INTERESTING CORRESPONDENCE

On the Natural Gas and Glass Manufacturing Questions.

Recently Some of the Chamber of Commerce has received the following and has sent the appended answer:

FRANKLIN, IDA., April 15, 1892.

S. H. Smith, Salt Lake City, Utah.

DEAR SIR—Yours of recent date at hand and in reply that I have been very busy of late, and in your gas and the glass manufacturing matter will say, Are there any window glass factories in Salt Lake City? What kind of fuel do they use? Is it natural gas? Is there any prospect of natural gas being found in sufficient quantities to make it a profitable fuel? Is it near enough to be transported and sold cheap? This will be very essential for our people. Fuel is very expensive and our people are very poor. Have you any idea what it would cost to bring natural gas into Salt Lake City? This would be a great boon to our people, if it could be brought in at a reasonable price. Is there any prospect of your being able to make it? Is there any prospect of your being able to make it? Is there any prospect of your being able to make it?
