MINERAL RESOURCES

Aggregate Value of the Product in This Country for 1893.

THE SMALLEST IN FIVE YEARS.

Increase Noted in Gold and Silver But Decrease in Iron, Copper, Lead and Zinc.

WASHINGTON, May 8.—The report on mineral resources for 1893, compiled at the United States mineralogical survey under the supervision of Dr. David T. Day is completed. It shows an aggregate valuation for the product of $[illegible], of which $[illegible] represents the non-metallic product and $[illegible] the metallic product, with an unspecified product of $[illegible]. The product is the smallest for any year since 1889, and is an aggregate decline of over $75,000,000 from the previous year.

The principal feature is the falling off in pig iron, which showed a reduction of more than $40,000,000 in value—about 2,000,000 long tons in production. Both gold and silver increased in production. The increase in gold was $[illegible] in valuation, and $1[illegible] in production. Silver increased 5,000,000 troy ounces with an increase in valuation of $2,[illegible] based on its coining value of $1.29 per fine ounce. Copper decreased in production about 10,000,000 pounds and nearly $[illegible] in value. Lead decreased almost 50,000 tons or $5,000,000. Zinc decreased about 9,000 short tons and almost $[illegible] in valuation. Aluminum increased about [illegible] pounds at $14,000. Nickel has fallen off nearly 40 per cent in quantity and over that percentage in the value of the product. Bituminous coal increased [illegible] long tons, but decreased $7,[illegible] in values. Pennsylvania anthracite increased 1,[illegible] long tons and $[illegible] in value. Building stone showed about $15,[illegible] and lime $4,000,000 in value. The largest gain in production was in petroleum, which increased $5,000,000 in valuation of the product. Natural gas increased $500,000 and mineral waters $[illegible]. Resulting from the decline in the production of pig iron, the production of lime slack for iron fell decreased 1,200,000 long tons and cost $1,000,000 in value. Phosphate rock production increased 240,000 long tons and over $600,000 in value.

THE FIGURES.

Pig iron, 7,124,802 long tons, $84,[illegible]; Silver, 60,000,000 troy ounces, $[illegible]; Gold, 1,126,031 troy ounces, $23,260,000. Copper, 307,316,[illegible] pounds, $32,554,601. Lead, 155,[illegible] short tons, $11,[illegible]. Zinc, [illegible] short tons, $[illegible]. Quicksilver, 30,[illegible] flasks, $1,109,327. Aluminum, [illegible] pounds, $[illegible]. Antimony, [illegible] short tons, $45,000. Nickel, 149,[illegible] pounds, $[illegible]. Tin, 9,938 pounds, $1,[illegible]. Platinum, 15 troy ounces, $1,[illegible]. Bituminous coal, 1,114,527,[illegible] long tons, $127,687,070. Penna. anthracite, 46,170,000 long tons, $[illegible]. Lime, 10,000,000 barrels, $[illegible]. Building stone, value $[illegible]. Petroleum, 45,414,000 barrels, $[illegible]. Natural gas, value $14,[illegible]. Fire clay, except potters clay, value $[illegible]. Cement, 4,000,000 barrels, $[illegible]. Mineral waters, 23,[illegible] gallons sold, $1,[illegible]. Phosphate rock, 842,351 long tons, $4,142,[illegible]. Iron ore, 11,357,178 barrels, $[illegible]. Lime stone for iron flux, 3,[illegible] long tons, $[illegible]. Zinc, white, 24,000 short tons, $1,[illegible]. Potters clay, [illegible] long tons, $[illegible]. Gypsum, [illegible] short tons, $[illegible]. Barite, [illegible] pounds, $[illegible]. Mineral paints, 97,718 long tons, $[illegible]. Sulphur, 1,[illegible] short tons, $42,000. Asbestos, 19 short tons, valued at $[illegible].

Office Force Unknown.

LONDON, May 8.—Mr. Donaldson Smith, of Philadelphia, who explored Somaliland, on the African coast of the Gulf of Aden, in 1893, starts on June 15 on a scientific expedition to the unknown region between 200 miles west of Berbera, a town on the coast, and Lake Rudolph, where traces of original civilization are believed to exist. Mr. Smith will be accompanied by Gilman, the explorer.

Editors on Trial.

BERLIN, May 8.—The trial of the nine editors of newspapers charged with calumniating the police upon the occasion of the meeting of the unemployed at Friedrichshain, a suburb of Berlin, in January last, when the police were accused of brutality, was commenced today. Forty witnesses have been summoned.

Explosion at Rome.

ROME, May 8.—A bomb was exploded tonight at the entrance of Prince Colonna's palace, in the Esquiline quarter. No damage was done to the palace.

TO INVESTIGATE.

Nelson's Resolution on the Labor Situation.

WASHINGTON, D. C., May 8.—Chairman McEttrick of the House committee on labor has completed the final draft of the joint resolution for a congressional investigation of the industrial unrest, and incidentally of the Coxey army movement. It will be presented to the labor committee tomorrow. It is as follows:

Resolved, By the Senate and House of Representatives, that a joint committee be appointed, consisting of three senators, to be appointed by the President of the Senate, and four representatives to be appointed by the Speaker of the House, whose duty it shall be to investigate and report within thirty days the cause of the industrial depression now existing in so many districts throughout the country, and what legislation will remove and prevent the industrial and financial conditions that will offer opportunity, permanent and remunerative employment to the citizens of the United States.

Reductions in Freight Rates.

CHICAGO, Ill., May 8.—The lines in the Western Freight association went on the interstate with an ax, and by the time they had finished their work there was no much left of the rates between Chicago and the Missouri river, and between the Mississippi and Missouri rivers.

The freight rates of all classes were cut squarely in half, the reduction being 50 per cent of the rates in effect yesterday. The cause for the reduction is said to be the Missouri Pacific road, which some time ago declined to enter the agreement of the other lines to maintain rates, and which has, it is claimed, been cutting rates without regard to the tariffs in effect on the lines of the Western Freight association. The present reductions are made with the object of bringing the Missouri Pacific to time and compelling it to maintain rates. The rates put in after today apply not only between Chicago and the Missouri river, but from all points on the Mississippi river to all points on the Missouri river as well.

A Crop Bulletin.

WASHINGTON, May 8.—The weather bureau in its report of weather crop conditions for the week ended May 7, says the week was warm and the weather conditions favorable for growing crops in all sections of the country east of the Rocky mountains. The week was cool on the Pacific coast, except over the interior valleys, where heat and dry weather proved unfavorable to hay, grain and pastures.

There is ample moisture in the spring wheat region and in the states of the Missouri valley. There was a total absence of rain in California and only light showers on the North Pacific coast. There is slight deficiency of rainfall in portions of Nebraska, Kansas and western Texas.

In California the season has been unusually dry and small grains and pastures have been very much damaged by drought, but the North Pacific states have been more favored and there has been a slight excess of rainfall over Washington and Oregon.

THE "ARMY" BURLESQUE.

Possible Fine and Imprisonment for the Convicted Leaders.

"Colonels" Decamp With Funds—Stealing a Horse & Rig Grand Train in Colorado.

WASHINGTON, May 8.—Two weeks may elapse, during which the convicted commonwealers will be free on bail, before a motion for a new trial is argued and decided. The penalty provided by the law is the same for each offense, viz. a fine not to exceed $100 and imprisonment in jail for not more than sixty days, or both, within the discretion of the court. Accordingly the punishment which may be meted out to Coxey and Browne is $200 and 120 days, while Jones is subject to $100 and sixty days.

By a curious Congressional error in a recent bill which merged and the district courts, there is no appellate court to which a police court case can be carried. The only method of appealing from Judge Miller's sentence will be by an application to a higher court for writs of habeas corpus and certiorari. Attorney Edgemont has announced he will take this step if Judge Miller overrules the motion for a new trial. However, such a petition will not operate as a stay of judgment to keep the defendants from serving their sentences while it is pending.

SHOOTS WITH THE PUMA.

SACRAMENTO, May 8.—The industrial army camped at Sutter's fort expected to move eastward on a train at 4 o'clock this evening, but was disappointed, as "Colonel" Carpenter, alias Inman, and Captain Logan, custodians of funds amounting to about $300, cannot be found. It is thought they have decamped.

ON A BUCKING BRONCHO.

SACRAMENTO, Cal., May 8.—Most of Baker's army moved this afternoon to Arcade, seven miles east of the city, where it is supposed they intend to capture a train. The remainder will move tonight. They are considerably broken up and dispersed.

RUNAWAY AN ENGINE AND STARTED.

PUEBLO, Colo., May 8.—At 6:30 o'clock this evening, an engine of the Denver & Rio Grande railroad was taking coal, the firemen being off the engine, it was suddenly surround by fifteen of the men under General Sanders, who came in Saturday as a Coxey band. They took the engine and ran the locomotive down to the Missouri Pacific tracks. Where six coal cars, that had been left a short time before, were coupled on. The whole band boarded these cars, and, attaching the Rio Grande engine, started for the East at a lively gait. For miles out they met an engine which was coming in for the purpose of taking out the regular passenger train, as all the rolling stock has been kept near the town since the Cripple Creek men arrived. The engineer reversed and is keeping ahead of the industrials. The latter stopped their train at Boone and took coal and water.

The engines passed Nepheata going fifty miles an hour. The superintendent has an engine and car overtaken in a cut at Olney, so that the runaways can go no farther than that point, and they may experience a collision. A train will start from Pueblo at 10 o'clock in the morning with the deputy marshal and thirty officers to overtake the band. The season prevented the movement of United States mail.

A DYNAMITE PLOT.

Prisoners Make An Unsuccessful Attempt to Blow Up the Jail.

JACKSON, Mich., May 8.—An attempt was made last evening to blow up the prison with dynamite. As the convicts were marching in the cells, Edward Handy, John Dennard and Arthur Lawrence broke from the ranks. One seized a guard, and another sprang to into a window and attempted to fight a line command with a dynamite bomb.

Deputy Nothnup and Captain Stone arrived in time to quell the disturbance and the convicts were soon locked in their cells.

The Trial of Dr. Meyer.

NEW YORK, May 8.—The trial of Dr. Jasper was begun today, with Dr. O'Hare, the accused's physician, who made the autopsy on Beach's body, in the witness chair, for cross-examination.

Dr. O'Hare described a very much emaciated and hairy man imperfectly—so much so that he expected it was valueless for the purposes of pathology. The brain was almost fluid, the intestines were so too that it was impossible to determine anything about them, and the organs were in a very bad state of preservation.

Dr. McAlpine, who made a microscopical examination of the organs, testified that, owing to the advanced state of decomposition, the examination was mainly of a negative character.

Dr. Dormus repeated his testimony in the former trial.

Dr. Charles A. Dormus testified to finding arsenic and antimony in the remains.

The court then adjourned until tomorrow.

A SERIES OF CRIMES.

Bones Found Tell a Tale of Murder Long Since Committed.

SACRAMENTO, Cal., May 8.—The Evening Joe's Dunsmuir, Cal., special says George Decker, a well-to-do rancher of Shasta valley, has been placed under arrest for the murder of his wife and child, committed twenty-seven years ago. It is suspected also that Decker is responsible for the recent death of his second wife and a groundchild.

Prospectors recently found the bones of a woman and child, supposed to be the remains of the first Mrs. Decker and child. Decker claimed his wife had eloped. The finding of the skeleton and a variety of other suspicious circumstances long known point to a most appalling series of crimes apparently committed by Decker.

Your Family should be provided with the well-known emergency medicine,

AYER'S CHERRY PECTORAL

The best remedy for all diseases of the Throat and Lungs. Prompt to act,

Doctor Shores' New Treatment for Catarrh and Chronic Diseases Creating a Profound Sensation in the City.—Marvelous Cures Effected Daily.—Read What the Doctors and Business Men Say.

Nothing has happened lately that has caused such a sensation as the remarkable cures being effected by Drs. Shores & Shores new system of treatment. The public could hardly believe the cures were genuine, until they called and interviewed the patient who has been restored to health and happiness. No treatment was ever before used in Salt Lake that has given so many satisfactory results as the Shores system. It is new, painless, safe and successful.

Last week Drs. Shores & Shores were honored by a visit from two doctors of the city and asked to be shown the new treatment, as it was curing hundreds of so-called incurable diseases.

The medical gentlemen after thoroughly investigating the treatment expressed themselves as highly pleased, and when leaving one of the gentlemen was heard to remark: "What you can talk all you want to, but Drs. Shores & Shores have the best system of treating catarrh and chronic diseases I have ever had the pleasure of seeing."

Such testimonials are heard many times a day, and coming from the leading citizens of Salt Lake, it ought to sell to add that the wonderful treatment is given for 10 a month and medicine included free. Come to the medical parlors, see for yourself, talk with our patients, they will tell you. Come and see our patients, always crowded with grateful patients, that is the way to find out the difference between the real and the imitation.

MRS. JANE STEPHENS, RESIDENCE THIRD NORTH AND FIFTEENTH WEST.

THOUGHT SHE WOULD DIE

Mrs. Jane Stephens an Expressive Herself in an Interview.—Cured by Drs. Shores & Shores' New Treatment.

"I hardly know how to express my case," said Mrs. Stephens. "It was a little of everything. I had bad headaches in the front of the head, my eyes were weak and watery. I had no appetite, and when I did eat I would immediately have to vomit; my stomach was in an irritated condition, so I rejected all kinds of nourishment.

"I was very weak; my bones ached always felt tired, worn out and exertion would not sleep; had bad dreams; bad taste in the mouth. I would often experience a sort of sinking sensation, in fact, as I have said, I really thought I was going to die when I began taking the Shores & Shores new system of treatment. Now I am truthfully say I am well. I can eat anything I want, sleep well, no headaches, and I feel like a new person.

Mrs. Stephens resides at Third North and Twelfth West, near Agricultural Park, where she can be seen and will readily verify her statement.

IF YOU CANNOT COME TO SALT LAKE

Write for the mail treatment. One of the physicians in personal charge attends to the mail department and by a system of close correspondence controls those out of the city quite as well as those who come to the office. Send for symptom blank. Medicines shipped carefully. Try the treatment.
