four veins, croppings from which carry 7 per cent copper. It is proposed to sink a shaft 450 feet at the intersection of these veins, and Mr. Lane is now advertising for bids for the first 100 feet.

ST. GEORGE.

Special advices from St. George indicate very much activity at the Dixie and Silver Reef properties. The Utah & Eastern company (owning the Dixie) has laid off most of the men at the mine and put them to work on the canal and road leading to the new smelter. The work being done at the mine now is dead work. It is the intention of the management to rush the building of the new plant to completion as soon as possible.

The Silver Reef Mining & Refining company, organized to work the tailings of the Barbee & Walker, Shrysty and Leads dumps at Silver Reef, has all its machinery on the ground and is busy putting it together. It expects to be running at full blast in about ten days.

MINING NOTES.

The Storey of Kelton, Utah, has a car of ore awaiting sampling.

Four cars of Bullion Beck ore and five of Mammoth will be marketed this afternoon.

P. J. Quealy, manager of the Kemmerer Coal company, is again visiting in this city.

Lower Mammoth high grade ore to the extent of two carloads will be marketed tomorrow.

Tug Wilson, the well known mining man, is expected in the city from Tonopah some day this week.

Ore and bullion settlements in this city on Saturday as reported by McCornick & Co., amounted to $86,050.

A. L. Dickerman has returned from Colorado and hopes soon to get the enlarged zinc plant at Park City in operation.

Resident Manager Anderson of the Tonopah company will today receive settlement for two carloads of Tonopah ores.

The Honest Abe and Columbia of Bingham each have a car of ore on Bingham each have a car of ore enroute to the smelters today.

Manager Levy of the Sampson of Bingham has one car of lead ore on today's market and a car of copper ore enroute from the mine.

The Shilow and White mine of Battle Mountain, Nevada, each have a car of ore en route to the American smelter in this valley.

The Conklin sampler was today in receipt of two cars of ore from Tintic and one from Kelton, Utah; also, of two cars of ore from Nevada.

O. M. Ladd, the special representative here of the Colorado Fuel & Iron company, has returned from a ten-days' visit to Iron county properties.

Grand Central dump ore to the extent of five carloads and six carloads of Eagle and Blue Bell ore was sent to the Bingham Con. smelter this morning.

The Taylor and Brunton management this morning reported the following shipments as having been sampled: 20 carloads of ore from Tintic; three cars from Bingham and two from Tonopah.

Mgr. George Moore of the Sunshine is scheduled to reach the city from the east some day this week, and following his arrival the announcement is expected that the mill capacity at the Sunshine will shortly be about doubled.

Burlington Route
A Thousand Miles of Comfort
There's not a piece of track in all America that is better built, safer, or easier to ride over than the Burlington Route from Denver to Chicago.
A trip over it is the most notable experience in the trans-continental journey. For more than a thousand miles you are transported at flying speed. Noise and dust are noticeably absent. If it were not for the landscape that rushes past at 60 miles an hour you would hardly believe you were moving.
Through sleeping-cars for Chicago leave Salt Lake at 3:15 p. m. daily. Through tourist-cars Wednesdays and Fridays.
Glad to give you more information.

MILL MEN
Will save money and delay by communicating with our agent,
JOS. W. WILSON,
237 South Sixth East, St., Salt Lake City. Telephone, 736 D.
He has constructed more Roller Flour Mills than any other man in the Rocky Mountain country. Also improved more Water Powers than any other man in the West. His estimates are always correct and satisfactory. He is also among the very best informed men either east or west, as to Salt Refining Machinery.
He handles mill supplies of every description, steam boilers and pumps, steam engines of every popular make, together with steam and belt hoists, with levers interchangeable from right to left hand; screens, rotary bolters, races and roller mills.
