MINING, BUSINESS AND STOCKS

BRISK WEEK OF TRADING.

Strike in May Day Mine Seems To Have Stirred up Local Investors.

STOCK DOUBLED IN PRICE.

Sold Six Weeks Ago at 2½ Cents—Con. Mercur Holds Up to a Firm Figures.

It begins to look like old times on the floor of the Mining Exchange. The business of the past week shows a decided improvement in the local market, and there has been a picking up in prices in quite a number of stocks.

May Day was again the chief attraction and it sold today at a price almost double that which it brought on Monday. On that day it sold at 14 cents—today 1,000 shares were taken at 27 cents. Six weeks ago it could be had at almost any price; sales being quoted around 2½ cents. That the strike made recently is an important one, there seems to be no doubt, and late reports from the mine indicate conditions are steadily improving. It is believed in broker's circles that the top notch price has not yet been reached; some even predicting that it will bring 50 cents a share before it sells again at 25 cents. But only developments will determine this. Another prominent feature of the week's business was the strength displayed by Con. Mercur. The lowest price paid for it being 38 cents, while for a few small lots buyers paid up to 41 cents. The Mammoth company paid its dividend of $20,000 for this month today; the stock sold at 1.88 and 1.90 and closed the week with an advance of 10 cents a share to its credit. Yankee Consolidated has been inclined to strengthen.

Little Chief has displayed quite a little activity during the past few days and has gained several points. Daly-West has weakened and many look for it to go lower. Uncle Sam Consolidated ended the week higher. Few Nevada stocks have been transferred, and there seems to be little local demand for them.

The closing quotations and sales today were as follows:

UTAH'S PRIZE MILL.

Has Been a Great Attraction for World's Fair Visitors.

The concentrating mill, which can be seen with the Utah exhibit at the world's fair and which captured the gold medal prize yesterday, has been a great attraction for those who have visited the big show since the opening day.

To thousands of easterners a mill of this kind is a novelty, while it is not lacking in interest to the trained metallurgist. Every afternoon visitors to the mining and metallurgy building can see the plant in active operation.

TEA

We couldn't moneyback tea, if our tea weren't better than tea as you know it.

Your grocer returns your money if you don't like Schilling's Best.

ORE AND BULLION SOLD FOR $489,500.

The settlements for ore and bullion for the week ending yesterday aggregated a total of $489,500, as follows:

	Ores.	Base Bullion.	Gold Bars.
Oct. 8,	$ 28,400	$ 37,500	$ 3,300
Oct. 10,	38,100	21,400	.....
Oct. 11,	29,500	39,700	10,000
Oct. 12,	46,900	32,500	3,800
Oct. 13,	82,700	29,400	13,200
Oct. 14,	42,000	31,300	.....
Totals,	$267,400	$191,800	$30,300

The shipments of copper bullion from the independent copper smelters during the week aggregated 798,522 pounds, distributed among the plants as follows:

	Pounds.
Utah Consolidated	305,241
United States	252,597
Bingham Consolidated	240,684
Total	798,522

The ores run through it were supplied from the great Cactus mine, operated by the Newhouse Mines & Smelter corporation, in Beaver county. As fast as the concentrates gather they are filed into little glass phials and given away to the crowd. Already the first supply of 20,000 phials has been exhausted and 50,000 more have been ordered. The ore, after going through a Gates crusher, runs through four screens. The oversize goes through rolls, and the oversize from the rolls through the jigs. The undersize passes to a hydraulic sizer, the bottom product being treated by another jig. The product from the sizers is treated on an Overstrom concentrating table and a Willfy table. The mill is driven by an electric motor.

It is quite likely that the plant will be exhibited next year at the Lewis and Clark Exposition at Portland, Ore., after which it will be set up permanently at the Utah School of Mines in this city.

TINTIC ORE SHIPMENTS.

Centennial-Eureka and Gemini Figure in Camp's Output.

Special Correspondence.

Eureka, Oct. 14.—The Tintic ore shipments for the week ending Oct. 14, amounted to 88 carloads, distributed among the following mines:

Centennial Eureka	25
Gemini	22
Eagle and Blue Bell	10
Yankee Cons.	9
Mammoth	7
Bullion-Beck	6
Grand Central	4
Godiva	3
May Day	1
Victor	1
Total	88

Concentrates—Uncle Sam Mill, 3 cars.

BINGHAM IN BRIEF.

Manager Lavignino Making a Success Milling Butterfield Ores.

Forty tons of Bingham Con. ore from the Dalton & Lark side, marketed this week, is stated to have contained 37.8 per cent copper.

Operations at the Butler-Liberal are now jogging along at an increased gait, as the hoist over the new shaft has superceded hand work.

It is anticipated that by December next a decision will be rendered in the United States vs Kempton apex case, which under appeal was argued and submitted to the court last fall.

An accident caused by the parting of a guy of one of the smokestacks caused a brief let up at the Yampa smelter this week. It will be running as usual Sunday.

The Bingham Con. smelter enlargement will be completed before the end of the month. It will be proof of the steady and substantial gain the operations of the company are making, and sugegstive of dividends in the near future.

About 100 tons of ore, carrying 8 per cent lead, 15 ounces silver and some gold, is being treated daily at the Queen (Butterfield) mill with excellent results—the tailings showing very little loss. Manager Lavignino seems to have at last solved the problem of how to treat the Butterfield low grades, of which there are thousands of tons blocked out.

When the Dewey mill is again running, its owner, Col. E. A. Wall, will test a new-fangled table of his contrivance, that it is believed will be an improvement on other devices for separating certain classes of Bingham ores—notably Kempton low grades. It will demonstrate a theory regarding reduction of ores that the colonel has long had in mind.—Bingham Bulletin.

PARK CITY MINES.

Shipment About to be Made by Creole Lessers.

A flume has been built at the Daly-Judge mill to keep the water from overflowing into the road. The road has also been changed to the east side of the canyon and greatly improved. On the west side bulkheads are being built from the mill to a distance of about 300 feet north. This is to confine the zinc tailings which have heretofore been dumped across the canyon from the mill. All these improvements would look as if the company was getting ready to start up the mill before long.

The miners of the Silver King have been making a choice this week of where they want their hospital fees sent. About two-thirds want it turned over to the Park City hospital. About four out of five of the others want it sent to the Holy Cross and the balance is to go to St. Marks.

James Muffett, lessee of the Creole, has another shipment of about 18 tons of first class ore to make. The owners of the property are figuring on a deal so that work can be resumed. If it does not go through Muffett will probably renew his lease.

A report has been current on the street that the Daly-West would lay off 100 men in a day or two. Inquiry at the office through the 'phone resulted in getting no satisfaction. They knew nothing about it and would neither deny nor confirm the report.

The mining reporter visited the Comstock this week and found the force busy at work driving the drift on the 450 foot level to reach the point where the winze wa sunk in the 300 foot level. A good body of ore was followed in this winze, but as it had to be hoisted by a windlass it was decided to upraise from the 450 foot level. Between 500 and 600 feet of drifting will have to be done before upraising will be commenced and the mil will probably not be started up again until the drift has reached the ore chute. No difficulty is now experienced with the water. One small pump is able to handle it.—Park City Miner.

STOCKTON MILL CONSTRUCTION.

Building Almost Under Cover and Plant Will be Completed About November 15

EQUIPMENT ON THE GROUND.

Machinery Being Installed—New Quarters for Employes to be Provided.

Word comes from Stockton to the effect that splendid progress is being made with the construction of the new mill at the Stockton mine, and that the plant will probably be ready to go into commission by the middle of next month.

The frame work of the building is all up and will be enclosed within the next few days. The machinery is being installed, so there seems to be no possibility of work being delayed anywhere, as the equipment is practically all on the ground.

Manager Trenam expects to provide the employes with additional living rooms and will soon commence the construction of two dormatories. The lumber for this purpose has been shipped from Oregon and is due to arrive in camp during the coming week.

The Stockton company made a good hit when it purchased the milling plant operated for a time at the West Argent mine. The machinery is every bit as good as new and it was taken in at a price which saves the Stockton company a good lump of money; had it been compelled to purchase it new, Willfey tables will be used and the initial capacity will be from 50 to 60 tons a day.

The Stockton mine contains some very large bodies of low grade milling ore and the company provided with the new mill ought to soon be able to bring substantial returns to its stockholders.

EQUIPMENT HAS ARRIVED.

Columbus Con. Mill Will be in Operation Next Week.

The electrical equipment for the Columbus Consolidated mill at Alta has arrived at last. This good news reached the local offices of the company yesterday afternoon; so it will be a matter of only a few days until the new plant will be ready for operation.

The consignment consisted of four motors, and by their delay the starting of the plant has been held back for several weeks. But the machines were sent down to Sandy today and from there will be taken to camp. It is expected they will reach their destination not later than Tuesday, so the plant will certainly go into commission by the end of next week.

There is much rejoicing around the office of the company today and stockholders will not have to wait long before getting substantial results.

Suit Was Compromised.

The Daly West Mining company has compromised the $50,000 damage suit brought by a miner named Gillette, who lost his sight by reason of an explosion in the mine last May, and the case has been dismissed. The company paid th injured man $2,500 and defrayed the expenses of his trip back to his home in Nebraska.

CONCENTRATES.

John J. Daly, manager of the Daly-Judge, has returned from his eastern trip.

The Daly-West dividend of $72,000, or 40 cents a share, was checked out to shareholders today.

Sidney Bamberger, manager of the Fortuna mine of Bingham departed for camp this morning.

The delinquent stock sales of the Wabash and Joe Bowers companies are scheduled for this afternoon.

It is reported from good authority that a deal is pending for the control of the Red Wing mine of Bingham.

Chief Clerk McSpadden of the Utah Copper company's offices, is back at his desk after a severe spell of sickness.

H. W. Horne has returned from a trip to Idaho, where he went to survey a group of claims for the Elmore Gold Mining company in the Neal district.

E. Lawrence White, Jr., a son of the president of the Bingham Consolidated, was in the city today, en route to his home in Boston from a trip to Alaska.

At a stockholders' meeting held in Baker City, Or., a few days ago, W. H. Tibbals was elected as a member of the board of directors of the North Pole Extension Mining company.

Edgar L. Newhouse of the American Smelting & Refining company came in from the east yesterday, and is the guest of Manager Whitley of the local plants of that big corporation.

The United Bingham has just shipped another lot of good pay ore. Its last consignment to the smelter was settled for on controls showing 28 per cent lead, 23 ounces silver, $6 in gold and 2 per cent copper per ton. The mine has considerably increased its working force.

CONDITION OF THE FALL TRADE.

Treasurer Carlson of Z. C. M. I. Says it is Quite up to Last Year's.

OUTLOOK ALSO ENCOURAGING.

Institution Distributing $64,600 to its Stockholders Today—Conference Trade Was Good.

The Z. C. M. I. is a very fair commercial barometer for the entire intermountain region, as its business relations extend out from this city in all directions for long distances, and therefore an expression of opinion from the management as to trade status and outlook for this territory may be relied upon as accurate and of genuine commercial value. In the absence of Col. T. G. Webber in St. Louis, Treasurer A. W. Carlson was asked this morning, for a review of the business situation, which he cheerfully accorded. Mr. Carlson said, "General trade, during the Conference, was very satisfactory, collections have been fairly good, and sales are fully up to the mark of last year. The past fine weather has held back the regular fall trade in dry goods, shoes and rubber goods, and corresponding lines, and the retail trade in particular has not been active. But on the whole the outlook for the fall trade may be considered excellent.

"Today, we pay our seventieth regular dividend of 4 per cent, and a special dividend of 2 per cent, amounting in all to $64,600, which will be distributed and be of benefit to the public at large. In groceries and hardware trade is steady, and when stormy weather comes, goods will go with something of a rush. The general wholesale and jobbing trade has been well supplied with stocks, and until the Christmas trade opens up, will buy only as demand may call for it. In men's wear, business has been very fair with ordinary demands. The recent rains over the country have proven a great thing for the farmer and ranchman, so that with a prosperous view ahead for them, there is a corresponding prosperous outlook for the tradesman and the jobber and manufacturer."

LOCAL BANK CLEARINGS.

For the week ending at noon, today:

	1904.	1903.
Oct. 10,	$ 639,980.34	$ 640,131.29

Oct. 14,	555,297.40	516,841.72
Oct. 15,	364,611.64	523,231.46
Totals,	$3,202,073.94	$3,178,921.23

Increase, $23,152.71.

BUSINESS NOTES.

The event of the week has again been the continued mounting in the sugar stocks. Amalgamated common having risen to $135 bid, with no sellers, Utah common to $3.50 bid with only a few transactions, Idaho to $10.32 and Utah preferred to $9.95 with quite a number of sales. The reports from all the factories operating continue to be of a glowing character. The Fremont factory will start up on its beets during the coming week.

Z. C. M. I. paid its regular semi-annual dividend of four per cent and a two percent extra today, a disbursement to stockholders of over $60,000.

CLOSE OF WEEK IN STOCKS EXCITED

There Were Large Dealings, Many Hugh Blocks Being Thrown on Market.

GENERAL TENDENCY WAS UP.

Enormous Buying of Southern Pacific—Union Pacific Lifted Up a Full Point.

New York, Oct. 15.—The stock market opened very active and buoyant today. The first blocks of many of the leading stocks dealt in were of 1,000 to 6,000 shares, the latter figure for Pennsylvania. Opening prices in United States Steel, the preferred, Southern Pacific and Missouri Pacific varied from a ¼ to ⅜. Special stocks made considerable progress upwards, but the general active list did not go far above the first prices and later began to feel the weight of realizing. Here and there buying was in huge blocks, especially for United States Steel preferred which touched 81. Many other specialties realized gains of a point or more, but the general movement in these stocks was narrower than yesterday. A few weak stocks cropped out in the Southwesterns and Norfolk and Western, but their recessions were slight. Baltimore & Ohio, Sugar and some of the car equipment and independent iron and steel stocks were among the better known properties that ruled a point or more higher.

There was a decided depression in the level of prices, which brought prices to near last night's level and Metropolitan Securities fell 2½. After the appearance of the bank statement enormous buying of Southern Pacific carried it up to 63. United States Steel preferred recovered to 81½ and Louisville & Nashville to 137. Union Pacific was lifted a full point for the first time and the whole market broke into great animation again. Room profit taking made some impression on prices, a number of the specialties receding to the lowest. The closing was excited and somewhat irregular.

RECOVERY OF BUSINESS SLOW.

Seems Sure in Leading Branches Manufactures' Contracts Being Placed.

MUCH LESS IDLE MACHINERY.

Jobbing and Wholesale Trade in Fall And Winter Wearing Apparel Expanding.

New York, Oct. 14.—Dun's Weekly Review of Trade will say tomorrow: "Progress is slow but sure in the leading branches of manufacture, contracts being more readily placed for distant delivery, while the percentage of idle machinery steadily decreases. Satisfactory news from leading iron and steel centers tends to strengthen conndence elsewhere, as the consumption of iron has been found a good barometer of business conditions. Jobbing and wholesale trade in fall and winter wearing apparel expands gradually, and such spring lines as are opened meet with a fairly satisfactory reception, considering the recent indisposition to provide for future requirements. At many points the return of warm weather checked the revival of retail trade in heavy business, but, as that movement had begun much earlier than usual, the net result thus far is better than last year."

BANK CLEARINGS.

New York, Oct. 14.—The following table, compiled by Bradstreet, shows the bank clearings at the principal cities for the week ending October 14, with the percentages of increase and decrease as compared with the corresponding week last year:

		Inc.	Dec.
New York	$1,559,514,388	44.7	....
