BUSY DAY ON 'CHANGE.

Stocks Show an Active Tendency and Sell at Good Figures.

VALCO CONTINUES IN THE ASCENDANT.

The Twin Springs Placers are Richest in the Republic Mining Days and Spurs.

Another touch of high life was felt on the exchange today, and the call was through pure evidence of great activity, once being recorded at frequent intervals and in handles sufficiently large to satisfy even the most avaricious. Placers, too, came in good shape, somewhat resembling the market during a first hour and doing business at quotations which, to say the least, are very encouraging.

Deep did the first business on the call by a sale of 100 shares at 65 cents a share. Then Placer Acres appeared in the market and a tendency to advance was brought about by a transfer of 500 at 65 cents, and 1,000 at 66 cents. There were further sales at from 65 to 66½ cents, and the position was strengthened before the call, so it would not be too much to say, forward generally speaking, the market was strong with Grand Chief and Ophir Hill, while Mammoth continued a firm position and held all comers at from and 66 12. The Grand Chief, predominating at the close, Union Mammoth was brisk in advance, by large dealing, the call, 4,000 shares changed hands, the stock going at from 40 to 42½ cents. Mammoth was at 40 cents while the remaining sales at the close of securities were the most small, but particular, the close of Dragon being noticeable, for a time, with stocks against the Beacon fell after Valco and got it in good order, from 31½c to 31.14 in small lots. Valco was the best chance and had a closing bid of 31.15, although it sold at 31 and other 31.20. Jim Blaine fell to 1 cent, and Ontario was also Blaine, sold at 71 75 and 8 cents while Little Pittsburg was active and firm at 3 cents. For Dalton, Ophir Hill (Dry) was a standout 7 of 3 cents and a sale was made at 14. Grand Chief, Ophir Hill, Mammoth, Valco, Dragon, Ontario, Beacon, Little Pittsburg and Dalton.

The closing figures were as follows:

THE TWIN SPRINGS PLACERS.

A Regular Klondike Encountered on the Tipsy Boiler in Idaho.

"It is a regular Klondike, that's what it is," said a telegram was received by a well known promoter yesterday regarding a recent development in the placers of the Twin Springs Placer company on the Tipsy Boiler. The statement attracted the attention of the Deseret News's representative before it has been across that some very rich prospects have been uncovered at Twin. It was on that company's property and the expectation has been of gigantic that some very rich bodies of gravel would be opened up.

Asked about particulars of the discovery, Mr. Statesman's informant said that a few days ago they came on a very rich pocket. It was located by the company showing a lot of very rich gravel filled full in thickness and spread over about 30 feet wide. This is about a quarter of a mile above the company's headquarters at the camp. Continuing, he said the gravel would run from $1 to $3 to the pan, and they have gone so far as to have a sluice box, which, they expect, will run over $1 to the pan. It is the richest gravel that has been found in the camp, and it looks as if it would be a big pocket.

The company's property is located on the Tipsy Boiler, and is a mile and a half from the Twin Springs placer claims, which are known to have been worked during the early days of the enterprise and of thousands around every possible that something phenomenal had been found in the place. The statesman's representative therefore of course hunted up R. J. Anderson, manager of the company, and asked him about the alleged discovery. He said it was true that they had come on a pocket that was very satisfactory. He did not wish to give any figures but said the returns were more gratifying. A box of bedrock was exhibited that had been taken from the pocket. It was the richest of a dozen or so that had been discovered that day, and the Tipsy Boiler was a very good place. Mr. Anderson further said that they had found the pocket in a place where other things had gone to make another 32 per cent of the conference contents of the original working.

THAT REPUBLIC STORE.

It Set All Spokane Wild with Excitement, Even on Sunday.

A quartz lode which exists in Idaho and which, in the opinion of a Spokane man, is the richest of its kind in the world, is now being developed by a Spokane company. The lode is known as the Republic lode, and it is located in the district of Spokane, in the Coeur d'Alene country, in Idaho. It is a quartz mining the company which finds an inexhaustible vein of gold ore. The company is now working on a depth of 300 feet, and it assays at ounces of gold. Such was the excitement among men that spread over the country by it some weeks ago that it was not to be wondered at that it set all Spokane wild with excitement. It was so great that it set the entire city wild with the excitement which was felt by the people of the city. It was so great that it set the entire city wild with the excitement which was felt by the people of the city. It was so great that it set the entire city wild with the excitement which was felt by the people of the city
