MINING, BUSINESS AND STOCKS.

UTAH APEX ISSUES ITS ANNUAL REPORT

Company Shows That it Is Able to Make a Mining Profit of $124,185 With Old Milling Plant.

Some interesting facts relative to the Utah Apex Mining company at Bingham are contained in the annual report for the year ending Aug. 30, 1909, which has just been issued. The company shows that in spite of the large amount of development work, and the waste due to the old mill which has now been remodeled, the company was able to make a mining profit of $124,185. The report in part is as follows:

Since our last annual report satisfactory progress has been made. Our mining has been confined to the lead ore body on which we were beginning work a year ago. This body is still increasing in size and responding to development. During the year we have constructed the upper and lower grades, so called, by means of which we were able to make a material saving in the handling of ore, and the Parvenu Raise, a three-compartment shaft, 7x18, and 323 feet in height. Through this raise, by means of its connection with the Andy incline, our entire output from all levels will be handled.

It has seemed expedient to your directors to purchase control of the adjoining Phoenix property, which purchase was consummated in December, 1908. The Markham Gulch mill, which we spoke of in our last annual report, has been sold during the year. It also seemed desirable to your directors to secure the services of E. P. Jennings as consulting engineer to assist Mr. Oliver in his work, and Mr. Jennings is following our operations closely.

During the past year 33,407 tons were mined; 9,535 tons being first class, 23,872 tons mill ore. No ores shipped or milled during August, 1909, pending mill improvements.

Besides shipping the tonnage of first-class and mill ore during the past year, a large tonnage of mill ore and first-class in new ore was blocked out and opened up with our development work. Assays of both first-class and mill ore have recently been made of all the working faces in the different stopes and headings.

MEASURED UP ORE.

E. P. Jennings, our consulting engineer, and the president have personally measured up and calculated the ore reserves in the mine, of both first-class and milling grades. The results determined follow herewith:

Tonnage—First-class ore....19,300 tons
Mill ore.. ....61,000 tons

Total ore in sight.....80,300 tons

Average assay value of lead ore:
First-class—Silver, 11 oz.; lead, 37 per cent; copper, 1.8 per cent; iron, 9 per cent; silica, 24 per cent.

Mill Ore—Silver, 5.13 oz.; lead, 12.8 per cent; copper, 1.7 per cent; iron, 8.47 per cent; silica, 55 per cent.

The report says: Parvenu Tunnel Western development is very important work and will be pushed with all speed, for the purpose of opening ore reserves in the western portion of Apex ground on this level. The ore we expect to find at the intersection of the various mineralizing fissures with beddings at this depth, being 1,700 feet vertically below the top of the Charles A. Dana claim, the apex of the mountain. Recently a development drift has been started toward the west from the big turn in the Parvenu tunnel (2,500 feet from the portal). At this date the face of the drift shows three feet of first-class lead ore, assaying 35 per cent in lead, excess iron over silica, and five ounces of silver. We are not able to tell yet whether the ore is in a fissure or in the bedding.

In regard to the Parvenu tunnel, Treasurer Horne says, "Since the report was written the developments at the Parvenu tunnel have been so interesting that we believe that the main goal for which the development work was pushed has been attained.

"We have now reached lead ore running as high as 50 per cent lead, and from present indications, when we get further into the body this will be greatly increased."

BALANCE SHEET SHOWING.

The balance sheet shows that the assets of the company amount to $3,148,280, segregated as follows: Cash, $35,397; supplies, $1,872; North Utah bonds, 6 per cent, $15,000; cost of two-thirds Phoenix Mining company, $95,890; equipment, $60,531; construction, $29,842; development, $562,731; cost of properties, $2,327,023.

The liabilities are segregated as follows: Capital stock, $2,644,000; bonds, $289,000; accounts payable, $7,572; profit and loss, $210,707.

The cash receipts for the year were, cash on hand, Aug. 1, 1908, $52,451; ore shipments, $328,248; interest, $1,288; sale of 100 $1,000 bonds, $100,000.

Construction work at the mine cost $28,674; development, $81,218; mining, $82,442; milling, $29,271.

During the year the company mined 9,535 tons of first class ore and 23,872 tons of milling ore, making a total of 33,407 tons. The average value of the first class ore sent to the smelter was $30.70, while the concentrates went $21.82.

The mining costs were $2.47 a ton; milling costs were $1.37; smelting of first class ore came to $5.71 a ton, and concentrates, $2.62; freighting cost 83 cents a ton. Thus the total cost of the ore extraction and treatment for the year amounted to $204,063, and the mining profits for the year were $124,185.

In addition to the $268,407 in lead and other metals, and $50,840 in silver, there was a bi-product of 912,473 pounds of copper. This was more than 36 pounds to the ton. The compensation was declared to be so small that it was not made a part of the records.

MARKET REMAINS UNCHANGED.

Same Old Story Is Repeated Today on Local Mining Exchange.

It was the same old story on the local mining exchange today that has been in progress for months. Scarcely a feature could be picked out and it was one big day for small stocks. Prices with but one or two exceptions were unchanged and the volume of business transacted was low.

Tintic Central which has been a strong feature for several days was lower this morning and remained unchanged. On the regular board 27,400 shares were disposed of at 8 to 8½ cents. On the open board only 2,000 shares were sold and they went at 8¼ cents. Sioux Consolidated reached 75 cents today and Colorado reached a new high mark of $1.52½ for 50 shares.

The total number of shares disposed of today was 69,400, while the amount represented was $13,525.25.

On the curb market Uintah Treasure Hill was disposed of at 9½ cents and 10 cents and for two 500 share lots.

LEMHI UNION MINE AND SMELTER RUNNING

Plant Will Treat Ore of Neighboring Mines and Prospects Are Good For Successful Winter.

Work has been started at the new smelter at the Lemhi Union mine in Lemhi county, Idaho, and according to the latest reports is doing excellent work. Other mines in the vicinity are also working and there is now more activity than ever before. Before long it is declared that the plant will be handling 100 tons of ore a day. In speaking of the mine and the plant, H. C. Craig, foreman of the mine says:

"We have one of the most promising properties in Idaho. We have disclosed two excellent leads of ore, one six feet in width on the 80 foot level, and also some high grade mineral on the 120 foot level. This latter ledge is widening out and now is eight feet across.

"At the present time we are only taking out about 20 tons of ore daily, and this is considerable when one considers the many disadvantages under which we are at the present time working. Getting sufficient water to run the hoist has been one of the main troubles, but we are remedying this and it will be but a short time until all is in first class working order. There are only a score of men working, but we will soon have more, as the work is getting bigger.

"Our smelter is a success. It has been found now that it was a valuable and indeed necessary acquisition. At the present time there is enough ore blocked out to keep the plant running for years to come. There are several companies owning small properties in the district which will have their ore treated at our smelter. Some of this ore is very high grade, running very high in gold and lead and as high as 1,000 ounces in silver.

RICH IN MINERAL.

"The mountains in the vicinity of the Lemhi Union are rich in mineral and one can see fine ledges of rich mineral cropping out. It is an ideal place for the prospector to get in his work, and while I don't anticipate that there will be much prospecting done this year, the spring will see an influx of prospectors."

"One of the main troubles thus far in connection with the smelter has been the transportation problem. The management has been unable to get teams to haul the rich rock. The traction engine has been a failure and will not be able to do anything when the snow begins to fly. If we had good teams and teamsters who were not afraid to work, this district would be active all winter. The road from Dubois to Spring mountain is one of the best in the country and there should be no difficulty in getting the necessary supplies and hauling the ore.

"The smelter started up a few days ago and ran out over 100 bars in short order. There was no hitch anywhere, and all who were present to see it try out were very favorably impressed with the results accomplished. I am satisfied that within a short time we will have the plant running overtime and at the very least we will be treating 100 tons a day."

LIKE CENTENNIAL PIOCHE.

Men Returning From Old Camp Are Enthusiastic Over Property.

That another prospect on the Prince side of the mountain from Pioche has all the earmarks of developing into a second Prince is the opinion of D. D. Houtz of Provo and W. W. Byrne, formerly of John Hays Hammond's staff and for some time on the staff of Chester Beattie, relative to the Centennial Pioche. The property is being speedily developed and already the shaft is down past the 200 foot level.

Mr. Houtz and Mr. Byrne have recently returned from Pioche and declared that they are well pleased with what they saw at the Centennial. They declare that there is nothing expensive about the way the work is being done there, and that everything that is being done, is done in a miner-like manner. The shaft is going down at a rapid rate and every change in formation is being eagerly watched by Supt. William Lloyd, who is the master hand in pushing the work at the Prince Consolidated.

Already several fine bunches of manganese have been making in the shaft and there appears to be no doubt but what good ore will be found at almost any time now. The visitors contend that the veins from the Prince Consolidated pitch toward the Centennial Pioche, and that one of the richest zones yet found on that side of the mountain should be encountered in the Centennial.

COMPLICATED ACTION AT LAW.

Many Persons Concerned in Suit to Quiet Title Filed Today.

A complicated legal action, one involving the estate of the late Porter Rockwell, was filed in the Third district court this afternoon by Hannah M. Lowe, plaintiff in an action to quiet title and naming Elizabeth Rockwell as defendant, she being the wife of David P. Rockwell, also deceased, a son of Porter Rockwell. This action will reopen the entire Rockwell estate before settlement is effected. The property concerned in the action is in Eighth East street, near Tenth South. A telegram received today from Mrs. F. J. Shaw of Seattle states that she will file a cross bill of complaint in the action. Mrs. Shaw is a daughter of the first wife of David Rockwell. Mrs. Erwin Stowell, a relative of Mrs. Rockwell, defendant, was today appointed by Judge Morse guardian ad litem of the minor children of Mrs. David P. Rockwell. The action grows out of a flaw in the title to the property.

BOTH PLEAD NOT GUILTY.

In Judge Bowman's court this morning, George Collins and E. Mackmuller, arrested Monday on the charge of burglary in the second degree, were arraigned and pleaded not guilty. Their hearing was set for tomorrow morning. The men are accused of breaking into room 14 of the Angelus house and stealing some clothing belonging to Mrs. Samuel Cox.

PRINCE REACHES QUARTSITE.

Believed Water Level Has Been Reached in Pioche Property.

According to reports from Pioche it is believed that the water level has been reached in the Prince Consolidated mine, and that in the quartzite, which it is believed has also been reached, sulphide ore bodies will be found. There is still some doubt as to whether the gone which has just been reached is the water level and it will be some time before it is determined.

In the winze off the 550 level some high grade ore has been found and until recently it has been very dry. The high grade appears to be continuing to greater depth but the formation has been changing until it is almost a quartzite.

When E. L. Godbe returned from the mine yesterday he brought with him some high grade horn silver that is about as pretty as anything in the Pioche district. This was taken from a raise on the lowest level. It is about the richest ore that has been found there thus far.

LOOKING GOOD AT MONTANA.

Expect to be Down to Ore Zone Within Next 100 Feet.

Work at the Montana property in East Tintic is progressing nicely and within the next 100 feet the management expects to tap the ore zone, according to John Roundy, superintendent of the Knight properties in Tintic, and who is also superintendent of the Montana. The shaft is now beyond the 1000-foot level and good progress is being made with the machine drills which have been installed.

The Montana is in a most interesting part of Tintic and where many declare some of the new wonders of the camp will be opened up.

At the Colorado and Iron Blossom, Mr. Roundy declares everything is moving ahead in excellent shape. Mr. Roundy was unwilling to go into details of the work being done, but declared he is confident that better ore deposits will be found at greater depth. At both the Colorado and the Iron Blossom there is a marked improvement every day.

CONCENTRATES.

There was no call of the local stock and mining exchange this afternoon on account of it being Salt Lake day at the Inland Empire exposition.

Tony Jackson, manager of the Columbus Consolidated Mining company, has returned from Chicago and this morning went to the mines at Alta.

FEEDER TO MOFFATT ROAD.

Extension of Laramie, Hahn's Peak & Pacific Toward Steamboat Springs.

(Special to The News.)

Centennial, Wyo., Oct. 5.—Work is being rushed on the 16-mile extension of the Laramie, Hahn's Peak & Pacific railroad from Albany to Fox Creek, and the contractors hope to have the line in operation to Fox Creek, a distance of 55 miles from Laramie, by Dec. 1. It is intended to push the Laramie, Hahn's Peak & Pacific on southwesterly to a connection with the Moffat road. The line will pass through one of the richest mineral and agricultural sections of the west.

CLOSING UP THE GAP.

T. J. Wyche, division engineer of the eastern division of the Western Pacific railroad, with jurisdiction extending to Winnemucca, is in Salt Lake City on business today. Mr. Wyche says that the construction work on the Western Pacific should be completed within two or three weeks, as there are only about 20 miles yet to be connected up west of Winnemucca, with three gangs of men laying steel. The gang on the eastern division of the road has been taken off, as the line has been completed to the end of the division at Winnemucca.

STOCKS STRONGER MORE ACTIVE

New York, Oct. 6.—A few small gains were registered in the opening dealings in stocks today but prices were lower in most cases. United States Steel opened with sales of 18,000 shares at 89¾ to 89, compared with 90¼ yesterday. The preferred was also down ¾.

Missouri Pacific lost 1 and Chicago Great Western preferred and Minneapolis, St. Paul and Sault Ste Marie large fractions. United States Realty advanced 1.

Opening prices were the lowest made during the hour, buying orders making their appearance in abundance on the decline which sent prices above yesterday's closing. United States Steel was lifted to 90¼ and there was a continuance of the recent strength in Erie and New York Central. Some stocks wavered a bit when realizing sales began to appear but the market was disengaging at 11 o'clock.

Atchison stiffened a fraction on the announcement of the dividend increase, but U. S. Steel was pushed for sale again to take advantage of the effect and brought back to below 89.

Union Pacific, St. Paul and U. S. Steel preferred suffered losses of a point, Pacific Telephone and U. S. Rubber 1¼ and Vulcan Detinning 2. There were fractional rallies afterward.

Bonds were irregular.

Some of the recoveries in the railroad section reached a point, notably for Union Pacific, but U. S. Steel and other metal stocks did not make much headway.

The heaviness of industrials invited reselling around 1 o'clock, in which U. S. Steel broke to 88⅝ or 2 points under yesterday's final price. Other stocks went off rapidly to their low figures. Reading, American Smelting, American Locomotive, National Biscuit and International Paper yielded a point. Amalgamated Copper 1¼ and St. Louis-Southwestern 1½.

The market was subjected to another vigorous selling in which all of the representative stocks lost considerable ground. U. S. Steel was the main point of attack and dropped to 87½. The heavy selling of this stock yesterday and today had a damaging effect on the whole market. At the low point there was buying for both accounts all around and the point stock moved up a good fraction. Pacific Telephone was driven down 2¾, Cleveland C. C. & St. Louis 2½, Minneapolis, St. Paul 1¾ and New York Central 1¼.

The market closed firm and active. Perceiving the lessened urgency of the liquidation the bears set about covering their shorts. Full recoveries were not unusual in this process and United States Steel rallied ¾. Central Leather rose 2 over last night and Consolidated Gas 1.

LIVESTOCK.

CHICAGO.

Chicago, Oct. 6.—Cattle—Receipts, estimated at 17,000; market steady. Beeves, 4.10@8.50; Texas steers, 3.85@5.10; western steers, 4.00@7.00; stockers and feeders, 3.15@5.25; cows and heifers, 2.10@6.00; calves, 7.00@9.00.

WOOL.

ST. LOUIS.

St. Louis, Oct. 6.—Wool, firm. Territory and western medium, 23@28; fine medium, 25@28; fine, 18@19.

BOSTON.

Boston, Oct. 5.—The movement of wool stocks to the mills continues actively, with dealings more insistent on the full asking prices. Local dealers anticipate that the high level will be maintained for six months. It has developed that the strength has induced bidding for the 1910 clip on the sheeps' backs.

Quotations:

Scoured values—Texas fine, 12 months, 75@78; fine, 8 to 8 months, 68@70; fine fall, 68@68.

California—Northern, 60@70; middle county, 63@65; fall free, 50@52; full defective, 38@40.

Oregon—Eastern, No. 1 staple, 71@75; eastern clothing, 70@72; valley, No. 1, 57@58.

Territory—Fine staple, 77@80; fine medium staple, 70@72; fine clothing, 70@72; fine medium clothing, 66@68; half-blood, 73@75; three-eighths blood, 65@70; one-quarter-blood, 67@68.

Pulled—Extra, 72@75; fine A, 65@70; A supers, 60@62.

PRODUCE.

CHICAGO.

Chicago, Oct. 6.—Wheat was strong during the early trading today on general commission house demand. The northwest cash situation was the chief factor, although an advance of ¼ to ⅜ in the wheat market Liverpool had some effect. Market decrease in stocks at Minneapolis during the last four days, notwithstanding continued enormous receipts there was the principal incentive to buy the options here.

Opening prices were ⅛ to ⅜ higher, December being at 1.01⅛ to 1.01⅜. Early in the day December advanced to 1.01⅝@⅞.

Buying by cash houses based on smaller receipts than had been estimated, caused early moderate firmness in corn but on easier tone soon developed on ideal weather conditions for the maturing of the new crop. December, which was a shade higher at 57⅛, sold at 57⅜ within the first few minutes, but later declined to 57¼@⅝.

Oats were firm with wheat and corn, but soon became weak on profit-taking. December opened unchanged at 39¼, sold up to 39⅜ and then reacted to 39.

Provisions were weak on account of a 5 to 10c decline in live hogs. Prices at the opening were 2½ to 10c lower.

Wheat—The market gained additional strength during the final half of the session on buying supposed to be for the account of a leading short. December advanced to 1.03⅝. The close was strong with December up ⅝@⅞ at 1.01⅝@⅞.

Corn—The market recovered the early loss owing to an improvement in the demand for cash grain. The close was steady with December a shade higher at 57¼.

Close—Wheat—Dec., 1.01⅝@⅞; May, 1.03⅝; July, 99⅝.

Corn—Oct., 59; Dec., 57¼; May, 60½; July, 58⅝.

Oats—Dec., 39⅛; May, 41⅝.

Pork—Jan., 18.22½; May, 18.60.

Lard—Oct., 12.10; Nov., 11.32½; Jan., 10.87½.

Ribs—Oct., 11.25; Jan., 9.37½; May, 9.50@9.62½.

Rye—Cash, 72@73; Dec., 73.

Barley—Cash, 46@62.

Timothy—Oct., 2.30.

Clover—Nothing doing.

SUGAR AND COFFEE.

New York, Oct. 6.—Sugar, raw, steady. Fair refining, 3.75½; centrifugal, 96 test, 4.25½; molasses sugar, 3.48.

Refined—Quiet. Crushed, 5.85; powdered, 5.25; granulated, 5.15.

Coffee—Quiet. No. 7 Rio, 7¼@⅜; No. 4 Santos, 8½@9.

BUTTER AND EGGS.

Chicago, Oct. 6.—Butter—Steady. Creameries, 29; dairies, 26.

Eggs—Steady, at mark, cases included, 18; receipts, 9,508; firsts, 22½; prime firsts, 24.

Cheese—Strong. Daisies, 16@16½; Twins, 15@15½; Young Americas, 15½@16; Long Horns, 15½@16.

GIRL FOR GENERAL HOUSEWORK. Must be good cook. Apply at 202 Seventh East.

Volume Five
Church History
Published by the Church With Introduction by Elder B. H. Roberts.
This volume deals with the history of the Church from May 3, 1842, to 31st of August, 1843. It, therefore, covers a period of about sixteen months. The main external events may be set down as follows: First, exposure of the wickedness of John C. Bennett, and his departure from Nauvoo; (2) the charge against the Prophet Joseph of complicity in an attempted assassination of Ex-governor Lilburn W. Boggs, under whose celebrated exterminating order the body of the Church was driven from Missouri; (3) the attempt of the state of Missouri to extradite the Prophet from the state of Illinois, to be tried as an accessory before the fact to an assault on ex-Governor Boggs; (4) a second attempt on the part of Missouri to extradite the Prophet from the state of Illinois on the old charge of "murder, treason, burglary, arson, larceny, theft and stealing," first brought against him in the year 1838; (5) a preliminary prospecting of the west, doubtless with a view to the contemplated removal of the Saints to the Rocky Mountains.
Of events that relate more nearly to the Church as an organization there should be mentioned: (1) the introduction of the endowment ceremonies and enlarged instructions on the subject of baptism for the dead; (2) an extension of auxiliary organization by bringing into existence the Young Men's and Women's Society.
Another item of great interest in this volume is the manfest development of the character and spiritual strength of the Prophet during this period. The trying experiences through which he passed seemed to discover new qualities of soul
