IN MINING CIRCLES.

Return of Senator James A. Pollock From The East

BULLISH PERVADES THE NATION.

A Probable Visit It Will Remain So Until After the Great Election.

Special to the Deseret News.

Mr. James A. Pollock, one of Salt Lake's foremost stock brokers, returned from the East yesterday afternoon after an absence of about four months.

He was found at his office today and to a News reporter he stated that his trip had been a pleasant one, although taken in quest of hot health. His time had been spent in New York and New Jersey, where the gold sentiment was very strong and nearly all were holding up hopes that McKinley would be elected in the coming great campaign. "The McKinley element," said Mr. Pollock, "is very much in evidence in that part of the country, in fact more so than any place in the West would possibly imagine. Of course the people with whom I mingled were mostly bankers and brokers from Wall street and they have always been known to be in favor of the single gold standard."

Mr. Pollock reports business in the East very similar to the condition which now exists in the West, and says that throughout the entire Union, matters are very, very quiet, the same. No new manufacturing concerns are being started in and very little speculation is indulged in. This state of affairs generally exists in the year of the Presidential election, although not to such a great extent as at present. The money question is the all-absorbing theme, and until the financial policy of the nation is determined, matters of business will remain practically at a standstill.

In speaking of the condition of the local mining stock market, Mr. Pollock felt assigned to be being a natural consequence. It was nothing more nor less than he expected as speculation and trading were at present entirely out of the question.

When Mr. Pollock left for the East he was suffering from a very severe attack of illness, but through proper medical treatment, he now feels that he is once more himself again. Besides, he says, you can't kill a Western man.

NEWS FROM SILVER.

The Lower Mammoth Company's Silver Paper and a Mill for the North Star.

Special Correspondence of the News.

EUREKA, Aug. 24, 1896.—The Eureka Hill mill has not been working to its full capacity during the last few days on account of the scarcity of water, the supply being too small to allow the full working of the great mill, and instead of a thousand stamps being at work there are now only forty. The company has been compelled to lay by large quantities of rock until more off through the tap sufficiency of water.

MAMMOTH TO THE FRONT.

Mammoth is last coming to the front as an up-to-date mining camp. Some 3 or 4 years elapsed of the silver day for no one than $100 per ton, and last week a printing press and one car load of type, etc., arrived. Now we understand the enterprising publishers of the Eureka Democrat, known as Leader and Dicks, are going to publish an independent weekly paper, which will go point blank for free silver and for a wide column folio. It will deal specially with and cater to all the news of Juab county and give some valuable information concerning the great gold and silver mines of Utah. It is hoped that Messrs. Leader and Dicks will be successful in this new venture.

TURNING TO THE CORE.

Mr. Harry Joseph, interpreter for Salt Lake county, is at his home south and is taking advantage of some of the great mines of Mammoth and the district.

Mr. Hyes, who is largely owner of with the Alice Copperopolis claim, visited the property yesterday in company with our Salt Lake gentlemen, and will return to the city tomorrow.

DIAMOND IN SHOWING.

The little camp of Diamond is growing considerably and is looking more like a mining community day. There is now considerable ore and one tailoring in the camp, and quite a number of prospectors are developing their ownership claims. We shall hear big things from this quarter, and some of some good paying propositions being opened up.

THE LOWER MAMMOTH.

There is a strong company at work on the property known as the Lower Mammoth, just a little south of the great Mammoth mine. The Lower Mammoth Mining company was incorporated a few weeks ago with 1,000,000 shares at the par value of $1 per share. J. F. Woolnough is president, John Rigby, vice president, M. McCurdy, treasurer. The board of directors are Messrs. Barnett, Kimball, Judge J. Parker, Lewis Morris and Frank Atkins, who is superintendent of the mine.

The company is moving good headway in the mine, the shaft is now over 275 feet in depth, and the ledge which is now in show up to the paying quantities in the near future. The company has fairly disposed of a thousand shares to some seventy parties at 50 cents per share. Without doubt this is a good proposition as the mine has every indication of being the best paying concerns in the Tintic district.

A FORTY STAMP MILL.

It is reported that the North Star Mining company which owns the front some time since is going to construct a mill over at Silver City, the capacity of which will be forty stamps, should this forty-stamp mill be erected it will be the means of several other mills starting up at Silver city, and then the great Mercur camp will be treated outright. The North Star will make a shipment of two car loads of flotation ore this week.

The bunchers of the Dragon mine are so small very lazy and will ship about forty carloads this week.

TODAY'S CALL.

Another Day Of Nothingness On the Stock Exchange.

The rain and tears succeeded in the pit of the stock exchange today only to go through the same figurative as of yesterday. Not a state of stock changes taking place, thus again emphasizing the extreme dullness of the local mining stock market.

The closing figures were as follows:
