DESERET EVENING NEWS.

Thursday, November 3, 1898.

JUDGE COLBORN RETURNS.

Comes Home After an Extended Business Trip Through the East.

Judge Colborn returned last evening from an extensive business trip to Omaha, Denver and other points. While in the former city he visited the Transmississippi International Exposition and characterizes it as being really great. No other term he declares would adequately describe it. Personally he was simply amazed at its size and magnificence, it being so much larger and better than he had ever dreamed of even in his most fanciful moods. It was no dollars a great advertisement and monument to the industry, intelligence and ability of the people of the West. It was a prodigious undertaking and was carried out in a most successful manner. Credit of a high order will ever be due those who planned and executed it, and the people had justly proud of the showing made.

The Judge also thinks that the people of Utah have reason to be proud of their exhibit. It was very fine and for the amount of money expended a marvel. It has been the wonder and admiration of thousands of people. It is sure to win prizes and golden opinions for the State of Utah. Regarding the mineral exhibit he says that it far surpassed all other displays made. There was nothing of this kind in the whole exposition that began to compare with it. If Utah is not given the first prize and highest mention for the richness, variety and general superiority of its mineral display it will be because she has been robbed of an honest and distinctive award. This is a mooted question of doubt or cavil. Colorado is perfectly, in fact, in the second in the list of mineral displays, but she cannot hope to win out over Utah. The mining men and citizens generally of the Centennial State were greatly surprised at the splendid showing made by their sister State of Utah. When they were making collections for their own display and arranging the details relative thereto, they felt certain that they would outshine all other competitors. But when they visited the exposition and gazed upon their mineral rival, Utah, they were astounded at what they saw and shook their heads, admitting that they had been beaten in the race.

There is one thing, however, in which Utah, according to the Judge's opinion, made a grave mistake. It had absolutely no printed matter which would give information to a person seeking something concerning this State, its history, people and resources. Such information as was disseminated had to be given direct by the gentlemen in charge of the exhibit. Other states had a great advantage over Utah in this regard. They had neatly printed books and pamphlets to distribute free of charge to all persons who might evince a desire to learn of them and what they had to offer. Colorado made a particularly fine effort along this line, by publishing an immaculately printed and beautifully illustrated book of 104 pages. It dwelt fully, clearly and interestingly with the history and resources of the state and was a genuine exponent of which the people felt so proud and which might be carried away by the visitor with the thought in mind that a book was being from home. Some similar effort, the Judge thinks, should have been made by Utah. That something of this kind was attempted is regarded as cause for profound regret.

We pay 4 per cent per annum interest on Our Dollar or Thousands. Zion's Savings Bank & Trust Company. 1, 3, 5 Main street.

Wilford Woodruff, President.
George M. Cannon Cashier.

100,000,000 Baby Rings

would be more than any one dealer in Salt Lake could sell by Christmas, the larger the can be seen at

McCONAHAY'S, 41 W. 2nd So.

HOMES FOR THOUSANDS.

To Latter-day Saints Who Desire Good Places to Make Comfortable Homes. A Good Opportunity to Accumulate Money to Pay for Them, Without Incurring the Bondage of Debt.

One hundred thousand dollars in labor wanted.

Fifty miles of the Alberta company's canal to be built, for which half will be paid in cash and balance in good, best prairie land, at $1 an acre, with free water for two years to first settlers on these lands.

Lands are to be settled in bonded or settlement form, in order to afford settlers the benefit of ward organizations, including day and Sabbath schools.

All labor will be contract work, at ten cents a cubic yard for earth work, gravel, loose and solid rock to be paid for in proportion.

An industrious, able-bodied man, with team can earn a good farm, town lot and cottage in one year.

Lands to be settled are different to a railway. Plenty of coal for fuel near at hand.

For special rates of transportation for passengers, household goods, teams, etc., etc., apply to Wm. C. Spence, P. O. Box 1, Salt Lake City, or C. O. Card, Cardston, N. W. T., Canada.

UTAH SUGAR PRODUCT.

It Will Reach a Total of Fourteen Million Pounds This Year.

PRICE OF LEHI STOCK GOING HIGHER.

Advances Given it by the Heavy Purchases of Eastern Savings and Deposit Banks.

(Special Sketch.)

This has already proved itself to be the best best sugar year in the history of Utah and the West. The product of the Lehi factory is comparatively speaking unusual, more than ten million pounds of the merchantable product will be turned out, about half of that amount has already been produced. The remainder will occupy the time of the factory and about the first of the year. The splendid crop and the very good showing made by the factory, has given the stock of the concern a boost, the price with the sale of one hundred and fifty thousand dollars of bonds taken by Eastern savings bank, and the Denver Railroad bank, recently the Denver Railroad bank, has greatly stiffened the price of the stock, there being daily demands for it from the open market. The factory is receiving roots by the dozen, of the best class of sentiment in the State where the beet raised.

The Lehi factory has done much better than the Ogden factory, and the Lehi factory during its first year's run. The reason for this is that it has had the benefit of the Ogden's experience, when engaged principally in experimental work. Its product will be about four million pounds, or 3 per cent of that produced by the Lehi factory.

The Logan factory, in which Ogden people are interested, is being interested, will turn out about two million pounds. It is also the first year of that corporation. It has a good many difficulties to contend with, and another to contend against at the outset, but it is now in a fair way to become a heavy producer. It is expected to do much better next year than this.

PIGSKIN AND GRIDIRON.

How the Season is Being Prepared for in Salt Lake—Stiff Games Promised.

This is the season when most big cities are drawing attendance on the results of the gridiron and Salt Lake seems to be no exception for every variant but is either crossed by a crowd of other small boys, young men or the stalwart athletic clad in padded clothing from the knee down, neither mud, nor the chamois padded posers and mole skin pants.

Every school in the city has its team and many of them, the smaller ones, are those who play suburbs football. There are but few, the High school, Ad Hall, Latter Day Saints and the University being the leaders. These teams range in weight about the pounds on the side, and are composed of the best of the high school eleven to reached by Mr. Cole, who planted on a class team at Yale and is responsible for "The Tripod." The Ad Hallers have formed upon the Fleming brothers for much and capacity the University is handled by Adams Johnson, the other teams has arrives been a talented out this year the variety is playing with more snap than ever before. The Ad hallers from in the game, Ben Wilson, who played on kind the one for Carroll last year and who is now pointing for Rock for the Y. M. C. A., will coach the University and promises them a winning team.

Outside of the schools the Elks and Y. M. C. A. are the strong aggregations. Each eleven averages in weight about 165 pounds, and many experienced players are found in both teams. The Elks are captained by Whitbeck who is a veritable giant in size, Ottinger at tackle and Lentzgeier at guard are strong, speedy players, and hard to stop. In the Y. M. C. A. Orem, who is considered the best football man in the game, is captain and coach, Fred Moir Allen, the old reliable half-back, plays on the left side with the team and is backed by Wilson of Carroll and Keller of the university of Nebraska.

The Elks and Y. M. C. A., meet on the first December grounds Saturday for the first game of the season. Many other games have been arranged, notably one for the Elks team to play at Ogden, giving day and for an All-Colorado team to meet the Y. M. C. A. December 10.

GENERAL KENT'S FAREWELL.

Expresses Thanks to the Officers and Men of the Twenty-Fourth.

The regiment of the Twenty-fourth United States infantry stationed at Fort Douglas was conducting an inspired and pleased yesterday afternoon just prior to the dress parade, when Adjutant Leitch drew from his inner breast pocket a neatly folded paper containing a farewell message from Colonel Kent to the officers and men of the regiment. The paper was read to the assembled regiment, and it was evident that it was more eagerly listened to than any other order that have been made in way of sound and meaning. The order was preceded by the following words of tribute from Major Theodore Wint:

"The regimental commander announces with great regret the departure of Major General J. Field Kent, late Colonel of this regiment, and publishes with pleasure the following letter of commendation and farewell:

"With a feeling of heartfelt sorrow I must say farewell to the Twenty-fourth Infantry, and I desire thus publicly to express my thanks to the officers and men of the regiment for their cordial support and the kindness of every one while I served with them as their colonel.

"I shall always remember my connection with the regiment with sincere pride, both on account of the general good conduct of the men under the temptations of this cosmopolitan city of Salt Lake, and the noble behavior of the officers and men in the late serious battles of Santiago, Cuba and their good more trying service at the yellow fever camps at Siboney—I shall watch for the future record of the regiment with interest and have had if that never have occasion to feel ought but pride in having been its colonel."

Water Aid Meeting.
