TALKS WITH LEGISLATORS.

Material Prosperity of the State Clearly Set Forth.

PEACE AND PLENTY ABOUND

People Have Something More Substantial Than Politics to Engage Their Attention.

"While I do politics little and while the introduction that follows the perusal of it is rather pointed to me," said a prominent member of the Legislature last evening, "yet it is not all there is to life to be an member of session." When he got through talking the "More" man entirely agreed with him so far as the session was applying life to the people of Utah.

He called attention to the prosperity they were now enjoying. He pointed out how they had been abundantly blessed in honest and state during the last session; how the soil had produced more collateral crops, how grasshoppers were almost growing through their weight; how a ready cash market was within easy access; how the others were giving up the precious metals; how vast sums of money from other states were being sent here for investment in these and how the live stock interests of the State were thriving as never before, in this connection extensive was made to the fact that these interests were perhaps more numerously represented than in any previous Legislature, and in this connection also it seemed that the livestock business is about to receive considerable attention in a legislative way.

NEBEKER'S LIVESTOCK INTERESTS.

The President of the Senate, Mr. Nebeker of Iron, is a stock man in all that the term implies, devoting his whole time and attention to sheep and cattle raising. He has recently become largely interested in the cattle business in the southern part of the State as well as in the district which he represents politically in the Legislature. He is a heavy purchaser, feeder and shipper and is considered an excellent judge in that line of business among the cattle men of Utah. There was a time when he engaged in cattle raising entirely to the exclusion of sheep raising. That was when he talked strongly against the Republican protective idea. Now he says, "If there must be a tariff on wool the people of the West might as well get a share of it." He he never forgets to add by way of reminder that he still believes "that the principle of protection is wrong and should not obtain in this country."

It is said that Mr. Nebeker is rapidly adding to his worldly wealth by engaging in the sheep business and that he will make an effort to become the owner of several more bands of them as well as to secure vast tracts of land upon which there may graze while enduring wool and mutton for him. While it is probably true that he is doing well in this particular it is also pleasing to note the fact that the reports which come from other stock growers of his part of the State are reports of prosperity and contentment.

PROSPERITY OF PRICE.

Hon. H. G. Miller, member of the House from Carbon county, who represented the people of that section in the State Senate three years ago, says that his constituents have enjoyed a very substantial wave of prosperity during the past season, and that they are still enjoying it. The livestock business is the most prominent and most profitable occupation of the people. The county is not a good one for farms though a large number of them are raised.

INFESTED BY MOUNTAIN LIONS.

"The county is," he says. "filled with washes, deep ravines, and mountain gorges, and is infested with mountain lions. So many of these voracious animals are there that we do not brand more than about 25 per cent of our calves. They prey particularly upon young brands. They have acquired a fondness for calves but do not kill as many of them as they do cows. It is a singular fact that a cow will produce her young much more rapidly than she will a mare. Besides this, horses seem to inherit a timidity so fear as to enable them to constitute lions especially."

HOW TO GET RID OF THEM.

"There is one way to get rid of these animals and one way only—and that is by offer of a good substantial bounty to the settlers for their scalps. The people cannot well afford the loss in addition to being about 15 per cent of our colts we lose annually. We also have a large number of timber wolves, which are the hospital color plan, which makes another number, one and account of excellent building stone. A good wolf is a rapid rabbit in the entire part of the county. As to sheep, our sheep are healthy promising copper bottom sheep being discovered. Not when we can mention a sheep disease in the county now, for a population of about five hundred and of a total of twelve hundred and ninety-five. The times is growing more rapidly."

PRICE AS SHEEP CENTER.

Speaking of the sheep business Mr. Miller said: "Carbon county is fast becoming a sheep center with Price for county seat as the sheep shipping. About fifty thousand there was shown there the last year and the prospects are that a hundred thousand will be shipped at the same place this year. I am informed that the Rio Grande Western railroad company is preparing to erect for the sheep business of Ashley valley also considerable and amounts to almost as much as that of Carbon county. It is a favorite point for southern Utahans to be easily sorting and the summer months, who come there to purchase and ship stock."

HOW THE PEOPLE PROSPER.

According to Mr. Miller nearly all the people of his district are prosperous. Most of the farmers are stock raisers. There are hardly any who do not own a bunch of cattle and who are not interested in a sheep herd or have a herd of horses. All of these have been notably lucky in the matter of prosperity for the two former. Wheat and oats are the principal two crops. Much a little corn is raised. Alfalfa grows to great abundance. Speaking of the Mormons Mr. Miller says he raised about two hundred tons of it on thirty-two acres of ground. The soil was somewhat mainly of angle, loam and clay and plaster was heavy and of good quality.

MINERAL RESOURCES.

Mr. Miller says that Carbon county is filled with silver of a low grade, but many claims are developed to an appreciable extent though several of these are being worked that as far as some of them supporting a number of dividends. The outlook for the future, however, is as bright as ever before.

MOUNTAINS OF COAL.

There are great mountains of coal in this county. It is a fact also that each thousands of the valuable fuel are mined. Mr. Miller says that there are another thousands of tons that yet remain untouched. All that is necessary to make them earn wealth for some one is the application of energy and investment of capital.

DOWN IN KANE.

Stock Raisers Would Like to Have the "Arizona Strip."

Hon. Joseph E. Robinson, who hails from Kanab, Kane county, and who has the reputation of being the strongest McKinley Republican in southern Utah, says that his constituents are happy and prosperous.

"Our stock raising brings us the money that we get," said he, "although we barely all of our revenue. This business has been strong and profitable for last year, good prices having prevailed generally. We do not raise enough grain and hay to supply our own demands by a long way and are compelled to ship the most from Sevier and other counties. We raise fine apples and good prices for our crop. Quite a lot of fruit is raised on dry land. We have a great many cattle and more sheep in the county. There are two large companies keeping herds of the latter and range close to the county's borders at the present time.

THE ARIZONA STRIP.

"Part of these are on the so-called 'Arizona strip,' which created so much interest in the Utah Legislature two years ago and which the Arizona legislature declined to allow to become a part of Utah. It is estimated that not less than two hundred thousand Utah sheep, forty thousand of which are from Kane county, are now wintering upon it. Naturally it belongs to Utah. I believe the people of Arizona would be willing to cede it to us at the time, providing a proper effort were made in that direction, such as sending a committee to Washington to take up a bill for with the committee on territories. The effort was made two years ago, in my opinion, on the ground that Arizona wished to be admitted as a state and desired to do nothing that might in any way compromise their work to end. The people here in Arizona willingly admit that it is sure generously. We can get to it and they cannot hinder it in a conference for admission. I am almost decided the treasury of Kane county is the attorney to secure them.

BIG CATTLE SALE.

"There are probably fifteen thousand head of cattle from Kane county on the Arizona strip at this time. The cattle business is enjoying a good deal of a boom down there. Some large sales have been made at still prices. Representative Crosby, my colleague on the right, is in Kane and ten thousand head from the N. land for $13.50 each the last fall. The purchasers were Cutler and Jolley, old Kane county stockmen."

OTHER GOOD SIGNS.

But these are not all the evidences of good times among the people of Kane county. All of them are feeling the effects of prosperity to a great extent. Business is good and money is plenty. Stock raising is the most lucrative business in the county. Kanab for instance, with a population of 500 people has just completed a water pipe system at a cost of $1,000. Already seventy families have subscribed to its support. It also says claim to boring the land for water and believe school boxes of the State south of Richfield. An enterprise that is much appreciated is the recent construction of a log sawmill in the Buckskin mountains, where there is an abundance of good timber for lumber purposes. This section was set apart by President Harrison as a timber reserve at the solicitation of Hon. Wm. F. Cody, better known as "Buffalo Bill," and associates who declined to let game be exterminated within its borders.

IN FAR OFF WAYNE.

County is Growing and Offers Good Inducements to Settlers.

"Wayne county is prosperous to a general war," said Representative Mitchell, who comes from that far-off section of the State. Continuing, he said: "Late frosts interfered considerably with the crops in one part of the county. But we had a magnificent fall season, notwithstanding. The sheep and cattle business has been better this for some time past and people are doing quite well. There are very few uncollectable for people around here. Some people who have come here with little and abundant water facilities awaiting the application of intelligent effort. A magnificent canal has been constructed in Johnson valley, at the head of the Fremont river. It will easily irrigate from thousand acres of good farming land. But there are other improvements as well. Stock raising is as I have said, notably. We also have a large number of timber, which will be hospital color plan, which makes another number, one and account of excellent building stone. A good wolf is a rapid rabbit in the entire part of the county. As to sheep, our sheep are healthy promising copper bottom sheep being discovered. Not when we can mention a sheep disease in the county now, for a population of about five hundred and of a total of twelve hundred and ninety-five. The times is growing more rapidly."

WHY FARMS DON'T PAY.

Lack of appreciation as to the nobility of his calling, is one reason why some farmers fail to succeed, says a writer in Home and Farm. With us, we lack of education to fitting for their calling, not jostling in their right by the experience and observation of others. We have large farms and farm by proxy in their homes. The farmer of state experience can tell the difference of state experience can tell. Most farm work is lost at a time, so great are its diverse results. Farm accounts are not kept as they should, or not enough, and with an unlimited outlay, necessarily, the farmer is left in the dark. Farmers should be alive to all the important facts of good work. Some farmers of the country from farm to farm are allowed to go to waste. Bad is not sufficient to feed the farm. Work is not to be the planted rows cultivated with such frequency and care as to be a source of profit. Work is not permitted to take time substitute from the end from the crop.

The farmer can be avoided by our farming in the right direction, as an honorable employment, and a highly conducted. Only it has been neglected for hundreds, sacrifices and culture, requiring as an occupation, state and industrial preparation that we give to more efficient industries to fitting for the farm, and intelligent and industrious, and do what we can to develop and promote the happiness of the farmer. Farmers should be thrifty and economical himself and thrifty control. Manure both liquid and solid, should be carefully saved and applied to the land. Aim to produce the best. Make home life pleasant and look well to the culture of yourself and family.

Tortured By Rheumatism.

A Purely Vegetable Blood Remedy is the Only Cure.

If the people generally know the true cause of Rheumatism, there would be no such thing as liniments and lotions for this painful and disabling disease. The fact is, Rheumatism is a disordered state of the blood—it can be reached, therefore, only through the blood. But all blood remedies can not cure Rheumatism, for it is an obstinate disease, one which requires a real blood remedy—something more than a mere tonic. Swift's Specific is the only real blood remedy, and it promptly goes to the very bottom of even the most obstinate case.

A few years ago I was taken with inflammatory Rheumatism, which though mild at first, became gradually so intense that I was for weeks unable to walk. I tried several prominent physicians and took their treatment faithfully, but was unable to get the slightest relief. In fact, my condition seemed to grow worse, the pains soon all over my entire body, and from November to March I suffered agony. I tried many patent medicines, but none relieved me. Upon the advice of a friend I decided to try S. S. S. Before allowing me to take it, however, my guardian, who was a chemist, analyzed the remedy, and pronounced it free of potash or mercury. I felt so much better after taking two bottles, that I continued the remedy, and in two months I was cured completely. The cure was permanent, for I have never since had a touch of Rheumatism, though many times exposed to damp and cold weather.

ELEANOR M. TIERNEY,
2131 Powelton Avenue, Philadelphia.

Those who have had experience with Rheumatism know that it becomes more severe each year, and like all other blood diseases, the doctors are totally unable to cure it. In fact, the only remedies which they prescribe are potash and mercury, and though temporary relief may result, these remedies produce a stiffness of joints and only intensify the disease.

S. S. S. never disappoints, for it is made to cure these desperate diseases which are beyond the reach of all other remedies. It cures permanently Rheumatism, Catarrh, Cancer, Scrofula, Eczema, and all other blood diseases. It is the only blood remedy guaranteed

Sound Reasoning.

The argument for an active Winter Business this year rests on several considerations. Among them.

FIRST—The extraordinary opportunities for securing great bargains in worthy goods.

SECOND—After Holidays there is always a quietness that gives you a circle of personal needs.

Congenial needs and extraordinary opportunities to meet them ought to produce business, and that explains the splendid opening of our January business.
