MINING, BUSINESS AND STOCKS

KNIGHT ISSUES WERE FEATURES

Tintic Stocks Were in Strong Demand and Colorado and Others Go Higher.

COLUMBUS CON. NOW LISTED.

Ohio Copper the Most Active of the Unlisted Stocks—Closing Quotations.

The Knight Tintic issues furnished some of the features of the forenoon session of the mining exchange. Colorado came up strong, starting with the sale of 400 shares at 4.25; it continued to climb, closing at 4.40. Beck Tunnel was also in fine form and likewise Iron Blossom. Sioux Consolidated weakened. Uncle Sam Consolidated moved up a few points, ending with a sale at 74 cents. Columbus Consolidated was admitted as a listed stock. A bid of $5.45 was made for it with no sales. Yankee Consolidated sold at 63.

Ohio Copper proved to be the most active of the unlisted stocks and sales were made at 4.50 and 4.60. One lot of Copper Glance was bought at 15 cents. The closing quotations and sales were:

GOLDFIELD'S PRODUCTION.

Mines of Nevada Camp Said to Yield $500,000 Weekly.

With the mines of Goldfield district producing approximately $500,000 worth of ore a week, says the Goldfield News, with an almost certain probability that the production will be doubled within a very short time, it would seem that the pessimists and the croakers have been put out of business. That such a condition exists is shown by the official figures of the Nevada Goldfield Reduction Works and the Tonopah & Goldfield Railroad and of the Combination mill. The ore treated at the local mills and the ore shipped by rail to the smelters during the last seven days, was very close to 3,000 tons and its gross value was but little short of half a million dollars, or about $25,000,000 a year.

The great importance of these figures can be better realized, when attention is called to the fact that comparatively little ore is being shipped from the great Consolidated mines, owing to the policy of the management of that corporation to await the building of a mill with sufficient capacity to handle the output, before beginning the extraction of ore on an extensive scale. Were they so disposed, the owners of the merger mines could be shipping 500 tons a day within the next few weeks, or more than the entire output of the district for the last week. But with this enormous capacity, it is not to be wondered at, that the Consolidated's management should deem it wise policy to hold its ore until the mill is built and thereby save $17 a ton in freight and reduction charges, $8,500 a day is worth saving.

The Florence Goldfield Mining company will soon have its own mill and the Consolidated is having plans prepared for one of the largest reduction plants in the state. Other mining companies will build mills sooner or later. The result will be an enormous increase in the output of the properties that are now numbered among the producers in this district.

But the production will not wait for the erection of mills. The mine owners and operators have expended a great deal of money in opening up their properties and not all are able financially, to adopt the economical policy of the Consolidated. They want quick returns on their investments and the stockholders have an incurable habit of demanding dividends as fast as they are earned. This is particularly true of the leasing companies. New properties are being opened almost daily and the producing area is slowly but surely being extended. The small mines of today may be big mines tomorrow and there is no telling how much ore lies beneath the ground in the vicinity of Goldfield. The output of the proven mines is being increased daily and as the work progresses the proportion of increase will be greater, as more men can be put to work extracting the gold bearing rock. The ore is there and in a few weeks the output will be limited only by the capacity of the hoists. By early fall Goldfield will again amaze the world by the extent and richness of its mines, as shown by their actual output.

UNCLE SAM GETS BUSY.

Denver, Colo., June 25.—Charged with using the mails in furtherance of a scheme to defraud, the medium being the Financial Security and Trust company, the Goldfield Glow Mining company and the Free Coinage Mining and Smelting company, W. F. McQuarrie, president of the first named company and one of the most prominent and wealthiest mining promoters in Denver; Dr. D. A. Saunders, one of his associates in the business, and F. A. Saunders, the secretary of the Financial Security and Trust company, were indicted by the federal grand jury. They were arrested today, and each gave bond in the sum of $2,500.

DR. GRAVES IN MEXICO.

Dr. M. N. Graves, formerly of Ogden and for several years a member of the city council of the Junction city, has made a successful mining venture in Mexico. He is manager of the Maglstral copper mine in the Etzatlan district from which regular shipments of ore are being made to the San Luis Potosi smelter.

RETURN FROM ELY.

David Keith and Others Visit McDonald Ely—May Go to Beinze.

David Keith, former Senator Kearns and Pat Moran have returned from a trip to Ely, Nev., where they went to look over conditions at the McDonald Ely mine. There is an unconfirmed rumor current to the effect that the McDonald Ely may become a Heinze proposition; that negotiations have already been opened along that line and that it will not be long until something will be known one way or the other as to what will be done with the mine in the future.

The McDonald Ely is regarded by some as being a very meritorious proposition and that with a few months of vigorous development done on the property it will rank well among some other Ely proposicions.

BINGHAM MILLS MAY BE CLOSED

City Council Would Destroy Some Of the Chief Enterprises of Utah's Copper Camp.

NEW ORDINANCE PASSED.

Prohibits Dumping of Mill Tailings Into Bingham Creek Under A Heavy Penalty.

The city council of Bingham at its last meeting passed an ordinance making it a misdemeanor to dump mill tailings into Bingham creek within the corporate limits of the town of Bingham. The penalty provided for a violation of the ordinance is a fine of $300 or three months in jail, or both.

The chances are good that this piece of law making on the part of the Bingham councilmen will prove to be unconstitutional if taken into the courts and no doubt that is where it will land if the city officials of the mining camp insist upon an enforcement of the ordinance.

At least three concentrating mills are affected by this legislation—the Markham Gulch, Wall and Ohio Copper plants and all of them would be put out of business if the ordinance were to become operative.

It is an absolute necessity, in order to operate the above named mills, to use Bingham creek as a dumping place for tailings. This practise has been going on for years and there are very few at least who believe that any action taken by the Bingham councilmen will prove effective enough to stop it at this late day. With a single exception, the Bingham council is composed of men elected to their present positions by the Socialists.

LEASERS IN FAIRVIEW.

The History of Goldfield May be Repeated There.

Special Corespondence.

Fairview, Nev., June 22.—History is going to repeat itself in Fairview—the leasers will advance mine-making more within the next year than company work would do in three years.

The leasing fever is directly attributable to the success of the Knox lease and the Jarvis lease, both of which are now in ore, the former having reached a state of deevlopment that guarantees a production of $1,000,000 within the next four months, and possibly $2,000,000, while the latter is just starting down a vein that is sensational for the double reason that the values are extremely high, and because the quantity of gold is very large.

Rapid strides have been made at the Knox lease during the last few days. While the production of high grade shipping ore is maintained without sorting, the main shaft is dropping down rapidly, and 35 feet have been made since the start from the 100-foot level was made. As was expected the vein was cut on the dip at 125 feet, the first of this week, and the shaft is now dropping down to the north of the vein. At the intersection of the shaft with the vein the ore was in splendid and regular form, with perfect walls; the shoot was fully three and a half feet wide, and the values were something enormous, easily eclipsing any yet found in the camp. The series of assays, about 20 in number, taken from the vein where the shaft passed through it, is the most remarkable in the history of Fairview, and the picture values there excel, on the whole, any previous sampling of the Nevada Hills vein.

In the drift to the east, on the vein at the 100 foot level, there has been a demonstration which may explode the theory of a decided fault in the main ledge of the Nevada Hills, at a point but a short distance east of the leasing shaft. The faulting plane was supposed to be at an angle that would give plenty of stoping room at the 200-foot level, and provide more ore than could be removed in four months' time, and the work was being conducted along this line. But this east drift at the 100-foot level instead of running into a faulting plane, has turned off to the north in such a manner as to give opinion to the effect that the faulting plane is not a perfect one—that it does not cut the vein off—that the ore shoot will be found to continue on through the Boulder No. 1 claim and into the Lookout ground. The importance of these late developments is momentous to the Nevada Hills and surrounding properties, and the result of the next few weeks' work ise anxiously awaited by all concerned.

DELAMAR'S BLUESTONE.

Property at Yerington Consists of Over Twenty Valuable Claims.

The Bluestone mine in the Yerington, Nev., copper district, owned by Capt. DeLamar and which is now being subjected to examination by Heinze experts, according to an article published recently in the Lyon County Times, consists of over twenty claims, and lies about three miles west of Yerington and within plain view of the town. It was formerly the property of H. E. Miller and associates, and was, in 1901, operated to some extent by the Exelsior company, a company made up of Butte people with C. H. Batterman as president and general manager. A smelter was erected on the property and considerable of the best ore in the mine was worked. Copper was then low—getting down to 10 cents—and upon the death of Mr. Batterman the company was dissolved and the property reverted to Mr. Miller and associates.

Some two years ago M. J. Heller took the property over for Captain DeLamar at a price in the neighborhood of $125,000. Since then development work has been carried on quite extensively and reports from expert examinations state that there is from 1,000,000 to 2,000,000 tons of copper ore blocked out in the mine at the present time. The ore will run, on an average, 3 per cent or better. This, with copper at 20 cents, and 1,000,000 tons only in sight, would give the mine a value of $12,000,000, and with 2,000,00 tons in sight, $24,000,000. From what information can be obtained it is reasonable to suppose that the property has close to the latter valuation.

For a year or more past Captain DeLamar has been testing the ores of the Blue Stone by the electro-magnetic separating process, and has demonstrated that it is a complete success. Over 90 per cent of the values in the ore can be saved by this process, and at the present plans are out for a 1,000-ton plant of this description, and grading for the plant is under way.

BUY INTO ROSEBUD.

W. H. Tibbals and Others Secure Ground in Nevada Camp.

Broker Wm. H. Tibbals and several other local mining men have made the first payment on a property in the Rosebud, Nevada, district, which was acquired recently, and are now preparing to begin a campaign of development thereon.

If, after the expenditure of a few thousand dollars the ground responds in a manner it is hoped it will, a company will be formed and a limited amount of stock placed upon the market

ALTA BREAD MONEY.

With July Dividend Columbus Con. Will Have Paid 55 Cents a Share.

With the dividend declared by the directors of the Columbus Consolidated mine yesterday, this well known Alta company will have disbursed among shareholders this year a total of 55 cents a share. The company paid its initial dividend of 15 cents a share in January, one of 20 cents a share was paid in April and the next one is payable on the 15th of next month.

BALAKLALA COPPER.

According to the current issue of the Boston News Bureau, Clarence K. McCornick has become a controlling factor in the Balaklala Copper company and the following will no doubt be of interest to a good many Salt Lake mining men:

"It is a magnificent property. That none can gainsay, but there is considerable criticism among mining people in the west as to the management. Nobody knows where control of Balaklala lies, but it is very evident that the Guggenheim interests are in a position to derive the principal benefits from the operation of the property.

"The Balaklala is building a big smelting plant, but no copper converters. Instead the Guggenheims have made a contract with the Balaklala company, although I am not aware that stockholders have approved the contract, whereby all of the Balaklala matte is to be treated at the new big Guggenheim plant at San Francisco bay.

"The Guggenheim interests are in a position to derive unusual benefits from such a contract and the Balaklala company must pay extreme penalties in comparison with the conversion of its own matte. This is a matter that should be very carefully considered by Balaklala stockholders.

"The above situation may have been applied several months ago, but we understand that the Guggenheim interests are today persona non grata with other Balaklala interests.

"Joseph A. Coram is no longer president of the operating company, having voluntarily resigned several months ago. He was succeeded by Clarence McCornick of C. K. McCornick & Co., and the McCornick firm is now the controlling interest.

"The original agreement with the Guggenheims was only preliminary, not a hard and fast contract, and it provided that the Guggenheims would treat the Balaklala matte at their new smelter, building on San Francisco bay, or some other of their plants in case the new smelter was not completed in time, at cost plus a profit of $1.50 per ton. The Guggenheims in return agreed to supply the Balaklala company with all the money needed for development and construction and wait for reimbursement out of earnings.

"Immediately after Mr. McCornick assumed the presidency the Guggenheims presented to the board of directors a new long term contract for signature which gave them greater benefits, but the board refused to consent to a new contract on the ground that the Guggenheims had not lived up to their preliminary agreement.

"The Balaklala company will now probably decide to build its own copper converters and be independent of any other copper interests. The Guggenheims now own a one-sixth interest in the company, which has outstanding 525,000 shares, and have one director out of five."

SAN FRANCISCO MARKETS.

CONCENTRATES.

J. B. Thompson, the well known mining broker, has returned from a trip to the coast.

Manager Tony Jacobson of the Columbus Consolidated, went to Alta this morning on one of his regular trips of inspection.

The ore and bullion settlements reported late yesterday by McCornick & Company were: Crude ore and concentrate, $43,000; base bullion, $75,000.

R. G. Wilson, formerly of this city but who now calls Los Angeles his home, is in the city to look after some mining business.

George W. Riter and Harry S. Joseph are preparing to leave for Denver, where they will meet with the American Mining congress' committee on smelting trusts.

Thomas Foote, a well known citizen of Pasadena, Cal., is in the city, the guest of Vice President Woodbridge of the Taylor & Brunton Sampling company.

Denman Blanchard, of Boston, who is interested in mining in this state, has returned to his home after a few days' stay in the city. Mr. Blanchard is interested with several others in the Overland mine in the Camp Floyd district (Mercur). No steps will be taken towards the rejuvenation of this property. Not for awhile, at least.

BULLS SHOWED SOME CONFIDENCE

Bid Up Stocks, All of the Well Known Ones Being Freely Bought.

RAILROADS VERY STRONG.

Transactions in Union Pacific Very Heavy But When it Fell Back The Advance Halted.

New York, June 26.—There was a considerable show of animation in the opening dealings in stocks and prices advanced vigorously all along the line. Colorado & Southern rose 1½, Great Northern preferred 1½, Canadian Pacific, L. & N., St. Louis & San Francisco second preferred and Great Northern Ore Certificates 1, and Union Pacific, Northern Pacific, St. Paul and Wabash preferred large fractions.

Bulls became more confident in the market and bid up the list still higher against the report in the street. All of the well known stocks were bought freely, but the railroad section was stronger and in better demand than the industrials. St. Louis & San Francisco first preferred was marked up 3, Pressed Steel Car 2¾, Louisville & Nashville and Great Northern Ore Certificates, Northern Pacific and International Pump 1¾, United Railway and Investment preferred 1½, Union Pacific 1¼ and Reading, Northwestern, St. Paul, Illinois Central, Big Four, Amalgamated Copper, Consolidated Gas, Sugar, Lead and Republic Steel 1.

Some heavy transactions in Union Pacific carried it up 1¾ and gains were increased in the general list. When Union Pacific fell back nearly a point the advance halted and the tone became dull and heavy.

Bonds were firm.

Realizing orders caused a slow decline between 12 and 1 o'clock but only a few features were effected seriously. Great Northern preferred dropped 1½, St. Paul, Northern Pacific and Reading ½.

The market closed steady at the decline. There were large gains in International Pump preferred of 3⅝, Southern Railway preferred 2 and Iowa Central preferred 1. Northwestern fell 1½. Fractional net losses were made for most active stocks by the reaction.

LIVESTOCK.

CHICAGO.

Chicago, June 26.—Cattle—Receipts, 16,000; market steady. Beeves, 4.65@7.00; cows, 1.75@4.75; heifers, 2.00@5.40; calves, 5.00@7.00; good to prime steers, 5.70@7.00; poor to medium, 4.00@5.65; stockers and feeders, 2.30@5.10.

WOOL.

ST. LOUIS.

St. Louis, June 26.—Wool, steady. Territory and western mediums, 30@35½; fine medium, 17@21; fine, 14@18.

BOSTON.

Boston, June 25.—Activity in the local wool market continues with the best class of wools, especially Australians, as the feature. The demand for fine crossbreds is increasing and a few sales have been noted in the lower grades. Receipts of domestic wool have been large and a greater confidence in the value of good wool is reported.

The supply of fine imported wool is narrowing, and the outlook abroad for additional stock is reported as poor.

Prices for domestic kools continue strong with the active sales, especially with Montana, Oregon and Wyoming clips of fine medium grades being reported as high as 23 cents. Better prices are also reported in the central states and in some parts extreme prices prevail.

The leading domestic quotations range as follows:

California, scoured basis, northern, 66@68c; middle countries, 65@66c; southern, 62@63c; fall free, 37@38c.

Oregon, scoured basis, eastern, No. 1, staple basis, 70@71c; eastern No. 1, clothing, 68@70c; eastern average, 68@70c; valley No. 1, 60@62c.

Territory, scoured basis, fine, staple, 70@72c; fine medium, staple basis, 68@70c; fine clothing, 68@70c; fine medium clothing, 65@68c.

Pulled wool, scoured basis, extra, 68@72c; fine "A," 68@62c; "A" supers, 53@58c; "B" supers, 43@46c.

PRODUCE.

CHICAGO.

Chicago, June 26.—The wheat market today opened easy because of lower prices at Liverpool. A rally soon took place however, on good buying by commission houses. The cause of the strength was found in the weather reports from the southwest, where it is said that too much rain is preventing harvest. From the northwest came the report that too little rain has fallen in that section. September wheat opened a shade to ⅛@¼ lower at 94½@94⅝ and sold at 95@95⅛.

The corn market was very quiet and prices were firm. September corn opened a shade higher at 53 and sold at 53⅜.

The selling movement in July oats seemed to be over when the market opened today. Trading was very quiet. September oats opened ⅛ to ¼ lower at 36⅞@37, and for a time held at those figures.

The provisions market was quiet and prices were easier. Heavy receipts of live hogs in the west offset an advance of 5 cents in the local market. September pork opened 5 cents lower at 16.20. Lard was 2½@5 cents lower at 9.02½@9.05, and ribs were 5@7½ cents lower at 8.80.

Cash: Wheat—No. 2 red, 93@93¼; No. 3 red, 89@92¾; No. 2 hard, 91½@93; No. 3 hard, 85@92; No. 1 northern, 1.02@1.03½; No. 2 northern, 98@1.02; No. 3 spring, 91@1.01.

Corn—No. 2, 53; No. 3, 52¾@53.

Close: Wheat—July, 92¾; Sept., 95¼.
Corn—July, 52¾; Sept., 53⅝.
Oats—July, 32⅝; Sept., 37⅛.
Pork—July, 15.95; Sept., 16.22½.
Lard—July, 8.75; Sept., 8.97½.
Ribs—July, 8.57½; Sept., 8.77½@8.80.
Rye—Cash, 86@86½.
Barley—Cash, 68@78.

NEW YORK FRUIT MARKET.

New York, June 25.—The market for evaporated apples is firm on spot, although demand is not active. Fancy are quoted at 9¼; choice, 8; prime, 7½@7⅝, and poor to fair, 6@7.

Prunes continue firm with a rather better demand for export. Spot quotations range from 4½ to 12½c for California fruit, and from 5⅝ to 10c for Oregon.

Apricots are unchanged; choice, 21c; extra choice, 22c; and fancy, 22@23.

Peaches, firm; choice, 11½@12; extra choice, 12½@12¾; fancy, 13@13½; extra fancy, 14@14½.

Raisins are not active but holders are very firm in their views and prices show advancing tendency. Loose muscatel are quoted at 5¾@10c; seeded raisins at 7¼@13, and London layers, 1.50@1.65.

SUGAR AND COFFEE.

New York, June 26.—Sugar, steady. Fair refining, 3.25; centrifugal, .96 test, 3.75; molasses sugar, 3.09.

Refined—Steady. Crushed, 5.70; powdered, 5.10; granulated, 5.00.

Coffee—Quiet. No. 7 Rio, 6¼; No. 4 Santos, 7⅜.

BUTTER AND EGGS.

Chicago, June 26.—Butter, steady. Creameries, 19½@24; dairies, 17@21.

Eggs—Steady, at mark cases, included, 13½@14.

BUTTER AND EGGS.

New York, June 26.—Butter, steady. Western factory, common to firsts, 17@19½.

Cheese—Quiet, unchanged.

Eggs—Firm, unchanged.

TODAY'S MONEY MARKET.

New York, June 26.—Money on call, steady, 2¼@3¼; ruling rate, 3; closing bid, 2½; offered at 3.

Time loans, strong and dull; 60 days, 4½ per cent; 90 days, 4½@4¾; six months, 5½.

Close: Prime mercantile paper, 5½@6 per cent.

Sterling exchange, weak, with actual business in bankers' bills at 4.87@4.87.05 for demand, and at 4.83.70@4.83.75 for 60 day bills; posted rates, 4.84½ and 4.88; commercial bills, 4.83½.

Bar silver—67¼.

Mexican dollars, 52¼.

Government bonds, steady; railroad bonds, irregular.
