NEWS OF THE WEST.

Died from Drinking Whisky and Camphor.

A PORTLAND OFFICIAL'S DOWNFALL.

"Society" Horse Kill[illegible]

Acid [illegible]

Chinese Society Row.

George Noble of Washington, D. C., died suddenly on Monday evening while bathing in a pool in Glenwood Springs, Colorado.

Omaha Stockmen, June 28: [illegible] Beauchamp of Cathay, Wyo., and J. Jenson of Wahatch, Utah, purchased a double-deck car at sheep each.

Wong Chee, a leading tobacco[illegible] and quite a celebrity in some circles, was shot by a member of a rival Chinese society at Los Angeles, Cal., Monday night and fatally wounded. The shooting is said to have grown out of a long-standing feud between the Bing On and Hop Sing societies.

Antonio Martinez, an aged Mexican, died at Ellwanza, Cal., Monday night from the effects of a quantity of camphor and whisky taken on a bet. The camphor gum had been dissolved in the liquor, and the Mexican, who had been drinking and was crazed with liquor, consumed a quart of the mixture. He was found dead in the morning.

Kate Powers, a woman about 45 years of age, who was employed as a domestic at the home of Mrs. Gunzing in Los Angeles, Cal., was found dead in her Tuesday morning. An inquest was held and the jury decided that she had been accidentally asphyxiated. It appears that in some manner the gas room was pushed against the gas jet and turned on the current.

About midnight Monday night a terrific explosion startled the people of San Jose, Cal. An investigation showed that something had blown up in the Evening News office on the second floor of the Columbia building. The force of the concussion blew a hole in the roof and also ran through the floor. What it was that exploded is not known. The whole thing is a mystery. The loss to the machinery and the building is $5,000.

Frankie Broderick, a quadroon woman, Monday afternoon fully identified the burglar killed by Detective Bradish on Saturday night at Los Angeles, California, as "Scotty" Burns. The woman said she had known "Scotty" about years, the latter having attended school together at Union, Cal. The burglar's right name, she said, was Charles McPherson, and at the time of his death he was 25 years of age. At one time he lived in Salt Lake City, and was well known in police circles.

Saratoga, Wyoming, Sun: We are in receipt of a letter from Foster Kearns, of Beaver Creek, saying he has struck oil in a well on his ranch. It seems he sunk a well on his place to obtain water for domestic purposes. At a depth of five feet he struck an alkali cause of water, but it is so strongly impregnated with oil that it cannot be used. He says he has found on his place, in the past few days, great deposits of oil, and requests to be informed if any one contemplating with such matters comes his way.

Glenwood Springs, Colo., Avalanche: Harlan Gardener Jackson Sampson's wife, who lives half a mile from town, got pretty badly hurt Monday evening. Some of her dogs on coming home, she set out to hunt them about nine o'clock. She went up on the Mesa, and on returning she stumbled over some rocks, and rolling down her neck was cut, several teeth were knocked out, and her body was badly bruised. With a great effort she managed to reach home. Medical aid for her wounds that she is confined to her bed.

A dispatch from Bisbee, Arizona, says: An important discovery was made in heliograph signaling between the Bisbee and San Bernardino stations, over forty miles. It has been the accepted theory that it was impossible to flash heliograph signals across a stretch of country if there was any precipitation between the two instruments. This theory has been exploded, as a message was sent between those two stations during a heavy rainfall, which was so dense as to obliterate every vestige of the hills on which the receiving station is located. Of course both stands had full sunlight during the time. The piercing of the rain storm with the flash is an important discovery, which is credited to Sergeant Gordon, in charge of the station.

George F. McConnell, grand keeper of records and seals of the Knights of Pythias, residing in Portland, Oregon, is a defaulter to the extent of $3,000 and a fugitive from justice. McConnell has been missing since last Tuesday, and it is thought he has gone to his former home in Canada, having to escape extradition. The first intimation of McConnell's peculations came to light last October. During a meeting of the grand lodge the annual account was made that the reports of the grand officers would be received in the afternoon. During the recess hours Mr. McConnell confessed to his intimate friends that he had embezzled about $800 of lodge funds. He claimed that circumstances compelled him to violate his fiduciary trust. He promised, if granted immunity from prosecution and given another chance, to forswear drink and make good the amount of the theft. Under such a plea his friends prevented an exposure and gave personal notes to cover the shortage discovered, and McConnell was reelected. To guard against further defalcation an article was added to the constitution providing that all subordinate lodges from that time on should remit to the grand master of the exchequer instead of to the grand keeper of records and seals. After the former retain $50 a month of the latter's salary till the defalcation was wiped out. McConnell made no effort to mend his ways after so much money was vouchsafed him, but he is in his course. A week ago he disappeared, and the supposition is that he has gone to his former home in Canada, realizing that exposure of his defalcation might consign him to the penitentiary. Steps are being taken to have him extradited from the British provinces should he be found. His family are yet at Portland, and his wife is heartbroken over her husband's criminal delinquency.

ROOF FOR A HAYSTACK.

A Novel Roof That Is Easily Erected and Conveniently Stored.

Where it is necessary to build stacks of either hay or grain it is sometimes desirable to make them larger than is practicable in the ordinary round form. We do that they are often built in an elongated shape, with straight sides, the top curved up to a ridge instead of to a point, and hence, from their form, called "haymocks." Frequently from 25 to 50 tons are thus stored in one stack. The advantage of this method is that in proportion to the amount of hay stored there is less surface exposed to the elements than would be the case were the same amount built into several round stacks.

There is, however, always difficulty in locking the straight sides of such a stack, which is slope to the ridge, so precise that it will completely protect the contents during a prolonged rainy season. Such a roof is frequently seen in the early fall. Various ways of securing the tops have been tried, such as daubing with straw and roofing with boards. The latter is considered best by a Monmouthshire farmer, who tells the Rural New Yorker of his device for fastening the boards together in a way that they can be readily removed and stored for one season. He fastens them with hooks and eyes. These, made of wire and attached to shingles that were directly into the wood, may now be purchased very cheap by the dozen at any hardware store.

Use good pine boards, 16 feet in length. A board of the same thickness should be securely nailed, with long wire nails, directly against each end of the boards to secure them against checking and warping. The ridge is made by securely nailing together two boards. On the lower edge of each of these fasten two of the boards. When they are placed in position on top of the stack, turn the next boards under the edges of these so that they shall lap one inch and insert the eye, which is a small ring with a screw shank, on the right distance from the hook. When all the boards are thus fastened in place by being hooked together, they form a symmetrical stack roof, but one which is flexible on its fastenings, so that it will be close to the hay or grain and which cannot get under it to lift it off. Its great superiority consists in the ease with which it may be unhooked and taken down, one board at a time, and stored for use year after year. In the east have repudiated from a rural New Yorker is represented a barn stack treated in this way. Where large amounts are stored, two and sometimes several lengths of roofing are used. In this case only one length is taken off at a time as the stack is removed or threshed. It can be cut down in sections with a hay knife, and thus only a small portion at a time is exposed to the chances of bad weather.

Feeding Sheaf Wheat.

It is learned from a bulletin issued by the Oregon station: 1. That steers will not gain as rapidly on sheaf wheat as when fed on ground grain. 2. That the animals do not relish the sheaf wheat. 3. It costs more to make 100 pounds of gain in live weight on sheaf wheat than on ground grain. 4. The difference under all ordinary circumstances is sufficient to pay for threshing and grinding. 5. The animals cannot be as well matured on wheat in the sheaf as when fed ground grain; hence a less price will be received for the finished product. 6. The same objections to feeding grain in the sheaf, mentioned under pig feeding experiments, will hold true when feeding steers. 7. Better results can be obtained by feeding sheaf wheat to steers than to pigs. 8. Much of the grain consumed is not digested. It has a tendency to scour the animals.

Let The Whole World Know The Good Dr. Miles' Heart Cure Does

HEART DISEASE has an victim at a fearful rate. Scarcely a month passes but some disease is invariably added to the previous homage well-informed, the patient succumbs, and with a terrible heart-rending wail, the spirit takes flight. For what a cure remedy is found, so universally effective, after repeated suffering, that it is no longer a question of life or death, but a question of how soon Dr. Miles' Heart Cure can be obtained. Years Washington, of Kansas, writes: "I desire to let the whole world know what Dr. Miles' Heart Cure has done for me. For two years I had pain in my heart, shortness of breath, palpitation, pain in my left side, numbness and feeling in my arm, weak and hungry spells, bad dreams, could not lie on either side, was much and seriously troubled. I took Dr. Miles' Heart Cure and before I finished the second bottle I felt its good effects. I feel now that I am fully recovered, and that Dr. Miles' Heart Cure saved my life."

Dr. Miles' Heart Cure is sold on guarantee that first bottle benefits, or money refunded.

Dr. Miles' Heart Cure Restores Health.

For sale by all druggists.

Waverley BICYCLES.

COVER THE EARTH

THEY ARE THE

Highest of all High Grades

And to prove this claim we ask you to compare the "Waverley" in detail, with any high grade you select on the market. Ask any "Waverley" rider about his wheel and then ride one yourself. That is the test.

Remember that it takes only $85.00 to buy a "WAVERLEY." An opportunity to save $15.00 is worth investigating, isn't it? Please call and see our '96 models.

Cobwebs

are usually a sign that a woman has more than enough to do; that all her time and strength are utilized in doing heavy work; that she also uses GOLD DUST WASHING POWDER. If she did use this great cleaner, her heavy work would be so lightened that the little things would be neglected.

GOLD DUST WASHING POWDER

gives a woman time to rest, time to go, time to read, and time to sew. Every housewife should have a supply of this great help.
