SAVAGE CRUELTY.

Women and Children Murdered in Cold Blood By Soldiers.

A PLAN TO DEVASTATE CUBA.

In Order to Make Room for Families From the Mother Country.

NEW ORLEANS, April 3—The Picayune's special Havana letter, dated March 27th, gives this summary of events personally investigated by the writer, which is declared to be accurate in every respect.

In Holguin Dr. Vidal Salvatego made an operation on a poor old man, and when he was convalescent he was one night arrested and taken to the armory of Guards Civils, where they issued him all over the body and in spite of his cries they laughed and kept him on the outside of the house, where they assembled him to make a given to which they buried him after he died to in the in treatment he had received. On the plantation Marcadio of the Coast de Barrera, about Bayamo, Cuban by birth, belonging to the House of Don Antonio, came to death, after hacking him with a machete, a Spanish lieutenant ordered him as on his way to join his family. On the first night a band of 150 an area and the second his head.

In the city of Batabano the chief of police and other local authorities arrested three individuals and took them to the cemetery, where they were butchered and left dead on the ground, the murderers bringing the report to the city that the insurgents had killed the men.

In the village of San Felipe, artillery under command of Col. Tejeda and Adj. Lunar captured three individuals unknown and order them to pieces, since the daughter of the troops, who stated that they should not serve the insurgents any longer.

In Jaucay at Bibaro, Brig. Gen. Calvar Baiz was waited upon by seven Cuban insurgents who wished to surrender, as they were suffering from hollow feet. He summoned them and asked them if they would not be in jail. However, the following day they were taken out and shot.

On Colonel Marques de Correra will certainly not be found in nothing so cruel as this and yet he will order the other to shoot every one, no matter who they were. At a road the Women and children, the sick and the dying were butchered with shot. This has happened again at Legaro, San Jose, Lacadano and Jesus del Monte.

In Guines some 1 am to cause by reliable sources the number killed, including men women and children, was only seven persons.

Lieut. Corral y Pedroso of a cavalry battalion made the statement to the presence of various persons that he had struck down with the sword two negroes, and neither added that when he set fire to the dead he killed every Cuban he could get hold of, on the strongest charge, as every Cuban was an insurgent at heart, and that Gen. Weyler has given instructions to the commanders of the operating columns to dispose of as many insurgents by machetes as possible, and that he would stop any talk, and would send between the Gloria and the palace, to the insurgents must be put down as all bandits.

To further appreciate the condition of this country I mention the fact that I was in the city of Trinidad while there a few days ago. The Rev. Father Correra Concalegas said:

"I believe that all the Cubans possible should be killed off and over the country, and in that manner move from the families which would be brought over from Spain to Cuba. The peasant and natives in all are to blame. All clergyman without sending any sermons, and their principal confessions. Hence we would bring our families over from Spain and colonize the island, we could give them the confiscated property and they would make a good start in life. The Africans who send their children to the United States to be educated, should be taken hold of by the police and quietly placed where they could do the least harm, because the as Americans have regards colonies, which are the real cause of the present desire of the Cubans to revolt. The Yankees are the people who stir up Cuba with the Cubans and they are responsible for it.

While at Trinidad I paid a visit to an insurgent camp numbering 500 men of their leaders, I believe by one Lo Cura, and found that the wives and daughters of a great many of the insurgents were with them. These women are not camp women, but some of them were ladies, who in other days, were shining social lights of the cities of Matanzas, Cienfuegos, Cienfuegos, Santiago, Camaguey and Havana. The camps were orderly, well established and disciplined.

Cuba's Finances Falling Off.

NEW YORK, April 4—A special to the World from Havana says:

The total amount of sugar made in Cuba this year will not exceed 150,000 tons. The normal crop is about 1,000,000 tons. This enormous shortage means, it is estimated, a money loss of $50,000,000. The tobacco crop, which is greatly diminished. The other products of the island, rum, molasses and cedar, are practically not to be had.

Plum palaces and the numerous decorations of life cannot be seen in Cubanos palaces. There is no money. Havana is like a tomb. Business, what there is, has been suspended. No newspapers are printed.

Voluntary Bankruptcy Bill.

WASHINGTON, April 3.—The voluntary bankruptcy bill, as agreed upon by the committee, provides that any debtor owing $200 or more may make a voluntary assignment before any competent authority of all his property, except that exempt under the law, to the benefit of his creditors equally. He is required to file a full list of all his property, except of homestead, and of his creditors. It allows provers, corporations, debts due to the United States, to any state or territory, to servants of laborers for service performed within one year, and the federal bankruptcies on homesteads to the extent of $1,000. The debtor is authorized to file a petition in the United States district court four months after making the assignment, asking to be discharged from his debts, which petition is subject to the action of the court, after creditors get the protection of the debtor and the observance of the law.

An appeal provision is made to the effect that the debtor shall not be discharged unless the court may have been misled in some question of material or a public officer or as guardian of trustee, or work acting in any fiduciary manner. The law is to remain in force for two years only. The committee have made bankruptcy consist of the purpose of carrying the law into effect.

Russia and the Egyptian Question.

NEW YORK, April 3.—A special to the Herald from St. Petersburg says:

The Egyptian question has been lately discussed in the city of the Russian government, the Vedomosti says: "It was a wrong policy to raise money in Russia and giving it to the Khedive of Egypt, by making a conquest of the Soudan for here it with our own money, whereas, if it were carried out with Egyptian money the conquest must be all used for Egypt.

STEEL AND TIN PLATE.

Manufacturers Is Preventing Various Interpretations.

NEW YORK, April 4.—The Herald says:

Beside the steel manufacturers went into session yesterday they were waited upon by a committee from the tin plate manufacturers association, who wanted to know what changes would be made in their tariff. They persuaded that any advance in the price of steel would injuriously affect the tin plate industry. The tin plate committee consisted of John Jarvis, secretary of the association; O. W. Graham of Bridgeport, Conn.; Theodore Grier, President of the Newcastle tin plate company, and Warner Aumer of Niles, Ohio. They were informed that their request would be duly considered. The statement stated that it is not true that a trust is in contemplation.

"That would be a bar," said one, "to the enrollment of some manufacturing concerns in this organization. For example, the laws of the state of Illinois would make it illegal for the Illinois steel company to join us. This is not a trust. It is a protective association. Our object is not so much to advance prices as to keep them at a profitable rate. The steel industry, like every other, has been largely at the mercy of brokers, who have, for purely speculative purposes, persuaded firms to manufacture largely in excess of any needs. The brokers have taken the only person to receive benefit. This combination is for the purpose of limiting the production and output in some degree, always producing a sufficient supply according to the needs of the country."

"Then you will manufacture for home trade only."

"Practically, that is what I mean. As to any advance in price, that is entirely a not thing to say about it. Instead of producing at a loss, we propose to produce for a profit."

The Illinois Steel company of Chicago and the Schoenberger Steel & Tinplate of Pittsburg were represented at the conference.

From other sources it was learned that different of opinion as to the number to which the new agreement shall be carried into execution have developed already.

A Vanderbilt Engagement.

NEW YORK, April 4.—The World this morning says: The engagement of Gertrude Vanderbilt and Harry Payne Whitney is now admitted by all their friends and denied by none of the family. Rarely aware the intensity of an engagement. As Miss Vanderbilt is the daughter of Cornelius Vanderbilt, and Harry Payne Whitney is the prospective heir to somewhat of the Payne-Whitney millions, this event must be bound to attract considerable attention.

Spain Falling out More Shirt.

NEW YORK, April 4—A special to the Herald from Madrid says: Senor Romero Robledo, the Spanish minister of justice, announces that Spain is filling out with steps for the purpose of protecting the Cuban coast. He was extremely cautious during the interview and explained anything but neutrality towards the United States.

"No communication has been received from the Spanish minister at Washington," said he, "relating to the sending of war ships to Cuba by Spain."

Will Join Sat Logan Booth.

CHICAGO, April 3—Senator Faulkner, Democrat, who is announced of the southwest division of the Republican party, has with the exception of Congressman Hartshorn, the most prominent officer in the party in America, has resigned his commission and will join the party of Republican Henry Vincent. The majority of his staff officers go with him, and the move is considered to be the most severe which has been suffered by the Republican party since the recall of Commissioner and Mrs. Harrington Booth.

Drowned Through a Cloudburst.

CINCINNATI, O., April 3.—A special from Beaverton, Ky., says a cloudburst on Little Barren and Rolling creeks is reported, which did great damage to property, and it is thought probably a dozen people were drowned.

Section took from near Beaverton, and is one of the leaders of the south fork of the Kentucky river. It flows in some cities through canyons. Through these ranges the creek rises, when in a flood, with the speed of a race horse, and sticking the bottom lands below, spreads out with wonderful rapidity.

People little thought that the little creek would rise so rapidly or was capable of gathering such a volume of water. The cloudburst occurred up in the gorges, the water gathered in a moment, and the wall flood poured down in a solid wall, carrying ruin and destruction in its path.

Buffalo creek is even more crooked and follows deep little ravines. A great many logs were turned down with the tide, and these speedily knocked the cabins and outbuildings to pieces.

Money Order transactions.

WASHINGTON, April 3.—The money order transactions for throughout the United States during the last quarter of 1895 beat all previous records in volume. The net gain have not been doubled, and shows the receipts to have aggregated $10,755,971. Domestic money orders issued amounted to $10,000,000, a very large increase. The net revenue of $250,000 has been equaled only once.

SITUATION IN FRANCE.

The Senate Must Watch the Foreign Policy of the Government.

LONDON, April 4—The Daily News Paris correspondent says: A curious part of the situation is that while the Chamber adjourned until May 12th, the senate will meet on April 21st, in order to watch the foreign policy of the government, and to oversee the course it may follow regarding the municipal elections.

The great strength of the senate is due to the fact that it has 300 votes in the presidential election. Every notable politician expects to be president, both M. Bourgeois and the senate seem determined to fight out the quarrel, but some of the ministers are scared at the line taut in order to keep their portfolios they must plunge into a dispute, and they will try to patch matters up. Towards is further opposed against M. Hourgeois on account of his tour in the south of France with President Faure, where he was frequently hailed with cries of "down with the senate." Moreover, the 100 senators are frightened at M. Dupuis's course of an income tax.

Double Murder.

CLINTON, Ill., April 3—At 4:30 this afternoon this city was thrown into the wildest excitement by a double murder and attempted suicide. Eli Poor, formerly employed at the shops of the Illinois Central railroad, murdered his wife, formerly Miss Myrtle Green, and his mother-in-law, Mrs. McMullen, and then attempted suicide by throwing himself in front of an east bound freight train. Jealousy is given as his reason for committing the horrible crime.

Interesting to Army Officers.

WASHINGTON, April 3.—Army officers are displaying much interest in the bill before Congress to revive the grade of lieutenant-general and confer that rank upon Major-Gen. Sheridan. To try the house committee on military affairs decided to invite persons who are interested in the bill to present their views to the committee before it takes action toward making a report to the House.

Edison's New Invention.

NEW YORK, April 4—The World this morning says: Thomas Edison was in a very happy mood when seen by a reporter in his laboratory in West Orange last night. The great inventor had about completed another machine which he calls the "vitascope." It is an improvement of the kinetoscope, and Mr. Edison says he has no doubt that it will prove to be a success.

The "vitascope" throws on a screen by means of brilliant lights and powerful lenses the moving pictures figures of human beings and animals. Last night in the big laundry building adjacent to the laboratory the machine was rigged up, and a very satisfactory exhibition was made.

WANTS.

Twenty words or 3 times insertion under this heading, now for 50c, cash, for 1ac per word for 1ac per word, cash for 1ac per line. No ads taken for less than 10c. Words of more than 8 letters count proportionately. Advertiser and per cents.
