LONG AND ARDUOUS JOURNEY.

Yet They Found the Indians, and Counsel Them,—Here are the Facts!

Following is the official report of Captains Gibbs and Cannon filed with the Governor today, giving an account of the trip and investigations of those officers in Grand and San Juan counties:

To His Excellency the Governor of Utah Territory:

SIR—Your orders of Jan. 8, 1895, required us to proceed "to Grand and San Juan counties to make a thorough investigation and ascertain the number and location of the Indians therein and of their tribe, force and horses, and to what extent, if any, they have depredated or are depredating upon the settlers; also further to ascertain the country of Southern Utah off their reservation found in said counties, and the number of so-called renegades or Pauite Indians."

In pursuance of these orders we left Salt Lake City on the evening of Jan. 9th in company with Messrs. J. N. Pearce, Thos. Nash and Harry Green (the delegation sent to present to you the complaints of the citizens of said counties), and in the afternoon of the following day (the 11th), we found ourselves in Moab, the county seat of Grand county. Having made known our business, and announced our readiness to begin operations at once, the services of a guide, interpreter and horses were furnished, and on the 13th we proceeded over a rough and trying trail about 20 miles to a point on the Grand river, probably 12 miles below Moab.

The Indian camp which we expected to find there had recently been abandoned, but near noonday (a mile or two) we followed the trail of the tepees, and about three miles further up the river (toward Moab) we came upon the Indians. We found the leader, one of those having charge of Chief Tabby's band, Tenabo, accompanied by one of his renegade sub-chiefs, Pinnacate, 3 squaws, 3 papooses, total 7, with 15 head of ponies. Six miles west of this point, near Cisco post-office, we found a camp of renegades—1 buck, 3 squaws, 3 papooses, 6 young with 70 pony horses and ponies. He claimed that night that Tabby, 25 miles to the trail leading to the Ute Agency, was camped with 15 lodges, 50 bucks, 70 squaws, 40 papooses, 15 young, 300 ponies. In Montezuma Canyon Charles found 3 Southern Utes (bucks), 3 squaws, 3 papooses, total, with 10 head of ponies; also 1 buck, 1 squaw and 2 papooses (renegades), 4 head, with 8 ponies.
