WEATHER AND CROPS.

Local and State Data Received in the Office by Wire.

Salt Lake Temperature, Rain and Crops Excellent—Hail Storm in Morgan Twice Weekly.

Weather-crop bulletin of the Utah Weather Service, for the week ending Monday, May 27th, 1895. Charles Salisbury, Salt Lake City, director.

WEATHER.

The weather during the past week was almost a duplicate of the week before with generally cloudy and unsettled weather. The temperature averaged higher and the rainfall was heavier than last week, and the conditions were generally favorable for the growth of crops. Hail fell in Morgan twice during the week, but did comparatively little damage. Reports from the various counties of the Territory, as the week closes, show a heavy rainfall in the mining districts and throughout the entire Territory. This is a good assembly week and we may look confident of fine crops with beginning of June. Rain is the need of the moment.

CROPS.

All reports received this week are very favorable and indicate that the principal crops are in fine condition, showing rapid growth and promising generously well. Considerable damage was done to fruit in Morgan county and also in Salt Lake county, especially in the higher canyons where there was considerable snow. In the northern half of the Territory, especially in Cache and Box Elder counties, the cereals are in fine condition and promising well. In the southern half of the Territory all crops are reported to be looking well and growing nicely. Frost occurred slightly on some nights during the week, but not enough to do much damage.

Potatoes and corn are coming up in good shape, wheat is heading out in several districts, lucern is nearly ready to cut and alfalfa is within nearly 10 days of the cutting. The sugar beet fields are growing and the work of weeding and thinning is nearly finished. Fruit is looking well with indications of an average crop.

Remarks of Correspondents.

BOX ELDER, CACHE, RICH, WEBER, DAVIS, SALT LAKE, UTAH, SANPETE, SEVIER, BEAVER, IRON, WASHINGTON, GRAND, SAN JUAN, DAVIS, WEBER, TOOELE AND GARFIELD COUNTIES.

Box Elder—All kinds of grain and alfalfa doing exceedingly well.

Dewey—Favorable weather for growing crops; lucern ready for first and the first cutting promises to be over the average; fall wheat looks promising.

Honeyville—Favorable weather for the growth of crops in general. The late rains will do much good. Strawberries have failed to appear yet, but dewberries will now, after such a good rain.

Vest—Heavy harvests on Lucern fill a great deal of storage in this locality, and lodging heavy loads.

Box Elder—Weather cool and favorable. Grain, lucern and fruit doing well. Strawberries have begun to ripen.

Tremonton—Crops have suffered some for lack of moisture. Strong southerly winds night of 25th, bringing regular rain. Conditions better now.

Corinne—The weather has been favorable for growth of crops. Lucern and all other crops looking well.

Honeyville—Fine week has been gain for crops. The showers of rain on the 21st much good. Nothing growing nearly finished. Prospect for good good time in full bloom a week ago.

Cornville—We have had fine weather every night, which has checked the growth of vegetables. Two inches of snow on the 19th, which did much good, fruit, potatoes all planted, watching commences.

Lewiston—Cool growing weather the past week, scarcely none at the time; but every night except the 19th, we had rain.

Cache Junction—We have had fine nearly every night the past week. Grain looks fine. Monday, the 27th, rain and snow all day, ground covered with snow; very cold.

Newton—The light shower on the 25th put new life into the grain and other crops, and nearly everything looks in growing fine; lucern and peas are backward on account of cool nights; blossoms are falling from peach and apples; strawberries in some and potatoes look good; very, potatoes are coming up.

Portage—Grain, hay and all other crops have made good growth this week; potatoes mostly all planted; high wind with little rain on the 25th.

Clarkston—A cool week; no frost; prospects fair for a large fruit crop; fall wheat looks fine; hay, all kinds, looking well.

Cornish—The prospect is looking very brilliant for plenty of fruit and vegetables; the rain on the 25th was very much needed and has worked wonders in the fruit and vegetable line.

Lewiston—Fine weather for growing crops; fruit, potatoes and all other crops are growing nicely.

Paradise—Fine weather for growing crops; fruit, potatoes and all other crops are growing nicely.

Hyrum—Fine weather for growing crops; fruit, potatoes and all other crops are growing nicely.

Wellsville—Fine weather for growing crops; fruit, potatoes and all other crops are growing nicely.

Mendon—Fine weather for growing crops; fruit, potatoes and all other crops are growing nicely.

Richmond—Fine weather for growing crops; fruit, potatoes and all other crops are growing nicely.

Logan—Fine weather for growing crops; fruit, potatoes and all other crops are growing nicely.

Smithfield—Fine weather for growing crops; fruit, potatoes and all other crops are growing nicely.

Hyde Park—Fine weather for growing crops; fruit, potatoes and all other crops are growing nicely.

Millville—Fine weather for growing crops; fruit, potatoes and all other crops are growing nicely.
