MINING, BUSINESS AND STOCKS.

TALKS OF COLORADO AND IRON BLOSSOM

J. Fewson Smith Makes Technical Examination of Properties and Gives Report of Investigation.

At the request of newspaper men and a number of persons interested in Colorado and Iron Blossom, J. Fewson Smith, engineer for the United States company, has made an examination of the properties and made a report. Mr. Smith has also made a map of the ore bodies as he found them and he further tells of what the conditions are at the properties. In his report Mr. Smith says:

"The map was made from information secured by a study of the lode last June, at which time its true position was determined, and a careful estimate made of the volume and value of ore actually developed and safely measurable in the Colorado and part of the Iron Blossom properties.

"Geologically speaking, the Colorado is a great fissure, one which has cut vertically through successive strata and different rock formations from a great depth and has taken the course shown upon the map. It is a vertical channel through which mineral-bearing solutions once circulated until they were absorbed in the more horizontal strata of the limestone which the fissure broke up and rendered fit for the reception of mineral which followed later. When the mineral did come through the fissure it spread out for 30 to 40 feet through the crushed limestone on each side, and formed a bed from 60 to 80 feet in width and about 20 feet in thickness. That several ore chutes of great value will be found adjacent to this fissure at intervals, under the present chute and through the several thousand feet of limestone which the fissure has cut, seems certain in view of conditions which have developed elsewhere in the district. It is also safe to predict that the ore will persist to the Dragon Iron pits, southwest of the Iron Blossom property.

"There are many reasons tending to prove that it must do so and none prove to the contrary. The porphyry formation will neither cause it to dip into Tintic Central or push it westward into Carisa property. In fact, the Spy-Carisa vein is parallel to the Colorado and has been explored for thousands of feet, both north and south of Carisa property. It proves that the ore is persistent; that it follows the fracture zones whether they strike with or across the limestone beds, and that there has been no faulting or great deflecting of ore bodies.

NO FIGURES FURNISHED.

"I am not permitted to furnish figures regarding the volume and value of ore which can be measured in the Colorado or Iron Blossom properties, but I may say that in the Colorado mine there remains twice the amount of ore that has been taken out, and this of such grade as to guarantee dividends for a long time yet, and there is evidence that with proper development of the main fissure new ore chutes will be found long before the present chute is exhausted. The Colorado ore channel will not prove an exception to the rule in Tintic.

"At the Iron Blossom all physical conditions are very favorable, with evidence of an ore body for thousands of feet, and values such as to guarantee dividends indefinitely. At present the south face of the stope is in the mixed ore found in large bodies in both the Sioux Con., and the Colorado; the values are good and the face opened is at least 60 feet by 10 feet in cross-section. At this point the ore seemed to end abruptly, but a resort to much-neglected prospecting has developed the condition which has proven, in all the beginners on parallel zones westward, that the ore is seeking depth in the neighborhood of the so-called Sioux Ajax fault or break. This development is significant of most favorable results in the Iron Blossom and possibly to the Sioux as well, as it indicates a depth and permanency consistent with the other great ore chutes in the history of the Tintic district."

MARKET IS SLIGHTLY BETTER.

Tintic Central Starts Moving Up With Heavy Sales.

About the only thing of interest on the stock exchange this morning was Tintic Central, which developed considerable activity with better prices. The heavy buying and selling of Tintic Central increased the volume and amount of business on the exchange.

Colorado showed some improvement today and sold at $1.47½. Columbus Consolidated was lower and 50 shares went as low as 77 cents. East Tintic Development was much weaker and sold as low as 10 cents. Iron Blossom was unchanged and strong.

Tintic Central started improving early in the market and on the regular board 48,500 shares were disposed of at prices ranging from 7 cents at the opening of the bidding to 8¾ cents at the close, the top price during the session. On the open board 40,000 shares were disposed of at from 8½ to 8¾ cents.

Uncle Sam, Mason Valley and Swansea Consolidated were relatively quiet this morning.

The total number of shares disposed of was 119,085, while the amount represented by the transactions was $15,184.05.

On the curb market only one sale was made and that was Uintah Treasure Hill at 8¼ cents.

TO SEND SHAFT DEEPER.

Work at Ninety-Nine Copper Property To Go to 500 Foot Level.

According to reports received by James T. Hammond from General Manager J. H. Jenson of the Ninty-nine copper property at Good Springs, Nev., but a few feet more of sinking in the shaft is all that is required to reach the 200 foot level, when the company will begin drifting to catch the strong ore body that was found in the level above. The work is now progressing at the rate of two feet a shift and two shifts are at work.

The shaft will be sent to the 500 foot level and it is expected that the property will soon be making regular shipments. At the property there is now considerable ore ready for shipment.

Since reaching the property Manager Jenson has found many indications that lead him to believe that the valuations came from below and that the strongest ore bodies will be found at depth. The ore on the hanging wall has been found to be the strongest thus indicating that the fissure at present is changed in the opposite direction from what it was originally.

CONCENTRATES.

M. J. Dailey, superintendent of the Silver King Coalition mines at Park City leaves tomorrow morning for camp.

Local members of the American Institute of Mining Engineers will hold a meeting at 8 o'clock this evening at the Commercial club.

The Ohio Copper company mill will be in readiness to begin operations shortly after Oct. 20. The trestle will then be finished and the second section of the mill ready for operations.

The Tintic Standard new shaft has reached a depth of 55 feet and is now in an iron blackened dolomite lime that might almost be mistaken for the manganese. Manager E. J. Raddatz is of the opinion that the shaft may break into an ore body almost any day.

The stockholders of the Sara M. Mining company, operating in American Fork canyon, have voted to take up sufficient treasury stock to push the tunnel ahead 200 feet to get 225 feet below the spex. It is expected that this work will be finished by the last of December.

J. G. Berryhill of Des Moines, Ia., a director of the Castle Valley Coal company, has just returned from the company's property on Cedar Creek in Emery county. With Consulting Engineer J. K. Seifert he has selected sites for the company's tipple and for the town at the mines which will be known as Connelsville. The survey for the railroad has been finished. It will be seven miles long and connect the mine with the Utah and Southwestern railroad.

Since the organization of the United States Smelting, Refining and Mining company in 1906, the company has received in dividends on its Centennial-Eureka stock, $21 a share. During that time the following amounts per share have been received: June 30, 1906, $4; Oct. 13, 1906, $3; Jan. 14, 1907, $2.50; Jan. 15, 1908, $2; April 15, 1908, $5; July 15, 1908, $2; Oct. 15, 1908, $2.50. This is an average of $7 a year up to 1909 on the 99,884 shares of Centennial held in the treasury. Thus far there have been no dividends paid for 1909.

FUNERAL OF H. D. NILES.

Simple Service Held to Conform to His Expressed Wishes.

The funeral of Dr. Niles yesterday afternoon was simple in character, according to his previously expressed will and desire. The service at St. Mark's cathedral was largely attended, but only the family and a few intimate friends followed the body to the grave. At the church the choir sang "Thy will be done," "For all the saints," and "Peace, perfect peace." Rector Saunders of Oakland, Cal., in his brief sermon, said:

"It is said that some men are born great, some achieve greatness and some have greatness thrust upon them. He whom we honor here today was born great, in that a great man is the summit of all the force and mind accumulated by his ancestors. It may appear here and there in flashes down the ages behind him, but some time this greatness is all summed up in one man, and we have one like he who has left us. In this he was born great. Some achieve greatness. He did. With his natural ability he worked long years without ceasing, and achieved greatness that all who knew him freely acknowledge was his due. Greatness was not thrust upon him undeserved. His fellow men freely proclaimed his worth without envy. He was born great, he achieved greatness by his own efforts, and the world acknowledged his greatness."

STOCKS UNCERTAIN, CLOSING WEAK

New York, Oct. 4.—Opening prices of stocks today showed sharp declines from last week's closing, running to 1⅛ in Pressed Steel Car, 1 in Union Pacific, Erie and U. S. Steel, large fractions in Chesapeake & Ohio, Great Northern preferred, Amalgamated Copper and Utah Copper. Pacific Coast Telephone rose 1.

The market was active and broad. Large buying orders for some representative railroad stocks and support of United States Steel soon sent prices upward. United States Steel rallied from 91⅝ to 93⅝, making another high record. St. Paul advanced 1⅛ above Saturday's closing, New York Central 1¾ and Reading 2⅛. Central Leather and Wabash preferred also gained 1 and St. Paul preferred and Vulcan Detinning 2. Pacific Telephone made another sensational rise of 6 points, touching 64½. Prices weakened very sharply again, Reading falling back 1⅝ and the other leaders a large fraction. Central Railroad of New Jersey fell 2, Missouri-Pacific 1¾ and Union Pacific preferred and U. S. Rubber 1.

The tone was steady at 11 o'clock.

United States Steel rose again to 94⅞, a gain of ⅞. New York Central advanced 1. Wabash preferred 2, American Telephone 1⅞, D. & R. G. 1¼ and American Sugar preferred and Pullman 1.

Railway Steel Spring preferred sold at an advance of 2½. Prices generally did not rise to the earlier high level. St. Louis and San Francisco second preferred declined 1.

Bonds were irregular.

A spell of dulness was followed by a continuance of the advance along new lines, the precious leaders, outside of United States Steel being let alone for the time being. The Hill and Morgan railroad stocks were the chief features. Northern Pacific jumped 2 points and Erie was run up 1¼ to 2⅝. Union Pacific was also active and raised 1⅛. Distillers' Securities yielded 1.

Trading became quiet again. Central Leather was marked up 2½ points in face of the general tendency. St. Louis-Southwestern preferred declined 1.

The market closed irregular and rather weak. The sag in prices placed Atchison, Southern Pacific, American Cotton Oil, General Electric and Pacific Mail a point lower than Saturday, and American Smelting and Interborough-Metropolitan preferred 1¼. United States Steel's recovery to within a shade of 93 did not affect the list and prices declined again. In the final dealings there were some abrupt reactions.

LIVESTOCK.

CHICAGO.

Chicago, Oct. 4.—Cattle—Receipts, estimated at 28,000; market generally steady. Beeves, 4.10@8.20; Texas steers, 3.85@5.10; western steers, 4.00@7.00; stockers and feeders, 3.15@6.25; cows and heifers, 2.10@6.00; calves, 7.00@9.00.

Hogs—Receipts estimated at 24,000; market slow, steady. Lights, 7.10@8.25; mixed, 7.60@8.40; heavy, 7.50@8.40; rough, 7.50@7.75; good to choice heavy, 7.75@8.40; pigs, 4.30@7.30; bulk of sales, 7.90@8.25.

Sheep—Receipts, estimated at 35,000; market steady. Native, 2.65@6.00; western, 2.75@5.00; yearlings, 4.50@6.50; lambs, native, 4.25@7.30; western 4.50@7.35.

KANSAS CITY.

Kansas City, Oct. 4.—Cattle—Receipts, 20,000; market steady to strong. Native steers, 4.50@8.25; native cows and heifers, 2.25@5.50; stockers and feeders, 3.00@5.50; bulls, 2.50@7.75; calves, 3.50@7.50; western steers, 3.60@6.25; western cows, 2.50@4.25.

Hogs—Receipts, 10,000; market steady. Bulk of sales, 7.70@8.05; heavy, 8.00@8.15; packers and butchers, 7.90@8.15; lights, 7.50@8.00; pigs, 5.50@6.25.

Sheep—Receipts, 15,000; market steady. Muttons, 4.00@5.60; lambs, 5.00@6.80; range wethers and yearlings, 4.60@5.25; range ewes, 3.00@4.60.

WOOL.

ST. LOUIS.

St. Louis, Oct. 4.—Wool, firm. Territory and western mediums, 22@28; fine mediums, 23@24; fine, 13@19.

PRODUCE.

CHICAGO.

Chicago, Oct. 4.—Wheat opened easy here today. December started ¼@¼ higher at 1.00⅝ to 1.00¾ on receiving by shorts who, already nervous over short local stocks, were further impressed by an advance at Liverpool in the face of heavy world's shipments. These, according to the board's estimate were 15,296,000 bushels, but Liverpool could afford to ignore them as only a small portion of them were headed for the English market.

The opening firmness was but momentary; December soon selling off to 1.00¼.

Corn opened barely steady. Opening quotations on December were a shade to ⅛@¼ under Saturday at 57⅛ to 57¼.

Perfect weather counted against the price and early sales sent the price down to 56⅝.

Sentiment in the oats pit was bullish and a show of firmness at the start was soon dissipated. December opened unchanged to ¼ higher on covering at 40 to 39⅞ and sold off to 39⅝.

Provisions were dull and featureless, quotations tending slightly lower. January pork opened 5c lower at 18.55, January lard 2½@5c higher at 10.35 to 10.32½ and January ribs 2½c down at 9.15.

Wheat—Later December touched 99⅝, but rallied on the cables and closed easy, ¼ lower at 99⅞@1.00.

Corn—The close was featureless and easy, December ¼ down at 57⅝.

Close—Wheat—Dec., 99⅞@1.00; May, 1.07¾.

Corn—Oct., 59; Dec., 57@57⅛; May, 59⅝; July, 59¾.

Pork—Oct., 23.35; Jan., 18.52½; May, 18.22.

Lard—Oct., 12.32½; Nov., 11.80; Jan., 10.00; May, 10.40.

Ribs—Oct., 11.00; Jan., 9.72½; May, 9.70.

Oats—Dec., 39@39⅛; May, 41¼@41⅜.

Rye—Cash, 72@73; Dec., 70@73.

Barley—Cash, 56@66.

Timothy—Oct., 3.40.

Clover—Nothing doing.

New York, Oct. 4.—Sugar, raw, steady. Fair refining, 3.70@3.75; centrifugal, 96 test, 4.20@4.25½; molasses sugar, 3.45@3.95½.

Refined—Quiet. Crushed, 5.85; powdered, 5.25; granulated, 5.25.

Coffee—Quiet. No. 7 Rio, 7¾; No. 4 Santos, 8½@9.

WILBUR WRIGHT DEFIED ELEMENTS

Made a Marvelous Flight Over New York Harbor and the North River.

New York, Oct. 4.—Wilbur Wright today defied the air, the water and the land in a marvelous flight over the numberless craft in New York harbor and the North river. Starting at 9:56 the aviator headed into the wind and flew over ferry boats, yachts, steamers and other crafts in the harbor.

Flying high Mr. Wright went up the North river, over the fleet of battleships and on past Grant's tomb, encircling the British cruiser Argyle.

Returning at faster speed with the wind he came back over the water and landed at his starting point.

He had been gone for 33 minutes and 33 seconds, making one of the most perilous trips ever attempted. The distance was estimated at 15 miles.

"The machine responded in fine shape," said Mr. Wright, as he clambored out through the net work of wires of his machine at the aerodrome on Governor's island.

"The motor worked fine. I started about 75 feet above the water, but kept climbing higher until I was about 200 or 300 feet high. The air currents sent up by the funnels of the ferryboats interfered somewhat, and I came down nearer to the water.

"I could hear the cheers of the sailors on the warships," continued Mr. Wright, as the enthusiastic group of army officers and newspaper men that had awaited his return grasped his hands.

"The wind was blowing about 10 miles an hour and I had to head in a little toward the east, instead of pointing the machine straight up the river.

"This flight fulfills every condition of my contract," added the aviator, in response to inquiries as to further demonstrations, "but if the favorable weather continues, this afternoon I may make another flight. As soon as possible I will leave for Washington to train the army officers."

As the aeroplane approached the city, flying steadily, but bucking the wind, the roofs of all the buildings became crowded and pleasure crafts started up the river in an effort to keep up with the machine that flew above them. They were soon compelled to give up the chase, for Wright outstripped the fastest of them.

As the machine pushed into the breeze, occassionally dipping slightly as though caught by a downward trend of the air, and then again was lifted suddenly, the mastery of the aviator was strongly impressed on the spectators.

ROCKEFELLER'S MOTTO FOR HOLDING A JOB

Cleveland, O., Oct. 4.—"Work just as hard when the boss is away as when he watching," is John Rockefeller's motto for holding a job, as related to the boys of his church yesterday.

First Mr. Rockefeller told how to obtain a position. This is to establish a reputation for honesty, industry and sobriety. Mr. Rockefeller philosophized from his own experience in life. Incidentally he remarked that last Sunday was the fifty-fourth anniversary of the date when he obtained his first job. He was foot-sore and weary when at last he found a chance to go to work. Then he was told to call again.

"I was to call after luncheon. A gentleman who knew me was hunted up by my prospective employer," Mr. Rockefeller said. "He told all about me and I got the job. Remember, boys, when you look for a job, employers will inquire about you and it's a good thing to have a reputation for honesty. Especially do they inquire of your pastor and teacher. A boy must not necessarily be smart to hold a position, but he must be honest, sober and diligent."

HEARST LEAGUE MAY ENTER MAYORALTY FIGHT

New York, Oct. 4.—After a conference with William Randolph Hearst, Charles E. Gehring, chairman of the county committee of the Independence league, announced last night that it was not improbable that the Independence league would enter the mayoralty fight at the head of an independent ticket. Mr. Gehring would not make definite statement, but intimated that Mr. Hearst had signified his willingness to enter the field again this year.

VERY PECULIAR AUTOMOBILE ACCIDENT

New York, Oct. 4.—Just before a speeding automobile struck a tree near Coney Island there were five men in the machine, and after the impact the ambulance doctors found only four men, all of whom had broken ribs or other injuries. When one of the four recovered consciousness he inquired for the fifth member of the party and a search revealed the unconscious man hanging over a limb of the tree where he had been hurled by the collision. He was not seriously hurt.

OCTOBER CONFERENCE RATES

Via Oregon Short Line. Tickets on sale from Idaho points and Utah points north of Ogden, Oct. 1, to 8, limited to Oct. 15. From Utah points, Ogden and south, Oct. 2 to 9, inclusive, limited to Oct. 12. See agents.

VELIE

COMMANDER PEARY ONLY GREAT MAN

Declares He Will Prove That He's Only White Man to Reach North Pole.

PEARY CLUB'S STATEMENT

Will be Made Public in a Day or So—Dr. Cook Has Arranged to Make Counter Statement.

New York, Oct. 4.—The north pole controversy is expected to reach a climax this week when the Peary Arctic club makes public the statement which Commander Robert E. Peary declares will prove that he was the only white man to reach the pole. Gen. Thomas H. Hubbard, president of the club, will be in the city today or tomorrow and will immediately call a meeting at which the statement prepared by Peary and submitted to Gen. Hubbard at Bar Harbor, Me., will be gone over and then made public.

Dr. Frederick A. Cook, who will be in Baltimore tonight, has arranged to issue a counter-statement, it is announced, to show that his rival's declaration does not prove that he did not precede Peary to the pole by nearly a year.

The cargo of arctic trophies, gathered by the Peary party, will be unloaded from the Roosevelt at once, and the ship, which has made two polar trips, is expected to be offered for sale by the Peary Arctic club. As the vessel was not built for carrying cargo, it is said to be useful only on exploration trips and for the reason that there are not now any prominent north pole seekers, at least on this side of the ocean, there is some talk that fortune-seekers may acquire the ship for a search of the West Indies for the hidden hordes of pirates.

DECLARES OPERATION FOR APPENDICITIS CRIMINAL

Boston, Oct. 4.—"An operation for appendicitis should be called a criminal operation and as such should be prohibited by law," declares Dr. Charles E. Page, one of the best known physicians of Boston.

"I have been following the records of appendicitis operations ever since the craze for this form of surgery started," says Dr. Page, "and I confidently believe that the day is coming when the people will realize that the cutting of the appendix is criminal operation.

"As for the widely-proclaimed benefits and saving of life by operations to cut the appendix, it seems hardly necessary to cite the long list of deaths following the operation."

PEARY'S FRIENDS TO PRAISE PEARY AND CONDEMN COOK

New York, Oct. 4.—The officers of the Peary Arctic club held a meeting today formally to pass on the proof offered by Commander Robt. E. Peary to show that Dr. Cook did not reach the pole. The statement will be made public in a few days.

BRYAN TO TOUR NORTHWEST.

Lincoln, Neb., Oct. 4.—William J. Bryan will start Wednesday on an extended tour of the northwest. He will deliver several addresses in Wyoming and Montana and will visit the Seattle exposition Oct. 12.

THE POPE MUCH BETTER.

Rome, Oct. 4.—The pope had a good night and was much better this morning. He resumed his audiences.

For several days the pope has been indisposed. There was considerable pain and swelling in the leg which indicated a recurrence of gout. The audiences were discontinued yesterday.
