BUSINESS IN MINING STOCKS.

Week's Record 681,087 Shares Which Sold for $153,595.80.

LAST DAY SOMEWHAT LIGHT

Sales and Their Value During the Month—Rules Governing the Listing of Stocks.

Compared with other days of the week, business was somewhat light on the exchanges today, the sales made reaching a total of but 86,080 shares, with a selling value of $115,741.47, the said board the record was 12,858 shares for $15,124, while on the new exchange 27,510 shares changed hands, for which buyers paid the sum of $14,634.42. For the week the sales amounted to 681,087 shares, the same selling for $153,595.80, while the month footed up 5,170,125 shares for $924,902.43.

THE WEEK'S BUSINESS.

—ing the week sales on both exchanges were as follows:

	Shares.	Value.
Monday	136,000	$ 25,727.25
Tuesday	112,275	24,981.05
Wednesday	118,819	19,962.69
Thursday	96,599	15,199.42
Friday	127,235	21,431.24
Saturday	86,080	15,741.47
Totals	681,087	$153,595.80

TRADING WAS GOOD.

Last Day of the Week Fraught With Good Business—Joe Bowers Declines.

The last day of the week on the Salt Lake Stock Exchange brought out a fair volume of trading, the sales amounting to 12,858 shares, for which there was paid the sum of $15,124. In the night, stocks were firm, being in better condition than the day previous, and all in all, conditions were quite satisfactory.

Business was good from the very start, Ajax leading the list with shares at $1.30 and $1.32½. Daly sold at 45¢, while for Four Aces the brokers paid 28, but later dealt in it at 26¢, leaving the stock with a closing bid of 26. Mercer found takers at $1 and Lower Mammoth went at 73¢, with Northern Light a sale also following between $7 and 7½c. Omaha displayed considerable activity and was dull in down to 47¢, while Star Consolidated was a seller at $1.05 to $1.07, and Sunshine went in board lots at 93 to 95. In Sacramento there was trading at 47 and 48, and South Swansea sold for $1.21¼. On the close business in higher-priced securities, in this class Iuaot appeared for the first time and was greeted with a bid of 30½, as against offerings at 33.

Unlisted stocks opened with sales of Buckeye at 5 cents. Then Central Mammoth was dealt in at the same figure, while Emerald had takers at 14¢, and Gold Hill did business at a decided advance, the sales being 5 cents. Joe Bowers received a severe reprimand, the bear element expecting it down to 38¢, the price it was selling when business came to a halt. It started at 17¢, and had a standing bid of 16¢. Bowers Extension also weakened and sold at 9 cents, while Little Pittsburg was handled between 1¼ and 4½. Monarch followed with sales at one cent, and Midnight Bowers made transfers at 4½. North Swansea was taken at 11½, and Yankee Consolidated at 9½ to 8¢. In the class Bio Cassia, Century and Kendall appeared for the first time, receiving bids of 2, 5 and 6 cents respectively, while West Mercer was reduced to its old mines with a bid of 7 cents, and Hover was called, the stock being wanted at 10 cents.

The closing figures were as follows:

RICH ORE IN THE WASHINGTON.

Big Body of High-Grade Mineral Exposed in the Shaft.

SACRAMENTO DIVIDEND PAID

Mercur Refinery Starts on Monday—Rockskin Copper Mines Showing in the Four Aces.

P. T. Farnsworth came up from the south this morning, returning from one of his periodical trips to Pinto where he inspected conditions at the Horn Silver and Washington mines. The former is pushing along as usual in the making of dividends for its stockholders, but it is with the latter that Mr. Farnsworth is especially pleased. He says that in the shaft of the Washington, at a depth of 320 feet, the miners are in a body of excellent shipping ore, the same carrying values of $40 to 250 a ton in gold, silver and lead. The ore has been now into a distance of five feet and it still continues with both ends putting up ore of a good grade. Mr. Farnsworth states that the mineral is being hauled by team, a distance of five miles to the railroad, and he believes that with the present showing regular shipments can be made. The ore body is still sinking to ascertain the extent of the ore body, which, it is thought, will develop into a magnificent proposition, worth millions. The owners of this property are highly elated, and already look forward to early dividends.

Sacramento Dividend Paid.

The Sacramento paid its dividend of half a cent a share, or $10,000 today, the amount being distributed among a wide range of stockholders. The property is a good one, and faithful shipping parcels on the list and last year handled out 100,000. With today's payment the company has settled the sum of $60,000 so far in the annual report, submitted a few days ago, the mine is in a condition to continue dividends for years to come.

Refinery to Start Monday.

John Dern, manager of the Mercur, informs the "News" that in all probability the new refinery in charge of Robert Hoffman will be started up Monday. This means that the company will make its first shipment of bullion about the middle of April, and thereafter, that it will be quite a saving to the company, as it is already assured, as the expenses incidental to shipping crucibles, testing, etc., will be done away with. If the refinery is found to be in good working order on Monday, no more crucibles will be shipped, if not, a shipment will have to be made as the company is almost ready for another clean-up.

Showing in the Four Aces.

Horace Zerbe, the well known stock broker, spent Thursday at Tintic in an inspection of the Four Aces. The gentleman speaks highly of the property and is at a loss to know why it is not being worked to better advantage. He says they have a splendid showing in the north drift on the 400-foot level from 20 inches to 3 feet of high-grade silver-lead being exposed. In the south drift on the same level there is about 18 inches of the same class of mineral, all of good shipping quality. Mr. Zerbe says there is good ore in several places and believes the mine ought to be pushing on the market a car a day at least. The gentleman also visited the Picnic which he says is looking well and nearing the ore body.

Jesse Knight Buys the Cyrus Oliver.

Provo, April 1.—A mining deed has been filed for record with the county recorder from George H. Robinson and Mattie E. Robinson of Salt Lake to Jesse Knight of Provo for one-half interest in the Cyrus Oliver mine, situated in Tintic mining district. The consideration named is $3,000.

Rich Carbonate of Lead.

Jos. Meeks of Circleville called at the office a few days ago with a sack full of peculiar looking ore. It is yellow and soft and does not look especially rich but is very heavy. It is, however, very rich in carbonate of lead. Some of it which was assayed went 52 per cent lead and 36 ounces of silver to the ton. The rock this ore came from was taken from a vein about twenty feet wide, and the piece assayed is from the croppings. Mr. Meeks had several large sacks full of the ore and will have further assays made. He left his home for a ten weeks' trip and had been gone two months.—Augusta Progress.

BUCKSKIN COPPER MINES.

King Brothers Own Good Properties—Grant Gulch Smelter.

[Pioneer Scotch Progress.]

Willis and Kinnear were down Tuesday on their way to the Buckskin copper mines, with men and tools to open up the claims and prove up on a good vein of ore for smelting. They propose to bring the ore out through Pangnitch, and ship from Kanab, but they want to get out two carloads this month and to ship regularly after this. These mines are located by ex-Congressman Wm. H. King and S. A. King. They have some good minerals to use in the work. It contains the same as mine backed by "Tom Kings and a Jack" output to be a winner.

The assay from McVicker's Salt Lake assay office gives Delaware silver 28.8 ounces; copper 22.2 per cent. Second assay gives 30.4 ounces of silver, copper 20.18 per cent. Floating Star 16.2 ounces of silver; copper 16.2 per cent. Second assay gives 16.4 ounces of silver; copper 5.8 per cent.

The Grand Gulch copper mines is about 25 miles from Pinto. Kings in Moab have county, Arizona. The party who has bonded the mine talks of putting up a smelter there. John Kings of Tropic was in Pangnitch Tuesday on his way to the new copper mines in the Tenmile Mountains. Mr. Swapp speaks highly of these mines and says there is a supply of water discovered there now that was not known in early days.

Our Cactus correspondent says Mr. Pearce has another car of antimony ready and is awaiting sacks. He is putting up a new building and platform for a refinery. The market price for antimony has gone up to 10 cents per pound and there is a very good prospect for a refinery. There has been a large body of ore found on the Little Emma, a carbonate in sight.

There has been some new ore found. The 25 per cent. It is a white metal and very heavy and clear from other material. If it is antimony it surely is a different kind from any yet found in this part.

Mammoth Dumps Leased.

John T. Hays, P. M. Gillespie and George Stapley have secured a lease on the old Mammoth dumps and are now sorting and shipping the Plutonic dump. The dumps were made when only high-grade ore would stand the expense of a wagon haul and heavy smelter charges, and under present conditions a large per cent of the ore is of a shipping grade. Mr. Hayes had a lease on the old Ajax dump several years ago, and made money for both himself and the company.—Tintic Miner.

The Newhouse Tunnel.

The Denver correspondent of the New York Sun says it is announced that work on the Newhouse tunnel, projected to pass through Sexton Mountain from Idaho springs to central City, will be resumed. Mr. Newhouse, the promoter of the tunnel, which is now 2,000 feet into the mountain, has sold a one-third interest of the Highland Boy mine of Utah for a sum said to amount to $1,000,000. The length of the tunnel under survey is five miles and the promoter aims to cut at varying depths many of the principal lodes of the Clifton county district.

MINES AND MINING MEN.

The Horn Silver is in with five cars of crude ore.

The Cinderella, adjoining the Lincoln group at Mercur, is to be incorporated.

C. E. Allen, manager of the Golden-Rockwell, was out at the mine today.

The Mercur Mercury says a mill for the Omaha is assured the coming spring.

Yesterday dividend by the Horn Silver was $20,000, and gave the company a total of $1,250,000.

James G. Forrester is again in charge of the Dalton-Beck mill as superintendent.

The machinery for the Kismet on the West Tintic is being hauled to the mine from Eureka.

The Utah of Fish Springs marketed a car of ore today carrying 53 per cent lead and 120 ounces silver.

It was expected that the Daly-West would pay a dividend of 5c at the opening today. The plant has a capacity of 125 tons.

A miner who was about this afternoon in the Ontario drainage tunnel reports that the Mercur has passed into the hands of Boston capitalists. The probabilities are that the mine will be worked, nothing is said of it at the company's office.

The Utah mine of Fish Springs has a car of ore at the sampler. Charles Van Antwerp, who has just returned from the mine, says it is looking well. He also puts in a good word for the Gaines.

During the week shipments from Tintic amounted to 12 cars of ore and 4 cars of concentrates. The Grand Central alone shipped 7 cars of ore, improvements at the mine, which been stated a shut-down for a few days.

Mammoth issued from Salt Lake yesterday a circular which is looking for an expert to explain how a piece of petrified wood with nails in it would be found in the mine in the 11th level of the Mammoth mine. The specimen is on exhibition in the mill office.

The Willard correspondent of the Beaver County News says: "Much of capital are still working outside of the mine. We are anxiously waiting for the results. They have already spent more than the Hecla has handled feet in the Superior and American mines and are still at it yet. The Hecla has not actually owned by farmers, but has passed into the hands of men of wealth.

STOCKS.

New York, April 1.—The suspension of trading in London with Tuesday's decided total failure of the Indian speculative sentiment on the other side. However, the large blocks of stocks were taken with considerable confidence particularly among the speculative, which were up from ½ to 2 per cent. Northern Pacific, Rock Island, railway stocks were irregular. Northern Pacific being easier and Union Pacific stronger. The announcement of a 100 per cent commission stock dividend on American Tobacco was without appreciable effect on the stock. The opening price proved to be the highest for many of the specialties, as traders became discouraged by the failure to stimulate the following, which depressed them notably.

An inquiry developed for the railway shares, the Rock Island, Burlington and Atchison, preferred, were advanced sharply. Subsequently there was a general showing of strength, the persistent decline in the speculative fraternity further improvement in the railway specialties.

Speculation halted and values fell away pending the publication of the bank statement, which showed a decrease in surplus reserve of $2,962,575 and a loss in cash of almost $4,000,000, coupled with an increase in loans of $469,000. Heavy buying developed in Manhattan and Federal Steel, which sold materially above the earlier high figures, Manhattan touching 131.

Considerable strength was also manifested in other speculations. Third Avenue rose 3 points. Standard stocks, meanwhile, were on the downgrade, as the following table of sales. Later they switched upward and the market closed with fairly good gains principally.

SUGAR.

New York, April 1.—Sugar ran strong tending upward; fair refining, 3 15-16; centrifugal, 96 test, 4 1-16; molasses sugar, 3 5-16; refined firm; crushed, 5¾; powdered, 5¼; granulated, 5⅛.

WEEKLY BANK STATEMENT.

New York, April 1.—The weekly bank statement shows the following changes:

Surplus reserve, decrease	$2,962,575
Loans, decrease	469,000
Specie, decreased	3,119,200
Legal tenders, decreased	773,800
Deposits, decreased	3,333,900
Circulation, increased	49,600

The banks now hold $15,484,850 in excess of the legal requirements.
