H. WALKER, Worcester, Mass.

KENDALL'S SPAVIN CURE.
The most Successful Remedy ever discovered, as it is certain in its effects and does not blister.
HEAD PROOF BELOW from
Rev. P. N. GRANGER,
Presiding Elder of the St. Albans District.
St. Albans, Vt., Jan. 20th, 1880.
DR. B. J. KENDALL & Co., Gents:—In reply to your letter I will say that my experience with 'Kendall's Spavin Cure' has been entirely satisfactory indeed. Three or four years ago I procured a bottle of your agent, and with it cured a horse of lameness caused by a spavin. Last season my horse became very lame and I turned him out for a few weeks when he became better, but when I put him to the road he grew worse, when I discovered that a ringbone was forming. I procured a bottle of Kendall's Spavin Cure and with less than a bottle cured him so that he is now sound, neither can the bunch be found.
Respectfully yours, P. N. GRANGER.
KENDALL'S SPAVIN CURE is sure in its effects, and in its action as it does not blister, but is penetrating and powerful to reach every deep seated pain or to remove any bony growth or other enlargement, such as spavin, ringbone, curbs, callous, sprains, swellings, sore throat, coughs and all enlargements of the joints or limbs, or rheumatism in man and beast. For all purposes for which a liniment is used for man or beast. It is now known to be the best liniment for man ever used, acting mild but certain in its effects.
Send address for illustrated Circular which will fully give positive proof of its virtues, which has never been met with such unqualified success to our knowledge, for beast as well as man.
Price $1 per bottle, or six bottles for $5. All druggists have it or can get it for you, or it will be sent to any address on receipt of price by the proprietors, DR. B. J. KENDALL & CO., Enosburgh Falls, Vermont.

NEW YORK TRADE.
ROYAL

BAKING POWDER
Absolutely Pure.
This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight, alum or phosphate powders.

FORTY-SEVENTH CONGRESS.

SENATE.

WASHINGTON, 21.—Hoar, from the judiciary committee, reported a substitute for the resolutions and bills on the subject, referred to the committee, in the bill introduced by him last week. It makes the succession to the Presidency pro tem., in the following order, in case the President or Vice-President are removed, die, resign, or are unable to serve: Secretary of State, Secretary of Treasury, Secretary of War, Attorney General, Postmaster General, Secretary of the Navy, Secretary of the Interior; provided such officers are eligible to the Presidency, if they have been appointed with the consent of the Senate. Ordered printed and recommitted.

The Senate, on motion of Conger, took up the House bill to regulate the conveyance of passengers by sea; passed.

A joint resolution appropriating $375,000 voted in 1877 to pay Southern contractors, passed.

The House bill to extend the charters of National banks came up as unfinished business. Hawley temporarily in the chair. The question was upon the eighth section, which provides that banks with $150,000 or less capital shall not be required to deposit bonds in excess of $100,000, as security for their notes.

Allison moved the following as a substitute for the section: That the National banks now organized having a capital of $100,000 or less shall not be required to keep on deposit, or deposit with the United States treasurer bonds in excess of one-third of their capital stock, on security for their circulating notes, and such of these banks having on deposit bonds in excess of that amount are authorized to reduce their circulation by a deposit of lawful money as provided by the law; provided that the amount of such circulating notes shall in no case exceed 90 per cent. of the par value of the bonds deposited as herein provided. The new section further provides for the assessing of banks with the cost of transporting and redeeming their notes.

Voorhees addressed the Senate in a long argument on the national bankrupt system.

Allison's substitute was adopted and a motion to strike out the section as amended was rejected by a vote of 17 to 32.

The ninth and tenth sections in regard to the withdrawal and issue of circulating notes was agreed to.

The eleventh and twelfth are new sections as reported by the financial committee; the first authorizes the refunding of three and a half per cent. in threes, and the other directs the issue of gold certificates. The eleventh section was adopted by yeas 27, nays 2.

It is as follows: That the Secretary of the Treasury is hereby authorized to receive at the Treasury any bonds of the United States bearing three and a half per cent. interest, and to issue in exchange therefor an equal amount of register bonds of the United States of the denomination of $50, $100, $500, $1,000 and $10,000, of such form as he may prescribe, bearing interest at the rate of three per cent. per annum, payable quarterly at the Treasury of the United States. Such bonds shall be exempt from all taxation by or under the State authority and be payable at the pleasure of the United States; provided that the bonds herein authorized shall not be called in and paid so long as any bonds of the United States heretofre issued bearing a higher rate of interest than three per cent., and which shall be redeemable at the pleasure of the United States, shall be outstanding and uncalled. The last of said bonds originally issued and their substitutes under this act, shall be first called in this order of payment and shall be followed until all shall have been paid.

The twelfth section was read. It directs the Secretary of the Treasury to receive deposits of gold coin in sums not less than $20, and issue certificates therefor, in denominations of not less than $20 each, corresponding in denominations with United States notes.

The nomination of D. H. Binney, of Illinois, as associate justice of the Supreme Court of Arizona was confirmed.

The House amendments to the bill for the examination and repeal upon the claims of Texas, California, Oregon and other States, with certain Territories, for indebtedness assumed in repelling the invasion and suppressing Indian hostilities. Concurred in.

The bill appropriating $300,000 for the extension of the Executive Mansion was passed. The extension is to be erected directly south of the present building, similar to it on the exterior and connected with it by broad corridors. Two years is to be required to complete the extension. The occupancy of the present building is not to be interrupted.

The Senate bill for the distribution of a port on of the Fort Henry reservation in Kansas passed.

The House bill to enable the national banks to extend their corporation was taken up; the pending section was that empowering the Secretary of the Treasury to issue gold coin certificates to banks. The pending amendment offered by Cooke directed the issue of silver as well as gold certificates.

Allison moved an amendment which Cooke accepted as a substitute for his own, providing that silver as well as gold certificates may be counted as the lawful reserve of the bank and may be accepted in the settlement of Clearing House balances.

Vest and Beck protested that the new provision should be made mandatory instead of being left to the discretion of the executive officers.

Allison said the silver certificates were by law now receivable for customs, taxes and all public dues.

Hill, of Colorado, addressed the Senate upon the general subject of the coinage of silver in reply to Sherman's suggestions in favor of the suspension of coinage. He (Hill) argued that the policy of the law of 1878 be adhered to and claimed that in reference to the currency, public opinion enjoined on Congress was masterly inactivity; asserting that the coinage would break down the price of silver and in his opinion suspension until the joint action with the other countries could be had meant indefinite suspension, and would be followed by the suspension of India silver coinage. This, he said, was intended by those who advised it, enumerating the benefits flowing from the continuance of silver coinage. He said it would be an important instrumentality in sustaining one of the most important industries of the country in assisting the bi-metallism and in preventing contraction. Discussing the question whether any injury could arise in the way of excluding gold from circulation, he held that this could not be brought about until we had coined between four and five hundred millions of silver. The total amount already coined by the United States is $116,000,000. He carefully reviewed the records of the Department in its dealings with silver, to show that it had uniformly discriminated against that metal and argued that the present production of silver is not more than is demanded by our increase of business and population, and that in a few years by continuing the coinage, silver bullion will be returned to its old value. Reviewing the history of bi-metallism in the several specie paying countries of Europe, and deducting from it the conclusion that no injury can follow to the United States from continuing the silver coinage. He said the claim of the money lenders of the world, that by discontinuing the silver coinage we would force other countries to resume the coinage of silver, is deceptive and designed to bring silver into discredit, and intended to depreciate it to such an extent that it can never again be adopted as money metal. Hill proceeded to urge the important present status, and upon conclusion of his remarks he was warmly congratulated by many Senators.

Without any action on the bill the Senate went into executive session and adjourned.

HOUSE.

WASHINGTON, 21. — Dingley, of Maine, from the committee on banking and currency, reported a bill to provide for the issue of gold certificates; calendar.

Kasson, of Iowa, from the committee on ways and means, reported a bill permitting the use of domestic materials in the construction of steam and sailing vessels for foreign account; calendar.

Also permitting grain bought by Canadian farmers to be ground at mills in the United States adjacent to Canadian territory; calendar.

Updegraff, of Iowa, chairman of the committee on the law respecting the election of President and Vice-President, reported a bill to fix the day for a meeting of electors for President and Vice-President, to provide for and regulate the counting of votes, and to decide questions arising thereon, as a substitute for the Senate bill on the same subject matter, the Speaker having ruled this was a privileged matter.

Rice, of Mass., asked the question for consideration, but the House decided, 75 to 54, to proceed with the consideration of Updegraff's bill. The bill provides that a candidate declared not elected might proceed against his competitor by action in the nature of a *quo warranto*, but could not proceed against him by injunction.

Browne, of Indiana, offered and advocated an amendment striking from the bill the sections providing for the adjudication of the presidential title by a judicial tribunal.

Hammond, of Georgia, opposed the bill, and insisted that it ought to be entitled "a bill to organize hell in the United States.

Hewitt, of New York, while favoring the measure, opposed the sections providing for judicial terms of the nation, and contested presidential election in addresses. Hewitt alluded to the electoral commission of 1877, and said he did not care who chose to disavow the responsibility for the Electoral Commission, he assumed it.

Carlisle, of Kentucky, also opposed the judicial sections while agreeing to other portions of the bill.

Updegraff closed the debate in a brief speech declaring that should the motion made by the gentleman from Indiana (Browne) prevail he would vote against the bill, and the Browne motion was agreed to without a division and the question was received on the adoption of a substitute as amended, and it was rejected; yeas, 93; nays 100.

The question then recurred upon the Senate bill, but the House refused to order it to a third reading and it was recommitted to the committee on law, respecting the election of president and vice-president. Adjourned.

The bill passed authorizing the Rock Island & Southwestern Railroad Co. to construct a bridge across the Mississippi River at New Boston, Ills.

Willetts, of Michigan, from the committee on judiciary, reported a resolution directing the recommital of the bill allowing Nebraska an additional representative. Adopted.

The resolution states that the committee had acted upon an incorrectly certified census report, and gives the committee leave to inquire into the matter.

AMERICAN.

The Tariff Commission.

WASHINGTON, 21.—The Senate in executive session to day, agreed to confirm the tariff commission as nominated. The discussion of the matter in executive session was very brief.

Senators Pendleton, Saulsbury, Beck and Van Wyck made short speeches against the confirmation, and Senators Hoar, Hawley, Brown, of Georgia, and Davis, of West Virginia, spoke with equal brevity in favor of confirming all the nominations. When a vote was reached the Senate stood for confirmation 32, against confirmation 22. Two democrats, Messrs. Brown and Davis, of West Virginia, voted in favor of confirmation and one republican, Senator Van Wyck, of Nevada, against it.

Senator Sewell, who was paired with Senator McPherson, and Senator Frye, who was paired with Hill, of Colorado, voted for the confirmation, claiming that if the gentlemen with whom they were paired were present they also would vote for confirmation.

Several democratic Senators were absent without being paired. Among others was Senator Bayard, who is said to be so disgusted with the votes of the finance committee on the whisky bill that he will have nothing to do with the measures agreed to by that committee.

Reduction.

The republicans to-night agreed to the bill reported from the ways and means committee by Judge Kelley, proposing a reduction of the internal revenue taxation. After striking out from the bill the provision for the removal of the tax on the bank capital and the special license tax on liquor dealers. Considerable feeling was manifested. Representative Page, of California, declared that he would not stand by the action of the caucus unless they would strike from the bill that portion of it which provides for the repeal of the tax on bank deposits. This the caucus refused to do. The bill will be taken up as soon as pending business on the bill for a new library building is out of the way. It was also agreed in the caucus to vote down every amendment offered to the bill except the two above mentioned.

Reimbursement.

The Senate passed the bill appropriating $9,930 to reimburse C. N. Felton, late Assistant Treasurer of the United States at San Francisco, for losses incurred by him in the payment of forged United States disbursing officers checks.

The committee on ways and means reported favorably the bill recently passed by the Senate, authorizing the accounting officers of the Treasury, in settling the accounts of Thomas B. Shannon as Collector of Customs at San Francisco, to credit him with the sum of $4,777, the amount paid out of the sub-treasury at San Francisco upon a draft erroneously signed by him in favor of J. C. Merrill & Co.

Appropriation Bill.

The sundry civil appropriation bill will probably be reported to the House from the appropriation committee next Thursday. The bill has not been finally agreed upon by the committee, but some of its items are in shape. Among them is recommended $60,000 for the Mare Island navy yard, dry dock $25,000, reservoir $80,000, iron plating $3,000; an appropriation of $12,000 for the light-house at Lime Point, and $20,000 for the light-house at San Lobus.

Help.

DES MOINES, 21.—Governor Sherman makes an appeal for contributions for the sufferers by cyclone, to be sent to Hon. John B. Grinnell.

The Cameron Chasm.

HARRISBURG, 21.—In the republican caucus Judge Jessup offered a resolution to the State executive committee to call a new convention, under the new rules to complete the State ticket with full powers to modify the present ticket for the best interests of the republican party of the State. Unless the grievances of the independents were patched up the democrats would carry the Legislature as well as the State. The charge (which he disbelieved), that one man had dictated the nominations, was believed in some quarters, and must be met. He favored a new convention.

Huey, of Philadelphia, spoke similarly. Carnahan opposed the attempt to placate the independents. Fisher wanted to complete the present ticket and sweep the State. McCleary moved a substitute to complete the ticket and recommended the republican State committee to adopt all honorable means to harmonize the party to secure success in November.

On the first ballot Marriet Brosius, of Lancaster, was nominated for Congressman-at-large. The vote was as follows: Brosius, 161; Lilly, 25; Todd, 17; Jacobs, 29. The chair and the members thought it wiser to adopt an amendment requesting the State committee to adopt all honorable means, etc., and it was carried with few dissenting votes. The State committee are empowered to fill vacancies on the ticket.

Appeal for Help.

CHICAGO, 21.—Hon. J. B. Grinnell, of Grinnell, Iowa, is here to solicit aid for the cyclone sufferers in Iowa. He visited a number of citizens and received great encouragement and sympathy and made an address on the change wherein he related briefly the appalling facts about the storm and depicted in strong language the desolation and want of the thrifty town, and in an eloquent manner, appealed to their generosity. J. V. Farwell announced that his check for $1,000 was ready for the committee. President Dunham appointed a committee of of seven to act in concert and to raise funds. The prospects are good for a large subscription.

More Strikers.

The brickmakers of the south side who struck a short time ago and received an advance of 12½ cents per day, notified the employers this afternoon that unless they were given another advance of 12½ cents they would quit work Thursday morning. The manufacturers have a large number of orders on hand and it is thought they will yield. About 3,500 are concerned in the demand.

The Sunken "Escambia."

SAN FRANCISCO, 21.—It proves difficult to obtain much information regarding the loss of the steamer *Escambia*. Owing to the empty water ballast tanks and the coal carried on the deck, the ship was crank on getting out, when she encountered a heavy sea. One of the journals became heated and the engines were stopped, the ship losing headway fell off in the trough of the sea and a wave boarded her, throwing her on her beam ends. All hands rushed on deck and the water began to pour in through the skylight and hatches on deck. Owing to the dangerous position of the ship no one would go below to start the engines and get her head to sea again. She then filled rapidly and sank. The captain, engineer and seven others got into one of the boats and nine men took the lifeboat. The latter boat was full of water and had no oars. The captain supposes that the remainder of the crew, 11 in number, went down with the ship. The captain's boat pulled around in the darkness until about one in the morning, when an attempt was made to land on Ocean Beach. The boat swamped and only four occupants succeeded in reaching land. This morning search was made along the beach for the bodies of the other occupants of the boat, but no trace of them was found. The revenue cutter *Richard Rush* is now out looking for the lifeboat. The *Escambia* had on board a cargo of wheat valued at $90,000, fully insured. The ship is believed to be insured in Liverpool. It is stated that it is the custom to empty the water tanks on loading and coal is used to fill the tanks to preserve stability. The general impression is that the disaster was due to piling coal on the deck.

Consumed by Lightning.

BRADFORD, Pa., 21.—Lightning struck two tanks of oil of 55,000 barrels capacity, and set them on fire; 165 other tanks are now in danger.

Fatal Fire.

The big tanks and 6,000 barrels of oil burned at the Anchor Oil Company's well at Cherry Grove this evening. Ed. Gibson was burned to death, and John Hughes was seriously burned at the fire.

Close Shooting.

HOUSTON, Tex., 21.—In a scrimmage to-day, Chas. F. Witham was killed by a negro. Deputy marshal Glass was shot through the shoulder and neck, a colored boy was killed by a stray bullet, and a negro named Spencer was shot in the back.

Carelessly Killed.

BALTIMORE, 21.—A caving earth bank killed three men and injured two seriously at Mt. Vernon.

New Albany, Ind., 21. — Two children of Joe Snyder were fatally injured by an explosion of wet gunpowder which Snyder placed near the fire to dry.

Marion, O., 21.—A defective boiler on a farm exploded this afternoon, killing two men and fatally scalding another.

Democratic Convention.

SAN FRANCISCO, 21.—The democratic State convention this morning received the reports of the committee of the temporary organization and were made permanent.

Lost on the Lake.

DETROIT, Mich., 21.—The barque *Norway* was cut loose from the tug *Wood*, in a gale on Sunday night on Lake Huron, and her whereabouts since unknown. She had a crew of four men.

Wool.

NEW YORK, 21.—The wool market is generally unchanged. In California very little has been done. The best northern spring is held firm at 30 to 35c.
