MINING, BUSINESS AND STOCKS.

MINING STOCKS MORE BUOYANT

The Sales of the Forenoon Calls On 'Change Footed Up to Almost $24,000.

SILVER KING PARTICIPATED.

Was Purchased on the Open Board at $70—Daly-Judge in Demand. No Offers Were Made.

Mining stocks were more buoyant today, and the bidding was quite animated at times during the forenoon calls of the Mining Exchange. The sales footed up to a total of 27,895 shares, which brought $23,980.37.

Carisa sold readily; beginning at 18 cents it slackened to 16½ at the close. Some Ajax shorts were filled, the stock ending higher. Some of the brokers who visited the May Day mine in Tintic yesterday were apparently well satisfied, for they were in the pit this morning as buyers; the stock closed higher. Star Consolidated opened strong, but declined later. Uncle Sam Con. also met with favor and the price stiffened.

On the open board Silver King participated, 100 shares being purchased at $70 per share. A 500 share lot of Ontario was also picked up at $5. Daly-Judge was anxiously sought, but no one had any to offer at the price bid for it.

The closing quotations and sales were as follows:

FORENOON QUOTATIONS.

LE SIEUR OPAL MINES.

Work Has Been Started at Company's Idaho Property—St. Louis Exhibit.

Special Correspondence.

Provo, Aug. 24.—A private letter from St. V. LeSieur, who is now in St. Louis, states that the Le Sieur Opal Mining company has commenced to operate the opal mines near Forney, Ida., which were discovered by Mr. Le Sieur about a year ago. The officers of the company are St. Vrain LeSieur, president; W. F. Ness, vice president; F. H. Janis, secretary and treasurer; Sidney L. Le Sieur, manager.

The company is organized under the laws of Arizona with a capital of $100,000. The office of the company is in St. Louis and a big display of opals will be made at the St. Louis world's fair.

The company expects to have its plant at the mine ready for turning out polished opals within 60 days, and when completed it will be the largest for cutting precious stones in the world.

BROKER REYNOLD'S TRIP.

Succeeded in Getting More Capital to Develop Beaver County Mines.

Broker J. M. Reynolds has returned from a seven weeks' trip to New York, where he went in the interests of the Wasatch-King mine of Beaver county, in which proposition he is extensively interested. The trip, he says, was eminently successful in the way of interesting capital. While away some gratifying developments were made in the mine. Reports from the property state that a 20-inch vein of ore has been disclosed which carries value of $50 to the ton.

The property is located in the north end of the district, which, according to surface indications, are every bit as attractive as the southern end where more development has been done.

Mr. Reynolds says that he found a great deal of inquiry for Utah mines in the east.

Returns from Colorado.

Secy. Arthur E. Snow of the Columbus Consolidated mine of Alta returned yesterday from Colorado, where he went to examine a property near Leadville for New York clients. Mr. Snow observed while in the Centennial state that the conservatism of Utah mining operators does not exist there. Coloradoans, he says, are more willing to take a long chance.

Honerine Drain Tunnel.

Supt. Raddatz of the Honerine mine of Stockton is in the city today to confer with Joseph Dederich in regard to the plans for the proposed concentrator at the mouth of the great drain tunnel which is intended to unwater the mines of the Stockton district. No ground has been broken as reported last week, for the plant, but the start will be made very soon now.

The tunnel has been completed to the length of 4,500 feet and headway is being made at the rate of 12 feet every 24 hours. The volume of water flowing out of the tunnel is not quite as large as a little while back, it having been reduced to about 1,700 gallons per minute.

The tunnel is now being driven through a hard formation and for the first time since it was started, no timbers are being used.

CONCENTRATES.

Isaac McKay, superintendent of the Halifax mine at Tonopah has arrived from that Nevada camp.

The shaft at the Centennial-Eureka is down to a depth of 1800 feet below the collar of the shaft.

Work is being pushed on the construction of the mill at the Homestake mine in the Fay, Nev., district.

J. C. Gladden, manager of the Tonopah-Belcher mine near Tonopah, came in from the east yesterday.

President W. B. Mucklow of the Majestic Copper company, will arrive from the east tomorrow afternoon.

A foot of ore has been disclosed in an upraise from the incline in the St. Louis-Vassar property at Park City. One shift is working.

The Liberty tunnel in Park City has been completed to the length of 200 feet. The new boardinghouse has been completed.

Superintendent Kinnon, of the Majestic smelter near Milford, says that plant will be ready for commission by Sept. 1. That is, the lead furnaces.

Constructing Engineer J. M. Callow was in consultation with Manager Jas. Chipman today relative to the proposed new mill for the Uncle San Consolidated mine.

Jackson McChrystal, superintendent of the Gemini mine of Tintic, has returned from Idaho after making an inspection of mining properties near Mackey.

The shipments from Park City last week through the Macintosh sampler were reported as follows: Daly-West, 3,145,000 pounds; Silver King, 1,673,630 pounds.

Capt. H. C. Lawrence, manager of the Sevier Consolidated mine in the Gold Mountain district, has been investigating mining property near Hailey, Idaho.

The directors of the Valeo Mining company are scheduled to hold a meeting in Park City today to determine on plans for the future development of that property.

A De Lamar paper says: Expert talent is at Fay, Nev., conducting an examination of the Amethyst group of gold-bearing claims owned by Francis brothers of Newlands, Nev.

Reports from the Patten property out beyond Ten Mile are to the effect that the ore body has increased to four feet in width, and that the entire body pans well in gold.—Marysvale Free Lance.

James Wilson, the veteran prospector of Payson, Utah, was in town Tuesday after supplies. Mr. Wilson is now prospecting in the head of Deer Creek canyon and has made several valuable locations.—Marysvale Free Lance.

Manager D. C. Jackling of the Utah Copper company arrived from Colorado late Saturday afternoon. He is at the site of the new concentrator at Bingham today, accompanied by Supt. Janney.

C. H. Hall, vice president of the Citizens' bank of Houghton, Mich., has arrived in the city and will go to Alta tomorrow to inspect the Columbus Con. mine, in which he is a stockholder. He will be shown about by Manager Jacobson.

Maj. B. F. Hackett, United States marshal for Indian Territory and wife, were in the city over Sunday and guests of C. E. Hudson and family. The visitors were very much delighted with Salt Lake City and expressed a desire to return.

Mining business is beginning to hum in this locality. Every man who desires to work is now employed in the mines, on road building, the pack trails or the other numerous odds and ends of work that always accompany mining operations.—Marysvale Free Lance.

A carload of ore from the new strike in the Carisa mine is being loaded today. Samples of the ore brought from the mine and which are on exhibition at the offices of the company were seen by a good many stockholders today. They certainly show up well and bear evidences of permanency to the vein.

On Saturday Asa Hawley and James Christiansen of Richfield visited the B. W. & H. in which they are largely interested. James H. Wells of Joseph was also at the mine last Sunday. The condition of the property is such that it is a pleasure to those that hold shares to look on the wealth now in sight and to speculate on the probability that now appears so certain.—Marysvale Free Lance.

A 50-ton trial shipment of ore has been brought down from the Columbus Consolidated mine of Alta and delivered to the Bingham Consolidated smelter. The consignment consists of low grade product and the object is to try it out in the furnaces to determine what the smelter people can do in the way of fixing a working charge that would enable the company to ship the crude ore without the necessity of concentration.

Articles of incorporation of the Michaelson Mining & Milling company were filed with the county clerk last Saturday. The company is organized for the purpose of manufacturing mining machinery and conducting a general mining and milling business. The capital stock is $100,000, divided into 100,000 shares at $1 each. The officers and incorporators of the company are: C. O. Michaelson, president; P. I. Dockendorf, vice president; David Burlough, treasurer, and John H. Hiller, secretary.

General Manager Farish of the Majestic Copper company has awarded the contract for the transportation of ore from the Harrington & Hickory, Old Hickory and O. K. mines to the smelter near Milford. The successful bidder was Jas. Low, who agrees to deliver a maximum of 500 tons per day. It will require about 60 teams to take care of this business when everything at the smelter is in running order. Until the copper furnaces are "blown-in" shipments will be limited to 100 tons per day from the first named property, which is a producer of lead.

DEVELOPMENTS IN BLUE ACRE MINE

Shaft No. 4 is Now Penetrating A Large Body of Copper and Iron Sulphide Ores.

CAPPING TO RICHER ZONES.

At Least that is the Belief of Managing Director Crowther—Shaft No. 1 Nearing the 300.

Managing Director Henry M. Crowther is in receipt of very encouraging news from the Blue Acre mine in Beaver county, The disclosures being made in No. 4 shaft are getting interesting and while it is only down to a depth of 90 feet Mr. Crowther states that it has encountered what appears to be a very large body of copper and iron sulphides, which he takes to be the capping of richer zones.

Development work is being pushed vigorously in other portions of the property as well and No. 1 shaft is nearing the 300-foot point, which, when reached, will be the starting place for another cross-cut.

The Blue Acre is looked upon with favor in the Beaver copper belt, being located to the west of the O. K. and undoubtedly covers an extension of the vein which yielded so prolifically in the latter property.

Mr. Crowther feels confident that the time is not far distant when great changes will be wrought in the Blue Acre. A great amount has been expended in doing dead work in the past, but devolpments are now reaching the stage where stockholders may begin to see results of a pleasing nature.

FIRST CONTRACT LET FOR UTAH CON. SMELTER

The first contract in connection with the building of the extension of the Utah Consolidated Smelter has been let. The award, which calls for the construction of a 50-foot stack, was made to Joseph Dederich, the well known mill and smelter builder, this forenoon. Manager Channing announced that Mr. Dederich would commence work just as soon as the material can be delivered to the ground, which will probably be within a week. No decision has been reached as yet as to the kind of reverbatory and roasting furnaces to be installed and probably none will be until about the 1st of September, when eastern representatives of the company are expected to arrive. In the meantime, however, Constructing Engineer George K. Fischer will proceed with the plans. The extension will increase the capacity of the smelter 250 tons per day. At the present time the plant is handling ores from the big Bingham bonanza at the rate of an average of 520 tons per day.

From Utah's Oil Fields.

The mining of ozokerite in Utah is reaching large dimensions. A New York company is taking out fifty tons per week near Soldier Summit, and several other deposits are being explored. When it is learned that this product is worth $250 per ton, refined, it will be seen that this hydro-carbon is more profitable than the average gold mine. It is also worthy of note that Utah contains the only pure mineral wax in the United States.

A syndicate, with the well known oil firm of Merritt Bros. at its head, has secured many sections of land in the Green River district. It lies mostly to the east of the river, in an unexplored section. While the original owners of the land has lost hope and interest in their locations and allowed them to lapse, representatives of the syndicate were on the ground and secured it without the payment of one dollar to Utah people.

Negotiations are under way between the Intermountain Asphalt company and John T. Davis, of Oakland, Cal., whereby one of his machines will be installed. Mr. Davis becomes identified with the company in the position of a stickholder. He is one of the most noted experts on asphalt in the world and is one who has made the business a success. Utah gains a great deal in having him interested in her hydro-carbons.—Price Advocate.

Bingham Mining Notes.

Difficulty in securing graders is seriously interfering with work on the Copper Belt extensions, though dirt is moving at a number of points along the line.

After two years suspension of shipments the Silver Shield is hitting the market again. It should be in plenty of ore this fall—the long tunnel having reached the junction of the cross fissure and bedded veins.

Grading is rapidly going forward at the Utah Copper company's concentrator site, and next week a good start will have been made on foundation work. Thus far everything has moved without a hitch, though extra work was necessitated in straightening the county road and turning the creek.

Spencer Clawson, George W. Riter and A. F. Barnes of the city were yesterday viewing the Aztec lode in Butterfield canyon and in which they are interested. "Mac" McFarlane has just finished a 50-foot tunnel contract on the claim and some nice streaks of ore are showing.—Bulletin.

BOSTON STOCK MARKET.

Closing quotations today as reported by Hudson & Sons Co., brokers, were:

	Bid.	Asked.
Amalgamated	46⅞	47¼
Con. Mercur	1½	1 17-32
Daly-West	40	40½
Utah Con.	27	27½
United States	19½	19¾

OPENING PRICES BELOW SATURDAY'S

Week in Stocks Started Out in a Dull, Irregular and Quite Discouraging Manner.

ONLY A FEW ORDERS APPEARED

Some Leaders Ran Off, Recovered and Remained Stationary, Transcontinentals Being Bought.

New York, Aug. 24.—Only a few orders appeared for execution in the opening stock market dealings this morning and the resulting price changes were irregular and generally narrow. Southern Pacific was lifted ¾ and Amalgamated Copper and Union Pacific ⅝. St. Paul rose ½ and then ran off ¾. Prices declined gradually below last week's close, the loss reaching 1@1⅜ in St. Paul, Missouri Pacific, New York Central, Amalgamated, American Car and Metropolitan Street railway and 2¼ in Reality preferred. Offerings were small. A steadier tone developed before 11 o'clock and some good recoveries were made. The rally carried a number of prominent stocks over a range of from 1 to 2 points, but only a few moved a point either way from Saturday's level. Locomotive and Canadian Pacific rose 1¼, Anaconda fell 4 and Chicago Great Western preferred "A," Wisconsin Central preferred, Iowa Central preferred and Chicago Terminal a point.

Bonds at noon were heavy.

Transcontinental stocks were bought more freely during the early afternoon and Union Pacific rose a point. Amalgamated also displayed renewed firmness but the active list otherwise was neglected. Snuff advanced 2 and Tennessee Coal and Rubber 1, while Rock Island preferred fell off a point.

The market was inactive and drooping in sympathy with fresh selling of the earlier weak stocks, notably St. Paul, New York Central and Amalgamated. New York Central sagged nearly 2 points but the general list ruled slightly above the forenoon low prices. North American lost 1¾ and Pressed Steel Car and Biscuit preferred 1. D. & H. advanced 1.

LIVESTOCK.

CHICAGO.

Chicago, Aug. 24.—Cattle—Receipts, 2,000. 10 to 20c higher. C. & N. W. TRAIN WRECKED.

One Person Killed and About Thirty Injured.

Fon du Lac, Wis., Aug. 24.—The Chicago & Northwestern passenger train from Chicago was wrecked three miles south of here at 2 o'clock this morning. George W. Zuhlke, of Fond du Lac, was killed. Conductor Moy, of Chicago, and 30 passengers were injured. The entire train, express car, baggage car, two coaches and three sleepers were thrown down a 20 foot embankment.

The injured in all but one or two cases received comparatively slight injuriese.

Mrs. Stephen Schaeffer, of Cedar Rapids, was bruised and thrown into a creek by the shock.

The injured were conveyed to a farm house nearby which was converted into a temporary hospital. Physicians were sent from this city in carriages and later by relief train. All the injured were brought to the city, except four, and they will be brought in this afternoon. The track was torn up for 300 feet and traffic was suspended until noon.

New York Passengers Should Carefully Consider

the facilities offered by the Pennsylvania Short Lines via Chicago for quick transportation and superior accommodations. Ten days' stop-overs allowed at Washington and Philadelphia on New York tickets. Find out about it by addressing H. R. Dering, A. G. P. Agt., No. 2 Sherman street, Chicago.

See competitive drill, Woodmen, Saltair, tomorrow.

MERCHANT'S PRINTING

Turned out on short notice at the Deseret News. A big shipment of new types and supplies just in. Our facilities for letter heads, bill heads, tags, envelopes, pads, etc., etc., are unexcelled by any establishment in the West.

131 So. Main St. 'Phone 805-z.

Wall Paper and Carpets Cleaned.

Exactly Right.

That's the way your prescriptions must be put up here. Exactly what the doctor ordered, and we want you to feel that if your doctor is all right, send us his prescriptions, and you've nothing more to worry about.

Schramm's

WHERE THE CARS STOP.

Only One Pair of Eyes

Take good care of them. If your eye-sight fails, you miss half the pleasure of living. At the first note of warning, consult an optician, and have your eyes scientifically tested. We make no charge for examination, and if the test proves the need of glasses, we fit you perfectly with just what your case requires.
