A GIGANTIC TRUST.

The Farmers' Alliance Endeavor to Corner the Wheat Crop of the Country.

SPECULATORS TO BE SQUEEZED TO THE WALL.

Circulars Issued to the Alliance Secretaries of all Wheat Growing Countries.

By Telegraph to the News.

THE WHEAT CROP.

A Movement to Secure the Entire Product.

ST. PAUL, Minn., July 23.—St. Paul has been made the headquarters of the national movement by the United Farmers' Alliance to corner the entire wheat crop of the country. At No. 317 Wabash street, for several days very large force of employes has been engaged in sending out circulars with a view of having all classes of farmers to keep back their wheat crop until the prices have been advanced to a high point. The plan is to unite the farmers in a gigantic combine, in which the producers shall be the stockholders and by which the speculators and wheat buyers shall be squeezed to the wall. George M. Muller, editor of the State and a prominent Alliance man, is at the head of the movement. The wheat crop of the United States is estimated at five hundred million bushels. The promoters of the farmers' trust believe that fourfifths of this can be held back by the farmers from four to eight weeks, by which time it is thought the prices will have gone skyward. Circulars have already been sent to the secretaries of the alliances of all wheat-growing States.

A Destructive Hail Storm.

ST. PAUL, July 23.—There was a hailstorm in Dickey and McPherson counties, S. D., last night, which destroyed thousands of acres of grain. A distinct track of hailstones, also through Norman county, Minnesota, covering a strip two miles wide and thirty miles long.

Saratoga Races.

SARATOGA, July 23.—The racing season at Horse Haven opened today under the most auspicious circumstances. The weather was fine, the attendance large and the betting lively.

First race, introductory scramble, purse $600, five furlongs—La Tosca first, Bolero second, Pennyroyal third. Time, 1.02. Betting—La Tosca 1 to 6, Bolero out.

Mile and an eighth—Ron won; Judge Morrow second, Test third. Time, 1.58.

Mile and a half—Vallera won, Houlihan second, Silver King third. Time, 2.40.

Outbreak at the Mines Feared.

KNOXVILLE, Tenn., July 23.—The killing of a convict named Hartley one of the guards, this morning, caused great excitement, and an outbreak at the mines is feared.

Gubernatorial Candidates.

OMAHA, July 23.—Chairman Watson of the State central Republican committee, announced that the Republican party will probably have a candidate for the gubernatorial chair in the field this fall, although the supreme court decided Thayer to hold over. Legal opinions are so varied on this point that it is deemed best to be on the safe side. The Alliance and the Democratic parties also have gubernatorial nominees on their tickets.

UTAH LAKE.

A Scheme for Draining It Said to be Practicable.

J. E. Taylor's attention was first called to the problem of utilizing the waters of Utah Lake in August, 1889. He found that, measuring by the Liverpool standard, the evaporation is thirty-six inches a year. His idea was to reduce the area of the lake from its present area of 89,000 square acres to about 25,000 acres. There is a fall between the Jordan at Utah Lake and the first dam of about eight or nine feet. To dredge the river from the first dam to give the river its normal flow, reducing the lake surface eight feet, would reclaim 59,000 acres of land, leaving a body of water still in the lake covering 25,000 acres. This, he says, would protect all the water rights in the Jordan river and by the reduced evaporation would give water enough to reclaim the 250,000 acres of land lying between Utah lake and the Great Salt Lake. This would open for settlement the 55,000 acres of ground now under Utah Lake, which is all subirrigated, and will produce crops without irrigation.

Common sense shows that by reducing the evaporation 50 per cent., this amount of water can be utilized in reclaiming the land between Garfield City and the Great Salt Lake, which, with irrigation will prove as fertile as any in Utah.

The government has made an enormous calculation by setting Utah lake aside as a reservoir reservation, and proposing to raise it four feet, as this would increase instead of diminish the evaporation.

"A canal to utilize these waters can be built for very reasonable figures," says Mr. Taylor, "less than $500,000. This is a good business scheme as it is a dividend-paying proposition."

"The whole water shed of the Oquirrh range is drained into Utah lake. It does not come in as a stream, but sinks into the ground and comes in on bed rock, finding its way into the lake in the springs. One of these is as large as a barrel and raises the surface of the lake from four to six inches by its commotion.—*Herald.*

Wasatch County Democrats.

Little Deseret News:

At the Democratic county convention held at Heber this (Monday) afternoon, the following ticket was agreed upon: For selectmen, Joseph H. Murdock, of Charleston (also of Chicago fame), and Alva J. Alexander of Midway; for Superintendent of District Schools, Attewell Wootton, Sr., the present incumbent. The proceedings of the convention were harmonious, although there is some smouldering unrest. As to Representative to the Legislature, no choice was yet made, action being deferred till Thursday. The general drift, however, points unmistakably toward Hon. Abe Hatch, who is already the choice of the "Citizens." Thus there won't be so very much heat in the campaign.

Tonic Sol-Fa.

Henry Gardner, President Salt Lake Tonic Sol-fa Society: At our B. Y. Academy summer school I gave the teachers a good drill in the Tonic Sol-fa method; we had just two week's session, so we got through the first three steps only. The teachers seemed highly delighted with the system of instruction, and probably will all adopt it in their respective schools. There is no question about its being just the thing for all our educational institutions. The southern Utah delegation of teachers have invited me to visit them to introduce the method in that section. I leave on Saturday next for that purpose. This system is already used extensively in Utah county, and I think I can step in Sanpete county long enough to give them sufficient instruction so that they can use it there this winter. If your Tonic Sol-fa Society can capture Salt Lake, with the influence that is now awakened south, it will not be long, I hope, before all the children of the Territory will be singing from the sol-fa notation.

My plan in the different settlements is this: I teach the classes twice each day, at 10 and 2 o'clock, for all the school children, and at 7:30 in the evening for the larger ones, then finish up the week with a concert on Friday night to give the people an opportunity to witness what their children have learned and how they have been taught.

Yours, H. E. GILES.

CHAMBER OF COMMERCE.

Special Meeting of the Directors: The Forthcoming Irrigation Convention.

The directors of the Chamber of Commerce had a special meeting last night. The following members were present: Messrs. Dowdican, Wells, Sloan, Hardy, Clawson, Waddell, Irvine and Webber.

The directors a few weeks ago requested the Deseret Agricultural and Manufacturing Society to hold an intermountain exposition this year, but in a communication read that organization stated its inability to vary from the regular territorial exposition.

Resolutions were adopted and the secretary was instructed to forward the same, asking the signal service bureau to increase the importance of Salt Lake in the reports, by having a greatly increased number of stations report to the Salt Lake office and for the further purpose of permitting this office to make weather predictions for the inter-mountain region as well as to publish daily a map showing the weather from the east slope of the Rocky mountains to the Pacific coast.

Acting President Donnellan reported as to his conference with Governor Thomas, Mayor Scott, Col. H. C. Lett, president of the national irrigation and Mr. F. G. Horn, secretary of the stock exchange, for the purpose of selecting delegates to the irrigation convention to be held here September 10, 11 and 12. Although the lists will not be completed until today it was decided to call these joint delegations together at the Chamber of Commerce for Monday night, July 27, to select various committees for the active work of preparing for the convention.

All congressmen and senators in the states and territories west of the Missouri river are to be made delegates. The governors of states, mayors of cities and the presidents of organizations sending delegates are to be made delegates and to be designated chairmen of the delegation chosen by them. Secretary Rusk, of the department of agriculture, will be asked to attend, together with the chiefs of special departments. So will all surveyor generals and receivers and registers of land offices in the states and territories west of the Missouri river.

WILL IT BE GRANTED?

Permission to Construct a Double Street Track on First Street Asked For.

At the last session of the City Council, the street committee, in its report, recommended that the petition of the Rapid Transit company for the privilege to construct a second street car track on First, from C to F street, and from H to the military reservation, excluding that part of the street where property owners have voiced their objections to a double track being granted.

The petitioner claims that a double track is absolutely necessary in order to give adequate service to the public.

Councilman Young protested against the granting of the franchise, at least until unanimous consent should be obtained from residents and property owners along the street over which a right of way is asked, stating that a parallel case had recently occupied the attention of the Third District court, and that the opinion of the court was that a double track could not be maintained on the narrow thoroughfares of our city without endangering the lives of the people and decreasing the value of property.

On this representation and on motion of Councilman Parsons, the matter went over for one week, to give any party owners on First street an opportunity to file their protests.

If they are opposed to the proposed construction of a second track, they should make known their objections forthwith.

THE STREET TROUBLE

With the Rio Grande Western Railway Company to be Settled by Ordinance.

The committee on municipal laws introduced an ordinance into the City Council on Tuesday night, which was read the first time and laid over one week, regarding the claims of the Rio Grande Western Railway company to certain streets in this city. It concedes to the company the right to occupy with railroad tracks and use for ordinary railroad and yard purposes, all those portions of Sixth West, between Second and Third South streets and between Third and Fourth South streets; to lay and use the railroad tracks on the east side of Sixth West between Fourth and Sixth South; also to lay the track on the west side of Fifth West street, from Second to Fifth South, the easterly rail of which shall not be more than twenty feet east of the east line of the lots on the west side of Fifth South, provided that the present small grade and gravel Fourth South from Sixth West to the west line of Seventh West, from Fourth south to the south line of Second South, and from Seventh West to Fifth West, on the grade established by the city engineer, and to gravel the same with a substantial top dressing of good gravel, the work to be completed by September 1, next. Also that the railroad shall open Fourth South street, from Fifth to Sixth West, bring its tracks across said street to the established grade and grade Fourth South from Sixth West to the center of Fifth West, and plank and keep in good repair all tracks crossing Fourth South so that the same shall be in first class condition for travel.

Section 2 provides that the right of way previously granted to the Denver and Rio Grande Western is confirmed to the Rio Grande Western and the latter is granted the right to maintain and use a single track on Sixth West from Second South to Seventh North and extending thence northwesterly to the company's present line; also to use the gravel road and other quarry track as now laid and used, from Seventh North to Ninth North, thence easterly to the city limits; also the right to maintain the wye on Fifth West, just north of Second South, leading to the coal yards, except the most westerly of these switch tracks which must be removed within thirty days after the passage of the ordinance, so that there shall be at least thirty feet between the west rail and the line of the lots.

The ordinance also requires that the company shall supply the city with enough gravel to keep its repair all streets agreed to under grant of 1885.

Spots on Venus.—A bulletin of the Belgian Royal Academy of Science states that the dark spots that have been noticed by astronomers on Venus are of a permanent character. Observations have been made at successive rotations of that planet, and the facts demonstrate that what are mistaken for spots are in fact spots were fixed enough to be recognized, and that the markings are not accidental, but are probably due to some configuration of the land, like those of the planet Mars. The atmosphere is as dense on Venus that the success of the recent observations was much interfered with.
