TELEGRAPHIC.

CUBAN COMMISSION.

Cleveland May Send One to Report the Condition of the Island.

MERRITT CALLED TO WASHINGTON.

He May Be Appointed One of the Commissioners—U. S. Consulate Stormed in Spain.

NEW YORK, March 5.—A special to the World from Washington says: It is possible that President Cleveland will send a military commission to Cuba to report on the condition of affairs there. In this connection it is announced that General Wesley Merritt, commander of the department of the Missouri, and several other high officials of the army have been suddenly summoned to Washington. The World says it could not be positively learned last night that their minds had any reference to Cuba, but it is known the President has implicit confidence in General Merritt, and that he would be quite likely to issue him for a commission of the character indicated.

VALENCIA, March 5.—The disorders which were prevalent here when the news was first received of the action of the United States Senate on the Cuban question broke out afresh today and there were renewed demonstrations of hostility towards the United States. The mob made its way to the United States consulate, which was stoned and the windows smashed by the infuriated populace.

WASHINGTON, D. C., March 5.—The late hour at which the reports of the orders today in Valencia were received made it impossible to learn whether any official information has been received here in regard to the trouble. The attack will be doubtless received indignation in Congressional circles, and may have the effect of hastening action on the Cuban resolution when the conference report is taken up in the Senate on Monday. In this, as in the case of the attack of the Consulate at Barcelona last Sunday, the Spanish government, it is quite likely, will promptly express to the United States its regret for the occurrence and make a complete disavowal of it.

The Spanish minister has not received any advices concerning this latest disturbance.

The Kentucky Election.

CINCINNATI, March 5.—The Commercial Gazette special from Frankfort, Ky., says:

The Republican joint caucus met tonight and by an agreement between Senator W. J. Deboe and Judge W. H. Holt, the Hon. St. John Boyle, of Louisville was declared the Republican nominee for United States Senator by acclamation. There were five adjournments. It was on a motion to adjourn Senator Deboe the caucus nominee that Senator Deboe declined and proposed Boyle. In this he was immediately joined by Judge Holt.

Then followed a love feast of enthusiasm, in which Boyle was chosen by acclamation. Deboe made a thrilling speech, and was followed by Boyle, who was brought in by a committee. Judge Holt also addressed the caucus. The only drawback was the action of Representative Tindle, who, when the announcement of the selection of Boyle was made, exclaimed, "That settles it with me!" and left the caucus in apparently ill humor.

The Democrats tonight drew the line strictly between the free silver men and the sound money Democrats. A joint caucus was held to hear the petition of the sound money Democrats for the withdrawal of Senator Blackburn. Twenty-seven members, a majority, including the twenty sixers to the petition, were absent from the Democratic caucus. Senator Blackburn was present. Herald he was the cause of numbers, and only the causes could remove him. He said it had been in the power of the five Democrats who had refused to vote for him from the first to elect him at any time. He said he was determined no Republican should be elected. The caucus adopted stirring resolutions in support of Blackburn, and adjourned, determined to support him to the end.

FRANKFORT, Ky., March 5.—When the name of Senator Nye was called in the joint ballot today he arose and said he desired to explain his vote. "I have voted," he said, "for the nominee of the party thirty-eight times, but now have become convinced that he cannot be elected. I cast my vote for Hon. John G. Carlisle.

The ballot resulted: Blackburn, 55; Holt, 8; Deboe, 46; Carlisle, 7; Hunter, 4; Pence, 1; Cassingere, 8; Lyons, 1; Weaver, 2; Faulk, 1; John M. Harlan, 13; Dickson, 1.

GENERAL WALKER.

Notes Is Received in a Letter from General Wise.

RICHMOND, Va., March 5.—The executive committee in charge of the arrangements for the reunion of the United Confederate Veterans refused tonight to adopt a letter to the census, written by Gen. Fitz Lee, Chairman of the committee, because it denounced Gen. Walker, commander-in-chief of the Grand Army of the Republic. Gen. Wise's references to Gen. Walker were suggested by the action of the letter in re. and to the proposed parade by the Blue and the Gray in New York. In his letter Gen. Wise said Walker was not a patriot, and deserved the censure and condemnation of all good people. The subject brought an animated debate, and a stormy scene resulted.

DESOLATING THE COUNTRY.

Many Cities in Cuba Lain in Ashes—The Inhabitants Starving.

HAVANA, March 5.—Up to date the insurgents have burned thirteen villages and towns in the province of Pinar del Rio. Among them are several important places, including that Isa de Mariano. In addition they have burned many tobacco houses and the extensive sugar estate of Guacamaya.

The reopening of telegraphic communication with the region of Pinar del Rio brings the first detailed information of affairs in that province for several weeks.

The condition of affairs disclosed is far less than appalling. The rich Guaja district seems to have been cut to the bone, and is apparently returned to a wilderness. Whole towns have been cholerated, and their inhabitants are wandering helplessly over the country, many of them starving. The villages and towns of Catanas, Bolita Honda, San Diego de Nunez, Santa Cruz de Los Pinos, Los Palacios, The Rosario, Guanajay, San Diego de los Banos and Bonavera known to be reduced to ashes, and reports of others will bring the number destroyed up to thirteen. All these were important and thriving centers of population and business.

THE CUBAN WAR.

General Campos Thinks It Will Last a Couple of Years.

NEW YORK, March 5.—A special to the World from Madrid says:

Marshal Campos was seen by a World correspondent. The general, who looks just as lusty, hale and hearty and energetic as ever that you read about since gave prominence to these points:

"I may that there is any foundation for the reports of atrocities in General Weyler's last letter. He was simply a field officer in the last Cuban insurrection, carrying out, like all others, the orders of his chief, Count Balmaseda, who had ordered reprisals because the insurgents had committed atrocities. People might not to be alarmed at the terrifying proclamation of Weyler, threatening penalties that are practically impossible of execution and only intended to quell the spirit of disaffection. So far nobody has been shot or executed.

"I believe the war is likely to last a couple of years, but despite the staying powers of the insurgents it is impossible for them to succeed alone, even if they do wear out the armies and resources in Spain by desultory, guerrilla warfare, invited by the climatic conditions of the country."

Northern Pacific Receivership.

WASHINGTON, March 5.—The Supreme Court yesterday who participated in the order recognizing the circuit court for the Eastern district of Wisconsin as the court of primary jurisdiction in the Northern Pacific receivership, decline to discuss the interest of Judge Gilbert to recognize the court in question jurisdiction. There is no doubt, however, on the part of those familiar with the proceedings, that these justices considered the order as regular, and intended that it should effect the consolidation of the Northern Pacific receivership in Messrs. Harlow and Mellvery who were appointed by the Milwaukee court.

Date Fixed for Holmes's Execution.

HARRISBURG, Pa., March 5.—The date for the execution of H. H. Holmes, the convicted murderer, was fixed by Gov. Hastings today. He names Thursday, May 7, as the date.

Treasy With Indians.

DENVER, March 5.—A special to the Republican from Pueblo, Arizona, says: A relief from San Carlos states that Inspector McCormick of the Interior department is now practically concluded his task of securing by treaty from the Apache Indians of the White mountain reservation segregation of the notes Deer Creek coal fields. The Indians have agreed to have an area of land set off to them adjoining, but all the Deer Creek coal fields and any other land on which a coal formation can be traced.

Information for the Navy.

WASHINGTON, March 5.—The navy department is sending out to the navy militia commanders of the various states having such organizations, blank forms for the collection of information regarding the topography and general features of their respective localities for military use.

FROM CLARA BARTON.

The Sublime Porte Perfectly Charming to the Lady.

NEW YORK, March 5.—A letter just received by a member of the American National Red Cross association from Miss Clara Barton, dated Pera, Constantinople, February 19th, tells of the journey of the Red Cross party which sailed from here January 22nd, and also contains the following:

"The minutes sent to Minister Terrell yesterday by Secretary Olney, and which I trust was there public, was the outcome of a call in the morning upon the Sublime Porte in the person of the minister of foreign affairs, which was perfectly way so agreeable, cordial and satisfactory as it could have been made in any country. Not only was the usual permission given for our entrance into Armenia, but an active and generous effort was displayed toward making our endeavors, our journeys, etc., safe and pleasant and as early as possible, and also as productive of beneficial results as could be wished.

"Mr. Terrell was very much gratified and seems very happy over our success, to which the state department and he contributed so largely.

"As soon as an outfit can be made and passage secured, our men will start for the desolated regions. It will be cold and terribly hard for them, but that is what they came for. I have met several of the leading missionaries and other American gentlemen here. It is hoped the massacres are over, but it is, of course, uncertain. The general feeling is that Russia has said enough.

"The distress and suffering through want and sickness are described as being both enormous and infinite. Our journeys to Erzerum and Van, Zeitoun and Marash were short, but very pleasant, and so full of good feeling, cordiality and usefulness."

Miss Barton refers in the beginning of the foregoing to the message sent by Minister Terrell on the 19th ult., saying the Red Cross had been admitted and charities distributed and that the gates of charity are now open. Since then these dispatches have announced that the Red Cross party had left Zeitoun, where its relief is most urgent, by reason of its capture by the Turkish army.

The Universal Law.

WASHINGTON, March 5.—Congressman Pendleton of Pennsylvania introduced today, at the request of the executive committee of the American Federation of Labor, a bill to restrict the jurisdiction of United States courts in process issued in a strike. It provides "that the courts of the United States, sitting as courts of equity, shall not have jurisdiction to punish for contempt any person charged with the violation of any order of decree a court whose seat is in the province concerned, or are connected with the business of such court, or shall be made under the laws of the United States or in the state in which the offense is alleged to have been committed, but in every such case the offense against the court shall be deemed merged in the greater offense against the state or United States."

The bill does not apply to United States courts sitting as courts of law, or distinguished from courts of equity, and only applies in the latter case in two instances, where the contempt charged is the violation of an order or decree of the court, or where it makes the offender a principal in or accessory to a crime.

SOCIAL REFORM.

"Sociology," not Economy the Greatest Danger of the Present Time.

NEW YORK, March 5.—The place of the church in social reform was the subject of a discussion at a public meeting held under the auspices of the Social Reform club in Cooper Union tonight. Colonel H. Crosby presided. He said that in his opinion the church might say that economics which did not pay, people were wrong, and a system which compelled men to work too many hours a day was wrong. It could be said further, he thought, that it was a blasphemy that time should be computed to work twelve or fifteen hours a day. The great danger to this city was not Tammany, but mammony, he declared in conclusion.

Rev. C. A. Briggs of the Union Theological seminary declared the prophets were the founders of social reformers, and that the Christian church law, in the main, been faithful to the cause. It was because of the efforts of the church that social reform was so much more advanced in Europe than in Africa. But the church to this country was hampered because it had been in social reform a moral influence upon its adherents. The greatest work could be done by church societies, he said, such as was being done by the Paulists, by Dr. Hansford and by Dr. Parkhurst. The country, he concluded, ought to return itself first and then to tring about, as far as possible, social reforms.

The minimum real resolutions called upon the churches to condemn selfish laws which discriminated against the poor.

The last speaker was the Rev. Thomas J. Ducey of St. Leo's Catholic church. He said it was a violation of the principles of Jesus Christ that immoral wealth should roll in luxury while the pure were crushed down with poverty.

Fire Damp Carriages and Bicycles.

CHICAGO, March 5.—The roads in the Central Passenger committee have agreed to make the same charge on bicycles as fire damp carriages are made by the lines in the Western Passenger association. The rule among the Western roads is that these articles are charged full fare if the same are express barges, with a minimum charge of 25c.

EVENTS IN COREA.

The Cabinet Killed Off and a New One Formed.

SAN FRANCISCO, March 5.—The steamer Gaelic arrived today from Yokohama, bringing news of another coup d'etat and the extensive sale at Pecin, Corea. On February 10th a detachment of Russian marines, numbering 127, arrived in Seoul from Fusan. The Corea advices say that the king then went into the Russian legation and formed a new government, dismissing all the former cabinet ministers. The leader Kim Hong Tsuh and seven other cabinet ministers, known as pro-Japanese statesmen, were beheaded and their corpses dragged round the streets. A decree, said to have been signed by the king at the Russian legation, ordered that the heads of five of the murdered ministers be fixed on spikes and exposed. All telegraph wires from Seoul were then cut and only meager news of the event was obtainable.

On receipt of the news of these occurrences, American, British and French men-of-war to Jinsen landed detachments of marines who immediately left for Seoul.

The king is said to have been induced to his action through a desire to evade a threatened attack on the Queen Gebtet. All the members of the new ministry are said to be connected with the Min family, of which the murdered Queen was a member. The Tokio papers attribute the king's actions to the influence of the Russian minister. The Russian minister, where the king could go to reside, is guarded by 500 Russian marines.

A Rockefeller Palace.

NEW YORK, March 5.—The World this morning says:

Wm. Rockefeller, the multimillionaire of the Standard Oil company, will build another palace for his present one does that now grace the millionaire district.

In company with James Stillman, the president of the Citizens' bank, Mr. Rockefeller, he has purchased seven lots on the old site of the St. Luke's hospital. Four of the lots front on Fifty-ninth street, and three on Fifty-fifth street. They are 125 feet from Fifth avenue and run through the block. It is said Mr. Rockefeller has the refusal of the Fifth avenue frontage and that when this ground is added to the present purchase he will erect a magnificent mansion, taking in nearly all the space.

THE NEW WOMAN.

Ideals Regarding Women Have Changed.

THE ATHLETIC WOMAN REIGNS.

Which Makes the Best Wife, the Bicycle Girl, or the Delicate, "Clinging Vine?"

Not so very long ago, the ideal woman was the helpless, strengthless creature, who must be protected from the slightest breath of air, and from the slightest exertion. She was beautiful in and conditionally dependent upon the sturdy "oak" to which she clung. She lapsed from an utter dependence upon her father and brothers to an equally utter dependence upon a husband. She had little self-reliance, and still less ability to take care of herself. And now, of late years, there has been a change—and we hear of a "New Woman."

That there actually is a "New Woman," there can be no doubt. Her manner of clothing herself has really very little to do with the case. Her newness consists rather in a new style and a new body than in new clothes. She is distinctly able to take care of herself. A great many of them make their own living—choose what they place—when they choose, and how they please. The New Woman is much more intelligent than her predecessors. She has found new objects in life to take the place of the only one conceived by the woman of a few years ago—the object of matrimony. Thirty years ago, a girl of (or twenty) was to be seen as something of an old maid. Now always a woman never gets so old that she is an old maid. The term is obsolete. The New Woman marries, if she pleases—and if the right man presents himself. She is able to take care of herself. She doesn't have to lean on anybody. She doesn't have to depend on anybody for her living, or to make the most of herself. Quite often she can make a better living for herself than she will have provided for her by the man she marries, and she doesn't have to work so hard before marriage as she does afterwards.

What does all this mean?

It means—first of all—that women are healthier than they used to be. It means that they are learning better how to take care of themselves physically. It means that "Female Complaint" is less fashionable than it was a few years ago. It means—among other things—that Dr. Pierce's Favorite Prescription has been widely, and judiciously, and persistently used. This one remedy has done more than anything else to produce the New Woman. It has lifted her out of her invalid's chair and put her on a bicycle. It has fitted her for the better performance of all the duties of her life. She is healthier, happier, cheerier girl. She is a better feeling, better looking, better tempered wife. She is a stronger, brighter, more capable, less irritable, pleasanter, happier mother. She produces and raises brighter, healthier, happier children. She performs her Home Duties and bears and rears children without fatigue, and so without nervousness—and so without irritability. She is what God originally meant her to be. She takes her proper place at home and in business, because she is able to do so. She is filling a place that was not filled before. She is no longer the mere shadow or ghost of her mother man. She is his equal in most things—his superior in many. She is that greatest and most charming of all good things—a healthy woman. And she is a better woman because she is a healthier woman. Perfect health is the very best thing that she can possess. Without it, she is an incomplete being. If she is dragged down by some nerve-sapping disorder of the organs distinctly feminine, she is a very imperfect woman indeed and she is sure a very fretful woman, because she may be relieved surely and easily and permanently by the use of Dr. Pierce's Favorite Prescription. This remedy is the discovery of Dr. R. V. Pierce, an eminent and successful practitioner and most popular medical writer and author, who has for nearly thirty years been the chief consulting physician and surgeon of the Invalids' Hotel and Surgical Institute of Buffalo, N. Y.

The "Favorite Prescription" is for all the ills peculiar to women. It is perfectly natural was it brings about perfect health and strength. It is not a "cure-all." It is for only one class of diseases—those peculiar to women. Its effect is prompt and permanent. It allays inflammation and stops debilitating drains on the system. It assuages distressing and painful periodical derangements. It promotes the changes and discomforts of all the trying periods of a woman's life. It should be taken whenever there is any irregularity of the feminine functions, and whenever there is any indication of disorder or disease. It should be taken regularly by every woman during the entire period of childbearing. It relieves the time of many of its discomforts, and in the end makes the ordeal of childbirth comparatively painless.

The first physician in America to make a life specialty of treating women and prescribing for their ailments, the physician to discover a remedy for nearly all the pain and suffering as well as the danger to both mother and child attending the ordeal of childbirth, Dr. Pierce, and his staff of skilled specialists have successfully treated hundreds of thousands of women, and have cured them by using means prohibited upon the laws of common sense and not in accordance with the laws of nature. These are happily combined in Dr. Pierce's Favorite Prescription.

Every prospective mother should commence early during the period of gestation to build up and prepare her system for the trying ordeal of the confinement by the regular use of Dr. Pierce's Favorite Prescription, which strengthens the system to withstand the conditions and the function of parturition which can not be realized with any other medicine to any extent. Thereby danger to both mother and child is lessened, nearly all the pain and suffering are avoided, recovery always is rapid, and the nursing period and the attendant secretion of sour stomach, for the child to be nursed. The women writing "Favorite Prescription" imparts health and strength to the whole system and especially to the organs distinctively feminine. Not only do prospective mothers find in nursing ease as well and for both women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon.

The "Favorite Prescription" is the only medicine now before the public for women's peculiar ailments adapted to be handled by druggists, and is regularly prescribed by physicians—as experienced and skilled specialist in these maladies. It cannot do harm in any condition of the system. It is also recommended some of the best medicines of women.

All derangements of the distinctively feminine organism are cured by Dr. Pierce's Favorite Prescription. It is absolutely certain. There are some who have sometimes doubted whether it is a complete cure in each and every case, but even these will find a relief and improved health in the use of the "Favorite Prescription." Many have cured hundreds of women who have received no relief whatever from years of treatment with good physicians. It is absolutely certain in the history of medicine. Such a remedy can be observed only once. There is nothing in the world like it, nor has there ever been.

The "Favorite Prescription" can be obtained at any good drug store. If you value your health more than you do the dirty profit of a druggist who tries to impose on you by giving you something which he says is "just as good." The "Favorite Prescription" is sold. There is nothing "just as good."

"I recommend Dr. Pierce's Favorite Prescription," writes Mrs. A. D. Simmons, of Rossville, Lyon Co., Kansas, "to every one who is having family—taken as directed. It works like a charm in confinement."

"I took the 'Favorite Prescription' through the period of gestation," writes Mrs. Belle Wisenant, of Pawnee, Adams Co., Ohio, "and when baby came it shortened labor and helped me wonderfully. My baby weighed ten and one-half pounds when it was born. It is the largest baby I ever gave birth to, and I had none the easiest time I ever had. I was in labor only one-half hour and in three days I was up. Helpsickness it was always about two weeks. When I first used your 'Favorite Prescription' I was going down as fast as I could and need nothing of medicine but I got no rest until I began taking your 'Prescription.'"

"Some years ago," writes Mrs. H. J. Newton, of Rosedale, Washington Co., Texas, "I was afflicted with falling of internal organs, and was advised to have an operation. Which I did. The operation was very painful, I suffered much and spent much money. There was a constant dull pain in my lower bowels and on top of my head, and a never pain in my right side just above or rather on the side of my right hip. I had attacks of a distressing nature which weakened my already feeble constitution. My physician directed me to undergo a second operation. This I refused to do, and gave up all patience with the doctors that I encouraged them and concluded to never take another dose of medicine. At length I read an advertisement of Dr. Pierce's Favorite Prescription. I sent and got one bottle and began on it, we thought, and the first three days I was worse than before—no longer can tell what I suffered. I was minded to throw it away and give up trying to do any more medicine, but on taking it for one week longer it was taking a good effect, also so it proved after the third day. I began to improve rapidly and female I had taken one bottle I could do my housework, and by the time I had taken the second I could do anything I did do work. I took four bottles in all, and, gentlemen, it has been ten years since I was cured. Have had good health in that respect ever since."

"When I got your treatise on Diseases of Women," writes Mr. W. G. Cain, Riverhill, Gaston Co., N. C., "my wife had not been on her feet in forty days, and I at once procured a bottle of Dr. Pierce's Favorite Prescription. My wife began to improve in strength and I can truly say that it was exactly the medicine she needed. After using half a bottle she began to improve, and she continued to use it three or four months. The last one she took to be very much relapsed in size and somewhat weakened. I am happy to say that she is now free from any symptoms of the disease. Two bottles of the 'Prescription' effected a permanent cure."

"Dr. Pierce's Favorite Prescription is the best medicine I ever used in my life," writes Miss E. M. Farley, of Central City, Cabell Co., W. Va. "I had discovered a tumor for eighteen months. Doctors said they could do nothing for me, but I knew what 'Favorite Prescription' had done and determined to try it again. I took but two bottles and am now sound and well."

"I took a few bottles of Dr. Pierce's Golden Medical Discovery and 'Favorite Prescription,'" writes Mrs. W. J. McCausland, of Glasgalla, Kittitas Co., Wash., "and they did me more good than half a dozen physicians' good physicians, whom we paid several hundred dollars to. I have recommended them to a great many of my friends, some of whom have used them and have been greatly benefited."

Hundreds of things that every woman ought to know are published in Dr. Pierce's Medical Author, which is offered below and can now be had free, on payment of cost of mailing only.

Any woman, anywhere, who is tired of suffering, tired of doctoring, or tired of life, who will write to Dr. Pierce, or to the World's Dispensary Medical Association, at Buffalo, N.Y., of whom he is President, will receive, free of charge, good, sound professional advice, that will enable her to cure herself at home (if her case is curable), pleasantly, painlessly, permanently, and cheaply. Only, too, without having to undergo the trying ordeal of "examination" and the usually painful and dreaded treatment by "local applications."

All such correspondence is treated as the strictest confidence by Dr. Pierce, whose records of over a quarter of a million cases treated within the past thirty years' experience, show that there are not three incurable cases in a hundred.

Every woman should send for Dr. Pierce's great book "The People's Common Sense Medical Adviser." It has 1,008 pages, profusely illustrated. Over 97 pages are devoted to Women's disease with suggestions for home treatment. It will be sent, free, bound in paper covers, for 21 one-cent stamps. Or, bound in cloth, with gilt side and back stamps, 31 cents in all, to defray the postage and the extra cost of that more durable and beautiful style of binding. Send now before all are given away.

WHAT IS MORE PRECIOUS THAN

SIMMONS LIVER REGULATOR

THE BEST

SPRING MEDICINE

is SIMMONS LIVER REGULATOR—Don't regret the Spring Fever you get daily during the Winter, just like all others, and the system becomes chilled up by an accumulated waste, which brings on Malaria, Fever and Ague and Biliousness. You want to wake up your Liver now, for be sure you take SIMMONS LIVER REGULATOR to do it. It also regulates the Liver—keeps it properly active, when your system will be free from poison and the whole body invigorated.

You get THE PURE BLOOD when your system is in A1 condition, and that will only be when the Liver is kept active. Try a Liver Remedy once and note the difference. Take it in powder or in liquid already prepared, or make a tea of the powder, but take SIMMONS LIVER REGULATOR. You'll find the RED Z on every package. Look for it.

J. H. Zeilin & Co., Philadelphia, Pa.
