THE MINES OF MORGAN.

Special Correspondence.

MORGAN, MORGAN, COUNTY, UTAH, April 5, 1894.—Mr. Editor: Recently I wrote to you about the very successful work done in the mines of Morgan county, and in spite of present unfavorable times the working force keep busy by expectations that the representations of silver experts as to the very rich ores of the Wolverine and Deseret, adjoining claims, mentioned in the report of a few years ago, that of galena have by results so very unsatisfactory and promises such a prospect to that a very low grade ore, from which, in quantity, are nearly now yielding and many of the mines have ceased to work and seem to indicate that the silver ores are not so rich as the expert report represented, giving large profits.

To my opinion Utah will not be in the race for a long time and not for one in the 20 months to come, then the fact that it will cost more than it is worth to get out the ore and prepared to ship from the place mined.

The people around Morgan are not asleep by any manner and will have their interests well looked after, but they certainly have a natural curiosity to ascertain our situation. The Morgan Gold Mining and Milling company, of which I am a member, owns the Ute lode, a valuable mining claim, on very actively developing their claim at Grass. This property covers about 200 in depth on the lode with a large percentage of copper to the mining, compact, free quartz.

Mr. H. Hoover, mine foreman of the Morgan mine, at Morgan county, is the owner of the Black Jack and other claims, about four and a half miles from Morgan City, which show indications of large carrying about 30 per cent copper, $2 to $4 in gold and 40 ounces in silver.

The Poor Man's Friend group of claims, owned by Mr. Cleveland, the station agent, and Mr. Kilburn, shows a fine quality of gold and copper ore. The ledge is from 4 to 6 feet in width. I was not able to examine it. The small dump shows a fine grade of ore, however.

The Mormon Chief group of mines, on the same lot, shows with slightly lost of development, a strong vein, with pay ore running 25 and 3 ounces in silver. This company, I understand, are all members of Morgan City.

I am a little too early to be seen to see many of the results—the snow was very heavy, but from my experience in mining on the past 15 or 15 years, I see that capital can find an inviting and profitable field in this section of the country. The inhabitants of Morgan invite coming men and will take good pleasure in showing the strongest capitalist this favorite section.

The snow is not yet gone from the higher points of the mountains, which overlooking my mining camp, continues—according to reports carry, to a better grade of gold ore and much larger bodies than here mentioned. Another month will permit a more thorough investigation, at which time I will give you more facts.

As the people are greatly interested in home consumers and home production, let capital and mining men not forget that Utah is blessed with gold as well as other mineral resources, and naturally eliminates their attention first before going to those richer lands of some other state or territory.
