ie in the state th is capable of producing the amount of ore that is now coming from this mine. But few people have any conception of the immense ore deposits in the Centen-nial-Eureka which are now yielding up nearly 600 tons of ore daily. Very little is being published regarding the Cent re is another is being published regarding the Cen-tennial-Eureka mine, but there is no question but what it is furnishing the bulk of wealth that is pouring into the treasury of the United States Mining company. Almost every day we hear something regarding the greatness of Park City's big mines and for that reason the writer wishes to make a reason the writer wishes to make a comparison. Last week the ore ship-ments from all the Park City mines ag-gregated 3,306,020 pounds, while for the same period the Centennial-Eureka mine, which is but one out of a list of perhaps 50 producing mines in the Tin-tic district, marketed in round figures over 7,000,000 pounds of ore or double the tonnage of all the shippers of Park City. While the mines in the other districts of the state are reporting their output in tons and pounds the Tintic output in tons and pounds the Tintic mines are being credited with carloads, Truly, "Great is Tintie."

the divide, comes the East Ontario St. Louis Ontario, Harwood and many others, and still further down in the valley again, the Nelson boys ground Hot Air, Majestic, Brown Eagle and other Elkhorn district propositions, Expert opinion has it that there must be vast ore bodies to the east of the city and from certain indications it would seem that such is more than likely the case. For the good of Park City, we hope so at least. At the Mt. Masonic mine the tunnel is now in 800 feet, and since Wednesday the face of the tunnel has been in quartz, and this is considered a very favorable indication. The tunnel has been run following the contact and is now within 50 or 75 feet, according to This fissure was found to cross the contact in the old workings at the top

of the hill and at the point of crossing good ore values were found. There-fore it is reasonable to suppose that the ore will again be uncovered, and will lead into a large body of it. The lay of the country has been carefully studied by the management of this

Additional Buckets for Tramway Are Being Strung Today.

General Manager Henry M. Crowther of the Continental-Alta Mines & Smelters corporation was advised by the superintendent of the mine during the forenoon that the snowstorm in camp last night was quite severe; that more than four feet had fallen during the

past few days. The additional buckets ordered to come by express from the factory at S Louis for the tramway were hurried through on schedule, they have arrived in camp and are being attached to the long rope today. It was found when the tramway was completed several weeks ago that the line did not have enough buckets attached to render its operation perfect, so an order was sent in for more. The line now carries fd in for more. The line now carries 64 buckets all told, and was built to carry 108; but until the company increases its milling facilities the present number will be sufficient.

Directors Today Ratified Recent Sale of Treasury Stock.

The directors of the White Rock Placer Mining company, the property of which is located north of Elko, Neva-da, held a meeting during the forenoon to ratify the sale of the treasury stock of the company for a good round sum. The amount of stock transferred aggregates about 20,000 shares. A letter from Superintendent W. D A letter from Superintendent W. D. Higginbotham conveys the information hat he expects to make a clean-up of during the season, which opens

about April 15 and closes in October. RETURNS FROM NEVADA.

E. W. Kelly Tells About the Aurora in Kawlch Range.

E. W. Kelly, the well known clothing merchant, accompanied by James A. Melville, returned home Saturday evening from a trip to Tonopah, Gold. field, Kawich and other Nevada mining districts.

Mr. Kelly recently acquired interests in the Kawich range and was instrumental in the organization of the Auro Gold Mining & Milling company, which is carrying on a vigorous campaign of development under the direction of $W_{\rm b}$ F. Gray, the manager, of this city

Mr. Kelly expressed himself to a "News" representative as being deci-dedly well pleased with the apearance of the Aurora group and feels confident that the property is going to develop into a very good one. Out of 22 assays arge scale of New York Central gave a later stimulus to prices which was rein-later from the croppings across the five ledges shown on the surface, the values ranged from \$1.50 to \$4.50 to the tor. This is encouraging; imasmuth as the croppings found on what are now recognized as being the biggest mines in Nevada, were no better than this. It is a prevailing condition in the tait the croppings generally show small values, but when opened, frequently to a depth of only a few fset, the ore becomes enormously rich. Another condition at the Aurora, which tends to inspire confidence, is the simular of other and that found on the January and Florence, which are producing ore running away up into the thousands of delard.
Marager Gray has a force of men dofing the locating work on the 14 claims of the company at Kawich. He is following the custom in vogue in that to locate the ledges definitely. Besides this several shafts have been enstarted.
Goldfield, Mr. Kelly says, is undoubt.
arter States and Chicago Union Tractios. taken from the croppings across the five ledges shown on the surface, the values ranged from \$1.50 to \$4.50 to the ton. This is encouraging; inasmuch

The Yellowstone property in the Leamington district has been bonded to George Ross of Marysvale and George Smith of this city, and will be the scene of an active campaign of development. C. H. Griffen is out with a denial that he is the president of the Gold-field-Guerdon Mining company. Other officials say that a mistake was made in the printing of the prospectuses isued recently.

Concentrates are now being forward-

It was rumored in Elko last night that a very rich strike had lately been made near the Grand Prize mine in Tuscarora. The lead was struck a few hundred feet from the Grand Prize assays are said to run upwards of \$400 Free Press.

John Roeder returned Friday from his trip to the Kawlch country. Mr Roeder reports that country is alive with miners and more coming in daily He says he saw some very rich rock but how much there is of it no one knows, as there has been but little work done in that section.-Lode

OHIO COPPER COMPANY'S MILL AT BINGHAM.

While the mill of the Ohlo Copper compny at Bingham is not as pretentious as the one owned by its neighbor, the Utah Copper company, it nevertheless cuts quite a figure in the mill operations of Bingham. The plant, with the recent additions to it, is handling about 225 tons of ore daily and from the concentrates produced there the company realizes about \$20,000 monthly. In addition to this the company is shipping a large connage of first class ore.

The mine operations at the present time are being confined principally to drifting on the All's Well fissure within the territory of the Utah Copper company in accordance with a contract entered into with the latter some time ago, which has proved very advantageous to the Ohio people, who are given the right to all ore extracted. While the management of the Utah Copper believed that the Ohio would realize handsomely, at the same time the company desired this portion of their territory developed as quickly as possible, hence the contract was entered into. The drift on the fissure is being pushed ahead to the meeting point with a force working from the shaft sunk recently on the All's Well fissure by the Utah company. This shaft is connected at 200 feet depth with a branch from the main tunnel.

Considerable local interest is being manifested in the outcome of the pending option on all of the Ohio company's holdings claimed to be held by representatives of the Guggenheim Exploration company. In the option the price named is \$1 a share, or \$1,000,000. The date of expiration, which was fixed for May 16 next, was last Saturday extended for several months.
