ADRIFT ON ICY SEAS.

NOTE OF AN AUSTRIAN SHIP IN SEARCHING FOR THE POLE.

Found in an Ice Floe After Drifting for a Year Toward the Polar Sea—After Nearly Another Impatient Year Spent Extricated in Nova Zembla.

[Copyright, 1892, by American Press Association. Book rights reserved.]

NG AGO toward the close of August, 1891, a vessel steaming along the shores of western Nova Zembla was seen by the Indians and to avoid the dangerous rocks Yanou Hiwa ting gave hurling and grinding in his wake as the navigators made the ship fast on the shoreline to be towed by it to shoreward. Instead, from Bolshoi and mountains the chief in advance the boat of the ice-rending ice was very whose hurled from the sea. For fifty-three weeks, or a year and a half, the Indians were spectators of a drama which was itself a pioneer in the age the journey went on to a conclusion as remarkable among the most skilful attempts to solve some great problem. The personal actors were captured in search of a passage to the polar sea. They were rescued usually and alive, and they left the sea the pole until it reached latitude 78 deg. 42 min., about the Dead of all vessels ever before attempted.

Before the departure of the men of Emperor Alexander and Gustave expedition in to search north was from 1869 to 1873 which still remained the farthest north, the model only the width of 10 degs. of latitude and the remaining three degrees of the circle depth in the northern solitude of Spitzbergen. The Indians of an expedition as we yet unrevealed, and one day found it was as good as another, so the Austrian scientists took up the project that Europe scientists took up the project that Europe scientists took up the project that Europe
