MINING, BUSINESS AND STOCKS

STOCK MARKET IS WEE BIT BETTER

Outside Affairs Have Effect Upon Trading on Salt Lake Exchange.

DALY-JUDGE DROPS TO $9.50.

Yankee is Lively Seller, Opening at 62 and Closing at 59—Seven Troughs Active.

A slight—very slight—improvement of yesterday's forenoon trading was recorded this morning. Today's totals were 20,725 shares sold with a selling value of $16,278, compared with 19,058 shares sold yesterday with a selling value of $15,062.88. Local stocks lead in the selling and price are inclined to be somewhat soft in spots. The week will not be as strong as it was hoped it would be when last week came to an unsatisfactory close. The Wall street wobbling is not at an end yet, say dispatches from the east and the labor troubles at Goldfield are far from an end so the stock markets wherever they may be, are not firm and strong. Brokers are not worrying; they are simply playing a waiting game, believing full that when the present unnatural conditions have ceased to be a general cleaning-up will have been performed.

YANKEE IS ACTIVE.

Daly Judge dropped to $9.50 this morning, 275 shares changing hands at this price. This sale was made during the open board call. Carisa opened the regular call this morning, two sales being made, one comprising 200 shares at 54 and the other 100 shares at 53. Lower Mammoth stays firm. This morning 100 shares sold for $2.27½ and another 100 at $2.15. Nevada Hills sold at $3.60 this morning, yesterday morning's bid price, and 100 shares changed hands. Colorado Mining is a little stronger, 200 selling at $2.40 quickly. Ingot is off a cent, 1,500 going at 10 cents. Yesterday morning it brought 11 and 11½. Mountain Lake came into play today; 200 going at $2. A lively run resulted When Seven Troughs was reached during the regular call. The following sales were made: 100 at 56; 100 at 55; 400 at 54 and 100 at 53. Yesterday 56 was bid with no results in the forenoon. Yankee was the most active stock on the board. During the regular call 700 went at 62; 100 at 63; 500 at 61 and 500 at 60. During the open board, 100 went at 61; 100 at 60 and 100 at 59. The forenoon sales and closing quotations follow:

UNION ASSAY OFFICE.
M. S. Hanauer, J. V. Sadler.
152 So. West Temple. P. O. box 1446

O. WEISER IS HOME.

Brings Samples of New Find in White Pine Gold Property.

O. Weiser has just returned from the White Pine mine, midway between Ely and Cherry Creek, and brings samples and the best kind of news to his associates in this city. There is rejoicing in Mr. Weiser's offices this morning and returns of assays upon a number of samples are being awaited impatiently. From the face of a tunnel 400 feet in vertical depth and 400 feet in horizontal depth, Mr. Weiser took a large number of honey-comb rocks. These are now in a furnace in this city, and that they will go better than $100 or even $125 is confidently expected by Mr. Weiser and others interested in the White Pine. Similar rock taken from a foot vein some time ago went $125, and this rock has indications of going higher. The White Pine has now a vein which varies in width from 18 inches to two feet. A chute 40 feet long and of unknown width and height is being followed by a force of 10 men.

Mr. Weiser says the five-stamp mill finished some time ago on the ground of the White Pine is ready for commission and would have been put into service some days back had materials been received as per order. Quick silver, amalgamated plates and other necessities have failed to put in an appearance but when they do the stamps will commence immediately to crush the White Pine's ore. Water has been piped to the mill and Mr. Weiser says enough water can be brought to the mill site to keep 30 stamps thumping in good shape.

GOOD ROCK UNCOVERED.

The Beaver county mineral deposits are coming in for a generous share of attention among Utah districts. A. J. Davis returned from a trip through the San Francisco and Star districts several days ago and reported that the showing there more than surprised him. Charles C. Crismon, a director of the Progressive Mining company in the Star district has returned from a trip of inspection, and he, too, is enthusiastic over the condition of that company's property. The 150-foot level is penetrating one of the most interesting formations discovered in the camp. Two drifts on this level are being run east and west. The drifts are in a mineralized lime formation in which lead carbonates and galena are found. As these carry silver and copper values the rock is considered good shipping stuff. The east drift is being driven on to the fissure, and it is expected to open bodies of high grade lead, silver and copper ore. The west drift, it is expected, will reach the porphyry dike and add further excellent showings in good time. Sinking is being done also and this shows the presence of carbonate lead ore. Mr. Crismon believes the coming summer will prove the Progressive property a jewel of the first water.

SWANSEA TO PAY $5,000.

But little is published in the daily press of the state regarding the Swansea mine although this property is a regular shipper and an occasional dividend payer. Supt. Samuel E. Ware is taking out a nice grade of ore from the levels above the "water level," and whenever sufficient money has been piled up in the company's treasury, the directors meet and declare a dividend. That is what happened on Monday of this week when it was decided to pass around 5 cents per share, or $5,000. This dividend will be checked out on the 20th of the month. It has been a few months since the last dividend was paid by this company but it is said that from the appearances of the underground workings dividends should come along more regularly in the future.—Eureka Reporter.

LUCKY BOY HAS STRIKE.

News from Rosebud says what is undoubtedly the most important development of the week is the strike made on the Lucky Boy claim of the White Alps group, under bonds to Salt Lake parties represented by C. J. Goss. The strike was made while doing development work, a body of ore being opened up which showed an extraordinarily high assay of $336 per ton in gold and silver. The ledge at the point from which this rock was taken shows a width of nine feet and can be traced for a distance of nearly 3,000 feet. The Lucky Boy is just west of the Brown Palace, and experts who are acquainted with both groups believe the ledge just opened up in the White Alps is the same which furnished the Brown Palace with its richest showing. A big force of men has been put to work to open the new ledge in the Lucky Boy thoroughly.

MERCUR MERGER DETAILS.

Following closely upon the heels of the first rumor that a big merger is being worked out for Mercur comes further announcement of a few details of the consolidation. It is said that a party of Utah's biggest mining men, headed by Samuel Newhouse, is forming a company to take over a big group of patented properties in Mercur. The new company is to be known as the United Mercur Gold Mines company, and is to be capitalized for 1,000,000 shares. Half this number will be reserved as treasury stock. Mr. Newhouse, who is now in England, is to place 100,000 shares of stock in that country at 50 cents, but other stock will be held at $1. The mines involved in the deal are the Florodora, Hercules, Golden Gate, Golden Gate Extension and the Griffin. Ingot shareholders will surrender two and one-half shares of Ingot for one share of United Mercur; the exchange to be closed at once.

STOCK SLUMP IS CAUSE OF WONDER

"Over Prosperity" and "Over Capitalization" Are Terms Used to Explain.

RAILROADS ARE BIG FACTOR.

"Set Back in Industry is Sure to Result"—Readjustment of Business Affairs Needed.

The recent Wall street stock slump, its causese and results have been the subject of much discussion and wonder throughout the country and in fact all over the civilized world. Perhaps as concise a review as has been furnished is that contained in E. F. Hutton & Company's latest letter, which has been received by James A. Pollock and company over a private wire. The letter follows: "The tremendous break in stocks lately on speculative liquidation and professional selling was followed by the strongest kind of investment buying on a heavy scale. It seems that certain things have been accomplished in the market by the break and the Morgan following, is large takers of stocks for the first time in a long period, which is a very favorable sign for future market events, for a while at least. There are many rumors afloat at the close of the week of changing of control of several of the trunk lines, but it seems quite doubtful if such has happened."

FACING DEPRESSION.

"However, it is quite possible that certain large interests have been severely hurt that were instrumental in the recent bullish operations in the market, what effect this will have on the railroad map of the future is impossible to predict at this writing. We do not regard money as being a factor of importance in the present situation as bankers can make this commodity what they may, according to their commitments in the markets. We are facing a depression in business coming later on in the year; hence we cannot feel that one should load up with stocks and on the contrary we believe that opportunities should be taken in the future to liquidate securities.

"OVER PROSPERITY."

Suffering from over prosperity, with its incidental bad influences for a continuance of stability of general business conditions, speculation in certain groups of securties on an enormous scale, induced by placing of Union Pacific on a 10 per cent dividend basis last August, thereby creating a market for a large speculative banking contigent in Wall street, to unload their holdings of Union Pacific on the public, after marketing their personal holdings of Illinois Central, Baltimore & Ohio, New York Central and other securities on the treasury of the Union Pacific railroad, recent government and state legislation of the most drastic kind against railway and industrial corporations, are the prime factors for the cause of the heavy break in these securities. The extended prosperity in the United States over a number of years has resulted in unprecedented expansion of trade, speculation in land and mining, which has strained the money situation and seriously impaired confidence. The great speculative coup of the Harriman banking syndicate in judging the Union Pacific and Southern Pacific dividends whereby millions were made by these interests, were sufficient to unsettle public sentiment toward standard securities, which has been lately proved. Foreign investors and bankers were warned of the situation here and funds were unprocurable in any volume.

FEDERAL INVESTIGATION.

"Searching investigations are being made by federal government into railway operations and their abuses and corrective measures are being taken in the shape of stringent laws whereby a purpose of honesty in the management will be exhibited in the future both to the shipper and transportation company. The subject of over-capitalization and valuation of properties will come later. It is said by competent authorities that American railways are five years behind the growth of the country, then it would seem that not in the remote future we will enter upon a long period of railroad reconstruction and extension with national laws to control this railroad building as to the issuing of new securities.

RICH MAN'S PANIC.

"We will find not only a period of prosperity but marked stability and American railway stocks will be found on a basis of investment not seen heretofore. The administration at Washington is being held responsible for the great decline in stocks, since the first of the year, facts do not bear out this view, taken by many. Let the censure be placed where it belongs, to the Harriman group of "financiers." This coterie of men have flagrantly manipulated their specialties for six months past in the face of dangerous monetary conditions in the country. They have unloaded their holdings, not on the so-called hub, but on rich men that have been imbued with the speculative fever and have been carried away by their immense speculative ventures. There has been one result, a rich man's panic in which fortunes should have been lost and irrespective of the present prosperity of business affairs in the country at large, must have its effect, as we are entering a new era of untried laws governing business conditions in the future, it will be quite natural that a cessation of traffic will result until the effect of these laws are better understood. A set-back in industry is bound to result and a period of rest and quiet in order. The extraordinary money rates throughout the world have got to relax and they will from natural causes, a relapse from world wide activity.

"How far the retrograde movement will extend depends on this year's crops, a large harvest should cause only a normal set-back which would be welcome; poor crops would have a marked effect on sentiment. What this country needs in the next year is a readjustment of its business affairs to meet a new condition of national and state laws that are bound to have a most beneficial effect on the business community. In the manipulation of stock values in the last week, the market has had a phenominal rebound and quite natural values will probably be maintained for one or several weeks, when there will be a distribution and it will be surprising if a sagging tendency is not then seen until late in the spring months."

POKER BROWN COMPANY.

Details of Incorporation Are Arranged—Property Has Ore and History.

The Poker Brown Mining company, which has discovered and secured the famous mine of "Poker" Brown, the notorious gambler of the Seven Troughs district, who died without divulging the location of his mine, will file its articles of incorporation this week, probably within a day or so. Lafayette Holbrook, of Provo, is the president of the company, also manager; A. T. Sanford is vice president, and B. S. Hinckley is secretary and treasurer. E. S. Hinckley, Arman Cravens and Horace Stayney complete the board of directors. The company is capitalized for 1,000,000 shares at the par value of $1 each, the company being formed under the laws of the State of Utah. Fay. Holbrook has left this city with a force of miners in tow and immediately upon their arrival at the mine development will begin. The property is about 18 miles north of Lovelock and 15 miles east of Seven Troughs, in the Trinity mountains, Humboldt county, Nevada. The discovery of the mine brought the district in which it is located to the front a week or so ago. Surface showings assure the company of shipping ore from the start and promising receipts which will pay development expenses. In seven claims two veins are exposed. In one is found a carbonate ore which goes from 25 to 35 per cent lead; 50 ounces silver and from $3 to $4 in gold. The second vein carries more galena, going 70.8 per cent lead and 77 ounces silver to the ton.

NEW COMPANY FORMED.

Salt Lake and Provo promoters have joined hands once more; this time to acquire and develop property in the Phonolite district, in the extreme northwestern corner of Nye county, Nevada. The new company is known as the Nevada Phonolite Gold Mining company and has been organized under the laws of South Dakota with a capital of $1,000,000 with a par value of $1 each. Working capital is arranged through the reservation of 400,000 shares. D.O. Rideout is named as president; A. Jacobson, vice president, with George M. Miller, S. A. King and H. S. Kozminsky as the other directors, while Joseph Oberndorfer has been selected as secretary and treasurer. The company owns the Commonwealth group of four claims, located on the strike of the ledge which has been the making of the Climax property. The vein can be traced for 3,000 feet through the Commonwealth group.

NEW VEIN IN MASON VALLEY.

The old Mason Valley mine at Yerington has cut into a new vein in the shaft at a depth of 325 feet. W. Mont Perry, president of the company, received a letter yesterday afternoon which told of the strike. The ore encountered is all sulphides, going 11.8 copper. Three feet of ore sharply defined can be seen in the vein while the surrounding formation is full of sulphides. Three shifts are pushing development ahead as rapidly as possible. Excavation for the boardinghouse and bunkhouses is finished, and as lumber is on the ground, building is to be started at once.

CONCENTRATES.

T. Frazier, outside foreman of the Daly Judge at Park City, is visiting in Salt Lake.

J. R. Rand, president of the South Port Mining company, left today for the mine.

Mr. Levi is home after a visit at the Carrie Mack. He reports everything at this famous property in tip-top shape.

G. W. Morgan left yesterday for Nevada. At Ogden he was met by James P. McNaughton, superintendent of the Calumet-Hecla. Mr. McNaughton is interested in the Sheba and with Mr. Morgan will spend several days inspecting that property.

George Z. Edwards, who has been at Yerington, spent the better part of a week at the Nevada-Douglas. He thinks this is one of the coming big copper mines of the country. Great things are being worked by the present efficient management.

A. A. Ball, formerly treasurer of the Annie Laurie at Kimberley and now in Round Mountain, is in this city. He will spend a week or so with his family here. Mr. Ball says the camp of Round Mountain is assuming every air of permanency. The city will soon have a water supply, piped from a source several miles away.

Tungsten is known as "a metal of grayish white color of considerable luster. It is brittle and nearly as hard as steel, and fused with extreme difficulty." It was first discovered in Germany in 1847 and is used in the tempering of steel. The Krupp gun makers of Germany are said to have a corner on the tungsten market and their almost exclusive use of the metal in tempering steel is assigned as the reason for the superior quality of their guns and armor plates.

THE WANT COLUMNS of the Semi-Weekly News are read by from 100,000 to $150,000 people twice a week.

PRICE ADVANCES SOON CHECKED

Stocks Started up Well, Making Good Gains Over Last Night's Closing Level.

MARKET THEN BECAME HEAVY

Result of Profit-Taking—Gains Wiped Out, General Average Going Below Yesterday.

New York, March 20.—Prices of stocks started at a sharp advance over last night's closing level. Union Pacific and Reading led, both rising 2¾. Amalgamated Copper advanced 2⅝. Anaconda and St. Paul 2. Missoui Pacific 1⅝. Smelting 1½. Canadian Pacific 1¾ and Pennsylvania, Atchison, Denver & Rio Grande and New York Central a point.

Most of the active stocks made their best prices during the first five minutes of business, the market thereafter showing progressive heaviness on profit-taking sales. While the prominent stocks were sagging a number of the other stocks were advancing, but these in turn became reactionary when the reaction elsewhere became large. Smelting was driven back to 1¾ under yesterday's closing. Reading and Canadian Pacific surrendered all their gains, Union Pacific all but a small fraction and the remainder of the leaders went back anywhere from 1 to 2 points below their best.

The action of the Smelting suggested further forced liquidation in the closing out of speculative accounts, and its weakness spread to the general list. The average level of the market had fallen well below last night before noon. Smelting's overnight loss reached 3¾, preferred 2¼. Reading 1⅝. Great Northern preferred and United States Realty 2, Pressed Steel Car 1⅝, and Union Pacific, Northern Pacific, St. Paul, American Car and Sugar a point or more. There were fractional rallies at noon followed by intense dullness.

Bonds were irregular.

The market closed dull and irregular. Smelting fell abruptly 6 points below last night. Reading dropped to 2⅝ below last night. There were rallies extending in Smelting, Reading and Union Pacific to 3 and over. Some stocks rose above last night.

LIVESTOCK.

KANSAS CITY.

Kansas City, March 20.—Cattle — Receipts, 8,000, including 500 southerns, market steady. Native steers, 4.60@6.25; southern steers, 3.75@5.40; southern cows, 3.25@4.00; native cows and heifers, 2.75@5.25; stockers and feeders, 3.50@5.25; bulls, 3.25@4.50; calves, 3.50@7.00; western fed steers, 4.25@6.30; western fed cows, 3.00@4.50.

Hogs—Receipts, 13,000; market weak to 5 cents lower. Bulk, 6.45@6.52½; heavy, 6.47½@6.52½; packers, 6.45@6.55; pigs and lights, 5.50@5.55.

Sheep—Receipts, 3,000; market steady. Muttons, 5.25@6.00; lambs, 7.25@7.80; range wethers, 5.50@6.75; fed ewes, 5.00@5.75.

OMAHA.

Omaha, March 20.—Cattle—Receipts, 5,000; market steady. Native steers, 4.60@5.75; cows and heifers, 2.50@4.75; western steers, 3.25@5.25; Texas steers, 3.00@4.25; cows and heifers, 2.50@4.25; canners, 2.00@3.00; stockers and feeders, 3.00@5.65; calves, 3.00@6.50; bulls and stags, 2.75@4.50.

Hogs—Receipts, 10,000; market 5 to 10 cents lower. Heavy, 6.40@6.45; mixed, 6.40@6.42½; lights, 6.35@6.45; pigs, 5.75@6.25; bulk, 6.30@6.42½.

Sheep—Receipts, 7,000; market slow to 5@10 cents lower. Yearlings, 5.85@6.60; wethers, 5.40@6.00; ewes, 5.00@5.75; lambs, 7.00@7.75.

CHICAGO.

Chicago, March 20.—Cattle—Receipts, 21,000; market for good strong, others steady. Beeves, 4.10@6.80; cows, 1.70@4.60; heifers, 2.65@6.30; calves, 5.00@7.50; good to prime steers, 3.45@6.80; poor to medium, 4.10@5.40; stockers and feeders, 2.80@4.85.

Hogs—Receipts, 27,000; market steady. Lights, 6.55@6.75; mixed, 6.50@6.72½; heavy, 6.40@6.70; rough heavy, 6.40@6.50; pigs, 6.00@6.55; good to choice, 5.85@6.75.

Sheep—Receipts, 10,000; market steady to 10 cents lower. Natives, 4.00@6.20; westerns, 4.00@6.20; yearlings, 6.00@7.10; lambs, 6.00@7.90.

WOOL.

ST. LOUIS.

St. Louis, March 20.—Wool, steady. Territory and western mediums, 24@28; fine medium, 18@22; fine, 14@17.

BOSTON.

Boston, March 19.—The wool market is fairly active and firm. Quotations:

California, scoured basis, northern, choice, 67@68c; northern, good, 66@67c; middle county, 65@66c; southern, 66@67c; fall free, 57@58c.

Oregon, scoured basis, eastern, No. 1 staple, 72@73c; No. 1 clothing, 68@70c; valley, No. 1, 62@62c.

Territory, staple, scoured basis, fine, 70@73c; fine medium, 68@70c; medium, 65@68c.

Territory, ordinary, scoured basis, fine, 68@70c; fine medium, 66@68c; medium, 62@64c.

Colorado and New Mexico, spring scoured, X, 66@70c; No. 1, 63@65c.

LONDON.

London, March 19.—The offerings at the wool auction sales today amounted to 14,324 bales. The selection was varied and all descriptions were firm and in sellers' favor. Scoured sold briskly, lambs being in strong demand. Home traders bought most of the crossbreds offered. Americans paid is 4½d for greasy, first combing half breeds.

MUNYON'S WITCH HAZEL SOAP
Makes The Skin Soft As Velvet
Keeps Lady and Baby Sweet As Roses

PRODUCE.

SEVEN TROUGHS KNICKERBOCKER MINING COMPANY.
1,000,000 SHARES. PAR VALUE $1,000,000.
400,000 SHARES IN TREASURY.
ABSOLUTELY NON ASSESSABLE.
Directors, H. W. Knickerbocker, A. Hanauer, Jr., F. H. Hyde, G. L. Bemis.
Two things are essential to success in mining and the general public should investigate before putting a dollar into mining stocks. First, Is the personnel of the directory such as would justify confidence? Second, Is the company's ground all right. Investigate us and see. Our ground is situated in the heart of the Seven Troughs mining district, and we are now taking out ore valued at from $60 to $100 per ton. Leasers are at work on our ground. We offer you the best value for the money in Nevada today and guarantee that every dollar realized from the sale of stock will be put into the development of the property.
The board of directors has authorized the sale of 100,000 shares at 10 cents per share. Send in your subscription at once.
