BUSINESS AND MINES.

A Salt Lake Banker Thinks the Outlook East is Gloomy.

THE PROTECTIVE ASSOCIATION.

Mideleter Fair Committee.—New Railway Project—Mining and Business Items.

Robert Morris, of the Rowe-Morris-Summerwayz company, of this city, has been in the East for the past two months and is about to turn his face homeward. He has been taking a good view of the financial situation, his trip being one of business and not for pleasure. His conclusions weren't in a letter to his company partner of a rather gloomy turn so far as the outlook for business is concerned. He says things look very dark in the East and there is no rift in the clouds that he can discern. He had not been able to find anything that indicates to him a prospect for improvement in business. In fact he believes that financial and industrial affairs in the East are destined to grow worse for some time before a desirable change is seen.

NEW RAILWAY PROJECT.

Articles of Incorporation of the Payette Valley and Northern Railroad company have been filed with Secretary of State Curtis, says the Boise, Idaho, *Statesman*. The company is composed largely of the promoters of the Nampa, Boise and Salt Lake Railroad, and the new project is spoken of in the nature of a reorganization of that company than anything else.

The proposed road is to run from some point on the Oregon Short Line near Payette to a northerly direction to Lewiston or Moscow as may be determined in the future. From Cascade valley a branch is to be run into the Seven Devils country. Trackmen of the road it is to be built first, the secretary to be called communicating with Chicago capitalists between now and every year. Another branch, extending to the place of the promoters of the company, is to be built from the confluence of the Payette river and Little White creek to Garden Valley, and will another branch from Nathan Meadows to the great Payette lake is proposed. The plan as detailed in the articles of incorporation contemplates the construction of about 400 miles of road in all. There is a rumor that the Burlingtons is behind the scheme and that the proposed road will in time become part of that great system. The road of Manager Merrill of the C. B. & Q. is connected with the project by railroad gossips.

STARTING FOR HIMSELF.

John C. Cutler Jr. is starting in business for himself in the Constitution building, East Temple street, and will open on the first of the month. He says a broker already adorns the window facing a nearly fitted office. The young man has just attained the majority, and so far is full of business life and energy he should make a success.

FOR GLASSWORKS.

The Lucania boys of trade has been successfully to perfect negotiations with H. W. Hooks, who represents a syndicate of capitalists, for the location of glassworks at that place. An offer was made Tuesday of $15,000 in cash and about $40,000 worth of land for the establishment and operation of a glass plant to employ not less than 200 men and boys. The Lucania *Democrat* says in relation to their pursuit of information from the board of trade before adjourning last night, the committee appointed to conduct negotiations with Mr. Hooks met the gentleman this morning and laid before him the proposition adopted by the board last night, as given above. Mr. Hooks made no definite reply as to whether it was satisfactory or not, but he at once telegraphed for the gentlemen who are interested with him to come to Lancaster at once. One of them is in Salt Lake and the others are in Denver. They will probably be here in a day or two. This looks like business, as Mr. Hooks said when he came that if negotiations progressed satisfactorily he would send for the others.

UTAH ONYX.

Lehi *Banner*: Mr. Millis, one of our onyx owners, recently returned from the East where he went with a car load of onyx. He succeeded in disposing of it at a good figure. It gave good satisfaction to the buyers. At present business in the building line is dull and there is not so much call for this stone, but the Utah product has secured a good hold on the market and if the owners are careful in shipping it will continue to have good sale in eastern markets. Mr. Millis says his trip was successful and he is well pleased with the outlook.

PROTECTIVE ASSOCIATION.

The Mechanics' Protective Association held a meeting last evening at the Chamber of Commerce building.

T. G. Webber, the president, called the meeting to order, and H. T. Ball acted as secretary.

The committee on the mechanic's lien law, consisting of R. W. Morrison, S. H. Hill, Nathan Dean and Elias Morris, reported that they had a bill prepared by eminent attorneys covering the point. The bill, with the exception of some slight amendments, is the same as that which failed to pass the last legislature. It will be submitted at the coming session, and the committee was directed to make an effort to have the bill so amended.

The committee to draft up a new attachment bill to be presented to the legislature reported that they had prepared one which will enable home merchants to protect themselves to some extent against soft soap attachment, without being compelled to allege fraud on the part of the debtor. The bill, they said, also provides against hardship to the debtor by allowing him to give a bond to secure an attachment and enjoins the same issue as similar laws in Nevada and California. The report was adopted.

The matter of the mechanic' lienes was then brought up and discussed. All of those present were in favor of the repeal of the lienes, and a committee consisting of F. G. Lake, C. H. Hood, R. K. Thomas, H. P. Nelson and J. H. Barton were appointed, with power to draft a petition and get signatures and present it at the first session of the new City Council for the repeal of the mechanics' lienes ordinance.

President T. G. Webber referred to the fact that there were but 200 members of the association, and as there were thirty some merchants in the city, he wished an exertion to be made to get all of them in. The meeting then adjourned.

THE FAIR COMMITTEE.

The executive committee of the Midwinter Fair will hold another session this evening. A large certain number of invitations was formulated to be sent to the various county courts, requesting their cooperation. It is expected that this evening Messrs. Don Maguire, G. D. Pyper, Andrew Young, N. A. Empey and P. H. Lannan will be present, to give the committee the benefit of their experience at the World's Fair.

RIVER.

One of the interesting sights that will be seen at the Midwinter Fair at San Francisco, will be the big locomotive of the New York Central railway, which has a record of 112 miles an hour, a train of magnificently equipped Wagner cars, and the first railway train that was run in New York in 1831.

Ogden Standard: George Steger reports having discovered a large body of iron ore of the finest quality. The image, which is of vast extent, is situated about fourteen miles east of Ogden and is so easy of a case that teams can get almost under the lodge. Mr. Steger has filed his claim in the recorder's office, and will a sample of the ore to be assayed.

A dispatch from Nogales, Arizona, says that a miner from Arizpe, Sonora, Mexico, reports depredations by Kid, the renegade Apache, and his party. They killed one prominent Mexican rancher and sacked several ranches and mining camps. At the mining camp of an American named Van Dorn they filed all the buildings and carried off and destroyed all the goods and supplies, including a small flock of merchandise. The raid was people completely by surprise. As soon as the news reached the Prefect of Arizpe orders be sent couriers to the different ranches and mining camps to warn the people and start an official of state soldiers in pursuit of the renegade.

The Yuma, Arizona, Indian affairs commission, composed of W. J. Cleveland, of Indiana, Dr. George A. Iverson, of Washington, D. C., and Peter R. Brady, of Florence, A. T., completed its duties on Tuesday, when the former left for Washington. It is understood that they have made some special arrangements with the Indians and the great part of the Yuma reservation will be thrown open to settlement. The remainder will be allotted in severalty to the Indians. Most of the territory to be opened lies upon the west bank of the Colorado and is south of Yuma. It is a rich bottom with considerable more land. The former is peculiarly adapted to growing figs, dates and grapes, and the latter to oranges and lemons. The work of the commission must be submitted to Congress.

Short Legal Matters.

The following orders were made by Judge Zane this morning:

In the case of Christensen vs St. Mark's Hospital, the demurrer of Barton & Critchlow was sustained and ten days allowed to answer.

David Dalgleish vs Caroline Leith et al. Demurrer overruled and ten days given to answer.

Foman & Hays vs Jos. W. Fish et al. Demurrer withdrawn. Time allowed till December 21st to answer.

Schade vs McKenzie et al. Motion for judgment withdrawn and default entered.

Mary Fybe vs Arthur Wild et al. Foreclosure and sale ordered for $5,196.15.

Detective Sheet's Assailant.

Mrs. Frank Rose, the woman who attempted to shoot Detective Sheets a few nights ago, was on trial in the police court this afternoon, defended by Attorney Carey. The court room was filled to overflowing with spectators.

Utah Dried Fruit.

Two car loads or 40,000 pounds of Utah dried fruit were shipped from this city to Chicago by Z. C. M. I. this afternoon. Each car bore a streamer with the following inscription: "Utah dried fruit, shipped by Z. C. M. I." Several more cars will be sent East in a few days.

BEBE'S FINE BRAIN FOOD.

"Sun-Fish" Prospering in Utah Lake—Other Varieties Coming.

Editor Deseret News:

I have just received the following:

PROVO, December 4th, 1893.

A. Milton Musser, Esq., Fish Commissioner, Salt Lake City:

Dear Sir—Having understood that you were desirous to get specimens of the different imported fish planted in Utah lake by you some time ago, we send you one—a "sunfish" we think. They are doing splendid.

Any further information we can give you will be furnished with pleasure.

Respectfully yours,
UTAH FISH COMPANY.

This "specimen" is plump and meaty, which proves that Utah lake is a good nursery for fish raising.

Not being fully satisfied that the sample sent me belonged to the same fish family, I asked Dr. Talmage to please identify it which he has kindly done as follows:

Dear Sir—The fish received from you this day by the Deseret News I return herewith. In my opinion it is a well developed specimen of Lepomis gibbosus, known in the Eastern states and particularly in New England, by the popular name of "Pumpkin seed" and "Sunny." It is perhaps the best known and certainly the handsomest of the sunfish family of the fresh fish. It is abundant in the brooks of New England, and is generally found wherever the perch abounds, but its occurrence in Utah is, I think, an unusual thing. Its food is largely composed of fish, and by some is considered superior to that of the perch. It is brought much of as a game fish.

Trusting this information may answer your purpose, and with the best of wishes, I am,

Yours very truly,
J. E. TALMAGE.

A. Milton Musser, Esq.,
December 4, 1893.

It will be remembered that in November, 1891 I received a consignment of fish from the Illinois river which I "planted" into the lake at Pleasant Grove. The consignment consisted of "crappies," "sun-fish," "black bass" and "bass fish" just as they were netted from the river. A number of Eastern citizens, on that date, are enjoying healthy, which is very gratifying to those fellows who are among the very best for the amount of fish spent, besides, some time and their rapid multiplication. Next year I expect to carry Utah Lake, Bear Lake, and the Weber and some rivers a consignment of white fish fry. The value of the whitefish to be will be so to speak and more at this time. In the new issue I am presented a liberal assignment of salmonoides lake trout eggs from the East. If any of your readers would like a few of these eggs, I will gladly supply them, by sending me their post-office address, express office, etc.

Respectfully yours,
A. MILTON MUSSER.

Action for Foreclosure.

In the Third district court this afternoon a suit was instituted by Margaret V. Taylor, as guardian of the person and estate of Noah V., Mary V., Abraham V. and Samuel V. Taylor, minors, against John Hess, A. E. Hyde and M. E. Commins. It is alleged that on July 19th, 1893, the defendant Deck executed to the plaintiff, as guardian aforesaid, a promissory note as follows: "Margaret V. Taylor, guardian, of Salt Lake City, of Utah, two thousand and sixty dollars, in U. S. gold coin, with interest payable at maturity at the rate of nine per cent per month from date until paid, having loaned as collateral security, five thousand (5000) shares of the capital stock of the Northern Star Mining company," etc. It is now claimed that the shares are practically worthless, and that, in addition thereto, as further security Deck executed and delivered to the plaintiff a chattel mortgage, consisting of all the hoisting plant and fixtures at the "French Drain and Hess Lonsbery," at the old Nabob mine, situated on South West Temple street. The mortgagee also assigned to the mortgagee all debts due to him on account of the hoisting plant, and claims there is now due—owing from John Hyde—the sum of one thousand and sixty dollars, together with interest at the rate of one per cent per month from July 19, 1893. M. E. Commins, the complaint states, claims to have some interest in the property which is subsequent to the mortgagee lien of the plaintiff. Commins is now in possession of the property, wherefore plaintiff demands that the defendants be foreclosed of all interest, lien and equity of redemption in the property, and that the same be sold and applied in payment of costs of this action, said note and mortgage, with interest thereon up to the time of payment at the rate of nine per cent per month.

Henry Harrington and Barlow Ferguson are the plaintiff's attorneys.

Rescue Mission.

The Rescue Mission provided during the week ending December 8, 416 meals and lodgings, taking 39 in excess of the week previous.

The "American Recorder" Dead.

BLOOMINGTON, Ga., Dec. 8.—Wm. Sparks, the oldest half brother and guardian, known in the civilized world for a quarter of a century as the "American Recorder," died here this morning.

PARK CITY.

PARK CITY, - DEC. 8, 1893.

Concentrator Starts.

The week opened up with a much brighter appearance that for a long time. News was received to start up mills full at the Crescent Concentrators, to treat the large amount of ore which they have on hand, and the welcome sound of the mill whistle is music to the ears of the people. Work on the Crescent tramway has been resumed and the little engines have been moved to their places to handle the cars up the hill, where they are loaded and sent down with fast close on to the Crescent mine. The snow is quite heavy along the tramway and the road cannot be kept open very much longer.

The Daly Starts.

On top of the Crescent opening came news from Mr. Daly to start work immediately in getting out ore from the Daly-West; and Monday morning a full force of men were out to work at that mine. In a few days the ore will be rushed to the markets. Altogether it looks better for the camp at present than for any time during the past five months.

The Weather.

The weather both at day and night has been extremely cold during the entire week. Not much snow down to the town, for the canyons are getting filled up very rapidly, and the roads are difficult to travel with the heavy loads both to and from the mines.

Ore Shipments.

The usual heavy shipments of ore from the Ontario, Ontario, Silver King and Anchor have been kept up during the week and of fine class ore. The Anchor and Silver King are laying up a great amount of Cable Gate coal, and this leads one to think that the mines will continue operation during the winter.

Rock Scenes.

At the present time there is a great deal of sickness among the adults of the Park, mostly of colds. Last week five people were carried off by typhoid fever and crouse. The illness in each case was brief.

Notes and Personal.

David Keith, manager of the Anchor and Silver King mines has been in Salt Lake during the week, interested in the suit in which the Anchor company came out victors.

Mr. J. J. Daly spent the early part of the week in the City, owing that work on the Daly West was well pushed under way. He is always a welcome visitor to the town.

Rev. Samuel Hanger is now in charge of the Episcopal services here. He succeeded Rev. Jeffrey, who has been called to preside over the church at Ogden.

The scheme for a free reading room which is being pushed by the Rev. Hunt, is progressing, and this winter will see a nice room fitted up, and supplied with all the leading daily and weekly papers and other reading matter. Such a room as this has been long needed, and its work will be very much appreciated.

Some sports, merchant, W. J. Kegley, lawyer, J. W. Wilson, ex-sheriff, and H. B. Rogers, member elect to the Legislature, went on a combination hunt and fish for the Tuesday to remain a few days.

Mr. W. A. Dayton, of the Utah Steam Laundry, was in town Wednesday, arranging for a branch of the laundry in this city.

The merchants are all setting up showings in their windows for Christmas cross, and trade to that line is expected to be good.

D. C. McLaughlin and W. V. Rice were passengers to the city Friday night. The former is now cashier of the Park City National bank.

PROVO.

PROVO, UTAH, Dec. 8, 1893.

First District Court.

Business was transacted in Judge Smith's court yesterday as follows:

Riley Patton and Dorcas Hendricks pleaded not guilty to the charge of burglary and their bonds were fixed in the sum of $500 each.

George Deming pleaded guilty to a burglary committed at the store of A. D. Jacobsen in Lehi, Utah county, December 8th, 1893, and was sentenced to two years in the penitentiary.

The White-Lockhart mining case was decided in favor of the defendants, giving them possession of the disputed property.

Salt Lake Irrigating Company Suit.

The old Jordan ditch controversy between Utah County and Salt Lake county farmers has at last reached the courts. George T. Ferry, a Provo farmer, has commenced suit against Salt Lake City, Utah and Salt Lake Canal Co., South Jordan Canal Co., North Jordan Canal Co., and Draper & East Jordan Canal Co., to recover $10,000 damages.

Mr. Ferry claims to be the owner of over 1,000 acres of farming and grazing land in the eastern section of Utah lake, and that defendants have diverted from during the two years past to the extent of $10,000 by maintaining banks in the Jordan river dams and so refusing the waters of Utah lake to an average of two feet above compulsion point—thus had three and one-half inches more low water mark—thereby conserving much of his land, bringing up the actual and sell on other parts, and making the place very unsalable for residence purposes. There has been some evidence in Mr. Ferry's family during the past two years.

The answer makes a wholesale denial of all the material allegations of the complaint.

Plaintiff is represented by Warner & Williams and Mr. Kennedy, and defendants by Judge Hogg and F. S. Richards.

This is but the first of a number of suits contemplated by Utah county farmers, and should Mr. Ferry be successful, other suits will immediately thereafter be filed.

Notes.

The grand jury ignored the discharge against Esther Graham of Provo, Mr. Irvine, prosecuting, the charge of Lillie Bennett, after examining back issues of the Deseret, and a civil action for damages sustained by libel, will probably be commenced in a few days.

The S. T. Jones distillery case and J. G. Jack murder case are now among the cases ignored by the grand jury.

Mr. Van Pelton has been taken to the penitentiary. An effort will be made in a day or two to secure bail for out.

The Central Building company has established to call for contractors against the directors of the S. T. Academy except A. O. Smoot and H. H. Cluff.

COMMERCIAL.

SALT LAKE STAMPING HOUSE.
