The Kirmess.

The kirmess which will be opened on Tuesday, June 7, in the Exposition building, should be a success financially as it no doubt will be in other respects, the object being a most laudable one. A special feature of it will be the booths where different national costumes, etc., are to be seen in all their picturesque beauty. Every evening's entertainment is to commence with a grand march in costume and special fancy dances, after which the floor will be free for general dancing. Oscar's band will be in attendance. 	For Bonds.	Against Bonds.

" Second ward	84	4
" Third ward	76	8
" Fourth ward	57	14
" Fifth ward	148	20
Plain City	11	13

Wilson	15	6
North Ogden	11	3
Total	719	106

Immediately on the official returns of the vote, the county will take steps to advertise for bids and dispose of $70,000 of the amount voted for.

Robbery and Fire.

The Beach fire department at Ogden was called out yesterday at 4:30 o'clock by a telephone message to the residence of R. C. Wilson, 2223 Monroe avenue. The fire started from a stove in the kitchen and rapidly spread to the sitting and bed rooms. The boys turned on the fine stream and reached the house just as the flames were getting a good headway. A few moments work and the fire was extinguished with a loss between $300 and $400, fully covered by insurance.

Mr. Wilson, who happened to be down town at the time of the alarm, rushed home and entering a small room occupied as a children's toy room, discovered his trunk open and $125 which he had placed in the trunk gone. There seems to be considerable room for the belief that robbers ransacked the house during the afternoon and upon their departure set it on fire.

MORE RETURNING EDITORS.

Seventy of Them Spend Today in this City and Vicinity.

Seventy more editors, principally members of the Illinois, Indiana and Michigan Press Associations, arrived in this city from Portland at 9 a.m. today. They registered at the Knutsford, Templeton and Cullen where they had breakfast after which they were driven about the city. Their exclamations of surprise at our broad streets, handsome houses, and beautiful city, were no less great than those made by so many distinguished delegations of prominent people who have preceded them. Most of them climbed the spiral staircase that led to the Temple tower, and viewed the valley from that height. They next visited the Tabernacle where they listened with the profoundest silence and admiration to the following organ recitals by Prof. J. J. Dayes:

"Fantasia" ..... J. J. Dayes
"Program Song of Peace" ..... Rogers
"Tempo per Marcia" ..... Dana
"Amore Ever Gladdens Me Yet" ..... Haydn
"Adagio" ..... Mozart
"Sonata" ..... Mendelssohn

At 3 o'clock they left for Garfield Beach on a special train and at the time of going to press many of them were lounging in a bath in the Great Salt Lake. Tonight they leave for their homes in the East in charge of J. M. Page, editor of the *Jacksonville* (Illinois) *Journal*.

A gang of prisoners were employed in tearing down some old buildings near the historic silk factory at the time and Mayo watched his opportunity and put off. He was serving time for petit larceny and having burglars tools in his possession.

Actions on Promissory Notes.

Suit was brought in the Third District court this afternoon by William Meikle to recover from James W. Carrigan and Virginia Carrigan, his wife, the sum of $500 due on a promissory note, bearing interest at the rate of 11 per cent. per annum, payable quarterly.

Suit has also been brought today in the same court by Charles W. Green against O. T. Carlson and Lillie C. Carlson, to recover $1,950 on a promissory note. The note was given to one Charles Dahl in consideration of borrowed money and assigned by him, on June 20th, 1891, to the present plaintiffs.

SEED CORN.

The best plan is to have plenty of seed and plant as early as the ground will work mellow, and then in about eight days plant another patch, so if the first should fail you have more coming on, writes a correspondent in Southern Cultivator, who further says: "If I can get corn up, a smart frost will not hurt it, it will only cut the top down, the bud is under the ground protected and will be coming the same. I have not found this corn much more liable to cut from early planting than common field corn. This corn requires richer soil than field corn; in fact it is useless to plant the small early varieties without very rich soil and in well manured land. The best soil for an early crop is a rich sandy loam. It may be planted in hills three feet each way, or in drills six to eight inches in the drill, according to the variety grown or strength of soil; the taller the variety or the richer the soil the greater should be the distance between the rows.

"The finest crop of sugar corn I ever grew I turned a crop of rye under while in bloom and planted the ground in maize. The third time the seedings were plowed a furrow was run in the middle between the rows and early Egyptian sugar corn drilled in it six inches apart. After the corn was up to see it across the field the whole patch was thoroughly plowed and laid by. This corn came up at a time when sweet corn came into full market. Besides the cane it yielded an abundance of stalk fodder. All things considered, I find it the most profitable to plant the large sized kinds and depend on early planting and manure for early corn."

CHICAGO, June 2.—Advices to the Associated Press give further details of the storm which did much damage to property by storms and cyclones in the Northwest.

STREAMS RISING RAPIDLY.

LITT, Texas, June 2.—Reports say that a cyclone near Durango caused the greatest havoc, sweeping everything before it from the face of the earth. Over a space of a quarter of a mile wide and several miles long, the houses were utterly demolished. Many escaped unhurt by entering cyclone cellars, but five or six are known to be killed and a number injured, some fatally. The effects of the rainstorm which have prevailed since Monday throughout Missouri, Arkansas, Texas, Oklahoma, Indian Territory and which continue in many places are becoming evident in the rising rivers. All the streams in this territory are rising rapidly and promise to exceed the high stage of water recently reached, where it is not already exceeded. Enormous damage is already done and much greater is in prospect. The damage by rain and wind in the neighborhood of Waco, Texas, is now estimated at half a million.

THE CONSERVATION OF MOISTURE.

The Three Operations of Ploughing, Harrowing and Rolling.

Crops usually fail or succeed in proportion as they receive an equal distribution or uniform supply of water. Failures are more frequently attributed either to a deficiency or a surplus of rainfall than to any other cause. Hence the importance of the subject of how to manage the moisture in the process of a proper amount of available water to crops, and so far as practicable guard against excess in either side. And this is largely within the control of the cultivator. Says Mr. Saunders, the superintendent of gardens and grounds at Washington: "The three operations of ploughing, subsoiling and mulching when properly understood comprise all the requisites of success and enable the cultivator to a very great measure to regard with comparative indifference whether the season prove unusually wet or unusually dry. If the former, the drains remove all superfluous water, and the loosening of the subsoil allows the surplus of water through all its pores, which are rapidly filled, and modering the surface so as to prevent evaporation retains the water where plants can reach it, instead of its being rapidly consumed by drying winds or evaporating over heat. The tracts of the Grand Rapids and Indiana road was washed out for three miles.
