MINING, BUSINESS AND STOCKS

NEW MANAGER FOR JENNIE CO.

Charles A. Short to Give Up Active Charge of Gold Springs Mine.

RETIRES EARLY NEXT WEEK

Leaves Property Just as It Is About To Enter Upon Money-Making Career.

A change in the management of the Jennie Gold Mining company at Gold Springs, Iron county, will occur next week. Charles A. Short, who has been actively in the harness since the organization of the company and before the town of Gold Springs came into existence, has tendered his resignation to the board of directors, which is to become effective on the 31st inst. It is understood that Mr. Short's successor has been chosen, but at the affices of the company today, official notice of this fact was not forthcoming. However, an announcement will be made within the next few days.

Charley Short has been interested in the Jennie property with H. R. Elliott for several years. They promoted the Jennie company; conducted a systematic campaign of development which has resulted in the opening of some extensive bodies of low grade gold ore. The property is equipped with a mill and is now in good shape to enter upon a money making career. Mr. Short has labored night and day to make the Jennie a success and while at times confronted with difficult problems, as nearly every mining man is who attempts to open up a new district, but they have been overcome and no doubt his successor will have smoother sailing. It is understood that Mr. Short will leave with his family next week for southern California where he expects to put in about two months on a vacation.

ON MINING EXCHANGE.

Market In Slightly Better Tone Today —Closing Quotations.

Business was more brisk on the mining exchange today than it has been for a week. The unlisteds received little attention, but the regular list looked attractive. There was an improvement in the situation and many stocks were marked higher. A few shrinkages were noted, but on the whole the market was in better tone. Lower Mammoth made gains, so did Colorado; while Sioux Consolidated closed a point under the opening sale price. Western Nevada Copper sold on the open board at 40 cents. The closing quotations and sales were:

WEDGE PROPERTY TO SO. COLUMBUS

Circular Letter from President Tony Jacobson Gives Proposed Plan of Merger.

FINANCES GETTING LOW

Hence South Columbus Must Make Move to Provide Funds for Development.

The South Columbus Mining company has mailed a circular letter to shareholders setting forth the reasons for calling the special stockholders' meeting scheduled for Sept. 15. It bears the signature of President Tony Jacobson and among other things says:

"Our idea in making this increase is to better finance the company, and to take over the Columbus Wedge Mining company's property which adjoins the South Columbus on the west, and which property has a very nice showing of ore. The Columbus Wedge Mining company has spent considerable money in developments, and is a property we think we should have in conjunction with our present holdings. Our idea is to give the Columbus Wedge Mining company 115,000 shares of stock for their property; the balance of 85,000 shares remaining in the treasury to be sold for development purposes. This added to the 15,000 shares now in the treasury will make a total of 100,000 shares of treasury stock. Our finances are now very low and we must either increase our capital stock as above indicated, or levy an assessment, as you will note by the following financial statement.

"The South Columbus property itself is looking very well. During the time of the corporation's existence we have completed something over 5,000 feet of development work, that is, in drifting, raising, etc. In what we call the Alta-Quincy tunnel we have opened up a large body of copper ore which will run from 4 to 8 per cent copper, but as it is very silicious it cannot be shipped at a profit without first being milled. In this same tunnel we have several fissures that are productive of carbonate ore, but this will not be of any great value until the sulphide is reached. We should get this later on in what we call our lower tunnel, from which point we are drifting to intersect the contact and ore chutes mentioned above.

"The property is well equipped with boarding house, etc., for the accommodation of at least 125 men; compressor house, compressors, blacksmith shop, and everything necessary to carry on development work in good shape.

"We are pushing three drifts from our lower level to points where we should get some good results within a very short time, and in order to continue it is necessary to raise funds. Without assessing we consider the above the best way out of the difficulty.

ORE IN WHITE ROCKS.

Not Rich Enough to Pay Though, Says Harry Joseph.

Harry S. Joseph returned yesterday from a round-up of several Nevada mining camps in which he is interested. "We are getting some ore in the January White Rocks lease at Goldfield," said Mr. Joseph today, "which assays about $24 in gold to the ton. That is hardly high enough grade to pay; but work is being pushed right ahead, and with the confidence that we will run into some high grade stuff after awhile."

Mr. Joseph reiterates the statement made last week to the Rhyolite Herald that the Montgomery Shoshone mine has a very bright future. He is profoundly of the opinion that Engineer Krumb has underestimated the value of the property.

NOW IN TELLURIDE.

Henry M. Adkinson Managing the Gold Pioneer Mine.

Henry M. Adkinson, formerly manager of the New England Gold & Copper company in Bingham, but who resigned several months ago to accept a more remunerative position in Colorado, is manager of the Gold Pioneer Mining company, operating at Telluride.

A letter from Mr. Adkinson to a friend in this city conveys the information that he is not making any attempt to extract ore from the mine yet; but is pushing an active campaign of development. In the meantime, however, he is paying expenses by working over an old dump on the Smuggler Union mine which was made 25 years ago. "I am living up on the top of the earth," says Mr. Adkinson in his letter, "at an altitude of 11,500 feet, and sending 150 tons of this material down to the mill every day, out of which is made a profit of several dollars a ton.

"We have had a terribly rainy summer—just like a tropical country—clear mornings and stormy afternoons. It is now due to change to clear fall weather. Our season ends here about Dec. 1, and then nothing happens here but snow until the following May."

PRODUCTION OF COKE.

Figures Showing Combined Output of Utah and Colorado.

The production of coke in Colorado and Utah (the statistics being combined in order not to divulge the extent of individual operations in Utah) amounted in 1907 to 1,421,579 short tons, valued at $4,747,436, against 1,455,905 short tons, valued at $4,504,748, in 1906, indicating a decrease of 34,326 short tons, or 2.36 per cent, in quantity, and a gain in value of $242,688, or 5.39 per cent. The average price per ton advanced from $3.09 in 1906 to $3.34 in 1907.

One new establishment was completed in Colorado in 1907, increasing the total for the two states from 17 to 18 and the total number of ovens from 4,103 in 1906 to 4,683 in 1907. One establishment of 23 ovens was idle in both years.

For several years prior to 1906 practically all of the coal used in the manufacture of coke in Colorado and Utah was slack, a large part of which was washed before being charged into the ovens. Of the total quantity of coal (2,388,911 short tons) converted into coke in the two states during the last calendar year, 679,182 tons was run-of-mine, of which 676,226 tons was washed; in 1906 the run-of-mine coal used amounted to 708,306 tons, of which 703,440 tons was washed. The slack coal used in 1907 amounted to 1,709,729 tons, of which 654,540 tons was washed and 1,055,189 unwashed.

Statistics of the manufacture of coke in Colorado and Utah are published by the United States geological survey in an advance chapter from "Mineral Resources of the United States, Calendar Year 1907," on the manufacture of coke in 1907, by E. W. Parker, the coal expert and chief statistician of the survey. Copies of this report, which will be ready for distribution in a week or two, may be obtained by applying to the director of the survey at Washington, D. C.

IMMENSE ORE BODY.

Splendid Showing Being Made In Nevada Douglas Copper.

In the south drift of the 550 level of the Nevada Douglas mine at Yerington, Nev., has been opened a sulphide ore body that might be considered a big mine of itself; but it represents only a smal portion of the reserves already proved up in the territory belonging to the Nevada Douglas company.

But the particular ore body referred to has been explored along the strike for a distance of 500 feet and face of the drift is now directly under the large cuprite ore body explored on the 500 level.

A cross-cut run recently was in ore for 50 feet and the whole mass, General Manager Orem states, will average 6 per cent copper; but there are lenses cutting through it that will show assays as high as 20 per cent copper.

SWITCH TO SIOUX CON.

Rails for New Road Have Arrived in Tintic District.

Rails for the new switch to connect the Sioux Consolidated mine with the Eureka Hill railway have been received in the Tintic district and will be laid without delay. Col. Ed Loose, one of the largest shareholders, and who was in the city from Provo yesterday, stated that the company has no contract with the smelters and adds that it doesn't need one. "The ore is what we call sugar ore and is in demand by the smelters. It is the cleanest kind of lead-silver ore."

UTAH CONSOLIDATED.

President Broughton and Guggenheims Not on Best of Terms.

The Boston News Bureau of recent date contains the following relative to the negotiations pending for a five-year contract with the American Smelter's Secureties company:

"The relations between the Guggenheim interests and President U. H. Broughton of Utah Consolidated are not very cordial, but the Garfield smelter wants the Utah ores as much as the Utah Consolidated wants the Garfield smelter and under the situation it is not unlikely that the two interests can come to terms.

"At present the Garfield smelter is having difficulty in treating the volume of ore coming to it, but this situation should be overcome within six months when additional furnace capacity is available.

"The Utah Consolidated people do not care to expend $3,000,000 in building a new plant. Underground developments at depth might influence them one way or anothe but considering the fact that the management is seeking a five-year renewal contract it is safe to say that developments at depth have not been all that could be desired.

WESTERN UTAH COPPER.

Manager Green and Engineer Zeigler Return from Camp.

Herman H. Green, manager of the Western Union Copper, and Engineer Werner Zeigler have returned from making an exhaustive examination of the Gold Hill mine in the Deep Creek country, which is owned by the foregoing named corporation. It is understood that Mr. Zeigler was commissioned recently to make a report on the property for the eastern interests identified with the proposition.

The Western Utah is reputed to be a copper property of more than ordinary merit and may be equipped shortly with a copper matting furnace. Mr. Zeigler is said to have formed a very favorable opinion and does not conceal the fact that the property gives promise of a bright future.

SPANISH M. & M. COMPANY.

Articles of incorporation of the Spanish Mining & Milling company were today filed with the secretary of state. The company is capitalized at $10,000, in 1,000,000 shares of the value of 1 cent each. The headquarters of the company is at Spanish Fork, and the properties controlled by it are the Spanish claims, in the El Dorado mining district, Utah county.

NEW COMPANY FORMED.

Special Correspondence.

Provo, Aug. 28.—Articles of incorporation of the Spanish Fork Mining & Milling company have been filed with the county clerk. The capital stock is $10,000 in par value of 1 cent each. The principal place of business is Spanish Fork. The company owns the following mining claims and are situated in the Eldorado mining district, in Utah county and which form a basis of capitalization: The Spanish mine claims Nos. 1 to 21 inclusive.

CONCENTRATES.

President A. B. Ruggles of the San Francisco Mining exchange was in the city yesterday.

General Manager George H. Dern of the Consolidated Mercur company left for Fremont, Neb., today, where he will meet Mrs. Dern, who is returning from a trip to Europe with the John Dern party.

Engineer O. H. Skidmore has completed plans for an electric power plant which a syndicate of Salt Lakers propose to erect on Little Cottonwood creek, about two miles below Alta. Interested in the enterprise are William Thornton, Harvey Bickerton and Fred Ray.

The negotiations which have been pending for several weeks for the purchase of the Lilly Mining company's Tintic holdings by a Salt Lake syndicate were broubgt to a conclusion yesterday. A new corporation will be formed to be known as the East Lily Mining company.

Commercial bills, 489¼ at ½.

Bar silver, 51¼.

Mexican dollars, 45.

Government bonds steady; railroad bonds steady

STOCKS STRONG, MARKET ACTIVE

New York, Aug. 28.—There was some irregularity at the outset of business in the stock market today, but the more important speculative favorites all opened higher. American Smelting improved 1⅝.

Profit-taking sales were on a large scale in a number of the leading stocks, but the demand was sufficient to prevent any serious inroads on prices, aside from Missouri Pacific, which sold 1½ below yesterday's closing. The market afterwards moved up in a resolute manner all around and there was a decided inquiry for some of the low priced stocks. Consolidated Gas was a conspicuous feature and advanced 3 points. The metal stocks were also extensively bought, particularly Amalgamated Copper. Toward 11 o'clock the market eased on all around and some stocks yielded to slightly below last night including Reading and Southern Pacific. The latter relapsed from 105 to 104⅛.

Speculation at noon was quiet on the decline, but when Union Pacific was rushed up to 164 the trading became animated and strong again. American Smelting moved up to par, but the leaders otherwise did not exceed their early high prices. Near midday the market again weakened slightly and became dull. Bonds were firm.

The market closed heavy. Atchison was run up 1¼ in a futile effort to strengthen the market. Its rise had only a momentary sustaining effect and active selling was renewed. Southern Pacific and Erie sold a point below yesterday's final price and a number of other representative stocks a fraction.

LIVESTOCK.

KANSAS CITY.

Kansas City, Aug. 28.—Cattle—Receipts, 2,000; market steady. Stockers and feeders, 2.80@4.75; bulls, 2.40@3.50; calves, 3.50@6.50; western steers, 3.60@5.00; western cows, 2.50@3.75.

WOOL.

ST. LOUIS.

St. Louis, Aug. 28.—Wool, steady. Territory and western mediums, 15@18; fine mediums, 10@15; fine, 9@12.

PRODUCE.

CHICAGO.

Chicago, Aug. 28.—Following a ¼ pence advance in wheat at Liverpool the market here today opened strong with prices ⅜@½ to ¾@⅞ above yesterday's closing quotations. Comparatively little wheat was offered at the start, but later some of the local longs took profits and prices reacted a trifle. The September delivery showed relatively the greatest strength, opening at 95 to 95¼, and selling off to 94¾. December opened at 95⅝ to 95⅝, declined to 95⅛@95¼.

Trade in corn was fairly active and the market was strong. Prices at the start were up ¼@⅜ and advanced about ¼ during the early trading. September opened at 77⅝@77⅞ to 78 and sold up to 78¼@78⅜. December touched 67 after opening at 66¾ to 66⅞.

Oats for May delivery sold today at 52⅝, a new high price for the crop. The market in general was strong, opening quotations showing gains of ⅛@¼ to ⅜@½.

Provisions were firm because of a 10@15c. advance in the price of live hogs. At the opening prices were 2½ to 10c. higher than the previous close, and further slight gains were made.

Reading was bought on a liberal scale for awhile and advanced 1¾ to 130⅜. While the general list hardened sympathetically, the traders soon began to sell stock under cover of the demonstration in Reading and the list became reactionary. Southern Pacific, Union Pacific and American Smelting yielded a point from their highest prices and Reading afterwards became weak and gave way as much. American Sugar was unusually active and gained a point. The prices dropped steadily during the late afternoon and the day's gains were largely cancelled. The Harriman and Hill stocks as well as others of equal prominence sold fractionally below yesterday's closing. Consolidated Gas, however, displayed exceptional strength and extended its advance to 4¼. New York Central also made a momentary show of strength and rose 1⅜ without effect on the general market.

Close—Wheat—Sept., 95; Dec., 95⅛@95¼; May, 98⅜@98⅞.

Corn—Sept., 78⅛; Dec., 66⅞; May, 64⅞.

Oats—Sept., 49½@49⅝; Dec., 49⅝; May, 51⅝.

Pork—Sept., 14.70; Oct., 14.80; Jan., 16.12½@16.15; May, 16.20.

Lard—Sept., 9.37½@Oct., 9.45; Dec., 9.30; Jan., 9.35.

Ribs—Sept., 8.87½; Oct., 8.97½; Jan., 8.37½.

Rye—Cash, 77½@78; Sept., 75
