CONGRESSIONAL.

SENATE.

Trumbull referred to Conkling's resolution, asking the President for information as to the number of recommendations to office by the Senators from New York, Illinois, Missouri and Nebraska, and expressed surprise that the mover had not called it up. Frelinghuysen explained that Conkling had promised Morton not to call it up in his absence. Trumbull gave notice of an amendment to the resolution by Conkling, requesting the President to furnish a copy of the record or list kept at the departments, showing the appointments or removals which have been credited or charged to each of the Senators.

HOUSE.

The bill to authorize the secretary of the interior to negotiate with the Ute Indians to extinguish their right to South Pass, passed.

The bill for the payment of $100 bounty to soldiers and their widows and orphans, who served prior to the 22nd of July, 1861, was taken up and amended to apply to soldiers mustered previous to the 6th of August, 1861, and passed.

Dawes made a statement showing how the balance sheet of the treasury is constantly changed by each day's legislation of Congress. He estimated the amount necessary for the expenses of the government, for the coming year without debt at $273,000,000. The house had already added to that, taking only the appropriations passed, a sum sufficient to swell it to $299,600,000. There were but four principal sources of revenue, customs, internal revenue, public lands and miscellaneous sources. That from lands was now at an end in consequence of the bill passed by the house devoting them to educational purposes. The secretary of the treasury estimated the customs at $232,000,000, but from which must be deducted the $19,000,000 of duties to be deducted from tea and coffee; and $1,000,000 for duties from coal and salt. The estimates of the revenue are $144,000,000, but from that should be deducted the income and corporation tax, which would reduce the receipts from internal revenue to $114,000,000 He places the aggregate receipts at $317,000,000, against $299,600,000 of expenditures, leaving a balance of $18,000,000. Without having paid a dollar of the public debt except interest. If the revenue is not increased beyond the estimates, or the expenditures not brought down, it will be necessary for government to borrow $10,000,000 to pay the interest fund. this will be the result of four years' administration, the first three of which had paid $360,000,000 of the public debt.

Kelly declared Dawes had based his speech on facts that had been already ignored by the events of the treasury. The estimated receipts for the year were $365,000,000, but the receipts for the first six months were $187,309,000, without the collection of the income tax, and he believed the revenue for the year would be little short of $400,000,000. He expected the income this year would be from $70,000,000 to $80,000,000, in excess of the estimates of expenditures.

Burchard spoke in corroboration of Dawes, and feared the extravagant appropriations might result in bankrupting the treasury. The house soon after adjourned.

EASTERN DISPATCHES.

WASHINGTON, 8.—The President will give a dinner next Wednesday to the Japanese Embassy.

MACHIAS, Me., 8.—The house of captain James Bryant, of Machias port, was burned to-day. The captain, his wife and two granddaughters were burned to death.

NEW YORK, 8.—An immense crowd filled the court room this forenoon to hear Garvey's testimony in the Hall case. Counsel for the defense concluded his argument against the admission of testimony of the fraudulent character of the bills upon which the warrants were issued, and Judge Daly decided to admit the question. Garvey thereupon testified that the claim paid him was neither just nor honest, and said he had fraudulently received large sums of money, a portion of which went to Tweed to be used for political purposes.

Garvey testified that his whole bill was $264,660, but as he was to give $126,000 to other people he made out a fraudulent bill for $395,660, of which Tweed got $50,000, for political purposes; and otherwise disclosed his unblushing rascality.

CHICAGO, 8.—Fully nine inches of snow fell here yesterday and last night, and there has been a drizzling rain this morning. The storm is reported very heavy through Wisconsin, where the lumbermen hail it with great satisfaction, as it affords a prospect of freshets to enable them to drive the logs out of the rivers.

The storm about noon appeared to cease, but came again at four p.m., and since has raged with undiminished violence, snowing and sleeting alternately. The sleet and snow were very severe on the telegraph lines; none would work in any direction, and most of the western lines temporarily failed.

A Washington special says that the President has intimated to U. S. Attorney Bates, of Utah, that his resignation will be accepted, but that Bates' friends urge him to decline and await a removal, so that his reasons may be made public.

CEDAR RAPIDS, Iowa, 8.—Last night some person fired into a party of people coming from a social at the house of the Rev. A. B. Kendig, hitting one and inflicting a serious wound in the knee.

At noon to-day, J. Levi held a pistol in his hands in a playful manner, and pointed it at his body, saying, "Here goes for my life!" It proved to be loaded, and the ball entered his side below the heart. The wound is probably mortal.

NEW YORK, 8.—The city editor of the *Tribune* was assaulted this evening in the office, by Joel A. Falchion, son-in-law of comptroller Connolly. Falchion was angered at an article in the *Tribune*. A warrant is issued for his arrest.

WESTERN DISPATCHES.

SAN FRANCISCO, 8.—Samuel Spiller was the name of the German who shot himself in the Alaska hotel. He arrived here a few days since from Cincinnati.

At a meeting of French citizens last night, to raise funds by contributions towards paying off the German war indemnity, $1,174.75 was raised and paid. A monthly subscription was made, sufficient to bring in $25,000 more in six months. They also contributed $185 for a floral tribute to the ladies of Alsace and Lorraine who originated the movement.

The Prussian uniforms and needle guns for arming the Dutch guard, has arrived from Germany by the *Alaska*. The uniforms were a present from the Emperor William.

The jury in the twelfth district court, in the case of Ah. Lee, indicted for murder for killing a countryman in Murderer's alley, returned a verdict of not guilty this evening, it being shown the killing was in self-defence.

EUROPEAN.

LONDON, 8.—The medical commissioners find O'Connor, the assailant of the Queen, sane but an enthusiastic Fenian. O'Connor says he used an unloaded pistol because he only wanted to frighten the Queen to sign, as her death would bring Wales on the throne, an event the prisoner did not desire.

PARIS, 8.—The payment of two milliards of the indemnity, with interest to date on the remaining three milliards, was completed yesterday at Strasburg. This gives France entire control of six departments, in which she is allowed to maintain a large military force.

Correspondence.

FREEPORT, Long Island,
Jan. 22, 1872.

Elder Angus M. Cannon:

Dear Brother.—After a ramble of several thousand miles through the States of Iowa, Illinois, Ohio, Pennsylvania, New Jersey and New York, I now find myself on Long Island. I came here from New York last Thursday, and have enjoyed myself greatly since then.

Since bidding you good bye last fall, I have talked "Mormonism" considerably, and answered a great many questions in regard to Utah and her people. I have only held two public meetings, in which Elder Bushman and myself bore testimony to the truth of "Mormonism," the divine mission of Joseph Smith, the authenticity of the Book of Mormon, &c. We were listened to attentively, and the spirit of God rested mightily upon us. After meeting, several gentlemen came forward to subscribe for the Book of Mormon.

I have been without a traveling companion most of the time, having only met three of our Elders before coming here. I have had a very good time thus far, and hope to do some good in allaying prejudice by giving correct information. You are aware, of course, that the press do not have as much to say about Utah as a while back. The Mormon problem is not as easily solved as they have thought. Whenever opportunity permits I tell the people the kingdom of God is established, and the quicker they make friends with God and his people the better it will be for them.

I am happy to say I have met a great many gentlemed and ladies of intelligence and refinement who are not religious bigots, and have been treated very courteously by them.

Mrs. Benedict and son, Dr. Danton, are here for the winter. The latter and myself visited lately several families in this locality belonging to the church. They are very good people, but cannot gather to Zion at present.

Respectfully, B. B BITNER.

Milk in Typhoid and Scarlet Fever.

A writer communicates to the *Medical Times and Gazette* a statement of the value of milk in twenty-six cases of typhoid fevers in every one of which its great value was apparent. It checks diarrhœa, and nourishes and cools the body. People suffering from disease require food quite as much as those in health, and much more so in certain diseases, where there is rapid waste of the system. Frequently all ordinary food in certain diseases is rejected by the stomach, and even loathed by the patient; but nature, ever beneficent, has furnished a food that in all diseases is beneficial—in some directly curative. Such a food is milk. The writer in the journal quoted, Dr. Alexander Yale, after giving particular observations upon the above mentioned, viz., its action in checking diarrhœa, its nourishing properties, and its action in cooling the body, says: "We believe that milk nourishes in fever, promotes sleep, wards off delirium, and, in fine, is the *sine qua non* in typhoid fever."

We have also lately tested the value of milk in scarlet fever, and learn that it is now recommended by the medical faculty in all cases of this often distressing children's disease. Give all the milk the patient will take; even during the period of the greatest fever, it keeps up the strength of the patient, acts well upon the stomach, and is every way a blessed thing in this sickness. Parents remember it and not fear to give if your dear ones are afflicted with this disease.—*Vermont Watchman.*

Decadence of Spain.

The Florentine King of Spain is evidently preparing for abdication or for flight, and we must own we are in no degree surprised by it, as the country appears to be in a state of hopeless decay. The proclamation of a Republic at the time when Isabella fled might have revived the nation's energies, but the other European Governments probably in secret opposed the movement, and our President, unhappily for his own fame as well as the influence of America, neglected the decisive opportunity of declaring that he would gladly have welcomed one, and thus established the weight of our opinion throughout the world without firing a gun or striking a solitary blow. As it is, the once splendid domain of Charles V., when he gave laws to Europe, is now reduced to a condition worse than when invaded by the Romans, upwards of twenty centuries ago. Then it contained a population of 80,000,000. The devastations of the Cæsars afterwards reduced it one-half in population, but now it numbers only 17,000,000, and most of its inhabitants are without industry or without energy. What the result will be, it is impossible to foretell. The adoption of republican government yet might possibly restore its lost vitality, but we shall probably only witness a return of royalty and legitimacy, which will plunge it into additional decrepitude.—*New York Star.*

140,000

SINGER SEWING MACHINES

WERE SOLD WITHIN THE PAST YEAR.—*Scientific American*, June 10, 1871.

The Singer Manufacturing Company,

AT THE WORLD'S FAIR

—Constituted by the homes of the people—

Received the Great Award of the Highest ales and have left all rivals far behind them, for they

Sold in 1870 127,833 Machines!

SEWING MACHINE SALES FOR 1870.

"The magnitude to which the manufacture of Sewing Machines has attained is shown by the "SWORN" returns (to which any one can have access) of the manufacturers for the year 1870 to the owners of the leading patents, on which they pay a royalty. According to these returns the number of machines sold by each manufacturer in 1870 is as follows:

The Singer	127,833	Florence	17,000
Wheeler & Wilson	83,218	Gold Medal	8,913
Howe	75,156	Ætna	5,806
Grover & Baker	57,402	Empire	3,560
Weed	35,002	Finkle & Lyon	2,620
Wilcox & Gibbs	28,880	Parham	1,700
American Suttonhole & Overseaming	14,573	Wilson	500

And several other companies who sold a few Machines.

It will be seen by this table that the popularity of the Singer Machine far exceeds that of all others, their sale being one-half greater than even that of the famous "Wheeler & Wilson" machine. This is owing to the fact that the Singer Company have lately commenced making, besides their old and well-established manufacturing machine, what is known as their "New Family Machine," which is selling at the rate of nine to one better than their old style." Their total sales for 1869 were 83,781 machines against the 127,833 of 1870, showing an increase of one-half in the latter year."—*New York Sun.*

One-half of our Gigantic Sales, now nearly;

THREE-QUARTERS OF A MILLION

Machines Sold,

AND ALL IN PRACTICAL USE, WERE MADE WITHIN THE PAST THREE YEARS!

But the greatest increase of our Sales over all other Machines, being within the past year This is incontestible proof that

Our Machines are the Best in the World!

The New Family Singer Sewing Machine,

With Attachments for All Kinds of Work,

Is fast winning supreme favor in the household, as shown by the rapidly increasing sales, over all other machines.

This New Family Machine is now capable of a range and variety of work such as was only recently thought impossible to perform by machinery. We claim and can show that it is the cheapest, most beautiful, delicately arranged, nicely adjusted, easily operated, speedy and smoothly running of all the Family Sewing Machines. It is remarkable not only for the range and variety of its sewing, but also for the variety and different kinds of texture which it will sew with equal facility and perfection, using silk twist, linen or cotton thread, fine or coarse, making the Interlocked-elastic-stitch, alike on both sides of the fabric sewn: the only stitch which is universally approved, or is at all adapted to first-class work. Tuns, beaver cloth, or leather may be sewn with great strength and uniformity of stitch, and, in a moment this willing and never-wearying instrument may be adjusted for fine work on gauze or consumer tissue, or the tucking of tarlatan, or ruffling, or almost any other work—even by a child—which delicate fingers have been known to perform. Even the careless and thoughtless have little or no trouble on this machine.

Send for Descriptive and Price Circulars.

We manufacture our own needles, silk and twist; furnish linen and cotton thread and oil—all of superior quality—but which can be relied on only when obtained through our Principal or Branch Offices, or Agencies.

Other Sewing Machines Repaired on Reasonable Terms!

We Guarantee every Machine we sell to give entire satisfaction!

MACHINES DELIVERED FREE THROUGHOUT THE CITY.

Terms to Suit All.

We extend a cordial invitation to all to come and see the Machines, whether they wish to buy or not. See all others, but do not buy without you examine the SINGER.

Visitors always politely attended by competent attendants. Instruction free. All Machines perfectly adjusted before delivery at the
