NEWS OF THE MINES.

An Average Day in the Pit of the Stock Exchange.

BULLION BECK MAKES A SALE.

Also Mercur, Ajax, Four Aces, and Others — Mining News From Bingham—Ships and Spurs.

The bulls and bears met in battle array again today, but hostilities were not as severe as they have been on other days during the past week. The proceedings, however, were fair and the business, if anything, was above the average.

The first sale of the day came with the call of Bullion-Beck, the stock which has been lying almost dormant for some time past. The transfer was one of fifty shares which brought the sum of $6.65 per share. The Four Aces gave up a block of 500 shares, at a figure which was the closing bid on the stock. One hundred shares of Mercur found a taker at a few cents below the $3 mark, the point at which that favorite property has recently remained. During the noisiest call a sale of 200 shares of Ajax was made known, the stock bringing 85 cents per share. Fifty shares of Horn Silver was wanted at $2.17½ but $2.80 was the figure demanded for a board lot.

The weeks called at random met with equally as much success as their predecessors. Swansea was the first to receive attention, much work was placed a bid of $1.75, but the demand made by possessors of the stock for $1.85 frustrated all attempts at country sales. Other properties followed in the wake of the initial one, and it remained for Richmond Anaconda to bring out the first excitement, which it did in sales aggregating 2,500 shares. The Electric stock, which mentalize quite a high standard, was followed at 5c shares for a equal number of dollars. Little Pittsburg received recognition in the sale of 1,000 shares.

The closing figures were as follows:

TRANSFERS OF STOCKS.

Fifty shares of Bullion Beck at $6.65; 500 Four Aces at 35 cents; 100 Mercur at $3.02½; 200 Ajax at 85 cents; 1,000 Richmond Anaconda at 7½ cents and 1,000 at 7½; 500 Electric at 5½; 1,000 Little Pittsburg at 5½ cents. Total shares sold, 4,850.

THE OLD RELIABLE.

The Bulletin's Report of Proceedings There for the Past Week.

Several weeks ago the Bulletin was apprised of the fact that a project was on foot to erect a new process concentrator at Leadmill station, for the purpose of treating ores from the large mines tributary to the Dalton & Lark tramway. Broadly applied this would mean the Dalton & Lark, Samson, Yosemite No. 1, Brooklyn, Ledmine, Keystone and others, which if worked to their present capacity could furnish several hundred tons of concentrating ore daily. It now seems that the project is taking form, and is part of a plan to erect a 500-ton plant at the smelting district at Park City, of which the Park Record speaks at some length, and states that T. R. Jones of Salt Lake and associates are promoters of the scheme. The process is a secret, but has been thoroughly tested for Park City ores, as we know it has a local little locality, and proved a success, saving practically all the values at a minimum cost.

From information obtained it appears that the plant at the Leadmill reach farther than the mines directly tributary to Leadmill. One mine within Bingham, capable of considerable tons of a concentrating character, has been approached for a contract for a product, and a manager is to be in Chicago ores, and it is stated that the output of the Bingham district will be directed to the new plant. Not strongly tributary to the Leadmill is the shipping district of the Ontario, Wisconsin and other mines, in the greater setting of value will give a handsome margin over cost of transportation to the Leadmill, the plans of the promoters contemplate the construction of two plants in Bingham, owing to the impracticability of sending a common center for so many producers, and this has a stronger as practicable. As all ores in the process is introduced here at all, and is a perfect success, it will prove a notable event in the history of Bingham. The properties mentioned in this article are since capable of producing on the line of concentrating ore daily.

With the exception of a few Bullionbeck ores the new Winnamuck mill is ready to start up, and it is the intention to put it in motion today if possible. By Monday or Monday it will be in complete running order. In the meantime it will treat from 50 to 60 tons daily, but with the addition of concentrators it can at any time be increased to 150 tons capacity. The ore for the mill being fired yesterday, and there are thousands of tons of excellent ore in and about the old mine awaiting treatment.

The Bingham Copper company are shipping by wagon 30 and 40 tons of ore from the Nast mine this week. The Nast is way up, and importing every day.

The Markham mill is about to start up again on Northern Light ore. The mine has 150 tons of ore in the bins, and will be operated to keep the mill running on 50 tons of ore per day. It is now in good shape for production.

A result of the exploring up of the old Winnamuck lead lower down is becoming apparent with new workings. The Cecilia has been shipped another lot of several carloads, the result of development work and moved to clear the ore bins. The mine is in shape to make a good output whenever the ore comes, after sufficient development work, and this is the case with several other properties in the vicinity—notably the Tom and Pete.

It is announced that a deal is pending for 300,000 shares of Dalton & Lark stock, or $300,000. The transfer will be consummated, if at all, as a result of the report of an expert who lately examined the mine, in company with the writer. The smelting man said confidently that the property was one of the biggest layouts he had ever seen.

A report comes over the hill that as a result of the old Brooklyn starting up last week a large body of lead ore, running eighteen ounces in silver, has been encountered in an upraise in ground heretofore untouched. The strike is a strong indication that a large vein of the mine that had been passed over as barren is healthy mineralized. The Brooklyn is to be put into shape for big production this summer.

Bingham is said to have an immense cyanide proposition, the ore being of much better grade than the average at Mercur. If the process used at Mercur does not exactly fit this case, perhaps some of the other ones will. A cyanide process has just been started at the Lemar mine in Idaho which, while more intricate than the Mercur plant, is more economical and effective, saving a higher percentage of values.

It is related that in 1571 parties working the Spanish mine operated their ore by selling it as it came, to the Wiskanock smelter for $8 a ton of lead. It carried from 40 to 50 per cent lead, and as there was no market for the metal in those days except as it could be shipped to Swansea, Wales, the smelter only wanted it for fluxing. When a load was received the target firing of guns were thrown out, and if a large chunk of it was encountered a big roar went up from the smelter man. The ore averaged about 12 ounces silver and $3 gold. Several hundred tons of the Spanish ore were disposed of in this way—often nearly half its value being thrown away and, owing to the crude method of smelting then in vogue, a large per cent of the bullion was lost.

A Salt Lake Gets Stolen Ore.

In speaking of the exploits of one at the Boise mining exchange, yesterday's Statesman of that city says among other things:

Prominent among the receipts so far is a chunk from the Friday, of J. U. Hill, mine, now being worked by Mr. McKinley. This specimen weighs about 75 pounds. It carries 50 per cent or less and close to $100 per ton gold, while there is a large percentage of iron. Since it was taken out, a richer strike has been made, there being now 36 feet of ore, much of which is so light as carry $300 per ton in gold. The ore carries some silver, as much as 18 ounces per ton being shown by some samples.

Frank Office, manager of the Mingo concert at Sun Lake, who was at Willow Creek with the Union Pacific party, has established for several carloads of the Friday ore, and shipment will be begun from this point just as soon as the roads settle. There is now 20 tons of ore on the dump. A hoist is to be put on the property at once, and a large production will then be possible.

From the Lehi Banner.

Dr. C. L. Seabright and Elias Day started West Saturday a tension to visit the Lion mine and Fish Springs and Deep Creek country. They will stay a couple of weeks and make a few locations, if favorable, along the line of the proposed new railroad.

John Muir, Eugene Rice and Daniel Fraser left here Wednesday morning for the west canyon, where they go to work their mining claims.

A contract has been let to Will Haley and George Jamieson to sink a shaft, Bill Jones is the incline which has been run in the west canyon properties owned by Chilton, Bateman Bros., Sabey, Campbell and Williams. The shaft will be sunk from a point about twelve feet in the incline where the five foot pinching campers were worked.

A sack of ore was received last Friday from the Dixie mines owned by the Big Four Consolidated Co., which consists quite a forty of excitement. By Monday night every share of the treasury stock had been sold and there was a demand for twice as much more at the same figure but individual holders would not sell.

George Hyland was in during the first of week from Granite mountain where he has been working some very promising claims.

Eli Crandall and George Hammer returned Monday from Dead Canyon where they have some promising properties. One assay on a sample brought in by them showed 52 per cent lead, 18 ounces of silver and a heavy trace of gold. It is their intention to incorporate.

Ships and Spurs.

Bingham now claims to have 169 miles from which ore has been shipped.

A recent strike in the Gold Dust property in the Camp Floyd district, discloses ore which assays $11.24 in gold to the ton.

At a meeting of the directors of the Dalton and Lark, held yesterday, regular monthly dividend No. 3 was declared payable on the 15th, which means the distribution of $12,000.

The Rubbing tools was put in the saw of the Mercur group last evening when the $100,000 bond was taken up and a company looking to the thorough development of the properties, organized.

W. F. Patrick of Denver and J. E. Fletcher of New York here arrived a lease on the South Aurora at 11:30. The agreement is that the gentlemen shall pay a 10 per cent royalty on all the ore taken from the mine.

According to the Mount Messenger, workmen commenced on the new crosscut at the Sterling Coal & Coke company's mines, on Monday. A new engine is being put in place in order to have full use of compressed air, by which means the drilling will be done. It will take all summer to compass the tunnel.

Tooele Transcript: Mr. Abbot has had an assay from Finnemore's Pass of $32 in gold, and 794 ounces in silver. Abbot is of the decided opinion that he can hold fall carding mines will be worked. He gives a splendid description of different tracks. This and many other innovations go to show we are in our mining infancy.

GUILTY OR NOT—WHICH.

The Jury Now Deliberating on the Hayken case Which Reached Them at Noon.

Arguments in the Hayken bribery case closed before Judge Hiles today. Judge Henderson on the reasonableness of court this morning, resumed his address to the jury and was followed by County Attorney Whitlemore who spoke at length and made a strong showing for the prosecution. Last evening the opening argument was made by Attorney Nye for the people. Then Judge Dey took a hand for the defense.

It was nigh unto noon today when counsel for either side finished.

Judge Hiles then delivered a long and able address to the jury, which, strange to relate, pleased both the prosecution and the defense. At 12:30 the jury retired, and at 4 o'clock had not returned a verdict. The length of time they are out indicates that all did not agree in eye and that a compromise will probably be the result. The all important question is, will the verdict be "guilty" or "not guilty?"

A NINE-YEAR-OLD RUNAWAY.

Little Irving Sloan Sent Back from Provo to Salt Lake.

Special to the News.

PROVO, May 2.—Last evening on the Rio Grande 630 train, little Irving Sloan of Salt Lake arrived in Provo. Irving is a bright little fellow nine years old and lives with his mother who up to a few weeks ago lived on State street, three blocks south of the Orphan's home in Salt Lake. Yesterday he made up his mind to come to Provo, where he has a brother, about 18 years old, he says, and the Rio Grande Western depot by hanging on to the blind end of a wagon and secreted the youngsters, coming to Provo without any trouble, although he had no money. When he arrived here he hunted up his brother and said he had come over to live.

This morning the little runaway was taken to Sheriff Brown's office, as the Salt Lake police were notified. They had not heard anything of the missing boy, but sent word to Mr. Sloan, and told Sheriff Brown to send the little fellow back, and they would meet him at the depot and send him home. He was sent back on the afternoon train R. G. W. train.

Frederick G. Lunt, aged 23, of Park City, and Mary A. Cooper, aged 18, of Provo, have secured a marriage license.

The "Uncle Sam."

Articles of incorporation were filed with the county clerk by the Uncle Sam Mining company with a capital stock of $50,000. The incorporators are Frederick H. Auerbach, Samuel H. Auerbach, George Rhoades, N. J. Nelson, Mrs. Sarah A. McCherson and Jane McCherson. Frederick H. Auerbach is president, Samuel H. Auerbach first vice president and N. J. Nelson secretary and treasurer. The company owns the Uncle Sam lode adjoining the C. K. claim, and are located in the Tintic mining district.

Building Permits.

Building Inspector Routledge issued permits for the following persons during the past week:

A. Grow, one two-room brick addition to 921 east Second South street, costing $300.

J. Chapman, frame barn at 155 First street, costing $100.

E. H. Callister, tenin additions at 40 west Seventh South street, costing $250.

Gordon Bromley, alterations at 17 south First West, costing $300.

William B. Hooper, frame barn at 822 south First West, costing $60.

R. Whitmore, brick addition at 39 south First West, costing $200.

E. Wagstaff, frame barn at 242 south Fourth East street, costing $150.

MINOR MENTION.

Gen. Jacob S. Coxey—the original of Coxey army fame—is billed to arrive in Salt Lake on May 12.

In the police court today three drunks were assessed $5 each and four disorderly were served the same.

Today's arrests by the officers consist of Indian Joe for drunkenness, and Charles Morgan, John Williams and Frank Allen for vagrancy.

A large cottonwood tree, blown down, by last night's wind, obstructs the sidewalk on West temple street, near Third South.

Elder B. H. Roberts will be the speaker in the Twenty-first ward meeting house tomorrow night, beginning at 8 o'clock.

Mrs. G. H. Fry and daughter, of Dillon, Montana, are expected to arrive in Salt Lake tomorrow, Sunday. Mr. Fry comes here for a few weeks in hopes of benefiting his health.

As the News goes to press, Justice Winger is sitting on a civil case for damages, resulting out of a small boy having stolen two apple dollies by a vicious dog, the property of William Chamberlain.

The Young People's Society of Christian Endeavor of the First Baptist church have arranged an interesting program to be rendered at the church next Sunday evening, beginning at 8 o'clock.

General Dyer: Local weather forecast for thirty-six hours ending 8 p.m., May 3: Utah: Fair tonight and Sunday; probably showers; warmer tonight; warm Sunday; southerly winds. Salt Lake and vicinity: fair and warmer weather.

John Hendricks, of Grantsville, is in the capital on business. Among other matters of importance he has his eye on the Deep Creek railway, which he says will carry ore via his party interested of through Tooele county east.

On Wednesday afternoon at 3 o'clock testimonials will be given to the Hawthorne ward hall, complimentary to Elder Anthon Paterson, who is about to depart on a mission to Scandinavia. An excellent program is being arranged for the occasion.

The fating of salaries of county officials is going to prove a knotty proposition with the commissioners, who have met to consider the matter for the morning. Mr. Lindsay said this afternoon that it would require the most skillful tongue in this portland that they would have to make both ends meet.

The committee on the proposed midsummer festival was requested to a meeting at Judge McNally's office at 4 o'clock this afternoon. On Monday evening next it is the intention to hold a meeting of business men and special committees to receive an report to supervise the work of the carnival.

Dr. Talmage's lecture in the Salt Lake Tabernacle tomorrow night on the man, Moon and Stars should draw a large audience. The speaker's well known ability, the interest in the theme itself and the subject for which the money is given—a free Bring the kindergarten association—should be ample inducements to pack the house.

COMMERCIAL.

SALT LAKE CLEARING HOUSE.

Today's clearing house exchanges amounted to $194,572. Balances day last year, $161,793; week's clearings, $1,198,264; same week last year, $1,121,[illegible].

FITS CURED
(From N. Y. Herald of Sunday.)
Prof. W. B. Fiske, the celebrated specialist of Rochester, has without doubt cured and now remains the only authority in the world who can cure epilepsy. Fits, convulsions, nervousness, etc. We have seen of cases of the most astonishing character. Hopeless cases have been given up by the doctors and relatives as incurable, which he has made with a few bottles of his specific cured. Sufferers are advised to write Prof. W. B. Fiske, 167 Pearl St., Rochester, New York, and he will send a trial bottle free, with treatise and testimonials of wonderful cures. Mention this paper. Prof. W. B. FISKE, P. D., 167 Pearl St., Rochester, N. Y.

TURNING GRAY
AND THREATENED
WITH BALDNESS
Too Danger is Averted by Using
AYER'S HAIR VIGOR

"Nearly forty years ago, after some weeks of sickness, my hair turned gray and began falling out so rapidly that I was threatened with immediate baldness. Hearing Ayer's Hair Vigor highly spoken of, I commenced using this preparation, and was so well satisfied with the result that I have never tried any other kind of dressing. It stopped the hair from falling out, stimulated a new growth of hair, and kept the scalp free from dandruff. Only an occasional application is now needed to keep my hair of good, natural color. I never hesitate to recommend any of Ayer's medicines to my friends."—Mrs. H. M. Hanson, Avoca, Neb.

BACK VOLUMES
—OF THE—
DESERET WEEKLY.
The sixth volume of the DESERET WEEKLY in the present form is now bound. A limited number of copies of these six volumes can be obtained at the DESERET NEWS Office, Salt Lake City, in bound form at $3.00 per volume. It is the best history of current events to be obtained, and by far the cheapest, and the time is not far distant when they will be eagerly sought after by students of history, anxious to be informed of the stirring events which have transpired within the past three years—the most interesting period of the history of the Latter-day Saints. Every person who can afford it should secure these volumes while they are to be had for future reference, and especially should they be obtained for every Sunday School, Improvement Association and Ward library. Apply early to make sure of getting them.
