TELEGRAPHIC.

SEVERE BLIZZARD.

Cripple Creek District Visited by a Destructive Storm.

GIVEN LOST IN THE HILLS.

Hundreds of Prospectors Tent Them Away—Great Damage to Property.

DENVER, Col., April 12.—A special to the News from Cripple Creek, Col., says: The Cripple Creek district was visited by the severest and most destructive blizzard ever known today. An immense amount of damage has been done, and in all probability some lives have been lost in the hills, or have to lost after being in exposure, and general fear is entertained for the prospectors. A light snow started in at 11 last night, and about 3 this morning the storm regarded and the velocity of the wind, which was from the northeast, increased and continued to blow at the rate of sixty miles an hour all day. A score or more of buildings in this city were blown down, and tents, sight and tent houses were scattered everywhere. All the telephone wires out of the camp are down and no trains arrived or departed this afternoon.

At 1:30 the Cripple Creek ensemble two-story building on Cripple street, and it caught fire from overturned stove and was completely destroyed. The building is insured, which prevented a general conflagration.

The Bullion cafe building at Carr and Bennett was partially wrecked.

A large outside house on Warren avenue was blown down about noon and several occupants were injured.

The city is in darkness, as all the electric light wires are down. Communication is cut off with all outlying points, with the exception of one telegraph wire.

Many more fronts have been blown in, and some of the business houses, as well as residences, will need repairing. In the little hundreds of prospectors who are in the hills, and the majority of them were blown away. The damage to property throughout the camp will not fall short of $100,000.

The telegraph line from the Florence & Cripple Creek road was washed between here and Anaconda. One of the mills just there from Victor is stuck in the snow at Elkton.

On the Midland Terminal two passenger trains are blockaded at Gillett.

A dozen buildings of mine were blown down at Gillett, and a number at Anhuel, Gold Field and Victor. Such homes and private improvements throughout the district were badly damaged.

At Palmer Lake one of the worst snowstorms that has ever visited the town in the memory of the oldest inhabitant started about 7:30 this evening and has been raging furiously ever since. The wind blew seventy-five miles an hour. The thermometer from six to twelve feet deep. Pedestrians is impossible and the storm shows no sign of abatement. The trains in both directions are stopped between this place and Colorado Springs.

THE WORST EVER KNOWN.

DENVER, April 12.—A special to the News from Raton, N. M., says: The worst storm ever known in this vicinity set in about 8 o'clock this morning. It continued until 3 o'clock tonight, with the wind blowing at a fearful rate all the time. All the northbound trains on the Santa Fe are tied up, as the snow drifts in the Raton tunnel on both sides of the mountain are drifted full of snow for a distance of several hundred yards. Under the most favorable circumstances it will probably be more than twenty-four hours before any trains can move over the Raton mountains.

COLORADO CITY, Tex., April 12.—A cyclone of limited dimensions but terrific force struck a portion of the city last night at 11 o'clock, doing considerable damage to property and resulting in the death of Jones, the twelve year-old son of J. M. Schanco. The storm struck the four room building occupied by the family, and the house was literally splintered. Mr. Schanco, wife and five children had retired, and it is remarkable that any of them escaped alive. James, the oldest son, was struck on the head by a portion of the timbers, and his skull fractured, resulting in death. He was found 200 yards across the street. Mrs. Schanco and the other children were bruised, but not seriously.

Arabs Driven the Revolution.

PARIS, April 12.—The Dervish force under command of Osman Digna, continue to hold in the neighborhood of Osak, in Wednesday their opportunity to do so. Most skirmishes between the Dervishes and friendly Arabs on the plains before Massaua are continually occurring, and several men have been killed. It has been learned here that the practice of the Dervishes is to torture wounded prisoners they may make.

Osman Digna, who is reputed to be an Italian, has slashed the nostrils of a Greek who is friendly to the British, but he was rescued with four men killed. The victory of the Dervishes is more serious the safety of the plains before Massaua.

It is now stated that Osman Digna has a force numbering 3,000 troops. It is well known that large numbers of the Arabs who have taken service recently in the British are deserting to the enemy.

VIRTUALLY ADMITTED

That Missionaries are to Be Expelled from Turkey.

WASHINGTON, April 12.—The Turkish legation has received from the Sublime Porte, under yesterday's date, the following telegram:

"It has been falsely stated that the missionaries would be expelled. The imperial government has not taken and does not intend to take any general measure of expulsion of missionary and Catholic priests. Those among them who, after consultation, have instructions are not and will not be molested. But, surely, it cannot be the wish for those who by their attitude try to create the other and the quality of the country and place Turkey under open hostility in the news and regardless to force in the empire. The imperial government, watchful of the most measure of public security, has the duty to send those away from the territory, and in no case it would disturb a hair, which is at yellow society quite contrary."

A President's Grandson in Trouble.

ATLANTA, Ga., April 12.—John Quincy Cooper, grandson of ex-President Tyler, has been held over to the next grand jury. Cooper is charged with forgery in the second degree. He is a young man of good family, and is been under bonds to answer.

ARRIE'S STORY.

He Claims to Have Murdered a Woman in Self-Defense.

DENVER, April 12.—Arrie, the Japanese who is charged with the murder of Mrs. Minnie Millet and Lenchow, Wyo., Tuesday, on Monday, Sunday night, was captured at Pueblo late morning and brought to this city. He admits having killed the woman, but says he did it in self-defense. He claims they quarreled and he struck her with a stick and then with a gun and then with a knife.

The Lamborn Murder Case.

LEAVENWORTH, Kan., April 12.—Detective Charles Schaeffer, who is alleged to have forced the Lamborn children to confess to having poisoned the mother of their father, J. F. Lamborn, and fired the crime on Thomas Davenport, has disappeared. Annie Lamborn, in the presence of her accused brother, confronted Alfred C. Lamborn, a half brother of the accused children, and announced to know why he had forced her to swear to a false story. Alfred admitted, it is said, that he aided Schaeffer in obtaining confession to the "confession." He claimed that he did not tell her to write down the name of Davenport. To this she answered: "No, you did not, but you persuaded that detective to do it, and by keeping quiet gave your consent."

Annie and Charlie Lamborn and Davenport are still in jail. Meanwhile newspapers are protested when they come to trial.

GREEKS SATISFIED.

They Win the Leaping Events of the Olympic Games.

ATHENS, April 12.—The festival in honor of the seventy-fifth anniversary of the Independence of Greece continues, though most of the important events have been decided. A luncheon was given at the palace today in honor of the victors in the games, the guests of which included the members of the various committees connected with the festival, the correspondents of foreign newspapers and representatives of the local press.

After the luncheon King George toasted M. Averof, the rich Alexandrian who made such liberal donations for the restoration of the stadium, as well as other donors to the same purpose, the crown prince and Prince George and Nicholas, all of whom, his majesty said, had worked for the success of the festival. He also said he hoped the foreign athletes present would possess around the success of the games and the enthusiasm they had seen of Greek people.

The third event of the day was a leaping race with Arabs in Marathon and such, the Greeks defeated Arabs by 4 feet, and Greek was second to Greek, the Greeks defeated Arabs in 3:22.

The Greeks are much gratified at winning the two Marathon races, Lorey's triple race and the first race, won by Louis, from Mars but to Athens. These two races were fixed upon by the popular opinion as the leading events of the games, and the Greeks feel that to have had their aspirations win both of them goes far to compensate for other defeats.

Abundance of Money.

LONDON, April 12.—There is a plethora in money now and rate rates again declined. The gold shipments from America during the week are believed to have been made in connection with the Russian currency program. It is taken there will be more extensive shipments during the summer, unless there shall be a revival of British confidence in American securities. Stocks on Monday the stock market was less active and mostly are fixed to silver securities. The Turkish securities were improved, and Spanish were hardly affected by the congressional action on the Cuban resolutions. Foreign securities were mostly improved.

MATABELE VICTORY.

Capt. Brand's Column Attacked by Matabele Natives.

BULAWAYO, April 12.—Details have been received here of an encounter with the Matabele of Capt. Brand, as the result of which he suffered a reverse and was compelled to ask for assistance from Bulawayo.

The Matabele surrounded and attacked Capt. Brand's column, consisting of 150 men, which had been sent to relieve Gwanda, twenty-eight miles south of here, on the Tuli road. Capt. Brand formed a laager for the purpose of offering a better defense against the attack. Major Cooperdale fighting was killed. The wounded were found to be well armed with Martini rifles, and they formed a strong and well aimed fire against Capt. Brand's Maxim gun, with such good effect that it became disabled. Capt. Brand's ammunition then ran short, and the Boer attack of the Matabele continued, the situation of his men began to grow desperate. They were finally obliged to fight their way through the beleaguering enemy's lines. They succeeded in reaching their wagons with a loss of five killed and eleven wounded.

It is estimated that 150 of the Matabele were killed.

In response to Capt. Brand's message asking for assistance, a relief force of 200 men with artillery were dispatched as quickly as possible. This force met Capt. Brand's column returning.

The rebellion in Matabeleland seems to be spreading, in spite of the exertions of the chiefs who have been trying to suppress it.

Boers Sends a Message to Wolff.

NEW YORK, April 12.—A dispatch to the World from Tampa, Fla., says: Among the passengers arriving from Cuba last night was one who left Havana Friday in a coach with others for a short drive to the country. As Havana, twelve miles out, the coach was stopped by insurgents, and the spokesman asked the driver if he recognized him. Upon receiving an affirmative answer, the leader said: "Tell your friends with your passports so that they may be without so having gone here, and tell General Weyler that Antonio Maceo is here waiting for him."

The party reached and the news quickly spread in Havana, but Maceo is still at liberty.

The Marchioness's Trial Lost.

CARCASSONNE, Fr., April 12.—Lesage Taylor, who escaped last night, after being sentenced to the day set for his execution for the brutal murder of the Marchioness Fanny, is still at large, with 1,000 armed men in pursuit. His brother Wilson is still in jail, which is heavily guarded. Fifteen armed men, officials, have arrived in town, and Deputy Sheriff Shelton, fearing an attempt to free the prisoner, has secured the local militia company to be in readiness to act.

Fifty men spent all last night and today drilling. The Bloodhounds traced the trail only a quarter of a mile out of town, where some scoundrels evidently met him with a vehicle. The dogs lost sight the trail near Salles Bon town, near the Watson tracks, but after following it a short distance, again lost it at a point near the Santa Fe tracks. Some people think it has been Georges Lamyre's passing freight train and got out of the country. An unknown man was seen to alight from the hind baggage of a Santa Fe train later near Marseilles, and inquiries have been sent there in hope that a clue is thus furnished.

Although there is talk of storming the jail, it is not thought that an attempt will be made to-night at least.

Ingersoll Preaches a Sermon.

CHICAGO, April 12.—Col. Robert G. Ingersoll spoke to one the Millard church congregation today, in response to an invitation extended by the pastor, Rev. John Rust. In his letter of invitation Rev. Mr. Rust said: "The Millard church, which is organized for the purpose of believing the condition of mankind, regardless of creed or lack of it, desires to have you an invitation to speak to us some Sunday morning on the great subject of the subject of your views as to what the Christian church should do and how."

In accepting the invitation Mr. Ingersoll said, "I was much pleased with the spirit of interchange hospitality in your letter, and what I say, if anything, to your people will be in the same spirit of freedom and candor."

Col. Ingersoll's address was given in Hadley's theater.

Remedy for Tuberculosis.

BERLIN, April 11.—(Copyrighted, 1896, by the Associated Press.)—Interest in Berlin has been aroused in medical and other circles here by the announcement of a young physician, Erich Lanchell, at the International Physiologic congress at Wiesbaden today, that he had discovered a new remedy for tuberculosis, namely, antitoxin. Its principal ingredients, it appears, are cocoa and cod liver oil, applied by subcutaneous injection. In the experiments of the past five years, he explained, the greatest difficulty in obtaining was that of keeping the cocoa pure and easily available. In his study cases of tuberculosis on treated in Moabit hospital during the past year, all have been cured. Professor Lanchell fully confirmed the foregoing statements.
