DESERET EVENING NEWS.

SATURDAY, . . . FEBRUARY 3, 1894.

FRAGMENTS.

THE funeral of J. H. Harrington, the well known Park City mining man, returned in the city this afternoon from the undertaking parlors of O'Donnell & Noyes.

MRS. BESSIE DEAN ATKINS came down from Ogden today to sing at the meeting of ladies in the Tabernacle used assembly rooms this afternoon, under the auspices of the W. S. A.

THE fire department was called out between 12 and 1 o'clock this morning to extinguish a blaze in the frame residence of Robert E. Nelson, at No. 468 west Third South street. The fire was caused by an overheated stove. The loss is estimated at $100. It is fully covered by insurance.

A MEETING of the Fourth Precinct Boise Republican club was held in Taggart's last night. James Devine acted as chairman and Joseph Lippman as secretary. Speeches were made by several members and steps taken to hold a meeting in the Eighteenth ward Independent school house some time next week to effect a complete reorganization of the club.

At the meeting of the Republican Workingmen's club in the O. A. K. hall last night, H. C. Dupont, John Chalmers, William Sapten, C. J. Rigson and A. S. Peal were appointed to draft resolutions to be endorsed by the labor unions and presented to the Legislature, asking that that body take special pains to secure an appropriation of $125,000 for Capitol Hill improvements as asked for in the message of Governor West.

RELIGIOUS SERVICES.

Regular services of the Church of Jesus Christ of Latter-day Saints will be held tomorrow at 2 o'clock in the Tabernacle; Sunday schools in the various Wards at 10 a.m., and meetings in the city Ward Assembly Rooms and adjacent wards as follows:

CITY COUNCIL SESSION.

The Question of Mining Preference in Some Lower Agate Has Been Settled—Secret Relative Employes.

THERE was a special session of the City Council last night, President McCarthy in the chair. All the members were present except Daly.

IT was ordered that H. S. Gleason & Co. have $25 of insurance premium applied to their license account.

P. H. Howell was appointed a special policeman without pay from the city.

The city attorney submitted as an ordinance empowering the Mayor to employ a special policeman at a salary of $90 per month whose special function it shall be to hide detectives with and whose identity will, if possible, be concealed from the rest of the police force. The measure was laid on the table for a short time and when it was taken up and passed though strongly opposed by O'Meara who wanted the enacting clause stricken out.

The street superior sent in a report of poll tax work for the year 1893, showing $2,356 paid in lieu of labor, each man being credited with $2.50.

The report of the police justice for the month of January showed fines amounting to $1,571.50 and the number of arrests 1,305.

The report of the health department for the quarter ending December 31, 1893, was received and filed.

O'Meara's resolution providing for a purchasing committee of five members went over until the next meeting.

Cannon offered a resolution providing for an appropriation and a committee to formulate a plan whereby employment could be given to at least a few of the many men in the city without work. Arnold, and Cannon, Lynch and Watson appointed as such committee.

On motion of Cohn the sanitary committee was instructed to advertise for bids for cleaning out the sheds in Liberty Park. The committee was also given authority to have the work done.

The recorder was instructed to furnish the committee on municipal laws with copies of all ordinances passed since December 15, 1893, that they should be compiled in pamphlet form.

On motion of Harry Clewes a resolution providing that preference in public work be given to bona fide residents and tax payers, irrespective of connection with unions, associations or other organizations, came up for discussion.

After long debate at length Burke offered the following substitute which carried: "That the whole matter be referred to the city members of the Utah city and county building committee for investigation and report, and make such suggestions as to changing or improving the committee on employment if they deem the same necessary, and make such recommendations in writing at the meeting of the City Council one week from Tuesday next."

T. G. Sutherland.

Appeared.

Y. M. M. I. A. Guide Class.

A five weeks course in the Bible will be conducted by Willard Done at the L. D. S. College, commencing Monday, February 5th.

Each association has the privilege of sending two representatives to this class. The hours for the class will be between one and half-past three each afternoon, including one-half hour for intermission.

These representatives can have the privilege of attending any class in the college that do not conflict with the Bible Class. Those who wish to ride upon the street cars can obtain rates by applying to Brother Done, at the college.

Also those from the county not provided with places to board can obtain the same, at reasonable rates, by applying to the same place. It is desired that the officers of associations take advantage of this opportunity for benefiting their association.

TERRITORIAL SCRAPS.

Unsatisfactory Mail Service In Sanpete.—In "Underground Mystery."—Important Lumber Deal.

A very important and significant lumber deal is being consummated with local businessmen, says the Mount Pleasant *Pyramid*. It is for the purchasing of 150,000 feet of lumber by a Tintic mining company, and 100,000 have already been contracted for. This is good news for both places and the mining camp.

The *Pyramid* also makes the statement on a current report that as a result of the Rio Grande Western railway has been in Mount Pleasant building facilities as to line for the coming summer, and hinted strongly about the latter of some early contracts. This, in connection with much development work, strengthens the inference on the part of the Western to do some important work on the branch during the coming season.

About two weeks ago Elisha Brandley was digging a well on his residence lot in the city, reaches the Mount Pleasant *Pyramid*, and had got down about thirty feet when he noticed, among the bowlders and other large rocks he was taking out, one little which a hole had apparently been drilled. He broke the rock and found the hole had been drilled through it, and the "dynamite" or gunpowder was still in there. How the rock came there, in a compact formation of washed rock, gravel and cement, where it has undoubtedly lain for years, if not centuries, is a veiled mystery. The ground in the same section upon which the whole city of 3?? Pleasant rests, and one late there years before the present generation. The rock is about twelve inches in dimensions, and the hole, which is perfectly true, about 8 inches long. The "dynamite," resembling powder, has been wet and hardened, and though light, is very solid. It is the work of human beings, and probably, and proves that the art of drilling rock have been known in this country for the savages for years ago. A piece of the rock and the "dynamite" can be seen at this office.

Hyrum and John Williams came in from Fillmore on Saturday and the next morning went out to the Detroit district. The gentlemen will do some work on a black onyx claim owned by themselves and James H. Olsen, of Fillmore. The gentlemen will also get samples from their quarry for experiment to ascertain the qualities of the onyx. The Belgian onyx marble, which is not a whit superior to our native quarry product, costs $3 per cubic foot laid down in the United States. This fact illustrates the value of the onyx find in the Detroit mountains and shows the possibilities that will come with the starting up of the home industry, for quarrying, cutting, and polishing the native onyx.—*Nevada County Gleaner.*

The infant son of Mr. and Mrs. L. J. Jensen died Wednesday evening after a very short illness, says the Mount Pleasant *Pyramid*. The cause of death is supposed to have been contracted in the shape of the grip. This is the sixth child the parents have lost in this city in the last twelve years.

One of the most innovational mail services ever initiated upon a single branch railroad has been in operation between the Mount Pleasant *Pyramid* business men fairly to every house in communities with towns only eight to fifteen miles away. The mail for earls side of the valley might as better as come to Ephraim and go up the following day as the other mail does to continue in the regular route, and a committee of six was highly in favor of circulating a paper for signatures petitioning the postoffice department to that effect. The proposed service is no reminiscence at all.

In the Land Office.

The cases of Thomas E. Jeremy & Co. and the United States against Pasmore, Thompson, McCartney and Barnes, involving coal lands on the eastern of the Great Salt Lake, have been appealed to the secretary of the interior. The issues were entered by the claimants under the desert land laws. Jeremy & Co. protested. The evidence and the case decided in their favor by the register and receiver of the local land office in this city, and later the commissioner reversed the decision and held that coal lands were not subject to entry.

The commissioner of the land office has handed down a decision in the case of William W. Falon vs Spencer B. Mackinnon, involving a coal entry of about 160 acres in section 8, township 15 south of range 10 east. The case was decided by the register and receiver in favor of Mackinnon, but the commissioner has reversed the decision and ruled in favor of Falon.

Andrew Anderson of Hyrum, Cache county, has filed first proof in the land office for his homestead entry of 160 acres in section 4, township 10 north of range 1 west.

Against an Ice Company.

Ed. L. Rutherford has begun suit in the Third district court against the Mountain Ice & Cold Storage company to recover $245.50 on an undertaking on appeal.

EVOLUTION OF PHOTOGRAPHY.

Hon. C. R. Savage's Lecture Before the Church University.

Promptly at 7 o'clock last night the regular session of the high science course of the Church University lecture series was commenced at the large hall of that popular institution, nearly every seat being filled. Prayer was offered by Elder W. C. Dunbar.

The lecturer, C. R. Savage, Esq., was surrounded by beautiful specimens of pictures and various apparatus used in the photographic art. On the blackboard were placed the names of chemicals sensitive to light, also a chart of the solar spectrum. After a few introductory remarks upon the sun and its general influence, the spectrum with the elements of each ray and its particular use in photography, the history of this "Black Art," was commenced with Palestine. This country commenced in 1500 that a solution of nitrate of silver was discovered by the author of Psalm 1?. H. Schulze wrote and copies in writing by another the written characters upon paper coated with chalk and silver nitrate, but could not fix the impression produced.

In 1750 Prof. Charles used this subject in producing a profile shadow of a friend upon paper. A solution of chloride of silver was then obtained in the same way and the impression of a cross moved on a scroll of the drawer made up to 1802. The work of Daguerre was referred to, the use of nitrate of the metals chosen, and the production of a fixed image upon a copper plate by fumes of iodine. Fox now comes in and the advancement of the art was carefully traced until the introduction of the Collodion process, which was fully explained, experiments and practical examples followed before the audience. The advantages of the dry plate, finally discovery to all to instantaneous process and the gradual increase in sensitiveness were then mentioned by the lecturer. At this stage the instantaneous views with artificial light was illustrated very effectively, a gentleman being selected to have his image taken by the author, down in the own chemistry and the surroundings of the audience. In course Mr. Savage spoke of the marked progress made in late years and months, and of the great issue of photography. It had already doubled the session of the woodengraver and would explain much of the marvelous progress of today. An interesting table was presented showing the various degrees of time required in taking a photograph from six hours to 1-1000th part of a second.

Benedictions was pronounced by Elder Reuben Clark.

PROVO.

PROVO, UTAH, . . . FEB. 3, 1894.

Criminal Matters.

W. H. Emmons and wife have been arrested on the charge of arson. A preliminary examination has been set for Monday in Commissioner Dudley's court, pending which, bonds in the sum of $500 each have been filed, Emmons's sureties being Joseph Rigby, and one in Salt Lake. The home of Mr. and Mrs. Emmons was recently burned. It was into occupied as a resort.

Claude Hightower, a 16-year-old lad from Lehi, was yesterday sent to the Reform school by Judge Smith. The boy has been twice guilty of numerous offenses, the last being the carrying of concealed weapons and threatening the life of a companion.

Notes.

Utah county still insists that the county jail, where it was not by the prisoners was recently escaped, must be repaired by the Park Jail Co., the contention. Reports say that the vermin are not taken out of the face by the fire used by the prisoners, but that it was a cool, clean fire. Are not one of the prisoners of today yesterday cut over or thirty minutes with a dull saw.

The name of W. H. King is being connected with the position justiceship of Utah.

A Salvation Army detachment has arrived in the city.

Report This is circulating a petition which prays the Legislature to investigate the acts of the land commissioners in disposing of university lands.

HIS PARAMOUNT ALLEGIANCE.

Hon. James W. Haines, while serving his sixth term somewhere of the Assembly of the state of New York, writes:

"State of New York, Assembly Chamber, Albany, Jan. 10, 1893.

I desire once more to bear my testimony to the value of Mrs. Pinkham's Vegetable. I have used them for twenty-five years past, and can conscientiously commend them as the best external remedy that I have known. Years ago, when thrown from a carriage and seriously injured, I gave them a thorough trial. In a very short time the pain that I was suffering disappeared, and within a week I was entirely relieved. On another occasion, when suffering from a severe cough, which threatened pulmonary difficulties, which I was recommended to go to Florida to relieve, I commenced to use the pinkham pills. I applied them to my chest and between the shoulder blades, and in less than a fortnight was entirely cured. On still another occasion, when suffering from an attack of rheumatism in the shoulder so that in order to extract that I could scarcely raise my arm, I again resorted to the pinkham, and within a very few days the rheumatism entirely disappeared. I have them constantly by me, whether at home or abroad. My family as well as myself have found them to be a remedy, especially for external and internal troubles. I never had any kidney difficulty in my life, and the application of the plasters cured me in a week. I remain, as I said before, to bear my testimony in a public way to their efficacy, and I know of no better way of doing it than by giving you my personal experience."

When Baby was sick, we gave her Castoria.
When she was a child she cried for Castoria.
When she became Miss she clung to Castoria.
When she had children, she gave them Castoria.

Brass in Chandeliers.
