L. Rawlins in 1892 and of Frank J. Cannon in 1894, was due to the fact that both these gentlemen were nominated in Provo, and suggests that if the Republican State convention is held there, it will tend to the success of the ticket. We think it will require more of a "Mascot" than Provo to take the electoral vote of Utah away from Bryan.

Bingham Bulletin: A. C. Reese, assistant under Charley Stanton, and candidate for the Republican nomination for county clerk, was in Bingham last Sunday for a breathing spell, and possibly cast a side glance at the political stoppings. Mr. Reese will be a formidable rival of any other applicant, as he has made a capable officer, and by experience is qualified to drop into the place like a nickel in the slot.

Logan Republican—We have no desire to defend Joel Shoemaker; far from it, but the Springville Independent is wrong when it states that Shoemaker ever believed in independent free coinage. He always was a goldbug of the most intense kind, and the Independent's insinuation that his conversion to "gold" was sudden and due to grease is unjust to him. Mr. Shoemaker has enough sins to answer for without being guilty of what the Independent accuses him.

Nephi Times: It appears to us that it is about time for candidates for nomination for county offices to publicly announce their intentions. It is no disgrace to a person who thinks he can be of benefit to the people to let them know that he or she is willing to serve and willing to suffer defeat. As yet there has been no public announcement of any one's candidacy for a county office. But judging from people's actions and words there will be no lack of material to make up tickets with.

Essay Caigh's Great Campaign is again prominent on the political table ground of this section. As in the days of its earlier youth it is "addicted to free silver, pointed personalities, square dealing, general gossip, business and harmless merriment." The editor's retrospective picture of the first campaign in Utah on national lines, his comments on the situation as he views it today and other features all combine to make the initial 1896 number an interesting one. May increasing patronage make each succeeding number better than the first.

Logan Journal—Silver men should hold together. Let us all unite, without party affiliation, in furthering the interests of silver. What does it matter whether we send a Democrat or a Republican to the United States Senate, so he is a good, reliable man? For our part we would as soon see Judge Goodwin go to the Senate as anyone else. The free coinage of silver is the only issue before the people. No Democrat need be afraid of any rise in the tariff. It is already higher than the Republicans thought of making it in war time or for twenty-five years thereafter.

Judge Powers has made the following statement:

In accordance with a resolution of the Democratic State committee, authorizing me to appoint such committees as I might deem proper, I hereby name Hon. C. P. Richards and Hon. John Tyler of Ogden, Hon. J. R. Letcher, Hon. Henry F. Henderson, Hon. J. L. Rawlins and Mrs. Mattie Hughes Cannon of Salt Lake, and Mrs. Electa Bullock of Provo, Democratic members of a committee of conference for the State of Utah, to confer with supporters of William J. Bryan in Utah belonging to other organizations, with a view to consolidating and unifying the silver forces.

The Salt Lake Herald has a new managing editor in the person of Mr. R. J. Clancey. Concerning him the Herald this morning said: "He is well known in journalistic circles in the West, having filled prominent positions on the great metropolitan dailies. He was for several years connected with the leading papers of Nebraska and Iowa, and while in this capacity became intimately acquainted with Hon. W. J. Bryan, the Democratic nominee for President. Mr. Clancey, who is a warm admirer of the 'Boy Orator of the Platte,' comes fresh from Chicago, where he was engaged in active newspaper work. He is a Democrat with open and pronounced views on the money question, being among those who ardently support the Chicago platform and nominees." Welcome, Mr. Clancey! May your residence in Utah be fraught with pleasure and usefulness.

DAILY WEATHER VANE.

Weather reports showing observations at 8 a.m. today:

Salt Lake City—Barometer, 29.83; temperature, 66; minimum, 62; wind, southeast, 8 miles per hour; clear.

Baker City—Barometer, 29.92; temperature 60; minimum, 58; wind, southeast, light; rain, .08 inches; cloudy.

Cheyenne—Barometer, 30.04; temperature, 54; minimum, 52; wind, south, 6 miles per hour; rain, .22 inches; cloudy.

Helena—Barometer, 29.90; temperature, 56; minimum, 56; wind, south, 12 miles per hour; cloudy.

Winnemucca—Barometer, 30.00; temperature, 60; minimum, 58; wind, east, light; rain, .02 inches; clear.

Idaho Falls—Barometer, 29.90; temperature, 60; minimum, 56; wind, south, 12 miles an hour; cloudy.

General and local forecast for 36 hours ending 8 p.m., Sept. 1st:

For Utah, showers this afternoon and probably tonight; Tuesday, partly cloudy; stationary temperature.

Salt Lake City and vicinity, probably showers; cooler.

J. H. SMYTH,
Observer, Weather Bureau.

Today's temperature is shown in the facsimile thermometer given below:

NEWS OF THE MINES.

The Old-Time Producing District of Alta Coming to the Front.

GOT $10,000 IN SIXTEEN DAYS.

That Is the Record Made by One Man in the District—The Mayday Company's Property—Shoebridge Bonanza Strike.

That old time mineral producing district, Alta, seems to be destined to awake from its few years of peaceful and unbroken slumber, and take on new life again by sending to the market once more some of the riches that lie hidden within its borders.

It was in the early seventies that the Alta district came prominently before the public as a mining camp of no mean value. Its worth was partially demonstrated by the opening up of the Emma mine, long since famous for its production of ore, and which in later years became involved in litigation from the effects of which it has not yet rallied. The Flagstaff, too, was a noted producer and along with others helped to give the camp the name which it attained among Utah's mining districts. But through difficulties, and many of them, which the mine owners of the district encountered, active work was finally abandoned and the camp deserted almost, for a period of a few years.

Now, however, that mining has taken on such a splendid phase in the new State, the attention of many of the old timers, whose faith was unshaken in the Alta district, has been once again directed to the camp, with the result that the locality is being rejuvenated and activity is becoming apparent on every hand. Old producing properties are being opened up and explored and capital has already begun to play its part in becoming acquainted with the district and its true merits.

Messrs. C. E. Hudson and J. R. Slater, two of Utah's prominent mining men, spent Saturday in looking over the Alta district and they return greatly pleased and delighted with what they saw. The former is authority for the statement that in one particular portion of the district, a certain party has been working but sixteen days, and his labors have been rewarded with $10,000 worth of ore, which now lies on the dump. The individual in question has reached into the earth but four feet when the valuable stuff was brought to light and as work now progresses, with nine men employed, the vein is gradually widening and promises to assume a nucleus to the opening up of a large and valuable mine. The location has been christened the Winnamuck and is situated but a short distance from the Flagstaff. It is believed also that the vein is but a continuation of that which went to throw the Emma to the elevation at which it once stood and that as work progresses, immense bodies of ore will be encountered. The ore is a lead carbonate and runs from $10 to $12 to the ton in silver and lead.

This valuable strike will no doubt create a furore among miners and prospectors, but it only serves to strengthen the statement of old-time mining men that the Alta district is not "played out" by any means. At the Flagstaff property a force of men are employed in cleaning it out, and it is rumored that activity is about to be resumed here as in other portions of the district.

Messrs. Hudson and Slater acquired an interest in a location adjoining the Winnamuck, a property which also bids fair to becoming one of the best mines in the camp.

THE SHOEBRIDGE BONANZA.

Additional Particulars Regarding the Recent Valuable Strike.

The recent strike in the Shoebridge Bonanza at Silver City, is an interesting one, and is rapidly throwing the property into prominence among the paying mines of the State.

The discovery was made rather inadvertently, so to speak, in a shaft which had been commenced but a few days before by Joseph Grise, the foreman. Other shafts were being sunk on the property at the time and it was from one of these that much was expected. The one which was expected to tap the vein at a depth of about 125 feet, however, had just reached the 99-foot point when Foreman Grise made it known that the newly commenced shaft had reached a two foot body of ore at a depth of twenty feet. The stuff was quickly sampled and gave returns of 125 ounces in silver, 10½ per cent lead and $27 in gold to the ton. This brought to light, sinking on the other shaft was discontinued and drifting in the same was at once commenced in the direction of the ore body.

The Shoebridge Bonanza which is an old time producer, appears to be now on the road to fame and its operators in fortune. It was this property that yielded ore which carried off one of the highest prizes at the World's Fair and now that developments have reached such a successful point, Messrs. H. L. Colburn, C. E. Hudson and others, who have the mine under lease from Mr. Blanchard the owner, are highly pleased with the outlook, and appear to think that they are "strictly in it."

Today's Call on 'Change.

Shoebridge Bonanza was the only stock dealt in at today's call on 'change, 100 shares finding a taker at 12½ cents. The listed stocks received very shabby treatment, some of them being passed without even the recognition of quotations. In the call of unlisted stocks, Sunbeam, a Tintic proposition, made its first appearance and was greeted with a bid of 11 cents. Several other stocks that have not been called for some time, were brought out and made the recipients of quotations.

The closing figures were as follows:

LISTED STOCKS.

A PROMISING PROPERTY.

The Mayday Company at Tintic Has a Bonanza in Sight.

If location and present indications count for anything, and they certainly do in mining matters, Police Justice Wenger and associates, constituting the official directory of the Mayday Mining and Milling company, will some day have a mine which will be worth something.

The property of the Mayday company lies in the Tintic district just over the hill south from Eureka and in the very heart of a bunch of properties that are now into splendid ore. The mines with which the Mayday are surrounded are the Uncle Sam and the Godiva on the east, and the now much talked of Humbug on the west. Through this hill on which these properties are located, is known to run a ledge of ore carrying big values in galena and silver. The existence of this ledge is demonstrated from the fact that it has already been encountered in the Godiva and Humbug mines, both of which lie on either side of the Mayday property.

The latter company has just recently commenced development work on its property and is now in about 110 feet with its tunnel. It is expected that the ledge will be tapped at a distance of 400 feet from the commencement point, and as the substance through which the miners will have to dig to reach it is very hard, and only a small force of men are at work, the hidden treasures may not be opened up for ten months to come. At the end of this time, however, the company thinks it will be able to show something which will be just as great as that struck in the other mines immediately adjacent thereto. Messrs. Wenger, Hunt, Muehlenbruch, Loreau and Peery form the directorate of the company which has been incorporated under the laws of the new State.

FROM THE TINTIC MINER.

A Big Strike in the Sunbeam—Good Ore in the Yankee Girl.

S. E. Ware reports that the bottom of the Blue Bird shaft is full of pyrites.

The new boiler for the Mammoth mine has arrived and is being put in shape this week.

The Eureka Hill is loading concentrates and shipping to Pueblo. We understand the mill now going out embraces about twenty carloads.

E. N. Jenkins has a new whim on the Gen. Kappes ground, and is putting it in place with a view to deeper work.

V. F. Strange, deputy U. S. surveyor, came down Monday evening to make the patent survey of the Paxman claims for the Grand Central company.

Hudson Smith came out from Salt Lake Tuesday to look after operations at the Brooklyn. He reports everything progressing in good shape in North Tintic.

S. E. Ware advises us that the shaft in the Blue Bird will reach the 225 mark by the end of this week and that drifting for the vein will then be commenced. It is expected, from the surface showing, that it will be necessary to drift only a few feet until the ore channel is reached and the Blue Bird put on the list of shippers.

We are pleased to be able to report positively a big strike of high grade ore in the Sunbeam this week. The strike was made in the drift from the 200 level and is reported to be of considerable magnitude. Manager Jones states that he will be able to commence regular shipments inside of two weeks. In the meantime the work of opening up the lower workings of the property is being pushed.

Shipments from the district for the week are as follows: From the Bullion-Beck mill 10 carloads concentrates, from the Centennial-Eureka 12 carloads ore, from the Eureka Hill mill 8 carloads concentrates, from the Ajax 3 carloads ore, from the Utah 4 carloads ore, from the Sioux mill 4 carloads concentrates, from the Swansea 7 carloads ore, from the North Star 3 carloads ore, from the Morning Glory 1 carload ore, from the Dragon Iron mine 2 carloads ore daily.

The effect of the recent decision of the register and receiver of the land office, to the effect that the locations made on the Ft. Crittenden reservation prior to the said reservation being thrown open to entry are void, has resulted in greatly stimulating business in North Tintic district, and numerous relocations have been made on properties, both within and without the lines of the reservation.

The Miner was on Wednesday shown some fine samples of ore taken from the north and south drift, from the 225 level of the Yankee Girl, both of which are of a good grade of shipping ore. The policy of the company, however, will be to thoroughly prospect and develop their fine property before commencing regular ore shipments, and to this end Manager T. A. Walley advises us that they will at once let a contract to sink 100 or 150 feet deeper.

Work is being pushed on the extension of the new wagon road to the Humbug mine, and extensive operations in the mine are necessarily retarded until its completion. Developments during the past week have only tended to increase the magnitude of the discovery, and that the Humbug is one of the bonanza mines of Tintic is no longer a matter of the slightest doubt. We are advised that a cash offer of $140,000 was made for the property Monday, but was refused.

The buildings of the South Swansea's new hoisting plant are being pushed as rapidly as possible and the boilers will be under cover in less than ten days.

J. S. Crook and Geo. Ellison went down to Goshen Sunday, to make an examination of a saltpetre claim about five miles southeast of that town owned by the latter gentleman. Mr. Crook brought in samples to the Miner office, which assays show a high value in saltpetre. Hand samples were sent some time ago to the California Powder Works, and their request for a 50-pound lot to be sent at once, together with request for information as to mileage, transportation facilities, etc., would indicate there is something in it.

PARK CITY NOTES.

Interesting Items Furnished This Week by the Record.

Surveyors have been busy during the past week running a line from the new Peck mill over the hill to the Daly West mine, the object being to establish a route and grade for a bucket tramway between the mill and mine. The line run goes straight over the hills, and standing at the mill one can follow the route to the divide with the eye by means of the swath cut through the brush to enable the surveyors to make their sights.

The present week has witnessed a grand change in the personnel of the Crown Point company and a resumption of activity that speaks volumes for the future importance and energy of the corporation. To begin with, the option held by the original organization on the Crown Point and Monadnock claims expired last Monday, and the reorganization, which included several prominent Chicago attorneys and one or two leading Salt Lake capitalists, was selected just in time to prevent the option's hold from lapsing and the amount of the bond, $12,000, was paid to Peter Kraiter and L. Stiner, they getting $6,000 each. The new company held a meeting Monday in Salt Lake and elected a new board of directors, of which W. J. Hines is president; T. W. Clark secretary and treasurer, and Patrick Ryan general manager.

The Valeio, Park City's youngest and most promising prospect, has joined the shipping list, ore hauling having been commenced Monday of this week. The ore is fine looking rock and there is little doubt but that it will show a handsome profit, even with the long and difficult haul. The grade of the ore—it carrying good values in gold and copper—takes the product, to a great extent, out of the slough of despond that attaches to lead and silver producers under present market quotations.

Manager Jones of the Peck concentrating company has closed a contract with the Anchor company for the big tailings dump lying at the Anchor concentrator, and that will be the first dirt handled by the new mill when completed.

The Silver King company instead of reducing its force will increase the number of its employes early in September. The increase will come through the beginning of operation in the construction of its new boarding house.

The new Peck mill is now ready for the machinery but there is no telling when the machinery will be ready for the mill, as the whole order has to be manufactured before it can be supplied. The company will sink a well in the flat and is satisfied that a depth of 100 feet will develop all the water needed. At the same time a contract has been entered into with the Anchor to supply, upon demand, a certain quantity of water at a certain valuation, hence if the well fails the company will have the contract to fall back upon. Only a few men are now employed at the mill, and they are simply putting on the finishing touches to various parts of the structure.

Following are the ore shipments from the McIntosh sampler for the present week: Silver King, 980,940; Silver King concentrates, 207,850; Valeio, 9,800; total, 1,198,190.

Bingham Bulletin Concentrates.

The hoisting machinery for the Frisco mine has been ordered, and will be put in early in September.

Every miner in Bingham is putting in three 8-hour shifts a day wishing for the success of the gallant champion of silver.

The Williams extension of the old Dampbool, is being worked under lease by Charles McCann, Roy Bemis and Bob Campbell.

A strike in the lower tunnel of the Northern Chief is giving up 100-ounce free-milling gold ore. The size of the streak is not reported, and we have no particulars.

There is at least one placer proposition in Bingham that a couple of miners can put their labor in against the ownership, and get quick returns and a good thing.

The "Old Reliable" has the advantage that when lead and silver are down it can switch operations to its gold belt and placers. There are a number of good gold prospects inviting attention.

J. B. Hazelgrove and M. Y. Wood are sinking on the vein of the Little Joker, at the head of Bear gulch. It carries straight gold ore that pans free gold, and is a very desirable property.

Dips and Spurs.

Payson Globe: Jesse Knight of Provo was in town Tuesday. It is reported that he and his father have a fortune in the Humbug mine over at Eureka. They have owned the mine for some time and have just recently struck rich ore.

The Cedar Valley mining and milling company is steadily and persistently developing its properties located near Milford, and today five samples of ore from the mine were sent to the assayer for investigation. The owners are confident that they have a good thing.

Provo Valley Times: A. A. Calhoun, one of the owners of the Gold Queen mine at Monticello, came in last Saturday and put up at the Maxwell. He left the first of the week for the mine with two heavy loads of machinery. He expects to have their stamp mill in operation in a few weeks.

Payson Header: A principal topic of conversation among a few, is a recently reported gold strike on the West mountain. As yet it is an unknown proposition, but it is to be hoped the find may turn out better than the one that created the great excitement some three months ago. People still believe that ore exists over there, and we believe, as do many others, that intelligent prospecting will reward some one with a rich strike.

Mr. J. J. Millroy recently of Chicago, has taken upon himself the work of getting up a map which will prove indispensable to Utah mine owners and stock brokers. In it will be marked out the respective mining districts of the State, together with the locations of certain properties, and on the margin of the map, it is intended to give such data as is essential to a description of each district. The work will fill a long felt want in the State of Utah and will advertise our mineral resources greatly as it is the gentleman's intention to introduce the maps all through the United States.

American Fork World: The Star mine, under the lease of Chadwick & Winn, is beginning to loom up in all its glory. The second car of ore for this season is now being hauled to the railroad.——C. M. Beck went to the Canyon Thursday morning with two representatives of Mirner & Co., who say they have struck a prospect that is proving to be a bonanza. It is some of the L. N. Smith claims.——The joint irrigation committee met at the city hall Tuesday and decided to go up the canyon Tuesday next in company with Surveyor McAllister and his helper of Salt Lake. They will survey ground at Milk Maid and Silver Lake and calculate and prepare estimates of the probable cost of the proposed water works. It will take three or four days to get through.

Police Court Items.

Sarah Langston alias Nell Humphries, a woman of about 45 years, was found guilty of drunkenness in the police court today and fined $15.

George Russell a violator of the bicycle ordinance, was assessed in the sum of $20 for his infringement of the law.

Joseph Cottrell had a hearing on the charge of vagrancy, with the result that he was admonished by the court to act like a man, and then discharged.

John Ray, who appears to have a penchant for wife-beating, was found guilty of abusing his better-half and sentenced to 100 days in the city jail.

The hearing of J. W. Patronnet, who is charged with an assault with intent to commit murder, has been continued until Sept. 14 at 2 o'clock.

Frank Benson will be tried at 10 o'clock tomorrow for a disturbance of the peace, as will also W. B. Kimbrough for cruelty to animals and B. W. Smith for assault and battery.

The case of Antoine Lyons, a lad against whom stood a charge of petit larceny, was dismissed on motion of the prosecution.

Press Publishing Company.

Articles of incorporation of the Press Publishing company have been filed with Secretary Hammond. The company is incorporated for fifty years, with a capital stock of $6,000, divided into 120 shares at the nominal value of $50 each. The purpose of the company is to do a general publishing and printing business with the principal place of business at Ogden city.

The incorporators with the officers are as follows: N. C. Flygare, president; R. H. Whipple, vice president; Charles Meighan, secretary; R. F. Thomas, treasurer and business manager; W. R. White, managing editor, and F. Healy and Adam Patterson, Ogden City, Utah. The annual meeting is to be held the first Monday in June, 1897.

Call and Get Your Warrants.

The State auditor has issued the following warrants awaiting the orders of owners:

San Juan county 2nd Apport. School Fund	[illegible]
C. E. Larsen, Ogden, drayage, S. U. K.	[illegible]
Graham & Son, Ogden, drayage S. U. K.	[illegible]

THE GREEN BAG.

The board of county commissioners will meet Tuesday next at 2 p. m., as Monday will be Labor Day.

Friends of Miss Richards, daughter of State Auditor Richards, will be pleased to learn of the improvement noted in her condition.

Carl O. Nordrum was today sent up by Judge Hiles to the county jail for sixty days on the charge of disturbing the peace.

Judge Street this afternoon overruled a demurrer in the case of J. B. Smith vs. J. B. Hansen; complaint is sustained and ten days granted in which to amend.

In the case of Albert Swiger, found guilty of burglary as previously chronicled in the columns of the News, next Saturday was fixed as the day sentence would be passed.

John Lell was taken to Bingham this morning by Deputy Sheriff Gibbs, to stand trial before Justice Trumbull on a charge of assault committed some time last June.

The registration agents will meet tomorrow at 2 p. m. in Judge Ritchie's court to receive their instructions and supplies preparatory to commencing their work.

Marriage licenses were issued to Silas L. Wardle of South Jordan and Rosaline Orell of Draper; Solomon Hancock of Payson and Mrs. Melinda J. Rawson of Ogden, Utah.

Auditor Fisher and his deputies worked against time yesterday. The county warrants were issued Saturday at 5 p. m. and by 7 p. m. last evening all warrants were signed. Mr. Fisher accompanied the K. of P. band to Denver.

The following jurors were today impaneled to try the case of James A. Lake, charged with perjury: William Everett, Charles Gilmer, Brigham L. Little, W. R. Foster, O. Parker Norton, Phillip J. Stone, William Kayting, N. T. Johnson. S. H. Lewis is attorney for the defense.

Mr. Rowe, of the State land office, has returned from his Green River trip whither he went with Mr. Ferron. The gentlemen separated in the southern part of the State. Mr. Ferron's arrival is hourly expected. Mr. Rowe said to a News reporter this morning he hoped to give the result of their labors in the land eastward to the public at an early date.

MINOR MENTION.

Boise Statesman—Rev. Isaac Kaiser of Salt Lake arrived yesterday to take charge of the dedication services at the Beth Israel temple.

Webber's second-hand store at 220 State street was entered by burglars sometime during Saturday night and several pocket knives, revolvers, cartridges, razors, etc., stolen. The police are doing their best to effect a capture of the thieves but have very little clue to work upon.

Anaconda Standard: A Mrs. McDermott of Salt Lake arrived in Butte yesterday in search of her son Johnnie McDonald, alias Montgomery. She learned that her promising offspring had been sent to the reform school, and she is anxious to secure his release and send him back to Salt Lake. She was referred to the state board of pardons, but it is hardly likely she will meet with much encouragement there. The boy is one of the toughest that has ever given trouble to the Butte police, and he is now where he belongs.

Personal Paragraphs.

Mark Hopkins of Coalville is at the Cullen.

L. O. Christensen of Shoshone, Idaho is a guest at the Walker.

M. M. Rogers of Cleveland, O., registered at the Knutsford today.

W. H. Smith of Albany, Ore., is stopping at the Cullen.

Dr. G. Caton and M. F. Macdonald are San Franciscans at the Templeton.

Mr. and Mrs. Henry Good together with Emma and Louise Good, all of La Crosse, Wis., are Templeton guests.

Clyde S. Ford of Wheeling, W. Va., is at the Knutsford.

Mrs. Janet Turner Powers and friend, of Brooklyn, N. Y., are located at the Cullen.

A. G. Giles is down from Pocatello and at the Walker.

J. A. Moore and wife of Omaha and Mr. and Mrs. James Green, maid and child, J. L. Green and Miss Green of St. Louis, are among the Knutsford guests.

S. Green, Mrs. Alameda Green and Miss Meda Mitchell of Mt. Carroll, Ill., are at the Templeton.

Mr. and Mrs. W. C. Crum of Helena are Cullen Guests.

STATE NEWS.

Grand Valley Miner: Efforts are being made to locate a colony on lands on the Green river, in Grand county, near where the Rio Grande Western crosses the river and, at an early day, will probably be successful. A large body of land can be watered there by ditch from the Green river.

Payson Globe: Attorney Joe Page is suffering with a bad case of poison, resulting from his coming in contact with some poison ivy while up in the canyon.——Millard Haymore, a boy about 15 years old, fell and broke both of his arms Tuesday evening over by the opera house. He was holding to the pulley on which Veda had just made "A slide for life" and several other boys were pulling him up the wire, when his hands slipped from the pulley and he fell to the ground a distance of about eight feet with the above result. Dr. Henry was called and set the broken bones.

Wasatch Wave: Thomas Moulton of Buysville while tending his horses Tuesday evening got pretty badly used up. One of them gave him a powerful kick on the lower jaw, fracturing the bone, knocking out and breaking several of his teeth, cutting an ugly looking gash on his chin and bruising his lower lip so that it will cause some disfiguration. Dr. Aird was called who sewed his chin and lip and replaced the fractured jawbone. Tommy says it is the worst accident he ever met with, and he should know something about accidents as he has had quite a number of them—certainly his share.

The Discovery Saved His Life.

Mr. G. Caillouette, Druggist, Beaversville, Ill., says: "To Dr. King's New Discovery I owe my life. Was taken with La Grippe and tried all the physicians for miles about, but of no avail and was given up and told I could not live. Having Dr. King's New Discovery in my store I sent for a bottle and began its use and from the first dose began to get better, and after using three bottles was up and about again. It is worth its weight in gold. We won't keep store or house without it." Get a free trial at Z. C. M. I. Drug Department.

Cure for Headache.

For a remedy for all forms of Headache Electric Bitters has proved to be the very best. It effects a permanent cure and the most dreaded habitual sick headaches yield to its influence. having had his legs broken three or four times. He says a broken leg is nothing compared to this accident.

The Examiner-Journal Relay.

San Francisco, Aug. 31.—The courier in the Examiner-Journal relay race reached Fort Steel, Wyo., at 4:33 this morning. Heavy rains in Laramie and Cheyenne give prospect of heavy roads and slow time. The relay from Creston to Rawlins, 28 miles, was in four hours and one minute. The loss on the schedule time to date is six hours in a total distance of 1,181 miles.

Silver Agreement.

Chicago, Aug. 31.—A special from Des Moines, Iowa, says:

The fusion agreement entered into by the silver Democrats, Populists and silver Republicans at the Ottumwa convention has been carried out in the nine congressional conventions thus far held, and in the conventions for the nomination of county tickets.

LOSS OF VOICE
After Acute Bronchitis
CURED BY USING
AYER'S Cherry Pectoral

A PREACHER'S EXPERIENCE.

"Three months ago, I took a violent cold which resulted in an attack of acute bronchitis. I put myself under medical treatment, and at the end of two months was no better. I found it very difficult to preach, and concluded to try Ayer's Cherry

Pectoral. The first bottle gave me great relief; the second, which I am now taking, has relieved me almost entirely of all unpleasant symptoms, and I feel sure that one or two bottles more will effect a permanent cure. To all ministers suffering from throat troubles, I recommend Ayer's Cherry Pectoral."—E. M. Brawley, D.D., Dist. Secretary, Am. Bapt. Publication Society, Petersburg, Va.

Merit

More and More Maintains the confidence of the people in Hood's Sarsaparilla. Its medicine cures you when sick; it makes wonderful cures everywhere, then beyond all question that medicine possesses merit.

Made

That is just the truth about Hood's Sarsaparilla. We know it possesses merit because it cures, not once or twice or a hundred times, but in thousands and thousands of cases. We know it cures, absolutely, permanently, when all others fail to do any good whatever. We repeat

Hood's Sarsaparilla

Is the best—in fact the One True Blood Purifier.

Hood's Pills cure nausea, indigestion, biliousness. 25 cents.
