HORSEFLESH IN TEXAS.

Some Facts About Prices Obtained for Texas Reared Horses.

To northern breeders who are still raising scrub stock, if there be any such, the following extract clipped from the Texas Live Stock Journal may be of interest. Add to the purchase cost the amount charged for freight—probably from $25 to $30 per head. Farmers must judge whether they can compete with Texas breeders or not. It would seem by comparing the shipments of last week with those of the corresponding week of last year that the demand for such stock is decreasing.

Buyers are not numerous, says the Texas Live Stock Journal, but one they succeeds in purchase anything that is of breed. Among the sales reported were thirty head of medium mares and horses at $28.50 per head; twenty head of yearling male colts (improved) at $19 per head; thirty head of medium mixed horses at $30 per head; twenty-six head of medium mares and fair at $25.50 per head; thirty head of improved mixed at $17.50 per head; twenty-five head of Spanish mules at $16 per head.

The receipts of horses, mares and mules by rail during the past week included 480 head, against 622 head during the corresponding week last year, and 1,125 head during the corresponding week in 1889. Among the shipments of horse stock and mules by rail last week to points outside of Texas were twenty-nine head of horses, one mule and six head of stallions, shipped by D. McComan, to Memphis; thirty head of horses and mares, and three head of colts, shipped to C. A. Hoover, at Louisville; forty-eight head of horses and mares, ten colts and twenty head of mules, shipped by Joe Perkins, to Franklin, Tenn.; twenty-six head of horses and mares and two head of colts, shipped by H. R. Elliott to J. F. Nichols at Meridian, Miss.; thirty head of horses shipped by J. D. Buckley to Lexington, Ky. The following quotations rule in this market:

From San Antonio.

ADOLPH HOEFFNER, a well known manufacturer of boots and shoes at 621 Nolan Street, San Antonio, Texas, will not soon forget his experience with an attack of the cramps, which he relates as follows: "I was taken with a violent cramp in the stomach, which I believe would have caused my death, had it not been for the prompt use of Chamberlain's Colic, Cholera and Diarrhœa Remedy. The first dose did me so much good that I followed it up in 20 minutes with the second dose, and before the Doctor could get to where I was, I did not need him. This remedy shall always be one of the medicines of my family." For sale by Z. C. M. I. Drug Dept. 5Aa

Breaking Sitting Hens.

The Farmers' Journal says: "In our experience we have found a simple wire cage placed in the run or shed to answer the purpose. As soon as a hen manifests broody tales her from the nest and place her in the cage. Feed her sparingly, and in a day or two her anxiety to be with the rest of the flock she can see through her prison walls will be so great that her broodiness is forgotten. It is a very simple and humane remedy."

Ice for Sunstrokes.

Still another use been added to the long list of remedies for sunstrokes. And this, like all the others, is said to be peculiarly efficacious. It consists in the application to the spine of a rubber bag filled with ice cubes and water. It is claimed that within a short time after the application the nausea and vomiting cease, and the victim of sun do not fall asleep. Moreover, that he does not suffer from stiffness or other disagreeable sensations.—Boston Herald.

On Government Trial.

Write Prof. Sanborn, Logan, for copy.

Pleasant Grove, July 31st, 1891.

Messrs. Bullock & Wadley,
Pleasant Grove, Utah.

Gentlemen:—The Walter A. Wood Single Apron Harvester and Binder we bought of you, and for which we gave our order in Salt Lake City, has been in operation now for several days. We have cut, bound, elevated and delivered all kinds of grain, heavy, light and tangled, to our satisfaction, and better than any other machine we have ever seen at the same work. We consider the single Apron Open End Machine is superior to any three or four canvas machines, both in point of workmanship and economy. We have just finished cutting five and a half acres and have not missed tying one bundle.

(Signed) ISAAC CARLSON,
J. J. CARLSON.

Pleasant Grove, July 30th, 1891.

Messrs. Bullock & Wadley,
Pleasant Grove, Utah.

Gentlemen:—We have had one of your Walter A. Wood Binders since 1880. Have cut at least 1000 acres of grain successfully for ourselves and customers. The machine is good for further service with a few slight repairs. This same machine was in contest with McCormick Binder in 1886, and won the honors in James Hallingsey's field, Pleasant Grove. The Single Apron Harvester and Binder tempted us you in 1891, in our opinion, does equally as good work and has many points better than any other machine, and up to date has cut, bound, elevated, and delivered to our entire satisfaction.

We consider the Single Apron Open End Machine far preferable to three canvas closed end machines.

A. A. HOLMES,
J. HOLMES.

Pleasant Grove, Utah, July 30th, 1891.

Messrs. Bullock & Wadley,

Gentlemen:—The W. A. Wood Single Apron Harvester and Binder, you sold us in 1890, has cut 250 acres of all kinds of grain, sheeted, tangled and thistled. We can cut, elevate, bind and deliver equal to work done with any binder known to us, has given entire satisfaction to our customers and can get more work done than we have time to accomplish. We never pull out of a field until the grain is all cut and satisfaction given. In 36 hours with two teams and three men we cut 80 acres. The Open End Single Apron Machine is a world beater.

Salt Lake City, Utah.

Gentlemen:—I have used my Walter A. Wood Harvester and Binder four years; it has cut, bound, and elevated some of the heaviest crops in Spanish Fork, and has given equal satisfaction to myself and customers, and is now in good running order after having cut 700 acres. The entire expense for repairs during the four years has not exceeded $5.00.

(Signed) DAVID WILLIAMS.

Wood was Victorious!

Read what the "Logan Journal" says in its issue of July 22nd, 1891.

It is much more exhaustive than the trials at the World's Fair, Philadelphia, in 1876, according to Mr. Scott, which were concluded in one day, while to present Experiment two long days were consumed. The grain and field were conceded to be even and of the best for fair trials.

Professor Sanborn kept the matter in his own hands, and all the parties active in the contest—active in handling the machines they represented on the ground—agreed that the trial has been fair and impartial, and signed as affidavit to that effect.

The test is of the utmost importance, as it has taken place under government direction, and will be noted all over this country and elsewhere, and will be taken as authoritative.

WILL IT ELEVATE?

YES. Malicious Competition equally as well as all crops.

Gentlemen:—The Walter A. Wood Single Apron Harvesters and Binders bought from you by us this season and put in operation by your Walter C. Lyman, have given satisfaction in every respect. We consider them far superior to any three or four apron closed end machines, from the fact that we can handle all kinds of crops with the Single Apron easier, and better satisfy our customers. The special features recommending the Walter A. Wood Single Apron Harvester and Binder are: Lightness of draft; one canvas in place of three or four, insuring success in elevation without choking, and the most positive knot tying device used. We recommend without hesitation the Single Apron Open End Walter A. Wood Binder to our friends.
