LIGHT SALES OF MINING STOCKS.

Day's Record 65,150 Shares for the Sum of $16,297.49.

BOTH EXCHANGES AFFECTED

On Each the Number of Shares Was Nearly Equal, but Values Were Much Different.

On both exchanges today the sales amounted to 65,150 shares for the sum of $16,297.49. The day was marked with inactivity on each board, and the result, therefore, was much lighter than usual. The old exchange sold 32,650 shares for $11,671.42, while the new one had a record of 32,500 shares for which there was paid the sum of $4,625.87.

BUSINESS IN STOCKS.

Quiet Call on the Old Board, with Little Change in Quotations.

The call on the old exchange today was rather a tame affair, but without the sales reached a total of 32,650 shares, for which buyers paid the sum of $11,671.42. In the main figures continued about stationary, fluctuations being slight in all cases.

In the selling Ajax took the initiative, 10 shares changing hands at 11.45. Daly was dealt in at 41½ and 41¾, while Deer West made a sale at $10.50 and Dexter followed with business at 11.45 to $1.47. Congor was active between $7 and $8, and Bogie, the new mine stock, received attention at 23 and 24, while Mercur took part on a downward scale, the stock selling first at $7.70 and from here to $1.65. In Northern Light there was considerable trading around 66. After which sunshine sold for 20 and 80%, these transactions ushering off business with the topmost figure.

Boston-De La Mar let out for smaller stocks, 1,000 shares going at 1 cent. Dalton and Gold Hill sold for 3 cents, while Emerald was dealt in at 11½ and Joe Bowers did business at 17½, with sales of Bowers Extension at 9½. Little Pittsburg was active and had taken from 8 to 10, while North Swansea sold at 16. Value at $1.48 and Yankee Consolidated at 9% to 9¾.

The closing figures were as follows:

NEARLY A TIE.

Business on New Board Almost Equalled That on the Old.

Lacking 100 shares, business on the new board this afternoon equalled that transacted on the old board in the morning, the sales amounting to 32,500 shares with a value of $4,625.87. The heavy sales were Midnight Bowers at 4 cents, Anchor between 1 and 2, and Bullpeter at 1 and ¾. Mercur was dealt in at $7.60½, while Daly sold for 41½. Four Aces for 3 and Geyser-Marion for 75. Ajax ebb up to $1.46 where 50 shares changed hands, and Bowers was taken at 17½.

STOCKS.

New York, April 4.—The arrangement entered into by the Manhattan elevated railroad and the Third avenue surface road whereby the latter exchanges its traffic and electric power is so much caused a wild opening of stocks. Third avenue rose from 116 to 125 and fell to 118. Manhattan opened up with simultaneous sales from 124 to 131. Metropolitan, which is the other half of the deal, rose to 224. Other speculative wave was supported, particularly leather preferred, which sold at 76. Mr. Pain's favorable showing for the fourth week of March inserted steadiness to railway shares generally, in addition to the usual miscellaneous offerings of professionals which followed the opening. Sales caused a market will. Sales before many of the most active shares yielding well below yesterday's close. Manhattan ruled at 118, Metropolitan below 223 and sugar at 111.

The iron and steel shares fell sharply, but little impression was made on the railways, which were quiet.

The bear faction pegged away industriously at the speculation and defeated twice attempts of the bulls to stem the downward plunge. Apparent lack of stable support in the highly manipulative shares stimulated extensive short selling. The essentials on the Stock and stocks were lost production, but these properties slipped moderately. Near middle a heavy demand arose for the market which spread to other stocks and prices moved upward rapidly. Metropolitan recovered five points and other shares one and two points.

PERSONAL.

J. T. D. McAllister, the venerable president of the Manti Temple is in the city visiting his children and other relatives. He will remain until after conference.

Representative Aaron Parr Jr. of Logan ran down this morning from his home in the Cache valley and was busy transacting some personal business he will return.

President Gowans of the Tooele Stake is among the conference visitors. He neither saw nor heard Jan MacLaren, but has a high regard for the gentleman's ability and was sorry that he was not present at the lecture at the Tabernacle last evening.

Miss Ida Brockenridge of St. John, Kansas, is in the city to attend conference and visit friends for a few months.

H. D. Haight, president of the Cassia Stake of Idaho, and Elder E. M. Lee of Oakley, Idaho, were on his way to the Southern States to fill a mission, called on the "News" this afternoon. The former is just recovering from an attack of sickness. The latter was in good health.

PASSING THE CUSTOMS.

[From Life.]

All the newspapers concur in the opinion that the new scheme devised by the treasury department for the delay and mortification of travelers coming here from Europe is a complete success. The new order is that the custom-house inspector shall examine every article purchased abroad which the traveler has with him. This takes time and provokes lamentation. The assistant secretary of the treasury, Mr. Howell, is pleased with the new rules, and says they are wise and benevolent, and that if anything ails them it is the fault of the inspectors. Nobody likes them as yet, but presently, no doubt, they will be less rigidly enforced, like all the other rules that have preceded them. The true way for the treasury to manage is to serve out lettuceleaves for travelers to come where it, and suke and suck at suction all the clothing and effects they have brought with them. That would be fair and just to everyone, and might lead to break Americans of the objectionable habit of eating lettuce with the fingers, and to pioneers the propriety to visit this country.

Not the least amusing feature in the collection of this penny-wise tax is that foreigners coming into the country are exempt from duty, but Americans, constrained to have one's personal wearing apparel dumped out on the dock in a heap, are subjected to the jeers and criticism of one's fellow-passengers and their friends, without the accompanying lettuce leaves, to soothe the haughty lettuce and encoring Standard oil, all unscathed and triumphant. In these circumstances, even the newspapers and dice-in-the-wool believers in Mr. McKinley's policy of protection have been known to use evil language.

A NEW FURNITURE IDEA.

The very latest novelty in furniture is a parlor chair or settee, with a high back and a folding screen hinged to either end. It is an English idea and is extremely decorative, at least that is the principal reason urged by young ladies who advise their parents to add one of the new chairs to the family furniture. From all indications it is destined to become popular, as the young men have pledged their support in boosting the innovation.

SOUTH SWANSEA MEETING TODAY.

Old Board Re-elected and Excellent Reports Submitted.

GRAND CENTRAL DIVIDEND.

Daly-West Mill Started—Smelter Nearing Completion—Activity at Eureka.

The South Swansea Mining company held its annual meeting in the city this afternoon, when the old board was re-elected for the ensuing year, the members consisting of L. S. Hill, J. T. Crowell, W. H. Farnsworth, J. M. Wheeler and C. V. Wheeler.

The report of Secretary Farnsworth showed that during the year the company had handled 5,850 tons of ore, which yielded 352 tons of lead, 191,166 ounces of silver and 2.41 ounces gold which sold for the sum of $14,394.86 and constitutes the company's receipts for the year ending April 1, 1899. During this period disbursements amounted to $14,125.22, this sum including expenditures of $7,500 each on 161,000 treatment charges, $6,500 for labor, $25,312.44; freight, $14,095.15; salaries, including that of the superintendent, $1,800, and office expenses, $1,000. The balance on hand at last report was $5,757.38, while that now on hand amounts to $14,226.24.

The South Swansea has resumed a few days ago for the company's officers, who reported in splendid shape, and the prospect of a new shaft to facilitate the extraction of ore was discussed. The shaft now in use being so low that it is extremely difficult to handle the ore bodies, therefore the company thinks that from its present handsome surplus, it can well afford to sink a new one. The work done during the year included 13,861 cubic feet of stopping on the vein, 1,500 feet in drifts and crosscuts and 46 feet in winzes and raises. The company now has 7 cars, 2 second-class, 4 cars of first-class and 4 cars of iron now loading and on the way, this being valued at $1,000 each. The prospects in sight are highly satisfactory and the stockholders were much elated with the showing made.

GRAND CENTRAL DIVIDEND.

Declared at Provo Today in the Sum of $37,500.

Provo, April 3.—The meeting of the Grand Central directors held here today resulted in the payment of the second dividend of fifteen cents per share, amounting to $37,500. This is the eleventh dividend paid by the company and makes a total of $825,500 distributed to the stockholders of the property.

THE DALY-WEST MILL.

Resumed Operations Yesterday Morning—Smelter at the Valve.

The "News" is informed that the Daly-West mill at Park City, was started up yesterday morning, as anticipated, and is now running on 100 tons of ore daily. No shipments will be made from the Daly-West mine yet, but when they begin they can be depended upon to continue regularly.

It was reported in mining circles this afternoon that a mammoth snowslide had occurred at the Velos, the same carrying away the shaft house and completely blocking up the mine. If the report is correct, it means that considerable expense will have to be delayed for a good while, as it is said it will take some time to repair the damage done to the property.

UNITED STATES MINING COMPANY.

Owner of Bingham Mines Now Ready for Business.

The United States Mining company, incorporated under the laws of the state of Maine, has filed a copy of its articles with Secretary of State Hammond, and a report with the "News" at the time of its incorporation, the company has a capital of 10,000,000 and its in the Old Jordan, Yosemite, Ontario, Telegraph and Niagara mines at Bingham, for which the new owners are said to have paid the sum of 10,000,000. The incorporators are all residents of Portland, Maine, and are Edward E. Milliken, H. F. Pineteed, Arthur F. Belcher and Leroy L. Hight. Each incorporator, with the exception of Mr. Sweetser, has subscribed for ten shares of the capital stock at $25 a share, and Mr. Sweetser's subscription is for eleven shares. The officers were elected as follows: William M. Bradley and the Dow for King was $2,500.

Will Inspecting the Ajax.

Thomas West, managing director of the Ajax, paid his first official visit to that property today. The enthusiasm went out for the purpose of "sizing up" the situation and ordering what improvements he might deem necessary in the work now going on. The present reorganization of this company's affairs has given it a new and vigorous development, to the end that stockholders might soon begin to realize on their investment. It is on this that the Mr. West expects to work. It is said the mine has a good showing of ore in sight, and if this is so it will make heavy shipments of high grade ore, some of it carrying good values in copper.

Chemists in California.

Captain Jack Dalton is still after gold mines, and has dispatched Victor M. Clemens to California where he is now in charge of a number of men, a group that may soon be increased in the captain's holdings. Meanwhile work at the Gold Hill mine is progressing nicely, the big mine continuing to yield an abundance of ore and the mill getting through a good number of tons daily. On Mr. Clemens's return, the latter part of the week, it is quite probable that the Dalton will be ready with another big shipment of crystals.

Smelter Nearing Completion.

Assurances form the company's office today were to the effect that in 30 days or by June 30 at the latest, the Highland Boy smelter would be running on 150 tons of ore daily, with a capacity for 300. Work on the plant is progressing satisfactorily. But the erection of buildings and the placing of machinery have not, with very little exception, been the responsible for doubling the capacity of the plant, while known to have been recommended by Mr. Silvester, but not been acted upon, and the structure will likely be completed on the original basis. No ore is being shipped yet as there is no necessity for it, the company being well able to satisfy the wants of the smelter by every-day receipts. The Boy plant is a model in every respect, and will beautifully the smelter in which it stands.

Rich Strike in Blue Rock.

Special Correspondence.

Eureka, March 31.—The officials up at the famous old producer, the Blue Rock, were considerably startled as they yesterday hoisted the first car of ore that has ever been mined from the low level. They had further cause for congratulation in the fact that the ore is of the same character as the huge body recently uncovered in the 300, and is unmistakably an extension of the already famous Oregon stope. The strike is very opportune for everybody, and a considerable number of the Eureka hill men have found employment there and at the Rock, where everything is looking very promising.

Activity at Eureka.

Special Correspondence.

Eureka, April 1.—Just everybody here has got over the mine dumps we had consequent on the Eureka Hill shut-down. The strike in the May Day mentioned in the "News," a new level for the Norway, three shifts on at the Eagle and Blue Bird, and the starting up of many other properties that have lain idle for years, demonstrate that Eureka is on the road to a boom.

Mining Locations Filed.

Special Correspondence.

Provo, April 3.—The following mining locations were filed today and recorded: Edna E., by Edith E. Polsom; Good Boy No. 1, by Charles Polsom; Good Boy No. 2, by Elizabeth O. Polsom, all situated at the Dancing Boy, Pots, Seamen Pork canyon.

Gold Hill Annual Meeting.

Special Correspondence.

Provo, April 3.—The stockholders of the Gold Hill Mining and Milling company, whose property is in Stockton, held their annual meeting today and elected the following directors: Joe M. Bowers, F. S. Hills, Jos. E. Snow, Artemus Metz and A. L. Booth.

MINES AND MINING MEN.

The Centennial-Eureka has ten cars of ore at the smelter.

The Golden Star Mining company was to have held its annual meeting at 4 o'clock this afternoon.

A. J. McMullen has received word from Parson's Nev. that his mine working near there have a fine vein in sight.

Work on the Highland Copper mine at Bingham is progressing nicely, the shaft now being about 40 feet in depth.

On the 12th inst., the books will close on the Centennial Eureka dividend of $15,000, so time is now set on the 15th. This stock is gradually increasing in value, as there is a good demand and for the use of a boom.

Mr. B. F. Woodward, president and manager of the Joe Bowers Extension property in Tintic, has been down looking over Bowers properties the last few days, and states that "Bowers money is all right." And further states that the amount of ore before surface indications or more promising prospects than in Bowers nearly. He expects to give Bowers money a more thorough inspection in the near future.

The Golden Gate Mining company has filed articles with the secretary of state. The capital stock is placed at $15,000, divided into 15,000 shares. The company owns the Golden Gate No. 1 and 2, the Golden Gate Fraction, the Patterson, Patterson No. 2, the Alternate No. 1, 2 and 3, and the Alvarado mining claims, in Camp Floyd district.
