MINING, BUSINESS AND STOCKS.

SALT LAKERS BUSY IN CAMP OF MIDAS

S. M. Levy at Gold Circle Crown Group—L. L. Savage Intends to Build Home in District.

(Special to the "News.")

Midas, Nev., Sept. 16.—Sam Levy of Salt Lake, general manager of the Gold Circle Crown group of claims here, left yesterday on the regular auto after looking over the development, and he is immensely pleased with the showing. The lower tunnel is now in close to 800 feet, and has three and one-half feet of sulphides that sample $25 per ton in the face. The superintendent expects to have air blowing through the shaft by the first of December, and at that time the company will have drifted on the vein over 1,000 feet, with from 100 to 400 feet of backs. This company will also drive a tunnel on the west side of the gulch to try and cut the Pipsaw shoot of ore, and will get good depth by tunneling.

Leslie L. Savage of Salt Lake and his father of Boston are here, and are making arrangements to develop the Elko Prince group. It is understood that L. L. Savage will remain and build a residence, and live here. The development will consist of tunneling several hundred feet to crosscut the Old Judge vein, which is very rich.

Captain Case of the Glasgow and Western Exploration company is here to increase the force on the Eastern Star on Frazier creek. There will be 18 men employed in drifting and sinking. This company is now sacking the best ore and blocking out its milling ore.

NEW UNIT FOR MILL.

The new unit for the Hartley mill is due to arrive most any day, and the mill as it is now running is making a most excellent saving. California placer miners are here, and have located ground below the mouth of the canyon, with the expectation of putting in a dredger. It is rumored the dirt will go 6 cents a yard.

The Rex Mines company has 17 men employed in constructing its mill, and teams are hauling in the tonnage as fast as possible. This mill will be in operation by the first of the year, and will be complete in every particular—stamps, cyanide and sliming.

The Geyman mill will start tomorrow on the ore from the Matthews lease on the Queen group. Some of the ore from this lease is very rich, sampling as high as $375 per ton. The ore seems to be between the altered rhyolite and tuft. The vein is from 4 to 18 inches at the 100-foot level.

The Williams and Avery lease on the Sleeping Beauty group has an extraordinary strike. In their winze, at 100 feet, they have encountered three and one-half feet of ore that pans about $15 per ton and assays $247 per ton. A sample has been taken out to see what steps can be taken for treatment. The lease in drifting 300 feet has cut two ore shoots and both auriferous besides on the footwall, all the way, is a very rich streak of ore from a knife-blade wide to 3 inches of picture quartz.

TAKE OUT MILLING ORE.

All the leases on the Esmeralda are taking out ore of good milling grade. The Boyle lease on this property is getting from the lower tunnel from 7 to 10 cars a day that will sample several hundred dollars per ton, besides their milling ore.

Development is being rapidly pushed on the Frying Pan group, by the contractor, Frank Jardine, and in crosscutting he has encountered a small fissure that pans about $15 per ton. The tunnel is in about 200 feet, with a hundred feet back. When the main ledge is crosscut, they will drift 100 feet according to contract.

STOCKS ARE STRONGER.

Local Market Shows Better Prices After the Slump.

Prices on the local exchange showed an improvement this morning and trading was freer. A good sprinkling of buying orders improved conditions considerably. Nearly every stock transacted in showed an advance over the slump of yesterday.

The volume of business today was not as great as on yesterday and the smaller securities were sold heavily. Colorado was selling at $1.60 this morning and was strong at the price. Grand Central was up to $2.50. Iron Blossom climbed up to $1.15 and was improving at the close of the market. Sioux Consolidated was a heavy seller but the price was better. The best price made during the morning session was 65 cents, which is much better than 59 cents at the close yesterday. Uncle Sam was also stronger. Others which showed the effects of a better market were Carisa, Mountain Lake, New York and Tintic Central.

The total number of shares disposed of this morning was 90,150 and the amount represented by the stocks sold was $26,671.50.

There was nothing happening in the curb market this morning. A bid of 10 cents was made for Uintah Treasure Hill and Demijohn received a bid of 5 cents.

CON. MERCUR ISSUES ITS ANNUAL REPORT

Earnings for Last Part of Year Small—But Little High Grade Ore Encountered.

In the annual report of the Consolidated Mercur Gold Mines company just issued, President John Dern declares that the profits of the company have been $34,095.17 for the fiscal year ending June 30, 1909. In his report Mr. Dern says:

"It remains to be explained, however, that the net earnings of the year were nearly all made in the first six months. From July to December, 1908, inclusive, the net profits were $30,324.62, while from January to June, 1909, inclusive, they were only $3,680.55. This is the unfavorable feature of the year's results. Had last fall's rate of earnings been maintained, the year would have been a good one, and stockholders would doubtless have had a dividend before this time. An unexpected decline in the grade of the ore, however, took away nearly all the margin of profit, and during the last six months it has been a struggle to break even.

"The year's developments in the mines have been satisfactory as to tonnage, but very little of the new ore has been high grade. The result is that it has become more difficult to keep the average up to a profitable figure. Other promising territory is to be prospected during the ensuing year, and it is to be hoped that better results will be obtained. Under existing conditions we have a very close proposition, and although our gross output is large, there is not much left for the stockholders after the expenses are paid."

COST OF PRODUCTION.

The financial statement shows that the output of gold from the Golden Gate mill during the time was $761,235.66. The following were the receipts from other sources: Manning royalty $8,465.50; Gold Belt Water company, dividends, $3,750; ground rent, $780; unclaimed time checks, $159.42; miscellaneous, $47.18, making a total income for the year $774,417.76.

The mining expenses were $432,760.27, the milling expenses, $307,513.95, and the Manning mill expenses, $135.37, which makes the total expenses $740,412.59.

The net earnings of the year, $34,005.17 and the balance from the last report, $46,632.21, makes the total available profits $80,637.38. This, less the construction items due to the slime plant, $5,607.57, leaves the balance of assets $75,029.81.

The average tonnage of ore handled was 23,522 a month or 775 tons a day. The average of gold extracted from a ton of ore was $2.70. The amount lost in tailings shows that the ore treated carried $3.58 in gold and 88 cents was lost. The average profit on the ore was slightly over 60 cents an ounce. The average cost of leaching the ore was 41.4 cents a ton.

Two accidents happened during the year that caused considerable loss. On May 8, 1909, eight leaching tanks fell to the ground, rendering them useless. The dissolving section of the refinery and the assay office were totally destroyed by fire on Nov. 20, 1908.

General Manager George H. Dern in his report declares that the Magazine vein in the Brickyard mine was developed during the year and that the block so far developed contains probably 100,000 tons of milling ore. The only drawback to this ore is that it is hard to crush.

CONCENTRATES

The shaft at the Tintic Standard property in East Tintic has reached a depth of 475 feet. The shaft is also showing considerable mineral.

The Highland Boy smelter has been almost demolished and within a few days there will be but little left to mark the spot where the plant once stood.

Within 10 days the new Huff electrostatic zinc separator at the United States smelter will be in operation. A trial run recently made a 35 per cent zinc concentrate.

The last well to be opened up by the Emerald Oil company in the Rangeley district struck oil at a depth of 728 feet. It is producing 15 barrels of oil a day and is the fifth one to be sunk.

About 40 freight teams are now hauling ore from the mines at Alta and Big Cottonwood to the samplers at Sandy. It is intended to keep the roads open and continue the work throughout the winter.

According to Frank Orcutt, who was down from Park City yesterday, the drill hole between the Hanauer and Alliance tunnels will be finished within the next 40 days. The 12-inch hole will be used to ventilate the mine.

W. J. Marritt has been reinstated as superintendent of the Red Warrior mine in the Star district in Beaver county. A deal was recently closed in Duluth whereby the promoters of the property has assumed control and Lucien Merritt is now president.

Work has ceased on all the leases and properties in the Seven Troughs district, and according to L. A. Friedman they will remain closed until the labor agitator and high grader has left camp. When work is resumed change rooms will have been established and some changes made in the present wage schedule of the camp. The district is to be known as an open camp but the union or non-union men will not be discriminated against.

47 South Main St. Phones 307.

LOCAL MARKETS

The price of eggs is up again this time reaching a maximum of $9. That this is not the doing of the Salt Lake jobbers was evidenced this morning by a local dealer, who showed a memorandum from a Manti farmer stating he was getting $8 per case right there. The demand is apparently considerably in excess of this supply, suggesting repetition of the remark made by J. J. Hill at the Bankers' convention, that the country needed more farmers. More chicken raisers would certainly make eggs more plentiful. Valencia oranges, full of rich juice, are on the market in carload lots, as are also bananas, and grapes from California. Nearly all of the grapes are of the black varieties. Contrary to expectation, the frosts did not damage the tomato crop to any marked extent, and that desirable vegetable is on the market in the usual quantities. Sweet potatoes are in plenty from southern California, with the supply of lemons still undiminished. Local watermelons will be in goodly numbers for some time to come, but cantaloupes are thinning out. Hay is on the rise again, alfalfa bringing now $15 per ton. This is due to so much having been spoiled by the recent rains before it could be stacked or got under cover. The quotations obtaining today in the local markets are:

RETAIL.

HAY AND GRAIN.

Family flour, per cwt	2.60
Flour, straight grade, per cwt	2.70
Flour, high patent, per cwt	2.90
Bran and shorts	1.40
Straight shorts	1.50

PETITIONERS FOR JEROME.

New York, Sept. 15.—Six hundred and fifty signatures were signed to the nomination petition of William Travers Jerome yesterday during the first day of his open headquarters. This number is nearly one-third of the 2,000 names needed to make valid Mr. Jerome's nomination for the district attorneyship. He is running independently and is in the race for the third time.

NIGHT SCHOOL.
Open Wednesday Oct. 6. Bookkeeping, Shorthand, Business, Arithmetic, Typewriting, Penmanship, English, Mechanical, Drawing, etc. Latest system, expert teachers, best equipped. The demand by business firms for our students is never fully supplied.

Daily Saltair Bathing Trains.

9:30, returns 11:45; 2 returns 4:30.

Hamlin Paints Signs. Both phones.

STOCKS ANIMATED, MAKING ADVANCES

New York, Sept. 16.—The prominent speculative stocks opened at sharp advances over last night and the sprinkling of small losses was for the most part in stocks of secondary importance. Union Pacific, Southern Pacific, Chicago & Alton and People's Gas rose 1 and U. S. Steel, Pennsylvania, Atchison, Rock Island preferred, Western Union and American Sugar large fractions.

Speculation became broad and animated and sensational buying of U. S. Steel which advanced it 1½ to 83⅛, furnished the chief stimulus to the upward movement. Round amounts of dividend paying roads were also bought. Reading lagged to some extent heavy sales up to 30,000 shares in a block following its rise above 168. The market was less active and a trifle off from the best at 11 o'clock. Chicago & Alton moved up 2⅝, Delaware & Hudson 2, Union Pacific 1¾ and New York Central 1⅜.

United States Steel sported to 82⅝, but the general list did not respond vigorously. The second hour's business showed a marked contraction from that of the opening hour. As a fractional reaction transactions were meager.

Bonds were firm.

Railroad stocks rest while furious buying movement was in force in the metal group. The continuous climb of U. S. Steel, which reached 82¾ before 1 o'clock was responsible for the enthusiasm with which other metal stocks were bought. New York Central, American Steel Foundry, U. S. Pipe and U. S. Reduction gained 3 points, Republic Steel 1¾ and American Smelting and Colorado Fuel 1½.

Virginia Iron jumped 7 points on a few transactions.

Prices eased off a fraction with Reading going below yesterday's closing. United States Steel then worked upward again and the rest of the list hardened. Union Pacific, which had been rather quiet for some hours, ran up 2⅝ to 206¾. United States Steel touched 84⅛. Great Northern Ore Certificates rose 2⅛ and Pacific Mail 1½.

The market closed firm and quiet. Union Pacific rose 2¼ and Southern Pacific and St. Paul 1⅝ following the publication of the will of the late E. H. Harriman. Free profit-taking sales then caused a setback in which Union Pacific and United States Steel reacted a point and Reading fell nearly that much below last night. The selling was not pursued and prices steadied again.

LIVESTOCK.

CHICAGO.

Chicago, Sept. 16.—Cattle—Receipts, estimated at 5,000; market steady. Beeves, 4.10@8.40; Texas steers, 4.00@5.25; western steers, 4.00@6.50; stockers and feeders, 3.60@4.90; cows and heifers, 2.25@6.25; calves, 6.75@9.25.
