MINING, BUSINESS AND STOCKS

WEEK ON 'CHANGE OPENS UP WELL

Interest in Nevada Stocks is Much Greater Than Usual.

BIDDING BRISK AND STRONG.

Individual Sales Small, But Volume Of Business on Whole Comes Well Up to Average.

Business for the week opened up fairly well this morning on the floor of the local exchange. The bidding was brisk and the market on the whole fairly strong. The individual sales were small but the total volume of business for the day was well up to the average.

Lower Mammoth was active on the open board at prices ranging from 65 to 71 cents. One hundred Nevada Hills sold at $3.20, and the interest in Nevada stocks as a whole was perhaps stronger than usual. Prospects of a good week's business are believed very favorable. The quotations for the morning closed as follows:

SELLS HALF INTEREST.

Share in Claims in American Fork Canyon Acquired by W. J. Holden.

(Special to the "News.")

Provo, Aug. 27.—Edward Hines of American Fork has transferred by mining deed to Willis J. Holden of Cleveland, O., for a consideration of $1, an undivided one-half interest on the following claims in American Fork canyon: Mazzie Lode No. 2, Quartzite, South Security, Getting There, Getting There Extension, Martha Lode Extension, Utah Light Artillery, Fisher No. 8 Extension, Fisher No. 8 Extension No. 2, Bog Iron Lode.

Etta Swarthout Reed of Salt Lake has transferred to Mary Swarthout of Provo for a consideration of $1 275 feet (undivided) in the Last Hope mining claim, in Mineral hill in Tintic mining district.

STRIKE ON RED FOX.

Twelve Foot Vein of High Grade Ore Cut on Well Known Property.

A special from Ryolite, Nevada, to the Daily Mining Record says:

A 12-foot vein carrying an excellent grade of ore has been cut at the Red Fox, which is being operated by the Forward Mining company of Denver. The entire vein is highly mineralized and contains good values throughout, but a pay lense of substantial width occurs on the hanging wall and it is here that the higher values are encountered. A greenish and an iron-stained variety of quartz appears. Assays from the former returned a yield in gold of $90 and $160 to the ton, while the latter ranged as high as $378. This vein shows a surface width of only a few inches and values of but slight consequence. It appears to be rapidly gaining in both metallic content and width with depth. It was encountered by the main crosscut at 135 feet, at which point 140 feet of backs are afforded.

The tunnel will be continued another 100 feet, where it is expected to reach the chief contact of the property at a depth of 200 feet. This shows about four feet on the surface. After this work is performed it is the intention of the management to return and begin vertical and lateral operations on the vein just crossed.

The acreage of the Red Fox includes three claims and a fraction situated immediately north of Rhyolite and adjoining the holdings of the Bonanza Mountain. J. M. Patrick, head of the Forward company, was in the district for the past ten days and has just left to return to Denver, by way of Goldfield, where the company also has extensive mining property. Encouraged by the present development revelations he will open the Red Fox ground as rapidly as possible.

HINTS ABOUT TELLURIUM.

All Rocks Showing it Should Be Assayed for Gold and Silver.

Any rock or ore which gives a decided reaction for tellurium should be assayed for gold and silver. Tellurium, however, is not always accompanied by gold. It forms combinations with other minerals, such as nickel, lead and mercury. Where any traces of gold and silver are found associated with tellurium, it would be well to seek in the vein for a richer pay-shoot. The geological conditions stated by the Sandy, Nevada, correspondent would usually be considered favorable to the occurrence of ore bodies. The occurrence of numerous quartz crystals in the vein has no particular significance, unless it indicates the pockety nature of the vein, which it certainly does in some districts.

DAMOND IMPORTATIONS.

Price Subject to Heavy Fluctuation—Large Quantities Still Uncut.

According to the department of commerce and labor, $35,000,000 worth of diamonds were imported into the United States in the fiscal year 1906. No article shows greater fluctuation in the imports than diamonds. In 1906 the total, as stated, was $35,000,000; in 1904, two years earlier, only $19,000,000; in 1903, $26,000,000; in 1900 but $12,000,000; in 1897 less than $2,000,000, and in 1893 about $15,000,000. About $10,500,000 worth of diamonds imported in 1906 were uncut, to be prepared for use by the diamond-cutting establishments of the United States, while over $24,000,000 worth were cut but not set.

COPPER-MATTING FURNACE

Built By Colorado Iron Works for Installation at Seattle, Washington.

The latest type of copper-matting blast furnace was recently built for the New World Smelting Co., of Seattle by the Colorado Iron Works Co., of Denver. This furnace, which is now being installed at the mines near Livingston, Montana, has some new features, including angle-inlet tuyeres and combination trap-spout. There are two tiers of steel-plate water-jackets, the upper one being supported independently of any other part of furnace by a steel I-beam frame carried upon brackets on the corner columns. The tuyeres are the Colorado Iron Works Co.'s latest type, the blast inlet entering at an angle of 45 degrees, thus avoiding the sharp corner and excessive friction. The trap-spout is made of cast-iron plates, bolted together, lined inside with magnesite. The overflow end is fitted with a water-jacketed copper tip, which resists the greatest cutting effect of the matte. This furnace is 42 by 120 inches at the tuyeres and has a capacity of about 150 tons per 24 hours.—Mining and Scientific Press.

CAMP OF BULLION PROMISES MUCH

Immense Ore Deposits Underlie Entire Section for Miles in Every Direction.

RICH VALUES ARE TAKEN OUT.

Ore Runs High in Gold With Proportion of Silver Small—Four Companies Now Shipping.

"Nine companies are sacking ore and four are shipping," said L. E. C. Hinkley who has just returned from the old camp of Bullion, Nevada, in discussing the mining situation at that point.

Mr. Hinkley went on to say that in his opinion the camp is one of the most promising in the state, and is certain to make a record as a gold producer. Men who have not visited the district can have no conception of the magnitude of the ore bodies underlying the camp for miles in all directions. There has been nothing like a boom so far, and lying in the interior as it does, the district has so far simply escaped attention in the general rush to other more easily accessible points.

Mr. Hinkley with three associates bought up 15 claims which they will begin to develop right away. They have let a contract for a shaft on one of the more promising of these, and in a 12-foot hole on this shaft they have uncovered a three-foot ledge averaging $39 across. One stringer gave returns of $135 and $560 practically all in gold. The proportion of silver in the ore is very small.

GOLD SPRINGS GROWING.

Nevada Camp Which Gives Good Promise—Excelent Results Obtained.

Mr. C. A. Short, the well known mining operator is in the city at present, having just returned from Gold Springs, Nevada. Mr. Short says the camp is forging right ahead and promises to be one of the greatest camps in the state. A postoffice has been established and a daily stage is in operation. The Gold Springs Merctantile Co. will open for business within the next few days, and in point of population the camp is gaining steadily.

The new camp is located about 13 miles west of Modena, near the Utah Nevada state line. It is essentially a gold camp, and several good properties are being worked there. Mr. Short and his partner are working 20 men on the Jennie-Uvada group, and so far the results obtained have been excellent. He has been engaged in mining and prospecting in the state for years, and the result of this his last venture, promises to make him a rich man.

TOMORROW TELLS TALE.

Columbus Consolidated Interests Expect to Add to Holdings in District.

It is authoritatively stated in mining circles today that tomorrow will see the consummation of the deal whereby the Alta Quincy property passes into the hands of Tony Jacobson, president and manager of the Columbus Consolidated, and associates. A payment of $15,000 was made to bind the bargain on Saturday, and it is understood that the balance of the purchase money will be turned over in the near future. Ernest Ramberger and Clarence K. McCornick are named as the principal associates of Mr. Jacobson, and the property taken over has always been regarded as among the most promising in the district.

This will give the combination an immense tract of the best ground in the camp, and in view of the well known records of the men behind the proposition it is believed that a campaign of development will shortly be commenced on a giant scale.

CONTRACT LET.

Royal Flush Property Near Logan Begins Season of Development.

Special Correspondence.

Logan, Aug. 25.—A contract has been let to drive a 50-foot tunnel at the Royal Flush prospect in the foot hills east of town. As the work progresses the quality of the ore improves, and those interested expect to strike something good before this tunnel is completed.

Experts from Salt Lake went up to Mineral Point Saturday to investigate the iron properties there. It is understood that the Salt Lake smelters want to obtain the ore for fluxing purposes and if the properties are as reported, will buy the property. The owners are holding the property now at $100,000.

HUMBOLDT COUNTY COPPER.

Section of Nevada Recently Explored With Promising Results.

A Salt Lake dispatch to the Denver Mining Record has the following to say regarding the recent investigation of the Humboldt county, Nev., copper deposits by L. R. Scott and E. S. Chaffy:

L. R. Scott has returned from Humboldt county, where he has been with E. S. Chaffy, the discoverer of the Transvaal district, for the last several weeks.

Scott and Chaffy went to Humboldt county to investigate the copper district some 65 miles north of Winnemucca, in the section lying along Jackson creek. Scott stated that the showings in the section were very good but that there is no particular boom on. There are several good prospects in the camp, and one of them, the Nelson property, has just been taken over on a $7,000 bond by Capt. Hassel. A company has been incorporated as the Nelson Copper Mining company.

Copper rock has been found in the district running as high as 40 per cent and float that will return 15 to 20 per cent is plentiful. The Lay Bros. are running a ranch in the neighborhood and board can be obtained there at a reasonable rate.

From Jackson creek the party went to the new camp of Dyke, which gets its name from a great limestone dyke that cuts it and can be traced for seven miles. The way to the camp lies down Jackson creek and across the Black Rock desert, a distance of 78 miles, to the Pine Forest range, on the southern end of which the camp is located. The camp is about 20 miles south of the Oregon line.

Scott said that the country is very promising and that so far but little ground had been taken up in the district, which is fully seven miles long and two miles wide. The men who discovered the big dyke, Jackson and Ellis of Sumpter, Or., have just completed their location work, but on one claim are taking out $300 shipping rock.

The great dyke that cuts the section, is nearly 400 feet wide, and the ledges sharply defined and of good width. There is a plentiful supply of good water and at a distance of seven miles is the big Miller and Lux ranch, from which fresh vegetables can be obtained. A townsite has been laid out in a place well adapted to the purpose, and adjoining the ground are several hot springs, the property of Miller & Lux. Throughout the townsite water can be found at a depth of six feet.

Scott and Chaffy report that they secured 15 claims in the district and from assays made yesterday they got one return of $22 in gold and 6.1 per cent in copper. The other samples all returned some values and in the ore shown free gold appears, though in small quantities. Scott says that the rock all came from surface croppings or at a depth of three or four feet, and while the values are not startling, they indicate good ore at depth. Whether the rock will be of an auriferous nature or a copper deposit when developed it is hard to say, as at present the copper occurs in kidneys. However, the whole aspect of the country is promising and Scott says that in his estimation there will be something heard from it in the future.

NEVADA STOCKS.

James A. Pollock & Co., bankers and brokes, furnish the following Nevada mining stock quotations today:

CONCENTRATES.

Solon Spiro and brother, I. Spiro of Chicago, spent Sunday at Park City inspecting a number of properties.

Col. Nicholas Treweek, president and manager of the Wabash mine, is spending a day or two on the property.

James A. Pollock, head of the brokerage firm which bears his name, is expected to return this evening from an extended eastern trip.

J. R. Rand of the Black Diamond company at Stockton, is putting in the day in making an inspection of the company's properties at the camp.

P. B. McKeon of the Talisman mine in Beaver county is in the city on business connected with the property.

C. G. Goss, manager of the Parker Mountain property at Parker mountain, Ida., spent Sunday and this morning in the city on a combined business and pleasure trip.

Joseph Oberndorfer spent Sunday going over the Little Chief property at Tintic. The mine is said to be showing some fine ore.

Henry M. Adkinson, manager of the New England company's mines at Bingham, passed through the city yesterday, en route for the camp, after a business trip to Denver.

Daniel Guggenheim, prominently identified with the American Smelting & Refining company and heavily interested in western mines and mining, will reach Salt Lake Tuesday on a brief business visit.

Edward Mingle, manager of the Manhatton Consolidated properties, is in the city for a few days. While here Mr. Mingle will endeavor to interest Salt Lake mining men in a proposition which he has a few miles east of Manhatton and west from the head of Jefferson canyon.

John Josten, private secretary to Samuel Newhouse, arrived in the city from New York a few days ago. Mr. Josten made a hurried inspection of the work at Garfield and expresses himself as astonished at the progress which has recently been made. He also visited the Cactus property, and expects to leave for the east this evening.

STOCKS OPENED RATHER UNSETTLED

Sales for Both Accounts Caused A Sharp Reaction Within a Few Minutes.

HARRIMAN ROADS WERE SOLD.

Efforts to Advance the Market By Bidding Up Select Properties Proved Futile.

New York, Aug. 27.—The stock market opened irregular today and with changes narrower than at any time since the present upward movement commenced. Atchison and St. Paul made fractionally higher records at 107¼ and 198⅝. Union Pacific, Southern Pacific, Amalgamated Copper and U. S. Steel stocks were on the other hand slightly lower. Chesapeake and Ohio, Northern Pacific and Louisville & Nashville gained 1, Great Northern preferred gained 1½ and Anaconda ⅝.

Sales for both accounts caused a sharp reaction within a few minutes after business commenced. A subsequent rise in St. Paul to the record figure of 198⅝ had only a slight effect in checking the selling elsewhere, which was continued later on an increasing scale. Union Pacific, Southern Pacific, Atchison, Reading, Locomotive and Smelting opened 1 to 1½ below Saturday's closing and Northwestern 2. St. Paul itself eventually succumbed to this pressure and went off to 197⅝. A block of 10,000 shares of U. S. Steel was sold at 47. Meanwhile Sugar was bought heavily and rose 2½ to 144¼. Shortly before 11 o'clock the market rose in sympathy with a revived demand for St. Paul and Atchison. St. Paul crossed 198 again and Atchison recovered fully. Lackawanna jumped 23¾ to 324 on one transaction.

Both Atchison and St. Paul increased their gains slightly to 107½ and 198⅞ respectively with the general market sharing moderately in their rise. Renewed selling, however, of the Harriman stocks and Reading on a large scale undermined the entire market and prices dropped to the lowest of the morning. Near noon the selling relaxed somewhat and the market became dull and steady.

Bonds were steady.

Futile efforts were made to advance the market by bidding up select stocks, notably Amalgamated Copper, rose a point to 111⅝. Room traders sold the list on all rallies and St. Paul was eventually depressed to 196⅝. The Harriman stocks continued heavy, but Atchison and Amalgamated Copper were supported at around the best.

The persistent selling of some of the leaders began to have its effect in the late afternoon when the practise of marking up special stocks was abandoned. Large blocks of various stocks were sold, especially Reading, which rose up 2½ to 81½. A number of other favorites were quoted a point or more below Saturday's closing, including U. S. Steel, which sold at 46½.

LIVESTOCK.

WOOL.

ST. LOUIS.

St. Louis, Aug. 27.—Wool, steady. Territory and western mediums, 22@24; fine mediums, 17@20; fine, 12@16.

PRODUCE.

CHICAGO.

Chicago, Aug. 27.—The wheat market today opened weaker on active selling by pit traders. Elevator interests also sold the December option with some energy. Later the market became firmer on covering by shorts, but the general tone of the market remained easy. Better weather in the northwest was the reason for the easy tone. September wheat opened ⅛ to ⅝ lower at 75⅝@75¾, declined to 73⅞, and rallied to 74¼.

The corn market was steady, but trading was very small. December corn opened ⅛ higher at 44, sold at 43⅞ and advanced to 44@44⅛.

The oats market was easier in sympathy with wheat. December opened unchanged to a shade lower at 30⅝@30¾, sold at 30¼ and for a time held within these figures.

Provisions were somewhat easier. September pork was unchanged at 17.00; lard was off 5 cents at 8.72½, and ribs were 7½ cents lower at 8.80.

Cash: Wheat—No. 2 red, 72@72½; No. 3 red, 72@73; No. 2 hard, 71½; No. 3 hard, 70@70½; No. 1 and No. 2 northern, nothing doing; No. 3 spring, 73@75½.

Oats—No. 2, 29½@29¾; No. 3, 29@29½.

Corn—No. 2, 49½@50; No. 3, 49⅝.

The market remained steady all day at the early decline. The high point for December was 74⅞. The close was easy, with December off ⅞ at 74⅛.

Corn—Prices held steady all day. The close was steady with December a shade lower at 43⅞@44.

Close: Wheat—Sept., 71½; Dec., 74½.

Corn—Sept., 48⅞; Dec., 43⅞@44.

Oats—Sept., 29½@29¾; Dec., 29⅝.

Pork—Sept., 17.62½; Jan., 12.62½.

Ribs—Sept., 8.77½@8.80; Oct., 8.62½@8.65.

Rye—Sept., 55⅝; cash, 55⅝@57½.

Barley—Cash, 37@52; No. 2 Sept., 43; feeding, 36.

Flax—Nothing doing.

Timothy—Sept., 3.90@4.00.

SUGAR AND COFFEE.

New York, Aug. 27.—Sugar, raw, firm. Fair refining 3⅝@3; centrifugal, 96 test, 4; molasses sugar, 3⅛@3½.

Refined—Steady. Crushed, 5.60; powdered, 5.00; granulated, 4.90.

Coffee—Steady. No. 7 Rio, 5⅝.

LIVERPOOL GRAIN.

Liverpool, Aug. 27.—Close: Wheat—Sept., 6s 2½d; Dec., 6s 3½d; March, nominal.

The weather in England today was fine.

LOCAL MARKETS.

In today's local markets may be found large quantities of grapes, California vegetables including quantities of head lettuce, Mango peppers, etc., while Utah is also supplying a wide assortment of vegetables. There will be a car load of sweet potatoes from southern California here in the morning, the first car lot of the season, and the event will be signalized by a lowering in prices. Oranges are practically in the past tense, though there is a car load or two within the reach of local jobbers, who are debating whether to take them, the drawback being the price, $7 and $8 per case being offered in the east. Mexicans are not sent to this market and the Florida freeze up of a few years ago, practically put that state out of the general market.

Lemons are becoming scarce, as there is a great demand in the east where the Sicilian supply has fallen off on account of partial failure of the local crops. Grape fruit, figs, raspberries, gooseberries and pine apples are out of the market. Eggs are up because the Utah hens are remiss in their duty. Poultry is rather scarce. The market has been comparatively bare of hay owing to the recent rains, but it will be arriving this week in larger quantities. The prices obtaining in today's markets are as follows:

RETAIL.

Timothy, per cwt	.85
Alfalfa	.75
Corn, per cwt	1.45
Wheat, per cwt	1.50
Oats	1.80
Barley, rolled, per cwt	1.50
