BUSINESS IN MINING STOCKS.

Good Volume of Trading at Better Figures Today.

ALICE SELLS AT 30 CENTS.

Joe Bowers Develops Strength and Sells Freely—Sunbeam's Surprising Advance.

Stocks generally were in better shape today, the bull faction gaining not ground of yesterday, and intimating new life into several sections which as the day went forward showed a little depressed tendency of the hour's opening. This feature of trading, the call was quite interesting and brought out a good share of activity, sales reaching 61,000 shares, which had a selling value of $55,831.11.

The first seller was Dalton & Lark in which the brokers dealt at 11 cents, and which closed with a bid of 11½. Four Aces continued in good tone and sold freely about 42, while Grover-Marion had trading at 68, Mammoth at $3.88 and $3.90, and Lower Mammoth at 31 cents. Northern Light maintained a stationary position and sold up to 70 and Sunshine had a buyer at 45, with the stock closing firmly bid for at 42.

The surprise of the call was the sale of 5,000 shares of Alice at 30 cents a share, this transaction being the first in this stock for a good many months. Boston-De La Mar found good business at the old figures, while Dalton sold above 3, and Joe Bowers had sales approximating 23,000 shares, a big portion of which kept at 20¼ and 20½ cents a share. Joe Bowers Extension trading continued good at yesterday's figures, while Golden Star developed some activity in sales between 10 and 11½, with the stock finally registering a close bid of 11. Omaha was freely sought for around 42 cents, and Hecla-Amalgamated changed hands at 1½ cents, and had an open bid of 2½. Monarch was stronger and sold at 1½, while the close business of the call, Falsh, sold at 5 cents, and was quoted up to 47 cents and making ready sales around the figure.

MARKET REPORTS.

NEW YORK MARKETS.

MONEY.

New York, Feb. 15.—Money on call easier, 2½ per cent.

Prime mercantile paper, 3½@4½ per cent.

Sterling exchange firm with actual business in bankers' bills at 4.86@4.86⅛ for demand and 4.84½@4.85 for 60 days; posted rates, 4.84½@4.85 and 4.86½@4.87; commercial bills, 4.83@4.83¼.

Silver certificates continually 59½@60⅝.

Bar silver, 59⅝.

Mexican dollars, 47¼.

Government bonds, firm; U. S. 2s, reg. 96½; new 4s reg., 138; do. coupon, 139⅝; 5s reg., 112½; coupon, 113⅝; 2nd's 96; 4s reg. and coupon, 111⅝.

STOCKS AND BONDS.

New York, Feb. 15.—Prices of standard and international shares were generally below last night's figures at the opening. The slow market speedily shook off the opening depression and developed considerable activity with attendant sharp gains in the Pacifics. Immense blocks of stock were met in Northern Pacific around 53⅝, but the offerings were well taken. Atchison preferred brought 42½. Toward 11 o'clock the market lapsed into dullness but the improvements were well maintained.

There was more general disposition than for some time to advance the middle and low priced shares. The Pacifics were the features but a sprinkling of the minor industrials including American sugars and international silver received effective support.

There was little doing in bonds.

SUGAR.

New York, Feb. 15.—Sugar, raw, strong; fair refining, 3 15-16; centrifugal, 96 test, 4 15-16. Refined, steady; crushed, 5¾; granulated, 5.

CHICAGO MARKETS.

Chicago, Feb. 15.—May wheat opened at 72⅝@⅞, declined to 72¼, rallied to 72⅝.

Close:

Wheat—Feb., 72⅝@⅞; July, 71⅝.
Corn—Feb., 25½; May, 26⅝.
Oats—Feb., 22⅝; May, 23⅝.
Pork, Feb., 8.15; May, 10.52@10.65.
Lard—Feb., 5.42½; May, 5.62½.
Ribs—Feb., 4.62½; May, 5.82½.

Cash:

Wheat, No. 2, red, 71⅝; No. 3, red 68@70; No. 2, hard winter, 68; No. 3, hard winter, 64@67; No. 1, northern spring, 70@71; No. 2, northern spring, 69@70; No. 3, spring, 64@69.

Corn—No. 2, 25⅝@⅞; No. 3, 25⅝@⅞.

Oats—No. 2, 22; No. 3, 22⅝.

Barley—67@73.

Timothy—2.45.

Rye—50⅝.

Flax—? 58½.

LIVE STOCK.

Chicago, Feb. 15.—Estimated receipts, hogs, 30,000; tomorrow, 40,000; slow to 5c lower. Mixed and butchers, $3.35@3.65; good to choice heavy, $3.52@3.70; light, $3.25@3.50.

Cattle—Receipts, 17,000. Market 10@15c lower. Beeves, $4.00@5.85; cows and heifers, $2.00@4.75; stockers and feeders, $2.50@4.60.

Sheep—Receipts, 28,000. Market weak and lower. Sheep, $3.90@4.65; lambs, $4.00@5.15.

KANSAS CITY LIVE STOCK.

Kansas City, Feb. 15.—Cattle—Receipts 12,000. Market weak to 10c lower. Native steers, $3.60@5.60; Texas steers, $3.00@3.90; Texas cows, $2.30@3.75; native cows and heifers, $1.90@4.50; stockers and feeders, $2.90@4.10; bulls, $2.25@3.25.

Hogs—Receipts, 13,000. Market weak to 5c lower. Top, $3.70; bulk of sales, $3.60@3.70; heavies, $3.60@3.70; packers, $3.60@3.70; mixed, $3.60@3.70; lights, $3.60@3.65; yorkers, $3.60@3.65; pigs, $3.60@3.65.

Sheep—Receipts, 5,000. Market weak. Lambs, $4.00@5.90; muttons, $3.25@4.25.

OMAHA LIVE STOCK.

Omaha, Feb. 15.—Cattle—Receipts, 2,900. Market slow to 10c lower. Native beef steers, $4.90@5.30; western steers, $3.60@4.60; Texas steers, $3.00@3.75; cows and heifers, $2.50@4.25; canners, $2.50@2.90; stockers and feeders, $3.00@4.60; calves, $3.75@5.75; bulls and stags, $2.50@4.10.

Hogs—Receipts, 700. Market 5@10c lower. Heavy, $3.60@3.65; mixed, $3.60@3.65; light, $3.60@3.65; bulk of sales, $3.60@3.65.

Sheep—Receipts, 4,600. Market firm. Native muttons, $3.25@4.40; westerns, $3.00@4.35; stockers, $3.00@3.70; lambs, fower, $4.50@5.85.

DENVER LIVESTOCK.

Denver, Colo., Feb. 15.—Cattle—Receipts, 150. Market quiet and steady. Beef steers, $4.00@5.25; cows, $2.25@4.00; feeders freight pack to river, $3.00@4.00; stockers do, $3.00@4.75; bulls and stags, $2.00@4.00.

Hogs—Receipts, 750. Market 5@10c lower. Light packers, $3.60@3.70; medium, $3.60@3.65; heavy, $3.60@3.65.

Sheep—Receipts, 700. Market steady. Lambs, $4.50@5.50; wethers, $4.00@4.50; ewes, $3.50@4.00.

Cisco's Mining Record.

Of W. A. Clark, the newly elected senator from Montana, and the recent purchaser of the Ophir Hill property in the Ophir Hill district, Utah, the Engineering and Mining Journal says:

"Mr. Clark was born in Connellsville, Pa., in 1839. He went to Central City, Colo., in 1863, and the following year to the Bannock gold placers in Montana, where he cleaned up a fair stake from his claim. He then became a trader, bringing in supplies and opening stores at several camps. In 1868 he formed a partnership with W. H. Mc-Dermott of New York City, as a stock sale trader and banker, and later acquired the Butte Bank. In 1872 he bought the Original, Colusa, Montana Chief, Gambetta and other claims at Butte, and spent the following winter at the Columbia School of Mines in New York. He returned to Butte, built the first stamp mill in that camp, and organized the first smelting company of importance, the Colorado and Montana Mining company. In 1876 he organized the Montana company, which erected the Moulton mill and developed the Moulton mine, a silver producer, still in operation. With his brother he now owns the Butte Reduction Works, the Colusa, Parrott and other Butte copper mines. In 1883 he secured an option on a small property in Arizona and developed there the United Verde mine and another, one of the largest copper properties in the world. He also owns copper wire works at Elizabethport, N. J., coal mines at Gallup, N. M., and Bridger, Mont., and is interested in the Sunset Peak silver-lead property in the Coeur d'Alene district, in Idaho.

Fine Point to be Determined.

Discussing the probability of litigation between the Mammoth and Grand Central companies, a prominent mining man said today that the courts would have a fine point to determine, and one which, if it should come before them, is being sure of controversy. The Mammoth, said he, claims the apex to the entire workings of that company, lying to the west and he believed they would put up a good fight to establish their contention. The other side, the Grand Central, he thought, would take the position that the Mammoth did not own the apex in question, but has been trying the courts to determine the dip of the vein—a point which he looked upon as one of considerable importance, and one which would be found well worth the price of great interest to mining men generally.

The Mammoth's Gold Workings.

A gentleman who connected with the Mammoth Mining company, fell into a reminiscent mood today and, in speaking of the Mammoth, said that it was not an unusual circumstance to find large slabs of high-grade gold ore in its workings. In fact, said he, the mine always did show a good percentage of gold, but never before had it made a strike like unto that now attributed to it. Those old gold workings, said he, used to pan out with a single shaft, the mineral showing in large blocks, which when removed, showed only the usual workings. This, he argued, would indicate the presence of a rich gold body somewhere in that vicinity, and it would be no surprise, he declared, to hear of its being encountered almost any day.

Curing for Farm Tools.

[Agricultural Epitomist.]

It is a rule we have always found true that the successful farmer always takes the best care of his tools. He has tools for his mower, rake, binder, plow and cultivator, drill, planter, harrow, etc. They are never left out exposed to the weather to decay or rust, but are housed as soon as done using them for the season. When the season for a piece of machinery is past, it is run into shelter until a rainy day, when it is carefully gone over, bolts tightened, parts well oiled where it might otherwise rust, and the woodwork and as much of the iron as possible, repainted, should it need it. And then, but not until then, store the machine away until wanted next season. If it has been properly cared for, it will be in as good condition as the previous year. The plows and cultivators can be taken apart so can other pieces of machinery, so that less space will be required.

Few farmers have a place where they can store their machinery. The first cost of putting up a building cheap enough, is one that many farmers do not feel that they can afford, though the saving in machinery in the first ten years would more than pay for the building. He cannot always see that it would pay; he comes only the cost of the building, not the money paid out in repairs for new machinery. Not nearly every farmer has unused, cobwebbed rooms in barns, sheds, stable or crib, which would be a part of a machine left to left, or where the harrow might stand. Perhaps he has more shed room than is utilized. Or, he may put up a few yards of it and run the mower, binder, etc., in out of the storms and some of the tools in it, and yet is room for a cultivator between the corn and rod of the corn rib. By storing the machinery in these odd nooks one can keep nearly all his tools out of the weather's harm.

A case in point is a shiftless farmer is to see a binder, dismantled and alone, in the fence corner of a stable field, a mower where it left the last cutting, in the rake for a neighbor, the cultivators at the end of the last row of corn plowed, with the plows and harrows near by, and no doubt the harrow close at hand, only the tools hitting it from right the wagon out in the weather and rain, and carriage, if he has one, also sitting in the shed or a leaky one. We have all seen this sort of farmer, and know what the result of his reckoning has been or will be. He can not stand the strain, and sooner or later must quit. It may not be the cost of machinery that ends it, but it is the same shiftless disposition that causes the neglect of the great tools, that ruins many the overburdening at last. There are many tools harder which if left to rot, will sink the farmer's craft. Farm machinery is one of the greatest, they only what not must have, and take the best of care of it.

JOH. L. DEWIN.

Mr. S. A. Fankler, editor of the Mineral (Pa.) Hunter, with his wife and children, suffered terribly from La Grippe. One Minute Cough Cure was the only remedy that helped them. It acted quickly. Thousands of others use this cure by its wonderful power for La Grippe and its exhausting after effects. Never fails. F. C. Schramm, Meseroles Building, corner Main street, First South.

EQUIPPING THE SUNBEAM MINE.

Company Making Extensive Improvements at Tintic.

RUMORS OF HIGH GRADE ORE

Two Dividends Paid Today—The Ridge and Valley Cyanide Shipments—Miscellaneous.

The startling advance made by Sunbeam in the old today, called a great flow of speculation among not very men as to the actual cause of its sudden and sensational popularity. To get at the root of the matter, a "News" reporter visited the company's office in the Deety block, where a talk was had with Messrs. Carpenter and Ho Yee, but as noticeably emphatic were they that very little information was elicited. This much, however, Mr. Carpenter said: That the company was securing the property with every modern appliance necessary to its complete and thorough operation; that this was being done because the mine's condition justified it and that while they had no disposition to boom the stock, it was naturally booming itself, as people learned something of its actual worth. Mr. Carpenter further stated that the mine had become a regular shipper but, he was reticent as to values, enough from another source the "News" was learned that very high grade ore had been encountered. It is predicted that the stock will go to a dollar inside of six months.

Two More Dividends Paid.

Two more dividends were paid today, the companies contributing being the Centennial-Eureka, which distributed $15,000, and the Dalton Dick, which handed out the sum of $16,000. To date the Centennial has paid $1,365,000 to stockholders, while the Dick has a record of $2,525,000. Both mines are making regular shipments and will doubtless continue the payment of dividends on a footing much affected by the mining industry generally. It is expected that in a few days the Utah will post a dividend, while on the 20th some think the Mammoth is good for another $20,000. The future of Mercur to declare a dividend this month, will cut the list down $25,000.

The Ridge and Valley.

The Ridge and Valley, which filed articles of incorporation on Monday, is already recognized among mining men as one of the strongest companies recently organized for the development of Tintic acreage. In substantiation of this, its managers point with pride to the sale of 30,000 shares of treasury stock the cash realized from which is to be used in development work. On the Old Hill claim there is a single compartment shaft 80 feet deep. This will be made a double compartment shaft sinking and the ledge pushed in a search for the ore bodies. The fact that an adjoining claim, the Norway, shows a good body of low-grade milling ore at a depth of 320 feet, speaks much for the future of the Ridge and Valley.

AFTER MORE GROUND.

Allman Goes to Locate New Claims in Emery County.

Special Correspondence.

Provo, Feb. 15.—Thomas Allman, one of the discoverers of the Copper Globe mining claims in Emery county, of which mention has been made in the "News," has gone out to make other locations on what he believes is equally valuable ground in that field, located by Mr. Le Fleur and himself. County Clerk Haverstock and Court Stenographer D. H. Roberts will be interested in the new locations.

Notices of location of the following mining properties have been filed with the county recorder: Red Cliff, in Lake mining district, by Jonas Holdsworth; Godiva Extension, by H. C. Edwards; Godiva Extension No. 2, by H. Owens; and Godiva Extension No. 4, by E. P. Palmer, all in Tintic mining district; Fish Mining claim, in Little Salt Creek canyon, by Thomas Morgan et al.

Today's Cyanide Shipments.

Cyanides were sent in today by the Chloride Point of Lion Hill and the Star of Peace Compos, Tooele county. These properties are youngsters at the business, but from all reports are fast developing to maturity and before long will be regular subscribers for the refinery. The Chloride Point, it is said, is showing good values, while the Star is reported better able than ever to turn out good big batches of cyanides.

New Tintic Locations.

Special Correspondence.

Provo, Feb. 15.—The following notices of location have been filed with the county recorder: Stallings mine, by J. R. Stallings; Black Rock, by J. W. Taylor; Taylor mine, by George A. Taylor et al; Granite No. 1, by G. A. Taylor; Granite No. 2, by J. R. Stallings, Jr.; Black Rock mine, by Geo. A. Taylor; White Peak, by J. R. Stallings, Jr., et al; Fallon Junior, by W. F. Smith et al; all the claims are in the Tintic district.

LISBON VALLEY MINES.

Inspected by Representatives of a Boston Copper Syndicate.

[Grand Valley Times.]

Messrs. Benson and Hoover, representing a Boston copper syndicate, who some six or seven weeks ago visited Lisbon Valley to inspect the mines of Lisbon Valley in connection with Mr. Taylor, returned the first of the week and took out with them samples of the ore. They expressed a high opinion of the copper deposits of Big Indian and Lisbon. On the strength of the ore they took out, depends the sale of several claims in which Taylor, Darrow, Hammond and others are interested. These great copper deposits will be supplying the real metal in due course of time. The supply of copper is steadily advancing and is now quoted at over 15 cents, the highest point reached in many years, the chances of the ore deposits at Big Indian and Lisbon calls for expensive plants for its economical reduction, and situated a long distance from a railroad, it has all combined to retard development.

M. H. Dorrow of this place has just come in from Lisbon and has some very fine samples from a new opening. He informs us that Mr. Frank Dorrow has opened a large vein of copper on a claim adjoining Mr. Dorrow's and at a point where there has been no surface indications, thus proving the continuity of the vein.

MINES AND MINING MEN.

Four cars of Horn Silver concentrates were on the market today.

Forrester Dorn of the Mercur and Gwenn-Marion will return from Mercur tomorrow.

The Acorn Mining company is about to be incorporated. It owns claims on Gold Mountain.

The Cube of Bingham has just made a shipment of ore showing 35 per cent copper to the ton.

Sixteen thousand dollars is the price at which the Alamo of Bingham is said to be changing hands.

The annual meeting of the Orient Mining company will be held in this city on Saturday next.

The development of the Nora at Mercur will be begun in about two weeks with Col. Wall at the helm.

The Sacsuxum Mining company will hold its annual meeting at Mercur, on Monday, the 27th inst., at 2 p. m.

The West Morning Glory at River City, Tooele, has opened up a good ledge showing 5 per cent copper, $16 gold and 16 ounces silver to the ton.

Arthur Gibson of Plymouth, Neb., has purchased an interest in the Hercules group at Rockton, owned largely by Messrs. Eardley Jones and Mr. Spencer.

The Winona Gold Mining and Milling company has incorporated with a capital stock of $50,000 in decent shares. The incorporators are Philo E. Jones, president; A. H. Beard, secretary; James C. Gibson, vice president; John H. Dotson, treasurer, and James Earls, Isaiah G. Meyer and Noble Jones. Its claims are the Mollie Gibson, Fairfield, Golden Era, Golden Wedge and Three Points in Camp Floyd district.

THE BEST PRESCRIPTION.

Physicians Use and Recommend Paine's Celery Compound.

Chicago, Ill., Dec. 12, 1898.

Gentlemen—It gives me pleasure to certify to the good effects from Paine's celery compound for my patients in general debility and liver complaints.

ANDREW L. LUNDGREN, M. D.

Why do the ablest physicians in America openly prescribe, use and recommend Paine's celery compound? Because First, because Paine's celery compound is not a patent medicine. It is not the discovery of some quack doctor of whom his profession never heard. It is not a concocted pot or big mess of stuff, who first invented a name, and then adopted a preparation to fit it; and it is not a secret remedy. But it is, first, the result of the lifelong study of the greatest physician America has produced, a man whose reputation was world wide years before he had ever arrived at this wonderful formula; a man who has received the highest degree from the best colleges, who was at the time of his great discovery a professor at Dartmouth and a lecturer in other universities, a scholar and a member of a family which has made its mark in every department of public life in America—Prof. Edward E. Phelps, M. D., LL. D.

Why do progressive and intelligent physicians of every school prescribe Paine's celery compound in preference to any other remedy?

Because it has prolonged the lives of thousands of sufferers. It has made their sick patients well.

The best test that can be applied to Paine's celery compound is to use it.

If one is "run down," feels without ambition, lifeless, tired, fretful, take this great remedy, and note the change.

In its peculiar ability to at once invigorate the body, to make new blood and to regulate the nerves, lies the great value of Paine's celery compound in all wasting diseases and disorders of the kidneys, liver and stomach.

A neglected complaint, though slight at the beginning, may through neglect cause a life-time of misery. The stinging in the ears, the backache or the general debility unless the body is braced up again, may teach one by bitter experience that disease can creep through very small holes.

Paine's celery compound stimulates the kidneys, improves the appetite and digestion, drives out any scrofulous tendency to the blood and actively invigorates the nutrition of the nerves and organs with the result that the whole body takes on flesh and color—the surest indication of improved health.

It makes people well!

F. Auerbach & Bro.
