THE young dipper fiend is again playing his dangerous game and he should be closely watched for home measures. The day one of the youthful miscreants attempted his game in a lady's school, at the head of Main street, while cheating escaped, the incident of this character are of almost daily occurrence.

AN application for the pardon of Neil Morley, who is now serving a twelve year's sentence for murder in the second degree, has been filed with Governor Thomas. The petition is signed by a large number of prominent citizens. Morley was sentenced March 5, 1891, and is now suffering from consumption.

The First Ward band furnished music for dancing, and an ample and excellent refreshment was dispensed. The affair was under the auspices of the Ely school, and was a pronounced success.

Its experiment will be watched with much interest in the Junction city.

JOHN HENRY HOBBS, a noted journalist artist and bookback, appeared in the police court this afternoon charged with not guilty to assaulting a white man named Grimsgrime. For the unpaid nickel the darkey seized Grimsgrime's hat and struck him in the face. The white man got out of a misunderstanding as to the price of the shine. The defendant was adjudged not guilty, and discharged.

The Second Today.

Mary E. Pond vs. Parley Pond are the parties to a divorce suit filed in the Third District court this afternoon. They were married in this Territory in June, 1880, and plaintiff has resided in Salt Lake county for some time past. The suit alleges that her husband has now for more than eleven years almost wholly neglected to provide for the support of herself and children. There have been six children born of the marriage. Plaintiff has supported her family by hard work during the period named, taking in sewing, doing washing and ironing, and receiving boarders. Defendant is described as an indolent man, and as having been a constant burden upon the plaintiff, who asks for reasonable alimony and the custody of the three children living, being all girls, whose ages are eleven, six, and three years respectively.

BY TELEGRAPH TO THE NEWS.

A COLLISION.

The Disaster Near Helsingfors, Finland.

ST. PETERSBURG, Aug. 10.—It is ascertained that the passenger steamer run down by the steamer "Hunsberg" outside of Helsingfors on Monday was the "Alex." At the time the collision happened the sea was in a rough state. There were no lines to cast them from, however, and in minutes after the collision the "Alex" sank and the "Hunsberg" went aground. Those on board the "Hunsberg" threw life buoys, boxes and everything portable overboard to the people struggling in the water, but despite this, ninety persons are supposed to be lost and thirty-five bodies are already recovered.

Tate Ineligible.

CHICAGO, Aug. 10.—A special from Omaha, Neb., says: It has been discovered that Rev. J. G. Tate, the Republican nominee for lieutenant-governor, is ineligible. This is an Kaghlen opinion and failed to take out his naturalization papers until a year ago. The constitution requires that the governor and lieutenant-governor shall have been citizens of the United States for two years prior to election. The State central committee will be called upon to fill the vacancy. Tate's case is similar one to Governor Boyd's, the difference being that Tate's father was never naturalized and that he was not a resident of Nebraska, when it was admitted to the Union.

The Tongkin Rebellion.

TANGIER, Aug. 10.—Montoh troops this morning made another attack in the direction of the rebellious tribesmen, assaulting the villa and selling the inhabitants of villages. The inhabitants fled. A portion of the troops have made an attack upon the rebellious Angheres and two divisions are proceeding to support the Sultan's forces.

The Body of Biggin.

NEW YORK, Aug. 10.—The body of Charles W. Biggin, a sailor of the United States steamer "Baltimore," who was murdered in Valparaiso, Chile, during a social visit, treated as a hero by the Pacific mail steamer "Colorado" last night. Mr. Everside and Jas. W. Nagle called at the bureau of the United States yesterday, and obtained permit for landing the body in this city. It will be taken to Philadelphia. On arriving in Philadelphia the body will be escorted to its last resting place by militia and by citizens. It is expected that several thousand people will participate in the parade. United States Senator Donal McCleary accompanies the body.

ARRIVAL OF THE REGADIS.

NEW YORK, Aug. 10.—The Pacific Mail steamship "Colombia" came up to her pier this morning. A metallic casket containing the body of Henry Clay Ritter, Charles W. Biggin, murdered by a mob at Valparaiso, was taken off and was transferred by W. S. McCleary, the U. S. consul at Valparaiso, to the charge of the Philadelphia committee. The United States flag was placed over the casket.

At Philadelphia the body will lie in state at Independence Hall for two days, and a military funeral will take place on Sunday.

A Crime Said to be Committed by Indians.

EL PASO, Tex., Aug. 10.—A Demming, New Mexico, special says intelligence has just been received of the murder of Lee Hopkins, the 21-year old son of J. B. Hopkins of this town, and a Mexican named Lucado, whose bodies were found near Hatchita yesterday. A band of fifteen renegade Indians from San Carlos reservation have been running as large for several weeks, committing many depredations, and it is said by well posted settlers that they undoubtedly committed the crime.

A Sun-Paton Was Assaulted by Strikers.

PITTSBURG, Aug. 10.—John Beame, a non-union workman employed at the upper Union mills, was assaulted by two men while on his way to work this morning and badly beaten. His assailants were arrested and recognized as Edward Zommer, a striker, and Thomas Osborne, a former employee. Beame's injuries are painful, but not dangerous. This is the first trouble since the beginning of the strike at the Union mills. The assault caused considerable excitement, but the police superintendent does not bear any more trouble and only the usual number of officers are on duty about the mill.

AN ANONYMOUS LETTER.

It Purports to Be a Warning to Secretary Foster and Others.

PITTSBURG, Aug. 10.—In Alderman McMaster's mail yesterday was an anonymous letter, posted in New York City on Monday. The letter was written in a cramped hand, probably disguised. It read:

"Alderman McMaster, Pittsburg, Pennsylvania.

Dear sir:—Some time this week a party of men will have been and willing to kill you and imprisonment in Fort again."

Alderman McMaster has been in Binghamton for two weeks. The anonymous letter was turned over to the alderman's attorney who, after reading it, said: "I am not afraid to stay out in the open." He said he had received written threatening letters, and was sent to New York to be sealed.

Attorneys engaged in prosecuting the Homestead riot cases have within a week received several letters of a threatening character, but they have done if any but of the latest contain the same, and are said to be in the same." In this connection it may be said that other officials of the Carnegie company are still receiving letters threatening their lives.

Death of Gomez A. Leach.

NEW YORK, Aug. 10.—George A. Leach, well known in newspaper circles, died this morning in Bright's disease of the kidneys. Leach was for many years connected with the American Hebrew and was in recent conditions, the last being that of assistant general manager. The exhibition drill this morning was witnessed by 10,000 people.

Inventive Genius of a Prisoner.

BERLIN, Aug. 10.—The inventive genius of an officer named Thomas, at the German military, who was, in 1884, sentenced to seven years in the penitentiary for treason, today resulted in his release under commutation of the sentence. During his imprisonment he invented a lamp, which is a great improvement upon the methods now employed in the construction of cannons. The government was notified by the proper official and a committee of officers, after visiting the prison and examining, reported it a most valuable discovery.

Thomas was immediately given his liberty and will become wealthy from his invention.

Incendiary Fire.

LANCASTER, Pa., Aug. 10.—An incendiary fire today consumed the works of the Lancaster Chemical company. The loss is $60,000; insurance only $20,000.

Remember! A woman will never be more than an indifferent suit of a man. She must remain what she is, but she must be gradually what she is. She is different from man but is not inferior to him. She is not equal to a perfect man, but she must be perfect after her own fashion and not after man's fashion. She differs from man as he differs from woman. Woman is equally slightly differ from politics, that is, in direction, not in energy. The negative and the positive together make up the power. You so which sets for nothing more."

FROM MIKE TO HIS MICHAEL.

An Irishman Who Got a Soldier Dubbed and Now Wants to Be with Him.

"The story of Mazon Creek is general. It regarded as a highly impossible place for a hero," said a Mazonite and rotterdam. "But I take in mind a case of a lonesome so and also one where boy near forwarding a parallel character. About ten years ago I had in my employ an Irishman, a clever but totally uneducated fellow, who did not take about my place in Bolivia. You remember what a Terrible Mike that country was in about that time since the rich finds in gold in the country adjacent. My Irishman caught the fever, and one day I found out he was asking me to lend him gun, with which he wanted to buy a prospector's outfit. Well, the fellow had lived so hard and money was so easy in those days that I let him have it. He bought his outfit and went off and I got for the prospector's outfit.

"In about a month he came back to Bolivia with that wide fabby staggering under a load of the richest of ore. He hired three men, bought three mules and started back to Little Mike's claim. Mike was shortly afterwards that with four more mules loaded as the first one had been. A representative of an English syndicate happened to be in Bolivia about this time on the lookout for building in Mexico. He saw Mike's ore, liked it, took a sample of the ore, had it assayed, went out and examined the claim and then made the Irishman a proposition that Mighty nearly knocked him off his pins. He was going to put office at the time, when in leave Mike in a state of terrible excitement.

"What do you think, sir, I'm offered for my claim? he cried. One million dollars and twenty-five per cent. of the net profits.

"Of course, I told him to sell, which he did. I passed a good investment for all concerned, as the Englishmen have taken millions of dollars out of the mine.

"But now comes my point. Instead of commanding the usual bribe that poor men indulge in when they become suddenly very rich, Mike set about to get his Michael benefits of his wealth. There lived in Bolivia at the time a young son of an English officer, who was possessed of a high degree of culture and refinement, though in very moody circumstances. Well, sir, the first thing Mike did was to get this young man, who was for an education. He placed himself absolutely under her direction. Went to the same house, and let tutor him how to hold a knife and fork and how to enter a room and how to behave in the refinements of a literary education and a year or so of travel.

"I met my Irish laborer in the parlor of a London hotel about six months ago. You never saw a more perfect gentleman in your life. He has acquired a financial education, is as easy and graceful in manners as a courtier and above all has the true instincts of a man and a gentleman in his heart. And until a month ago he was a laborer in Bolivia and was evidently made at the dream of his life to be one at his first opportunity!"—St. Louis Republic.

The Migrations of the Lemming.

In Norway and Sweden a curious migration takes place, the irregular migration of the lemming. There is no telling where this strange animal will begin its march southward through Norway and Sweden in search of food. The natural instinct seems to direct and the nest is seldom less than seven years or, as in one instance, more than seventeen years.

The lemming is a species of rodent and resembles in some ways a common water rat. Once started, these strange creatures press on in a straight line. There is no checking their march. If a wall or a house is in their way they will try to climb it rather than go around it, and if the house be a stack of corn they will eat it and then go forward. The lemmings are good swimmers and so they do not mind rivers and ponds, although they cannot keep afloat in the rapids.

The migration comes to a fatal finish. Taking a wind-swept road the southward wanderer, the animals arrive after awhile at the seashore. Still they press on, and the result is seen in the most pathetic manner. Thousands of them are drowned in every place.—J. L. Vance in Our Animal Friends.

The Male Bass Hatches the Young.

A small south black bass, the variety called the angler, is a perfect woman, and the only fish except about the islands in Lake Erie, attains a weight of about one pound in two years, at which time it also arrives at maturity in a productive sense. It then finds a clean place on the gravel, generally in a little pool of water, and by the male member of the family, who, contrary to the general rule laid down by nature, the female consent, is some favorable waiting place, while the male goes off and collects food, holds duties, and by the most constant care fans with his tail all the sediment off the eggs and drives off all intruders, even to a bygone and turtle. He fishes fresh little healthy of several thousand individual fishes about, and brings each to the nest of a female gipsy and shoot a spadger of an inch long, to become in time as a brown handle and weigh all the way up to ten pounds, so saving that the parents are proud of it. He and who for the first time pulls him permanently out of eggs pass. He added thirteen a weight of over four pounds, although these weighing six pounds have been caught.—Cleveland Press.

An Ancient French Custom.

Infanticide in some parts of France, where it is said to be still practiced, is the custom to have twelve adults witnesses accompanied by twelve little boys, and when the proved the land was paid, and to authority took place, the care of the twelve were pulled and they were boxes severely, so that the pain thus inflicted should make an impression upon their memory, and, if required afterward, they might bear witness to the act.—Yankee Blade.

An Odorless Scaffold.

"I should think Pope Leo XIII would be a very unhappy man!" said Judge Pennybacker. "I should think he would be troubled with dreadful foreboding."

"Why so?" asked Colonel Verger.

"Because he can never sit down to the table without seeing the Hitherto—Low Tones Strings.—Judge Pennybacker.—Texas Siftings.

OF THE

DESERET WEEKLY.

The sixth volume of the DESERET WEEKLY in the present form is now bound. A limited number of copies of these six volumes are bound and kept at the Deseret News Office, Salt Lake City, in bound form at $2.00 per volume. It is the best history of current events to be obtained, and by far the cheapest, and the time is not far distant when they will be eagerly sought after by students of history, authors to be informed of the stirring events which have transpired within the past three years—the most interesting period of the history of the Latter-day Saints. Every person who can afford it should secure these volumes while they are to be had for future reference, and especially should they be obtained for every Sunday School, Improvement Association and Ward library. Apply early to make sure of getting them.
