TELEGRAPHIC.

MR. EDISON AT WORK

Endeavoring to Take Pictures of a Human Brain.

...RY OF HIS EXPERIMENTS.

...wspaper Reporters and Other Visitors Watch the Remarkable Proceedings with Interest.

ORANGE, N.J., Feb. 10.—Thomas A. Edison was hard at work all day in his laboratory in West Orange preparing for his experiments of photographing the human brain with the aid of the new Roentgen ray. With thousand of dollars-worth of apparatus and a company of people he labored assiduously in Crooke's tubes of his own manufacture. To the mouth of each tube is a long glass tube was attached, through this, by means of a connecting tube in the side, the mercury in the tube and the air in the Crooke's tubes was gradually exhausted by the pump.

Surrounded by a score or more of reporters and other visitors, Mr. Edison all day long watching the progress of his work, and he displayed a wonderful amount of patience when, after repeated trials, the desired result was not obtained. Again and again the effort was made, and Mr. Edison explained to the reporters that he was trying to see whether the rays were sufficiently elastic to bend sufficiently out into space, or local magnetic force streaming from one side of the skull to the other in the tube through the air in the immediate vicinity, being purely local in influence. The desire of finding the magnetic influence in a tube warm would give the intelligent effect of rays.

In another experiment today he allowed the rays to pass through a piece of lead half an inch thick. He also found that the mysterious rays were capable of penetrating a bit of cardboard, a piece of celluloid and a half-inch strip of steel constructed, leaving the plate uninjured. Had the rays not penetrated the steel the plate would undoubtedly have been made in the time when the steel was not interposed. Experiment another results several times repeated yesterday.

In regard to the proposed attempt at photographing the brain, the representatives of the American Press asked Mr. Edison if there would be any danger of the subjects suffering from any personal injury from the rays which would necessarily be forced through his head, as it has been suggested that a shock of electricity from the tube might cause some injury to the nervous system. Mr. Edison replied: "No, the effect would be no no danger whatever, as there is no mugnetage in the tube, and it is the magnetage that works the harm."

Tomorrow he will try to photograph a section of the head only by placing a small film, which is the plate mentioned a second ago, to the mouth of the tube, with the plate facing the vision. The rays from the fluorescent substance will then be directed so as to penetrate the skull and strike the plate at the desired angle. Another experiment contemplated in connection with the subject's mouth, facing the rest or left side of the head, and the rays will be aimed accordingly. This, in Mr. Edison's opinion, would warrant a successful exposure the rays would only have to pass through one thickness of the skull, as then, if the attempt is unfavorable, he will try to photograph the entire head, with the plate resting at the back and the rays penetrating the skull, and the subject lying on his side, so that the ray penetrates from the right or left with the plate on the opposite side.

LIGHTS OF WHEELMEN.

Six Hours Section to Speak to Empty Seats.

BALTIMORE, Feb. 10.—League politics ruled the situation of the delegates to the annual convention of the American League of Wheelmen today, to the utter exclusion of everything else. As a consequence the experimental "good roads" meeting was only a moderate success in point of attendance, although the mental pabulum served in lieu was allowed was of a high order. Mayor Hooper was in consequence the victim of an unintentional affront on the part of the delegates, as he had been invited to make a speech, and was there at the appointed time with a nice little address of welcome, which was not spoken, because there was no one present to hear him save a few newspaper men. The mayor retired awhile, and then went away to attend to municipal affairs. An ample apology was made to him later in the day, however, and full official forgiveness granted.

After the mayor's departure another effort was made to get the delegates together, which, after two hours hard work, was successful. President Wilkins called the meeting to order, but it was the first "good roads" paper ever given by the league, and he decided that the decision to set aside one day annually for the discussion of good roads was one of the best moves ever made by the league. He regretted, however, that the attendance was not better. He thought the delegates to the annual meeting should feel bound to attend the good roads convention, and to give it their entire attention.

ON POWER OF NEW YORK.

In the highways improvement committee, and not the league proper, was the cause of the affair, he resigned the chair in the chairmanship of the committee, Isaac B. Potter of New York, the father of the "good roads" day movement.

Mr. Potter was greeted with applause when he had finished, he addressed the meeting briefly.

The days exercise closed with a banquet tonight at the home of the Maryland Bicycle club, at which about 100 delegates and other guests were present.

THE QUEEN'S SPEECH.

Expresses Unalloyed Pleasure by Victoria in Her Address to Parliament.

NEW YORK, Feb. 11.—A dispatch to a New paper from London says: The Queen's speech to Parliament will practically announce the approaching dissolution. The message will say: "The government of the United States have expressed a wish to cooperate in bringing to a close the difficulties which have existed for many years between my government and the republic of Venezuela, regarding the boundary between that country and British Guiana. I have expressed my sympathy with the desire to come to an equitable arrangement and I trust that further negotiations will lead to satisfactory settlement."

Regarding the Turkish question the queen will say:

"The sultan of Turkey has sanctioned the principal reforms in the government of Armenia, for which, in conjunction with the governments of the emperor of Russia and of the president of the French republic, I have felt it my duty to press. I deeply regret that a fanatical outbreak of the Turkish population has resulted in a series of massacres in those provinces, which have caused the deepest indignation in this country."

The utterance on the Transvaal subject will be:

"A sudden incursion into the South African republic by an armed force from the territory under the control of my British South Africa company resulted in a collision with the Boer forces.

"The president of the South African republic, acting in this measure with moderation and wisdom, agreed to place the prisoners in the hands of my high commissioner, and I have undertaken to bring to trial the leaders of these men. The conduct of the president of the South African republic on this occasion, and the assurances which he has voluntarily given, leads me to believe that he recognizes the importance of redressing the legitimate grievances of which complaint has been made by persons now inhabiting the Transvaal."

Soldiers Arrested for Prize Fighting.

OMAHA, Feb. 10.—A scandal developed at Fort Omaha today, when Privates Cavanaugh and Murphy were arrested for prize fighting, and 100 others who witnessed the fight expect to be ordered to the guardhouse tomorrow. It has been stated and generally credited that the two men fought for a purse that was furnished by the officers of the fort. This is most emphatically denied by Colonel Biles. While he has no doubt that there was a purse in sight, he says that he is sure it was not made up by the officers. That is another point to be investigated, and the facts will be obtained, if possible, from the prisoners when the court martial convenes.

It is stated by the officers that there need be no surprise if the guardhouse is stored full of prisoners in a short time. A very determined effort is being made to learn who were present at the mill, and if the discovery be made all the soldier spectators will be arrested. The United States Infantry, the commanding officer says, will frown down anything in the way of a prize fight by soldiers.

ANOTHER CONFESSION.

Miss Hollingsworth Speaks About the Death of Pearl Bryan.

INDIANAPOLIS, Ind., Feb. 10.—Lulu May Hollingsworth, the young woman who is supposed to know something about the Fort Thomas murder mystery, made another alleged confession tonight. She says the death of Pearl Bryan was caused by criminal operation and that it was performed in a stairway in this city. Miss Hollingsworth says that she performed it at the request of Miss Bryan. She also claims to have received a letter from Jackson, in which he explained how and where the woman was decapitated. In the letter, according to her story, Jackson said that Miss Bryan died in his room, that he hired a horse and buggy and employed a negro to assist him. The negro, with the body of Miss Bryan, drove to Fort Thomas, where Jackson was in waiting. The negro cut off the head of the young woman with a cleaver, and Jackson threw it into the river from the suspension bridge.

Late this afternoon Miss Hollingsworth said:

"When Pearl went through here on Tuesday she told me she was coming back, and accordingly she arrived on Thursday night. She stayed that night at a hotel in South Illinois street."

"What was the name of the hotel?"

"I am not prepared to state."

"Who did you see her next?"

"I got up at 4 o'clock on Friday morning and went to the hotel. There I met Pearl, and at 10:30 o'clock she took the train for Cincinnati and went back."

It appears from what Miss Hollingsworth and the talisman have said that Pearl Bryan was sick when she took the train, and the police believe that the drugs were administered in this city.

Miss Hollingsworth refused to state whether Walling was with Pearl Bryan on her return here.

Miss Barton in Turkey.

CONSTANTINOPLE, Feb. 10.—The United States minister, Mr. Alexander W. Terrell, is using his influence with the Turkish government in order to procure the necessary escort and protection to Miss Clara Barton, president of the American Red Cross society, and her assistants, while they are distributing relief to the suffering Armenians.

THE BOND ISSUE.

The Government Will Realize From It $111,378,350.97.

WASHINGTON, Feb. 10.—A statement prepared at the treasury department under the direction of Assistant Secretary Curtis shows the government will realize from the new loan $111,378,350.97. The following table shows the amount of bonds to be paid for at each of the ten sub-treasuries, together with the proceeds to be paid in at each.

	Principal.	Proceeds.
Boston	$ 3,132,000	$ [illegible]
Baltimore	[illegible]	[illegible]
San Francisco	2,227,000	2,300,312 [illegible]
New Orleans	[illegible]	[illegible]
Washington	[illegible]	[illegible]
Cincinnati	[illegible]	[illegible]
St. Louis	[illegible]	[illegible]
Chicago	[illegible]	[illegible]
New York	47,012,450	47,596,477 [illegible]
Philadelphia	[illegible]	[illegible]
Total	$100,000,000	$111,378,350 97

The average rate therefore paid for each $100 is $111.3783.

Receiving Gold.

NEW YORK, Feb. 10.—Sub-treasury officials were engaged up to a late hour tonight receiving gold on deposit in payment of instalments on bids for the new government bonds by individuals and representatives and employes of banks and institutions. In fact, the facilities of the department were overtaxed, and the total amount credited to bond buyers was not reached until 6 o'clock. There were but thirty or forty depositors. The officials did not assume to furnish official data but the total figured out was $9,745,924. The greater part of this sum was represented by the turning over to the sub-treasury of checks for gold deposited at the assay office, and receipts for gold previously deposited at the sub-treasury for examination.

TURKISH PLANS.

An Armenian Missionary Arrested for Sedition and Murder.

LONDON, Feb. 10.—The Constantinople correspondent of the Daily News telegraphs to that paper: Turkey's plan to implicate the American missionaries in Armenian affairs is being steadily pursued. An attempt has been made to arrest Mr. Knapp, one of the hardest working missionaries at Brusa, on a charge of sedition and murder, based on an accusation signed under coercion by some Armenians who were in jail. Mr. Knapp appealed to United States Minister Terrell who learned from General Hampson, at Mosul, that the charge was wholly unfounded, and was a mere pretext to drive Mr. Knapp from the country. Mr. Terrell thinks that unless the charge is abandoned Mr. Knapp shall be brought here and tried before him.

Condition of Arbitration.

LONDON, Feb. 10.—The Bradford Observer says it learns that the Marquis of Salisbury has requested the authorities British Guiana to enquire into the number and extent of the districts occupied by British subjects. This, according to the paper mentioned, points to the fact the British government is willing to arbitrate on condition that Great Britain be allowed to retain the districts occupied by British subjects, or that the latter be compensated for their loss by Venezuela in the event of the latter passing into the possession of this country.

Denver's Bids.

WASHINGTON, Feb. 10.—The secretary of the treasury has accepted the offer of A. C. Drake for the sale to the government of a site for the Denver coinage mint building. The property is located on Colfax avenue, South Thirteenth and Evans street. The price is $65,000.

Drawing Gold.

WASHINGTON, D. C., Feb. 10.—Gold to the amount of $2,251,000 was today withdrawn from the sub-treasury at New York, presumably to be used in making payments for bonds. This leaves the true amount of the gold reserve $81,000,000. Up to the hour of adding, the department had no official advice of deposits on account of bond purchases.

Senate Reorganization.

WASHINGTON, D. C., Feb. 10.—The action of the Populist senators in deciding to put their own tickets in the field for the senate officers has caused some of the Republican senators to watch the expediency in attempting to complete the reorganization of that body at this time, and it now looks as if this attempt will be deferred at least until there is greater certainty of accomplishing something more than now appears to be the case.

Bishop of a Valuable Horse.

SAN FRANCISCO, Cal., Feb. 11.—It is not likely that Crescendo, the great three-year-old of Naglee-Burke's Pueblo stable, will ever face the starter again. On Sunday at the Bay District track he was so seriously injured that ever since he has been shaped up and up. While being walked around on the extreme outside of the track a two-year-old that was being galloped came swerving along and bumped into him, knocking him to the ground and fracturing his collar bone.

Crescendo is now in the hands of a veterinary surgeon, who is doing everything that is possible and there is a slight chance that he may be brought around so as to race in about six months. Even if he does recover it is doubtful whether he will ever be the Crescendo of old.

As a two-year-old he was one of the very best in the country, running second to Requital in the Futurity stakes last autumn.

Potter May Have Been Murdered.

SAN FRANCISCO, Feb. 11.—Further investigation leads to the conclusion that H. Cranston Potter, the Tacoma merchant, whose body was found near the Cliff House yesterday, may have been murdered. In the back of his head is a great wound that crushed the skull for several inches. The bridge of the nose is also cut and the forehead is a mass of bruises. While the facial wounds may have been caused while the body was being washed upon the sands by the ocean waves, the frightful wound in the head is of such a nature that the friends of the deceased who have viewed the remains believe that Potter was murdered. Potter was a brother of James Brown Potter and a nephew of Bishop Potter of New York.

ONCE USED, ALWAYS IN FAVOR.

One a Dose. All Medicine Dealers.

Ministers Should Use Dr. Miles' Heart Cure.

THERE IS NO PROFESSION, whose labors necessarily tax the nervous system, as that of the ministry. The disarrangement of the nerve centers of the brain by over work, frequently brings on attacks of heart trouble, and nervous prostration.

Rev. J. P. Sanner, M. D., Pastor U. B. church, Loudon Mills, Ills., himself a physician, writes Feb. 25, 1895: "Heart affection and nervous prostration had become so severe I felt that a little more work in this person would so completely prostrate me that it seemed certain I must relinquish the work of the ministry entirely. Heart palpitation became so bad that my medicine would ask me if I did not have heart disease. Last November I commenced taking Dr. Miles' New Heart Cure alternately with Dr. Miles' Nervine and derived the greatest possible benefit. I have just closed revival work of 16 weeks, preaching nearly every night and twice on the Sabbath. I can speak for hours without suffering as I formerly did. Hard working ministers should keep Dr. Miles' great remedies on hand."

Dr. Miles' Heart Cure Restores Health.....

Dr. Miles' Heart Cure is sold on guarantee, first bottle will benefit or money refunded.

For sale by all druggists.

Since 1861 I have been a great sufferer from catarrh. I tried Ely's Cream Balm and it did me more good than anyone else tried. Twenty-five hundred from which I have long suffered are now free from it. J. S. Adams, Lake Shore U. S. Pat. Office, Buffalo, N. Y.

CATARRH

ELY'S CREAM BALM Opens and Cleanses the Nasal Passages, Allays Pain and Inflammation, Heals the Sores, Protects the Membrane from Colds, Restores the Sense of Taste and Smell. The Balm is quickly absorbed and gives relief at once.

A particle is applied into each nostril and is agreeable. Price 50 cents at Druggists or by mail. ELY BROTHERS, 56 Warren Street, New York.
